Egandale. 4 ft. Currant-red.....	.35	2.25	20.00
King Humbert. Fine bronze foliage. Orange-scarlet with bright red markings. 4 ft.....	1.00	8.00	75.00
Leonard Vaughan. 4½ ft. Bright scarlet.....	.35	2.25	20.00
Musaolia. The finest foliaged Canna, with enormous musa-like leaves, 3 by 5 ft., of a dark green bronze-tinged color.....	.35	2.25	20.00
Philadelphia. A bright glowing red. Height 5 ft.....	.75	4.00	30.00
Papa Nardy. Large, rich carmine-red, 4½ ft.....	.70	2.00	17.50
Pillar of Fire. 6 to 7 ft. high; flowers bright crimson-scarlet.....	.75	4.50	40.00
Robusta. Height 6 to 8 ft., with immense foliage.....	.30	1.75	15.00
Sheandoah. Large Salmon flowers. 6 ft.....	.30	1.75	15.00

Orchid-Flowering

Allemanzia. 4 to 5 ft. Scarlet and yellow. Green foliage.....	\$0.35	\$2.25	\$20.00
Austria. Pure canary-yellow; an orchid-flowering type. 5 ft.....	.30	1.75	15.00
Italia. 4½ ft. Green foliage Red bord-red yellow.....	.30	2.00	17.50
Kronus. Rich golden yellow, with patches of bright red, 4 ft.....	.30	1.75	15.00
Mrs. Kate Gray. 6 ft. Green foliage. Scarlet and yellow.....	.30	2.00	17.50
Pennsylvania. 5 ft. Green foliage. Deep scarlet.....	.35	2.25	20.00

CATALOGUE FREE.

We go through the block from 14th Street to 13th Street, but our address is still

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St., NEW YORK CITY.

PITTSBURG FLORISTS' AND GARDENERS' CLUB.

The meeting of March 1d was well attended. Pres. Burki announced the committees having in charge the necessary arrangements for the Carnation Convention of 1910, the chairman being as follows:

Finance, E. C. Reineman; exhibition, A. W. Smith, Jr.; reception, C. S. Crall; press, Wm. Falconer; decoration, E. J. F. Zieger.

Bulbous Plants and Flowers was the topic for the meeting, with a competitive display by the private gardeners.

In the forced bulbs class, the prize donated by W. C. Beckert, was won by Fred Wissenbach, gardener for W. L. Mellin. In the class for forced plants in flower other than bulbs, N. C. Madsen, gardener for R. H. Boggs received cultural certificate for three pans of very fine cyclamens. Other exhibitors were Frank Crook, gardener for J. H. Park, who showed pots of tulips, daffodils and hyacinths, plant of *Eranthemum pulchellum*, *Amaryllis* and *Clivia miniata*; North Side Park Conservatories, Jas. Moore, foreman, who showed two pots of *Chorozema varia*; E. C. Ludwig, with vase of mixed bulbous flowers; Phipps Conservatories, Jno. W. Jones, foreman, who showed a large table with tulips, hyacinths, daffodils and cinerarias. Mr. Jones also showed for the first time before the Club *Narcissus Elvira*, a cross between *Narcissus poeticus ornatus* and *Narcissus Tazetta*, the tender flowering narcissus of which Paper White is an example. The cross, *Elvira*, as shown, had a little smaller flower than *Ornatus*, an agreeable perfume, flowers in clusters like the tender type and will force like the tender type but is perfectly hardy out of doors. It attracted considerable attention, and it was thought it would make a place.

The South View Floral Co., per H. C. Buecheler, manager, showed a large vase of Rose Pink Enchantress, cut on Saturday and holding up well Tuesday night. At the preceding Club meeting much complaint was made of the non-keeping qualities of Rose Pink Enchantress, and the present exhibitor wished to show that when conditions were favorable it would keep all right. This brought out considerable discussion with the result that it seems that Rose Pink Enchantress if grown cool keeps well, but the quantity of flowers produced is lessened.

The retailers ascribe many complaints of the non-keeping qualities of carnations, to the universal use of natural gas in Pittsburg, and where there is imperfect combustion, as frequently happens, the fumes are very harmful to carnations.

Subject for next meeting Easter Plants and Flowers.

H. P. JOSLIN, Sec'y.

CHICAGO FLORISTS' CLUB.

This club held its regular monthly meeting on March 4th with a good attendance. The first business was the election of the following new members whose names were proposed at the last meeting:

Chas. Bemisch, George Armbrust, F. Merker, D. F. Simons, Chas. Zapfe, F. Krause, F. Haage, F. Ayers, Paul

TAUSENDSCHON

New Hardy Rambler; no limit to its sale.

Kubish, Emil Maerz, Chas. S. McConeley.

The following names were proposed for membership:

W. F. Scofield, Walter Adams, Geo. Piser, Michael Fink, Max Ringler, Michael Matcher, R. E. Kurowski, S. W. Baker, John Bell and P. Olsen.

Pres. Asmus added Ollie Beck to the committee on sports and pastimes.

The committee on revision of the by-laws were granted further time. The secretary called attention to the general desire which seemed to prevail among the members for the club to decide upon holding a flower show in the fall of 1909. The question was discussed at length by E. F. Winterson, W. N. Rudd, J. F. Klimmer and others after which the matter was referred to a committee consisting of E. F. Winterson, Walter Scott and P. J. Foley, who should consult with the board of directors of the Chicago Horticultural Society with the object of obtaining the support of that society. Immediate action will then be taken by the Board of Trustees of the club.

It was voted that a ladies' night be held during the month of March and an appropriation was made to cover the cost. The question of life membership came up for discussion with the result that the president will, in the near future, appoint a committee of three to take up the subject and make the proper recommendations. Chas. Morton, formerly of Chicago, now of California, was present and gave an interesting talk on the clubs in his section and the good work they were doing.

The sudden death of E. V. Hallock, of N. Y., was mentioned with regret and the secretary was instructed to telegraph an order for a floral wreath to be sent as a token of esteem from the Chicago Florists' Club. J. H. Pepper, F. F. Bently and J. C. Vaughan were appointed committee to draw up resolutions and send to the bereaved family.

Sec'y J. H. Pepper tendered his resignation with regret, and the club as reluctantly accepted it. Mr. Pepper stated that his recall to N. Y. city had neces-

sitated his action. Louis H. Winterson was elected recording secretary by acclamation to fill the vacancy and the thanks of the Club were tendered to Mr. Pepper for his faithful services.

DOBBS FERRY HORTICULTURAL ASSOCIATION.

A meeting of the Dobbs Ferry Horticultural Association was held in Odd Fellows' Hall, Feb. 27, at which some very creditable exhibits of roses, carnations, sweet peas, violets, etc., were displayed. The judges, Messrs. Knodel, Lindsay and Riley, awarded first prize to J. Holgerson, gardener to Mr. H. T. Seidenberg, and second to Robt. Boreham, gardener to McComb estate; for the best four species of cut flowers cultural certificates were awarded to Messrs. Keeling, Lee and Harnes; and to H. Kastberg, gardener to the Misses Masters, for two bunches of single and double violets. The prize for the next meeting will be for the best flowering plants.

JOHN BRUNGER, Cor. Sec.

CLUB AND SOCIETY NOTES.

The St. Louis Horticultural Society will hold their spring exhibition in the Odeon, March 22-25. O. G. Koening is secretary.

Prof. Sears of Massachusetts Agricultural College will lecture before the Houghton Horticultural Society, Lynn, Mass., on April 7, on "Fruit Growing from a Commercial Standpoint."

The annual convention and flower show of the National Association of Gardeners will be held in Scheffel Hall, 17th and 3rd Ave., New York City, March 17 and 18. The annual dinner takes place on the evening of March 17.

Jackson Dawson of the Arnold Arboretum was to deliver the last lecture in the Massachusetts Horticultural Society's course on March 6, but owing to his illness his paper was read by Secretary Rich. His theme was "Methods of propagating plants." An unusually large audience was in attendance.

THE ROYAL HORTICULTURAL SOCIETY OF ENGLAND.

A fine display was again made by the trade and fellows of the society, with the result that the hall in Vincent square was occupied in nearly every part. The crush of visitors was very great towards the close of the afternoon.

Orchid Novelties.

I will take certificated orchids first as representing the highest form of the novelties brought to the notice of the society and visitors. Messrs. Charlesworth & Co. showed *Odontioda Lutetia* derived from a crossing of a species of *Odontioda* with *Odontoglossum luteo-purpureum*. The blooms are 2-1.4 inches wide, the spikes 8 inches in length, on which were eight expanded blooms. It is a brilliant flower of scarlet color, with a mottling of golden yellow. Awards of merit were made to *Brasso-Cattleya Cooksoni*, obtained by crossing *Brasso-laela Gratorex* and *Cattleya aurea*, the latter greatly employed in making crosses in consequence of the unique influence of the color. The sepals of the hybrid are orange suffused with red; lip rosy purple suffused faintly with orange. This is the most striking feature of the bloom.

Mr. de B. Crawshaw, an amateur of *Odontoglossum* proclivities, showed *Trichopilia suavis*, a native of Costa Rica. The flowers are white, the interior of the throat yellow and having spotting of violet rose on the front and sides. The blooms have the fragrance of hawthorn. Mr. Crawshaw showed *Odontoglossum Cariniterum*, and was awarded a Botanical Certificate. It was a small flower, with a white lip and brown sepals and petals. *Dendrobium Melpomene*, a flower of primrose color, with a brownish purple blotch on the lip. This exhibitor had also *D. Leechianum* and various *Cypripediums*, including *C. Beekmanni*. He was awarded a Silver Banksian medal.

Mr. R. G. Thwaites received an award of merit for *Dendrobium Chesingtonensis* King Cup, a botanist's orchid.

An award of merit fell to Mr. H. A. Tracy for *Cycnoches Peruvianum*, the plant having five well developed racemes.

Sir Jeremiah Colman contributed to the show a number of so-called botanical orchids, and among them *Bulbophyllum comassum*, *Dendrobium Morfil*, and *D. Lady Colman* a variety of *D. nobile*, in which every part of the flower and its marking are much enlarged, especially the lip.

Lieut. Colonel Holford was awarded a first-class certificate for *Cattleya Trianae* Sir Trevor Lawrence, in which the sepals and petals are of an unusually bright tint and the lip of a rich shade of velvety purple.

M. Maurice Mertens, of Ghent, Belgium, showed a choice collection of *Odontoglossums*, for which he was the recipient of a Silver Banksian medal.

Miscellaneous.

Messrs. J. Veitch and Sons showed an old-fashioned hardwood plant in *Crowea angustifolia*, which found many admirers among the visitors. Messrs. W. Cutbush & Son showed the rare *Tulipa Kaufmannii*. The flowers

are as regards the upper half of white, the lower half yellow, and the outer petals are flamed with scarlet. The firm showed *Adonis Amurensis*; a hardy, light purple flowered *Azalea*, named *Yodogama* of Japanese origin, the blooms appearing pairwise and very abundant; and *Rhododendron Smithii*, a plant with yellow blossoms, and excellent for forcing.

Carnations.

American and English varieties of carnations formed an exhibition of themselves. Of the first named there were blooms of most of the standard varieties; of English origin, *Fortuna*, a yellow bloom inclined to buff. The bloom is fringed, and is 2 to 2 1-2 inches in diameter, and the calyx does not split. *Snowball* is a large white bloom, round and full of petals, very nearly smooth. Its best flowering season is early spring. It is not a true tree carnation, but a cross between that and a border variety.

FREDERICK MOORE.

A PROPOSED NEW ENGLAND FRUIT SHOW.

The First New England Conference, called by the Governors of the New England States, was held in Boston, Nov. 23, 24, 1908.

At this Conference Prof. John Craig of Cornell University delivered an address on "New England's Opportunity in Orchards," which was followed by suggestions and discussions by the delegates present. This subject matter was referred to the agricultural departments of the several New England States and a representative conference was held at the office of the Massachusetts State Board of Agriculture, Dec. 5th.

At this meeting it was resolved, That this conference recommend to the New England States that a New England Fruit Show, to be participated in by the States of New England, be held in October, 1909, at Boston, and that a representative of the State Board or Commissioner of Agriculture, and one representative from each State Horticultural or Pomological Society, and such others as they may appoint, form a committee for the organization and management of this project.

It was voted to recommend to each State that, where necessary, a special appropriation be made for the collection of State exhibits, and that a committee be appointed from each State in charge of the exhibit from that State. It was further voted that the matter of local arrangements be left to the Massachusetts State Board of Agriculture and the Massachusetts Horticultural Society and that they be requested to call a meeting of the above committee at the earliest possible date.

Such a meeting has been held and arrangements have been made for holding the New England Fruit Show at Horticultural Hall, Boston, on October 19-24, 1909.

State regulation of horticulture and sale of fruit is provided for in a bill which passed the Washington Senate at its session in Olympia on Feb. 26. In it the office of a horticultural commissioner is created and deputies in 13 districts will be appointed.

Obituary

J. Metz.

J. Metz, a retail florist at 182 East 116th St., New York, died on February 27, at an advanced age. A widow and five children survive him. Mr. Metz has been well and favorably known in the trade for many years. His daughter, who has been buyer for the store since he became unable to attend to it, is the recipient of general condolence and sympathy in the wholesale flower district.

J. B. O'Neil.

J. B. O'Neil, well known to the trade as "Bert" O'Neil, passed away at the home of his father in Elgin, Ill., on March 5. He had been ill for over a year and though he made a brave fight for life tuberculosis claimed him.

Mr. O'Neil was traveling salesman several years for Vaughan's Seed Store and was a young man of much business ability. He had very many friends among the trade who sincerely regret that his career has been cut off in this sad manner.

The funeral services of E. V. Hallock, the late President of the New York Florists' Club, whose sudden death was recorded in our last issue, were held at the family residence in Queens, N. Y., on Saturday, the 6th inst. The house was filled with sorrowing friends, of whom a very large number were members of the flower and seed trade and the New York Florists' Club. Among those from a considerable distance were Mr. and Mrs. J. C. Vaughan and M. Barker, of Chicago; W. Atlee Burpee, of Philadelphia, and W. J. Stewart, of Boston. The floral tributes were many and very beautiful. The interment was in Greenwood cemetery. Mr. Hallock was 58 years of age. Two sisters and two daughters survive him. His wife died a little more than two years ago.

Richard A. Malone, father of Mrs. Thos. P. Galvin of Boston, died at his home in Lancaster, Pa., on March 2, aged 74 years.

NEWS NOTES.

Brooklyn, N. Y.—Andrew Leis, a gardener, committed suicide on March 3 at Hotel Elberon.

Twenty-five thousand acres of land in the French and Italian Riviera are cultivated in the interest of a single French perfumery firm which uses up 2,400,000 pounds of rose leaves and 600,000 pounds of orange blossoms annually.

The third annual meeting of the New England Conference on Rural Progress was held in Boston on March 5, and it was decided to hold a fruit show on an extensive scale in Horticultural Hall on Oct. 10-24. Wilfrid Wheeler of Concord, Mass., is secretary of this enterprise.

The Amesbury and Salisbury Agricultural and Horticultural Society (Mass.) was addressed on March 5 by Miss Mary E. Cutler, of Holliston, on "Profitable Market Gardening."

THE REAL SHAMROCK.

Even at this late day there seems to be some confusion in the public mind as to the identity of the plant known as the "Shamrock."

So many authorities have written on the subject that one might think the matter would be settled by this time, once for all. But no. The merry discussion still goes on. With a sincere desire to add to the harmony of sound, we submit a few points that may help to clarify the situation.

The real shamrock is a three-leaved plant; all authorities are agreed on that. Shamroc and Shamrackh are the Arabic equivalents for trefoil, and the trefoil was held sacred in Iran and was emblematic of the Persian triad long before the days of St. Patrick. St. Patrick used the same idiom in illustrating "trinity in unity" to his flocks in Ireland, and it stands to reason that he did not waste any time about the species of three-leaved plant he picked up to point his moral. It may have been the wood sorrel (*Oxalis acetosella*) of Mr. Bichenor; or the white clover of Prof. Rennie and Dr. Withering (*Trifolium repens*); or the black medick (*Medicago lupulina*) of Loudon. In a way, all these authorities are right. The three leaves were there in all of them. So they were all "Shamrocks", of course, according to the Arabic meaning of the word.

It only remains to get at the identity of the plant known among the Celtic people as the "Irish Shamrock."

Mr. Croker points out that as far back as 1689 the Irish themselves considered sorrel and shamrock as entirely distinct. The Irish Hudibras printed in 1689 says:

"Springs, happy springs, adorned with sallats,
Which nature purposed for their pallats;
Shamrocks and waterress he shews,
Which was both meat and drink and clothes."

In the same work the Irish are represented as:

"Without a rag, trouses, or brogues,
Picking up sorrel and sham-rogues."

Another illuminating passage occurs in the "Hesperio-neso-graphia," one of the ancient classics of Irish literature:

"Besides all this, vast bundles came
Of sorrel, more than I can name,
And many sheaves I hear there was,
Of shamrocks and of water grass,
Which there for curious salads pass."

From all of which it would appear that the sorrel and the water cress were considered in a class by themselves by the Irish and that the shamrock was a different plant.

Irish botanists of note, including Keough, Threikeild, and others assert that all history, romance, sentiment and common sense unite in designating *Trifolium repens* as the true Irish Shamrock. The weight of evidence seems to be in their favor and the studied effort of late years to make it *Trifolium minus* seems to have very little ground to stand on. If one imports a piece of Irish sod with clover on it one has a right to sell it for pieces of eight; but outside of that—anyone with *Trifolium repens* can say with a clear conscience that he has the real "Irish Shamrock."

To my mind, the spirit of interna-

CARNATION LUCILLE.

On this page we give a "life-size" of *Carnation Lucille*, the beautiful novelty being sent out now by A. F. Longren and grown by Fritz Bahr at Highland Park, Ill. It is only a short ride on the Chicago & Milwaukee electric cars and it presents a sight worth going many times further to

see. Unlike *Prosperity*, which it somewhat resembles in color, *Lucille* is extremely productive and the stems are strong and very long. The plants are thickly covered with buds and blooms. *Lucille* is a beautiful flower, easy to grow and makes plenty of cuttings.

PHILADELPHIA NOTES.

Among our recent visitors: Ernest Weinhoeber, of the Weinhoeber Floral Co., and H. N. Bruns, Chicago; Mr. Embden, Mount Vernon, N. Y., representing Dutch, Belgian and German houses.

What is the proper pronunciation of *Leucothoe*? Most of our local florists call it "Lu-co-thea," others, more particular, say it should be "Lu-co-thoe-y." Which is right? This evergreen, introduced to the florist trade about twenty years ago, is now one of the most popular and useful subjects. *Catesbaei* is the species used. Virginia to Georgia. All up-to-date wholesale houses now carry it.

[Pronounced Lu-coth-o-e, accent on second syllable—E.D.]

The Elberon Horticultural Society held its regular meeting March 1st. It being exhibition night the following points were awarded: Peter Ewen, for Stock Queen Alexandra, 88 1-2; W. R. Seymour, callas, 78; W. R. Robertson, *Dendrobium*, 90; J. Logan, carnation Lady Bountiful, 81 2-3. At the next meeting, March 15, Wm. Turner will read a paper on some timely subject.

tional comity as exemplified in our celebration of St. Patrick's Day is a far more noteworthy and significant sign of the times than any technical controversy over botanical subtleties. Twenty-five years ago all those now of Irish birth and extraction took little note of St. Patrick's Day—now everybody celebrates that auspicious anniversary from London to Melbourne, New York to Tokyo. And the outward and visible sign is the shamrock. Every florist's store the world over has shamrocks to sell St. Patrick's Day.

"St. Patrick, they say, came up Bannry Ray,
Sitting cross-legged astride on the top of a whale;

And the spalpeens were scared,
And they saucer-eyed stared,
Saying: Arrah be gobbs, 'tis the man in the moon."

But the saint was the real thing,
all right, and we all take our hats off to his memory. G. C. W.

FIRE RECORD.

Rehoboth, Mass.—Manuel R. Serpa lost his greenhouse filled with vegetable plants, tools, etc., through a fire that started early on the morning of March 4. He had no insurance.

CULTURE OF THE GARDENIA.

Paper read by William Kleinheinz before the Florists' Club of Philadelphia, March 2, 1909.

The best time for propagation of gardenia is January and February. Select your cuttings from strong growing, healthy plants. I have experimented with propagating in sand in half peat and half sand, and also in a mixture of fine chopped sphagnum moss, peat and sand in equal parts, and have found the mixture the best, as I always get the strongest roots on cuttings propagated in this last mentioned composition.

It is very important to give sufficient heat; I should say 75 to 80 degrees on bottom and 70 to 75 degrees on top. Syringe two or three times a day, protect from the sun and never allow any draught to strike the cuttings. Under this treatment the cuttings will be rooted in from twenty to twenty-five days. Then the young plants must be potted into 2-inch pots in a mixture of half peat and half well-rotted compost. Never allow them to get dry, and protect from the sun for three or four days. Keep the house at a temperature of 68 to 72 degrees at night and 75 to 80 degrees in daytime, for about one week, until the young roots are coming through the soil, then commence to reduce the temperature at 65 to 68 degrees at night and 72 to 75 degrees during the daytime, and the young plants will soon begin to grow.

In from three to four weeks the plants will be ready for a shift into 3 or 3½-inch pots, and the shifting must be continued as often as necessary. Never allow the plants to get pot-bound.

All the buds must be removed to secure a good, healthy growth.

In the month of July the plants should be in 5 or 6-inch pots, and this is the time to plant on benches. Be sure to have good drainage in all cases, especially in the benches, as this is a very important item. The soil must be one part rough peat and two parts well rotted compost, with a little sand mixed under. I found it well to mix a little pulverized sheep manure with it.

The distance to plant is about 12 to 15 inches each way, but great care must be exercised in planting, to see that it is not done too deeply, as the young, fibrous roots always run on top and those are the ones to take care of. Plant solidly, but not too firmly, and leave a little drain around each plant, so that every one can be watered separately.

Two weeks after this the bench can be leveled off and packed some, but not too firm, to give the water always a chance to run through the soil quickly.

From September 15th on the critical time begins, as the plants will now show buds, and we all know that the most difficult part of flowering Gardenias in winter is to keep the buds. Great care must be exercised from now on until February 15th.

The falling off of buds is caused by irregular temperature, over-watering, running too dry, and by syringing with very cold water. Great care must be taken to avoid these mishaps. The night temperature should be 65 to 68 degrees, as nearly as possible, but

never below 65 degrees, and in daytime should be about ten degrees higher.

As soon as the fibrous roots show on the surface a light top dressing of half compost and half sheep manure must be applied, and repeated as often as necessary.

This is one treatment under which I have grown Gardenias with success, but I have tried another way also, with good results. I have been growing my plants up to 7-inch pots under glass all summer. August 1st I removed the glass and kept the plants in the open until September 15th. This ripened the wood and the flowering buds could be found at the end of each growth by that time. The plants have to be moved under the glass again when the nights get cooler. I have planted a bench, when the plants have been treated in this manner, by October 1st and cut a very fine crop of flowers from December 15th on.

This method gives anyone the chance to have Gardenias in succession if you have different houses to plant in rotation, as you can hold them in a cool house at about 52 to 55 degrees at night, until wanted for forcing. By planting in the bench, it is understood that I mean to give them the same treatment as in the first method.

The varieties grown are principally Veitchi or Florida and Floribunda. Gardenia Fortunei produces larger flowers, but it is more suitable for summer flowering.

As all plants have their enemies, so, also, has the Gardenia. The worst of all is the mealy-bug. Syringing with a mixture of lemon oil and Rose-leaf keeps them in check, but the best and surest remedy is prevention. This can be accomplished only by heavy syringing with a good force of water, in summertime I would say three times a day, and as the days get shorter reduce to one, or, in bright days, to two applications.

WASHINGTON INAUGURATION NOTES.

March 4th, with its sleet and snow, rain and thunder is, "manks be," a thing of the past. Not for years, as all the world already knows, has Washington been called upon to endure such a storm as swept over it the night of the third and day of the 4th, for more than twelve long hours. Business of every kind was virtually paralyzed. The Court of Honor in front of the White House which had been beautifully decorated by Gude Bros., presented a bedraggled and ragged appearance, and but for the substantial quality of the decorations it would have been entirely ruined.

The ball room, which was decorated by Small, was a marvel of beauty, one of the chief features being a sunken fountain in the center. Here hundreds of pot plants of specimen azaleas, genistas, bougainvilleas and baby ramblers were banded from the center up to the outer edge, which was finished by a row of ferns and palms. The entire building was hung with patriotic emblems, among which the colors of the newly made President's alma mater were conspicuous.

PREPARING FOR BEDDING PLANT TIME.

With the approach of long days and the warmth of sunshine, it is necessary that the cutting bench be prepared in readiness in order to have a supply of good plants when bedding-out time arrives.

Prepare your cutting bench and see that it is thoroughly cleaned and replaced with clean fresh sand to a depth of three or four inches, which is sufficient for most bedding plants.

Look over all stock plants that have been carried over from last fall and select cuttings from none but healthy plants; it may be well to state that this is the only means by which a large number of plants are kept true to character.

Althernanthera.—Insert cuttings and if a greater supply is needed than the number of cuttings at your command, divide up old plants and put them in the bench, so that root action is encouraged, after which they may be potted into two-inch pots, which will be sufficient to carry them along, or they may be planted in small flats.

Geraniums that have been carried over winter in two and two-and-one-half-inch pots must now be shifted and pinched. If short of any particular variety take off the tops and insert in cutting bench; these will make thrifty plants by the last of May.

Cuttings of the following plants are best started now, viz., Ageratum, Abutilon, Achyranthus, Stevia, Centaurea candidissima, Fuchsia, Petunia, Begonia maculata, E. Vesuvius and Er-fordii. The latter species begonia is frequently raised from seed, but from my experience I find that cuttings make the best plants and are more floriferous if young soft wood cuttings are taken.

In shading the cuttings it would be well to state that a little sun in the early morning and in the late afternoon will not hurt; in fact it is beneficial for it will dry up any moisture that may gather around the cuttings over night, or during the day while shaded, thus preventing damping off.

Cannas need urgent attention. Select the strongest and most promising eyes; put them into small flats; after root action is started pot off into four-inch pots, in which they can remain until bedding out time.

RICHARD J. HAYDEN.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The next meeting of the club will be held at Horticultural Hall on Tuesday evening, March 16, 1909, at 8 o'clock. Owing to the decease of Mr. E. V. Hallock of Queens, N. Y., who was to have been the lecturer of the evening, Mr. Robert Cameron of the Harvard Botanical Gardens has kindly volunteered to favor the club with a paper on "Perennial Plants." There will be, as usual, attractive exhibits and other interesting features.

The annual club banquet originally announced for March 31 has been postponed to April 14 at the solicitation of a number of members. Tickets may be had from the officers and members of executive committee, as well as at the coming meeting. It is planned to make the coming banquet the best the club has yet held.

W. N. CRAIG, Secretary.

ABOUT CYANIDE OF SODIUM.

Bustleton, Phila., Pa., Feb. 13, 1909.
Editor HORTICULTURE.
Dear Sir:—In a recent issue of HORTICULTURE, under the heading "Fumigating with Hydrocyanic Acid Gas," and signed Alfred J. Loveless, mention is made of "cyanide of sodium." My druggist wants me to ask you whether you did not make a mistake and mention "sodium" instead of potash. Any information on the subject will be thankfully received.

Yours truly,
JAMES T. BAKER.

Bustleton, Pa.

Editor of HORTICULTURE:

Dear Sir:—As there appears to be some doubt in the minds of many of your readers concerning my statement with reference to the use of cyanide of sodium for fumigating, I beg to state that I made no mistake in the name in my article which appeared in HORTICULTURE, and can assure any of your readers that no ill effect will follow its use, as recommended.

I have tried purified cyanide of potassium but failed to get the satisfactory results which always attend the use of cyanide of sodium, but feel perfectly safe in saying that if the foliage is quite dry on your plants, equally good results will follow the use of either kind, but the commercial grade is pure enough for the purpose. I have used the imported cyanide of sodium as supplied by A. T. Boddington and also some purchased at our local drug store, and both have been equally satisfactory.

ALFRED J. LOVELESS.

NEWS NOTES.

Geneva, Ill.—William Grote has made an extensive addition to his nursery.

Springfield, O.—The Leedle Floral Co. increased its capital stock from \$10,000 to \$20,000 on February 25.

Rockland, Me.—Mrs. E. C. Mather is planning to increase her office space and to add a bulb cellar at an early date.

Parma, Mich.—F. G. Hubert, at present raising vegetables under glass, intends to add plants in the near future.

Poughkeepsie, N. Y.—The bursting of the hot water boiler at the establishment of A. Relyea & Son on Feb.

THE STRAWBERRY BLIGHT, ITS CAUSE AND CURE.

How to more than double the yield of strawberries without increasing the cost of production. A great discovery. Price of book, 25¢. Write at once.

WM. C. TRIMBLE, Princeton, Ill.

26 caused some inconvenience, but within twelve hours a new boiler was installed and little damage to stock resulted.

Springfield, O.—Harry Reeser has recently bought several acres of land and it is stated will start again in the florist business.

Webb City, Mo.—Mrs. S. S. Brennenman has secured H. R. Fisher, a former employee, to manage the place since Mr. Brennenman's death.

Stoughton, Mass.—Prior to the distribution of seeds to the school children for their spring work, Robert Hutcheon, the local florist, gave an interesting talk on the subject.

Hastings, Neb.—W. M. Bonnewell and Earl Cooper, of Iowa, have purchased ten acres of land and will engage in a wholesale and retail nursery business.

State College, Wash.—One hundred students were in attendance at the first regular short course in horticulture under Prof. W. S. Thorner at the state college this spring.

Wenatchee, Wash.—Prof. Van Holderbeke, formerly State fruit inspector, states that the peach crop in this section has not been damaged by the high winds and a normal crop may be expected.

Albuquerque, N. Mex.—A company, to be known as the Albuquerque Floral Co., has been organized, four acres of land purchased and greenhouses will be at once erected. Mr. Brainard is the manager.

Watertown, Ill.—It is stated that J. J. Staack & Son, of Moline, have taken an option on thirteen acres of land here and will expend \$16,000 in establishing a nursery, but they are not yet ready to make definite statement regarding their plans.

Salt Lake City, Utah.—Under the auspices of the State Board of Horticulture a number of the fruit growers' associations met on Feb. 24 to form an organization to market their crops. J. H. Forristall told of the methods of the Southern California Fruit Exchange.

San Francisco, Cal.—The State Commission of Horticulture, quarantine division, has made its annual report and shows that at the city of San Francisco more than 50,000 packages of fruits, vegetables or trees brought into the state have been examined by them. They have found that the old plan of fumigating did not effect the purpose, so all infected shipments are now destroyed.

WIZARD BRAND MANURES

Dried, screened and packed in bags of 100 lbs. each.

PULVERIZED SHEEP MANURE

PURE — UNIFORM — RELIABLE
A strong and quick acting manure, highly recommended for carnations and chrysanthemums.

SHREDDED CATTLE MANURE

EASY TO HANDLE AND APPLY
Stronger and better in every way than rough manure. Lasts much longer on the benches. Unequalled for mulching and feeding roses, liquid manuring and mixing with bench and potting soil. Used by all the largest growers.

AMERICAN SEED TRADE ASSOCIATION.

Watson S. Woodruff, Orange, Conn., Pres.; J. C. Robinson, Waterloo, Neb., First Vice-Pres.; C. E. Kendell, Cleveland, O., Sec'y and Treas. Twenty-seventh annual convention June 22-24, 1909, at Clifton House, Niagara Falls, Ont.

WHOLESALE SEEDSMEN'S LEAGUE.

F. W. Bruggerhof, Pres.; Burnet Landreth, Sec'y.

THE ZIEGLER SALE.

F. L. Ziegler who has for several years conducted a seed and florist business at No. 18 Broadway, also during the summer months at 138 Bellevue avenue, Newport, R. I., recently became bankrupt and the contents of both stores were sold at public auction March 6th. The seeds were arranged in large lots and if good went very cheap, the peas and beans in many cases not averaging two cents per quart. The plants which were mostly Kentias, ferns and aspidistras, probably brought their value. Mr. Ziegler will be succeeded in the flower business at the Broadway store by C. Os-

car Schultze the well known Newport nurseryman and florist.

NOTES.

Falmouth, Mass.—The new office and seed store of H. V. Lawrence is nearly ready for occupancy.

Yankton, S. D.—The Gurney Seed Co. has found its present quarters over-crowded and has leased another building for a storage warehouse.

Columbus, O.—The Livingston Seed Co. lost about thirty-five hundred dollars' worth of stock in the West Spring street fire, in one of their storage rooms. It was fully insured.

GREENHOUSES BUILDING OR CONTEMPLATED.

Fremont, Neb.—C. H. Green, additions.

Marinette, Wis.—Geo. Vatter, one house.

Baltimore, Md.—Harry Ekas, house, 16x120.

Of Interest to Retail Florists

NOVELTY IN DECORATIONS.

As novelty in interior decorations depends somewhat upon the season of the year when made, no better time than the present may be chosen for varied and most beautiful displays.

From the first of February until the middle of April the great assortment of flowering fruit plants, together with lilac, hawthorn, heather, Rambler roses in variety and an endless chain of bulbous flowering material enables the florist to indulge his taste and ingenuity to the limit of his ability.

A Pretty Effect.

A pretty decoration made by one of New York's prominent florists last week is worthy of mention. The parlor mantel was banked with Whitmanii ferns, a specimen plant of winteria in bloom forming a centerpiece.

Tettonic, N. Y.-Shampton...

Japanese prunus in flower at either end completed a harmonious blending of softest tints. The sprawling fronds of the pale ferns in wild confusion with the flowering plant gave cause for general admiration.

Whitmanii ferns banked in the fireplace and studded with branches of white lilac added much to the beauty of the mantel display.

Suspended from the picture mouldings were sprays of wild smilax, the smaller and more delicate branches being used. Mirrors and doors were in like fashion ornamented.

Southern Smilax Preferable.

For festooning delicate satin and not infrequently expensively frescoed walls, wild smilax is by far safer and more delicate than the softer or greenhouse variety, the slightest pressure of which against a wall leaves a smudge and consequently unappealing, while the hardy vines are easily adjusted and rarely leave a mark.

The halls and dining room were decorated on practically the same lines as the parlor, plants of white

and lavender lilac appearing wherever
an opportunity presented itself.

Another Example.

A similar decoration was furnished
for a debutante's reception at the
residence of a prominent upper West
Ender, the only difference being the
substitution of Dorothy Perkins and
Apple Blossom Rambler rose plants
for the flowers used in the first-named
decoration.

The Ball Bouquet Returns.

It may be of interest to a few of
the many to learn of the resurrection
of the ball bouquet, a relic of many
years ago. The debutante of the hour
can be readily distinguished by her
bouquet. While somewhat larger and
less rigid than the affair worn by our
grandmothers on similar occasions in
the dim past, the ball of today is con-
sidered quite proper when suspended
by a ribbon bow from the arm of the
latest bud.

Flower Market Reports.

BOSTON Business is running along since Lent came in with a steadiness and vigor which is as gratifying as it is unexpected. There are some bad spots, notably the bulb flower sales and values, which emphasize the fact that if importing had not been circumscribed last year somebodies would have been in dire straits by this time. White carnations are in better demand than for many weeks, the call from suburban and country quarters being very lively, and the overstock which has been a fact heretofore, no longer exists. There are practically no high class Beauties in market, and the rose situation is, we think, generally satisfactory, everything finding a ready market. Violets are doing considerably better. Very few doubles are in sight but the singles are superb in quality and they are worn freely at all public occasions. Of course, the demand for shamrocks is at high water mark at present.

The second week in **BUFFALO** Lent passed quite satisfactorily, and while there is an abundance of material on most lines, yet the trade has been somewhat better than a week previous. It is noticed that roses have not been over-plentiful at this time, when in previous years crops were all on and prices very low, a condition which keeps out the carnation to a certain extent. The carnation seems to be becoming more plentiful each day, and while the wholesaler is trying to prevent the Bargain Sale signs, they accumulate much faster than is wished for. Such varieties as Beacon, Winsor, White Perfection and a few others are moved at satisfactory prices, while a good many ordinary ones are carried along awaiting an outlet. In the rose line, Killarney seems to lead in pink, though some excellent Bridesmaids are seen, also Bride, Richmond, Bonsilene, Perle and no over-supply. Beauties are scarce. Bulbous stock is on the quiet side, while peas, violets, mignonette and daisies are having a fair demand.

CHICAGO Trade is slowly reviving. With Ash Wednesday came an almost complete cessation in business and flowers accumulated and prices were down. A slight improvement has come each week and as we start on the last half of Lent trade seems in a fair way to regain its normal tone. Southern jonquils and lily of the valley are coming in to compete with home-grown and the sales are a little slow in consequence. Violets are also too plentiful. The double ones from the East and the home-grown single ones are alike selling very slowly. In some parts of the market sales are reported brisk enough but at buyers' prices. In carnations red are in fairly good demand and white brings a good price but pink, especially light pink, are found too plentiful in every part of the market. The ease with which Enchantress can be grown makes it a great favorite with the growers and without doubt too many were planted last year. Aristocrat seems to be gaining in favor and has now a fixed place as a good commercial flower.

It seems to be a little ahead of Lawson in some localities. As one man expressed it—and he has had years of experience with carnations—Aristocrat fits the fancy buyer and Lawson fits the medium buyer. Bridesmaids are rather ahead of Killarney in quality just now and more in demand, though some growers have a good crop of Killarneys at this time. There seem to be plenty of lilies and the different varieties furnish a never-ending topic of discussion.

Everybody reports a revival of business and general satisfaction reigns therefore. Stock is coming in better in quality as well as quantity and is cleaned up daily at good figures.

The market here in **PHILADELPHIA** was fairly good last week considering the inclement weather. The Washington celebration caused some extra demand, which helped out the local situation a little. Stocks came in generally ahead of demand—especially in roses and bulbous material. American Beauty roses are still scarce but showing signs of becoming more plentiful within the next ten days. There was a slight let-up in carnation receipts as compared with latter part of the week previous. The quality continues excellent. Violets are plentiful and good, the local crop being now exceptionally fine, and preferred for freshness and fragrance. Authorities are at variance as to the cattleya situation. Scarce in spots but on the whole we believe quite equal to demand. There is also a conflict of opinion as to the lily of the valley market. After digesting the various

reports from different wholesale centers, it would appear that that item was in fairly good demand, and not quite so plentiful. Sweet peas were never better, the pinks and whites being par excellence. There are too many tulips, frezias, and daffodils. Myosotis, marguerites, alyssum, Easter lilies, callas, and various other minor items drag along in the rear of the situation with more or less satisfaction to their sponsors and users. Hope to have a more rosy report for next week. Looks favorable at this writing.

This market has been very good the past week. Prices were a little lower than the week previous. White roses, like Brides are somewhat scarce. Paper Whites are off the market. Other cut flowers are almost more than plentiful, owing to the fine clear weather we have been having of late.

INCORPORATED.

Pittsburg, Pa.—United States Floral Co.; A. T. Lorch, De Haven; H. F. Borch, Pittsburg; G. F. Hofmeister, Carrick; capital, \$325,000.

Rochester, N. Y.—The Phillips Nursery Co.; H. B. Phillips, J. C. Johns, H. F. Gandy; capital, \$5,000.

Charles Morrison, who claims residence in Boston, has been arrested in Bangor, Me., for obtaining goods under false pretences. He was hired by H. H. Gurney & Co. of Auburn, nurserymen, on commission, and his numerous orders led the firm to investigate.

NEW YORK FLOWER MARKET.

The market has been depressed all through the past week. Buying is very light and the speculative and street trade element are responsible for what little activity is in evidence in the wholesale districts—activity in hammering down values and negotiating for job lots by all the shrewd manoeuvres in which this class of buyers is so trained. The quality of the material offered is generally excellent. There are some weak spots, however, notably the carnations from some growers, which are up-to-mark as to stem but disreputable as to flower; lily of the valley, of which there is more than the usual proportion of low-down grade, and lilies of which there is an unprecedented aggregation of shapes and sizes and degrees of degeneracy in sight. It might also be noted that some stocks of Killarney rose show color weakness as the season advances. On the other hand, Bridesmaid has come to the front in a quality of color and form not seen heretofore this season. Many very poor gardenias are being received. Bulbous flowers are abundant, as usual at this season, and of widely varying degrees of quality, with values down to the lowest notch. Of tulips there is a preponderance of short-petaled, more or less wrinkled flowers. Daffodils are good in all varieties, but their sale is further handicapped by

the presence of the Southern-grown out-door single trumpets which are being shipped here by cratesfull. Cattleyas are excellent and in supply sufficient for all demands. The richest thing in sight is *Acacia pubescens*. The quality of this has never been better, sprays from three to five feet long being the rule. Pussy willows and English wall flowers are in every window.

NEWS NOTES.

Reports from Baltimore indicate that during the severe storm on March 3d and 4th few trees in the parks were blown down, but the greatest injury was the breaking of branches.

Prof. L. R. Taft of the State Agricultural College, Michigan, in a recent address before the State Horticultural Society, stated that the poor crop of apples in the state the past year was due to lack of spraying the trees. From figures he had obtained he found that the average cost of spraying was about 40 cents per tree, and the average profit \$6.00 per tree.

The U. S. Civil Service Commission announces two openings, one for a laboratory assistant in the Bureau of Plant Industry, Department of Agriculture; the other for assistant curator, Division of Plants, National Museum, at a salary of \$50 and \$100 per month respectively. Further information can be obtained by requesting Circulars 162 and 163 from the Commission at Washington. The examination takes place on March 30.

THE QUESTION OF STRENGTH

IT is conceded that the strongest and most curable structure known is "THE IRON FRAME." And when you have all the **Modern** features combined in this type of construction you have "**The Ideal Greenhouse**."

The picture shows the beautiful symmetry of my "**Curved Iceless Eave**" — no heavy antiquated shading members. And I also make a specialty of having my work harmonize with surrounding conditions. **Note** how the mason work on greenhouse conforms to that on adjacent stable.

The advice of "**The Practical Greenhouse Builder**" is at your disposal for the asking.

PALM HOUSES

Square ones like this, with curvilinear roof and dome are decidedly ornamental and give an attractiveness to the entire range; but a straight gable, curvilinear house is less expensive.

Of less cost still, is one with the straight roof and high sides, but you don't get quite as much head room. Send for illustrated circular, it shows our several kinds.

Hitchings & Company
1170 Broadway New York

Curvilinear Points

The curvilinear house is always attractive, always practical. It makes a splendid all around house, because of its great lightness, and that the curved roof gives extra head room so longer stemmed plants can be grown. For grape vines they allow greater length vines, which is certainly an advantage. The sectional iron frame, however, makes the best curvilinear house. There are several reasons why now is one of the best times to build. Get in touch with us.

BOSTON: 819 Tremont Building. PHILADELPHIA: 1215 Filbert St.

CONSIDERING COSTS

There are two ways of practicing economy: One way — consider prices only. The other consider **results**. It is results that has gained for the U-Bar its reputation.

It is because of these unequalled results that we are asking you to build U-Bar houses. Send for catalog.

**NEW
ROSE****WHITE KILLARNEY****We Know You Will Want to Buy White Killarney**

Every live, progressive, up-to-date grower who has seen it is buying it; but when you buy White Killarney, be sure you get the right White Killarney (the Waban variety). When you buy from us you get the variety that has been exhibited and certificated, and the one that has attracted such favorable mention.

If you are in the vicinity of New York, we should be glad to have you call and see White Killarney growing at our Scarborough range, and you will say at a glance—as everyone has who has seen it growing—that it is by far the best white rose that has ever been placed on the market.

It is not only a good winter-flowering rose, but is good the entire year, and it is a splendid shipper. Read the following letter received from Mr. Willis N. Rudd, Secretary of the Society of American Florists, dated January 18th, in which he writes as follows:

"Dear Mr. Pierson:—I cannot refrain from writing you and expressing my admiration for the White Killarney as shown at Chicago on Thursday. It is an exquisitely beautiful thing and attracted much attention. I took half the blooms home with me, and they were finer on Saturday than they were at the show. The record is that these blooms were shipped from Tarrytown, staged and exhibited during the afternoon. They were then carefully wrapped up in a box, and remained in that box until one o'clock Friday morning, at which time I reached home; improved in quality up to Saturday, and were in fairly presentable condition on Sunday.

"In addition to being the most beautiful white rose of its class which I have seen, this demonstrates its splendid keeping and shipping qualities.

W. N. RUDD."

We were awarded Silver Cup at National Flower Show, Chicago, for best new rose with White Killarney; also Silver Medal Horticultural Society of New York.

Strong plants. 2 1/4 inch pots, own roots, now ready for delivery. \$30.00 per 100; 250 for \$70.00; 500 for \$125.00; 1000 for \$250.00. Grafted plants, ready April 1st, \$35.00 per 100; 250 for \$82.50; 500 for \$150.00; 1,000 for \$300.00.

CHRYSANTHEMUM BELFAST

BELFAST

The New Christmas-Flowering
Chrysanthemum

Of the largest size light pink shading to cream. Can be brought into bloom from Thanksgiving to Easter but is at its best about Christmas. Easily grown and claimed to be for the commercial grower the most profitable variety ever introduced. It comes into bloom after every other variety is through, is a great keeper and can be held on the plants for four weeks. Last Spring the originator cut the last blooms April 11. 2½ inch pots 6c., \$5 per doz.; rooted cuttings \$3.50 per doz., \$18 per 100.

Caronation Bay State

Winner of the Gold Medal at Indianapolis. From 2½ inch pots, \$3 per doz. Rooted cuttings of all other desirable varieties, old and new, at lowest prices.

Tuberose, Caladiums, Gloxinias, Tuberous rooted Begonias, Florists' Flower Seeds and Sundries.

Send for Wholesale Price List.

The Storrs & Harrison Co., Painesville, Ohio

Cattleya Luddemanniana alba

Cattleya Luddemanniana is a Venezuelan species not generally cultivated though it has flowers of large size and great beauty; in fact flowers 8 inches across are not uncommon with this species. It was formerly known under the name of *C. speciosissima* and is still catalogued under that name by some growers but the name given above is the accepted one of orchid authorities. Like almost all *Cattleyas* it has its albino forms but these are exceedingly rare so that the illustration of one that has just flowered at Florham Farms should be of more than ordinary interest.

It is the first white form of this species I have ever seen whilst other growers having had a life experience in orchids tell me they have never seen one. Are there any records of a white one having flowered before in this country? I know there are several in Europe but European conditions are not favorable to frequent flowering of this species. The plant in question came to me several years ago and I was informed that it was a white one but the tiny piece consisted of three bulbs not one of them as large as a hickory nut so it has been a matter of years growing it up to prove that it is what it was represented to be. The flowers are of large size, and good substance especially having regard to the small size of the plant which is growing in a five-inch pan.

Although as before said *C. Luddemanniana* is not largely grown it deserves more attention from American growers for it can be made to flower freely and finely in this country with proper treatment. It can stand more heat and more exposure; in fact these are the two essential requisites as compared with the usual treatment accorded to *Cattleyas*.

Some years ago Mr. Geo. Field of Washington grew this *Cattleya* successfully and it flowered abundantly and, if memory serves me rightly, when I saw them they were growing on the back bench of a house devoted to Meteor roses and during the hottest part of the year a piece of cheese cloth was hung down in front of them

to break the bright sun rays as there was no shade on the roof of the house.

At Florham Farms we have had good success also with this *Cattleya* and although it falls short in number of flowers produced as compared with other species the flowers are always of large size and commanding beauty. Another peculiarity about it, too, is its prolonged season of flowering. Our experience would indicate its season of flowering to be from February to April because then we have most flowers from it, but our records show we have cut flowers of it every month in the year except June. I recall cutting some very fine flowers once in December that a prominent New York florist said made *C. Trianae* look like "thirty cents." Another point in its favor is that it has a robust constitution, keeping strong and healthy, and living longer under cultivation than most *Cattleyas* do.

Arthur Herrington

The Florists' Pentstemon

The interesting note by Alfred J. Loveless on these beautiful, half-hardy perennials in *HORTICULTURE* for March 6th should assist in promoting an extended interest in their cultivation and it may be safely assumed that their many merits will be fully appreciated when these handsome plants become better known.

In many of the best estates on the other side of the "pond" *Pentstemons* now form one of the principal attractions of the flower garden and the many fine varieties now on the market are, as Mr. Loveless truly says, the result of much careful hybridizing and selection.

The finest varieties in cultivation are, undoubtedly, those raised by Mr. E. Beckett of the Aldenham Gardens, Elstree, England, who has for many years endeavored to produce large flowers combined with freeness and good constitutions. The result is that some sorts now have flowers three inches across individually. I see that this excellent strain has been introduced to America, and it is to be hoped the *Pentstemon* in its improved state will become as popular here as elsewhere.

I had several years' experience in growing and selecting the best varieties and am quite sure that no finer plants exist for the embellishment of the flower garden during the summer and early fall months, and very few plants require such a small amount of care to bring them to perfection. If one grows them in groups or beds of separate varieties some wonderful effects can be produced, but to do this it is necessary to take cuttings in the fall and plant out in April when frosts have disappeared.

It is very interesting to grow a batch of seedlings and select one's own varieties as there is always sure to be great diversity of color and these will also prolong the display well into the fall as they do not commence to blossom so early as the cuttings. The *Florists' Pentstemon* is well suited to the climatic conditions of this country and in some parts would prove of perennial duration but the most satisfactory results are always obtained by treating them as annuals.

European Horticulture

COMING EXHIBITIONS THIS YEAR IN HOLLAND

At Hillegom, Holland, an exhibition of flowering bulbs will be held in April and May in the open air. For this purpose, a large beautifully situated terrain, planted by the local bulb growers will be planted with 200,000 flowering bulbs. Last year, Sassenheim, near Hillegom, held a similar exhibition. This year's exhibition will be opened on April 8 and will be a much more important one.

A NEW VARIETY OF GERBERA JAMESONI

We read of a new variety of this highly decorative plant—a native of South Africa—that has been raised by Mr. R. Adnet of Antibes, in Southern France. It is surprising to note how numerous are the varieties of this brilliant South African species, and how the changes in colors vary from orange-scarlet, yellow and white, according to the desire of the hybridist, and flowers become larger and longer in the stalk. The largest blooms of Adnet's raising have a diameter of 13 cm., against 6 or 7 cm., with stalks of 20-25 cm., less than ten years ago while the stalks of the new Adnet's hybrids measure 50-60 cm. and they are firmer and thicker. Today there is a greater variety of colors than could have been imagined possible a few years ago. These colors range from pale sulphur yellow and creamy white to full *Doronicum* yellow; from a tender rosy peach to salmon pink and scarlet tints, to the deepest clear carmine; out of fifty varieties scarcely two were exactly alike in their tints. The form of the blooms is very varied. It has yet to be proved that blooms are so good for carriage to distant places; but should they well withstand the rough handling inseparable from long journeys by road and rail, we shall have flowers that may rank with carnations and roses, and the demand for seeds of *Gerbera Jamesoni* hybrids will be a lively one.

HEMIPHAPHIS COLORATA

This is a recommendable decorative plant, more particularly for the amateur and private gardener. It has a bushy habit, a vigorous growth and leaves of a leathery texture, serrated at the edges. The plant requires the temperature of the warm greenhouse, and is suitable for the flower stand, and a striking subject for winter gardens and glasshouse decoration. The best kind of soil in which to grow this plant should be a light one. Mr. Heydt states, in "Die Gartenwelt," No. XIII, that he grows his plant in leaf mould, decayed cow dung, and sand intermixed. Liquid manure may be afforded with good effect when in full growth. The older plants are not at all tender, but on the contrary the young ones should be kept close and moist, and protected from strong sunshine. Propagation by means of cuttings should be undertaken in the spring, employing a temperature of about 70 per cent. Fahr. in the bed. Without bottom heat, the production of roots is very slow.

SINGLE FLOWERED CHRYSANTHEMUMS

As is well known, the nature of the soil and climatic conditions exert great influences on the growth of plants and the chrysanthemum is no exception. A cultivator residing at Frankfurt on the Oder purchased forty varieties of single-flowered chrysanthemums in 1906 and 1907, of which some have fully grown up to expectations, deserving of the widest cultivation. And of these the names are given in "Die Gartenwelt," No. IX, of the present year. Cannell's Yellow is in growth most excellent. In form and color of the bloom it resembles a large yellow *Marguerite*. The color is a pure dark yellow, which does not pale with age—not even in pass-

ing out of bloom, and its floriferousness leaves nothing to be desired. It makes a good bush and standard. A fellow plant to this is *Freedom* which in growth is more vigorous, but the bloom is smaller of a pure white, and very free. It is equally good as a bush and standard. Very acceptable in flowering, pose, and form is Mrs. F. J. Howarth, of a terracotta tint. It is an excellent flower for filling vases, and makes a pleasing plant in bush form. One of the darkest tint and a late bloomer is *King of Siam*, a dwarf habit, and bright red. The following three varieties are similar in the form and color of their blooms and only differ in the height to which they grow and their date of flowering: Mrs. Selby, Flossy and Ladysmith. They are of a bright rose tint, and possess healthy foliage and growth. Mrs. J. Ferguson in habit of growth and shape of the flower is similar to the old *Marie Anderson*. The tint is a more decided pink, and the plant is earlier in flowering. As a flower for cutting *White Swan* may be recommended. The flower with its long petals has a good effect. The strong growing *Sylvia* should not be omitted; it being a variety which forms a magnificent globular bush, thickly set with blooms, the color of which is like that of *Ada Owen*, but it is larger. For these single flowered chrysanthemums pot culture is to be preferred.

JASMINUM PRIMULINUM

This Chinese species is a bright, interesting plant now in flower in the Kew Botanic Garden. The long pendulous shoots are thickly furnished with semi-double yellow flowers. The best way to grow this plant is to place it in the open, in full sunshine in the summer-time, and every encouragement afforded to secure well matured growth. The plant may be gently forced in a minimum warmth of 40 degrees Fahr till January. More warmth develops wood-growth instead of flowers. A plant new to gardens is *Erlangea tomentosa* belonging to *Compositae*. It is a native of British East Africa. The flowers are like those of a *Eupatorium* and are of a heliotrope color. The plants are about three feet high, and the leaves are of a silvery white color. *Peristrophe speciosa* is a good cool greenhouse plant, freely producing carmine purple flowers for a period of three months.

PRIMULA OBCONICA GRANDIFLORA IN THE OPEN AIR

Usually the gardener, after flowering his plants of *Primula obconica*, throws them on the rubbish heap. But when it becomes known that these easily grown plants, which flower so abundantly during the winter months can be made to flower with equal freedom in the summer, the gardener will do so no longer. There can be found in every garden much shaded spots, or ground full of the roots of trees and shrubs, in which summer flowering plants of the most modest requirements in regard to soil and position will not succeed. For such parts of a garden, as likewise edging for groups of shrubs, and under thinly planted shrubs and trees and bare parts of a rockery, *Primula* can be put to a useful purpose. The plants should be set out in the spring, at the same time placing a small quantity of fresh soil, containing peat and light turfy loam, or even spent potting-bench soil, failing those. After planting, the plants should then be heavily watered, and occasionally as may be required during dry, hot weather. Sometimes these out-of-doors plants produce a number of large developed specimens, which, if taken up with care and potted, afford in the following winter a quantity of long stalked corymbs, excellent material for cutting.

Friedrich Meyer

Some Novelties of Double and Semi-Double Campanula

The bellflower or *Campanula* is a plant genus very rich in forms and widely different in its varieties. One of the oldest and best known types is the peach-leaved: *Campanula persicifolia*. Clear colors—pure white and various distinct shades of blue—and a marked profusion of well-shaped flowers borne on long wiry stems, are attributes which strongly appeal to the eye of every garden owner. Their long-lasting quality as cut flowers makes them still more worth having, especially since this perennial has proven extraordinarily hardy and under cover well survives the long frigid winters of our northern States. Plant species of high floral value merit the interest of the hybridizer. That the latter's skill and labor was not wasted when turning to the peach-leaved bellflowers, the present begins to show.

The growth of the latest single varieties, when compared with their old parents appears more robust and taller. The individual bells of the grandifloras are decidedly larger in size and, in the most cases, they show improvements in shape and color.

The advance in the double and semi-double class is by no means less remarkable. As the principal part of the work on their further developments has been carried on in Europe, few of the recent novelties are as yet found in American trade catalogues. Most of them are, however, on the trial grounds of our leading hardy herbaceous plant firms and will no doubt be sooner or later disseminated.

Among the latest introductions *Campanula persicifolia* "Capri," in clear bright blue, and "Vineta," in color a few shades darker, both semi-double, are reported to combine free flowering quality with enormous size of the singular bells. Coupe d'azur, semi-double, of lower growth, and the medium high navy blue variety "Cloche bleue," are of French origin. Wilhelm Pfitzer of Stuttgart in Germany offers, among his novelties *Campanula persicifolia* Pfitzeri, a large flowering, cup-shaped, double or semi-double species, said to be Moerheimii in clear bright blue. Mr. Pfitzer rarely ever exaggerates and if his latest achievement is what is said of it, it is sure to be a winner. *Campanula persicifolia* "Humosa," one of the tallest growing semi-double, blue bellflowers, has been introduced to the American trade during the last year.

In double white, *Campanula persicifolia* Moerheimii stands unsurpassed in beauty and floral productions. The sight of a clump of from fifty to one hundred plants grouped together for mass effect is certainly dazzling. It is the immaculate white of the lily and the alabaster gloss of the alba plena camellia that greets us. This explains the rapidly growing popularity, both in our country and in Europe, of *Campanula* Moerheimii.

Richard Roth

Northeast Harbor, Me.

Lilium Formosa

[This communication was intended for last week's issue and editorial reference was made therein concerning it, but it was unavoidably crowded out at the time. Ed.]

Among the recent introductions among the trade is the new Japan lily, *Formosa*. When disseminated in fall of 1907 the supply was so short that one box was shipped to each city, results of which were watched with the keenest interest by all our local growers. A box of

these bulbs was received in Rochester about September 10, 1907. The bulbs were potted and stored in cool place. Not having bench room until after Christmas, they were left and when benched (Jan. 2, 1908) they had a mass of roots, and gave good promise, which was fully verified by results. The plants were grown on, staked as necessary, and when in bloom March 10th, on good strong stems three to four feet long, they averaged five flowers to a plant, and only four bulbs of the entire box were discarded. The remainder were a revelation to all who saw them. Clean, strong and thrifty, good flower, elegant keeper, and congratulations were heard on all sides because at last something had come that was worth having, and on the success of that box in Rochester many orders were given to the firm handling it.

Last fall when the shipments of *Formosa* began to arrive the writer was present at the unpacking of several cases in different establishments. Some were packed in clay, others with just sphagnum moss, and these were badly shrivelled, but all were potted. Results are now apparent, and am sorry to say that *Formosa* lily is far from its standard set by the sample box of year previous. Grown by same grower, under same conditions, there has been a decided falling off in quality both as to blooms and foliage. These conditions prevail wherever *Formosa* is grown here. The growth is very uneven, tall plants, short plants, and apparently *Formosa* is a composite of ten or twelve varieties, for, in looking over the growth of several different shipments, there can be seen wide leaves, narrow leaves, short and long leaves, red stem, white stem, green stem, long jointed, short jointed, and, in fact, apparently all varieties, and hard to tell which is *Formosa*. Perhaps the introducers of this bulb can inform us. The buds this year are not so plentiful, showing a decided falling off, averaging two or three buds each plant, a good many having only one. With a lily so full of promise such as the sample box was, the writer fails to understand how it has taken such a sudden drop in quality. Grown side by side with other lilies, it is certainly not worth the room, and it is to be sincerely hoped that some improvement can be made.

It is a good lily, early, and responds to treatment readily, and I believe could be had in bloom for Christmas if bulbs could be received during latter part of August, without danger of being dug before ripe.

Aubrose H. Cocker

Rochester, N. Y.

Monkshood

There are a number of the various species of *Aconitum* that do well in ordinary garden soil, napellus, the true monkshood, being one of the best. It is also one of the earliest flowering and does well either in sun or shade—although the flowers will last longer if partially protected from hot sun. Responds readily to high cultivation. As seen at Dreer's during one of our last year's visits it is one of the most charming of the long list of hardy perennials and should be in every border although not too near the vegetables nor where children are likely to be playing, on account of the poisonous character of its roots.

Owning
a home

Well wishers of horticulture will be pleased to read the notes from Glen Cove, N. Y., stating that the project for building a horticultural hall as a home for the Horticultural Society there is being carried forward with every prospect of success. No better investment can be made by the supporters of a horticultural organization anywhere, be it Society or Florists' Club. The advantages are so manifest that it is surprising that so few communities, comparatively, are provided with a horticultural hall. We hope to see the Glen Cove project come to a successful realization and then to see many more places stirred into action by the good example there set.

"Let us
reason together"

The address by C. A. Dards, setting forth the aims and purposes of the recently organized Retail Florists' Protective Association of New York,

which appears in this issue of HORTICULTURE, reads well and we think that all departments of the florist business will be disposed to give a cordial hearing to the views on their mutual relationship so tactfully set forth by Mr. Dards. There is wisdom in the suggestion that growers and owners of large producing establishments should meet, more than has been the custom hitherto, and become better acquainted with the men who are engaged in the distribution of their product. We have, in these columns and elsewhere repeatedly advised such a course as conducive to a better understanding between those engaged in the trade, and tending towards a higher mercantile position for commercial floriculture, particularly in the large cities. There are so many ways in which the florists' business may be elevated and dignified through the earnest and unprejudiced co-operation of the men who are leaders in its various departments that the present agitation, if kept within conservative and conciliatory bounds, cannot fail to have a healthy influence. That it is the intention to so limit it, is very evident from the tone of Mr. Dards' communication.

A suggestion
for the rose hybridizer

As everybody knows, many thousands of seedling roses and carnations may be raised before one is produced which is an evident improvement on existing varieties. As time passes and the required standard of quality is raised higher and higher, the proportion of discards keeps on increasing until, as Peter Fisher stated in his address at Amherst the other day, hundreds of varieties are now rejected which would have been considered wonders a few years ago and three or four out of 3,500 are all that are worth saving, even in the product of the most expert and skillful hybridizer. In the case of the carnation the question of selection, in the hands of a man who knows the cardinal points, is a simple matter, as the carnation has only one sphere of usefulness and if a seedling falls short of any one of the requirements there is no alternative but to throw it away. The situation as regards the rose is, however, quite different and it has seemed to us a pity that so many thousands of seedling roses are sent to the rubbish heap every year simply because they do not come up to the standard required in a rose for cut flower purposes under glass and without being given any test as to their possible adaptation for outdoor garden planting. We are inclined to the belief that the possibilities in this direction are not fully taken into consideration by our rose hybridizers so intently engrossed are they in the definite purpose to develop forcing varieties of advanced type. Having in mind the vast room for improvement in the line of garden roses who can say that fortunes have not been thus thrown away?

RETAIL FLORISTS' PROTECTIVE ASSOCIATION OF NEW YORK.

Editor HORTICULTURE:

Because of the many rumors current in the florist trade in this vicinity respecting the aims and purposes of the Retail Florists' Protective Association of New York recently formed, I beg of you the courtesy of a little space in your valuable paper in order to explain some of the main objects of this Association.

For a long time retail florists of New York City have felt that they were in need of cohesion and co-operation. Adverse and predatory conditions, both from within and without the trade, accentuated this need. Retail florists, conducting a business of large volume, paying annually hundreds of thousands of dollars in rents and equally large amounts in wages, are perhaps the only commercial men who have no trade organization to elevate their business, to correct abuses, and to suggest from time to time the means for amelioration. It was these circumstances which called forth the Retail Florists' Protective Association, and which will dictate its policy.

There has been no established system of credit, either between the producer and the retailer, or between the retailer and the customer. It is remarkable that a business of such magnitude should be in this anomalous condition; and the Association purposes, if it be possible by fair and legitimate means, to find a way mutually satisfactory that will conduce to more rational business methods.

Some people have thought that the Association had a grievance because the wholesale or commission men are enforcing short credits. Quite the contrary; we believe that moderately short credits are the best for the retail floral business, and while we would not assume to question any just rule, which any one may make for the conduct of his business, we believe that any rule established should be a just one and should be impartially enforced.

Again, it has been said, that the Association is antagonistic to commission houses. This is entirely erroneous. In a large city like New York, it is indisputable that the retail flower business could not be conducted without commission houses, nor could the growers dispose of their superfluous and lower grade stock without the commission man. But this Association will ask as emphatically as it can, that the commission man confine himself to his legitimate business; that the commission man refrain from competing with his own customers; and that he keep out of the retail part of the work and not undermine the retailer, who is, after all, the mainstay of his business. This position is eminently fair and just. It is reasonable and businesslike. It should appeal to the commission man, no less than to the retail florist. And we feel sure that the retail florists throughout the length and breadth of this land will adopt this position to a man, and that the commission man, once he appreciates the equity and justice of the matter, will freely and voluntarily take the same stand.

We believe it to be the growers' duty as well as his self-interest to discourage competition by commission men

in selling at retail. Upon the business of the retailer depends the return to the grower. By injuring and impairing the retailer's business, the grower must and does necessarily suffer. Therefore, the grower, no less than the commission man, is in duty bound to protect those from whom he derives his support and revenue, from unfair competition. This duty should compel the grower and the commission man to take active steps, not to stand by and passively tolerate a practice which strikes at the heart of the trade. A dollar and cent point of view, if no other, should dictate this course. As to the general public, we may be sure of them, because we know they like a square deal.

Retail florists have suffered much from fraudulent and delinquent customers. We mean to provide against this by a central agency, and shall endeavor to uplift the general trade by a better standardization of prices. By protecting the retailer against bad debts, we feel that we are in turn protecting the wholesaler, the grower and the commission man, and here again it is but fair that the retailer receive in turn that measure of fair protection which will eliminate unjust competition on the part of those with whom he deals.

We hope to secure a better enforcement of the law as to the sale of flowers on the streets by unlicensed vendors. The growth of such wrong practices is detrimental not alone to us, but to other men in the floral trade.

We believe that if the growers, the men having large establishments and investments representing many thousands of dollars, were to meet the men who distribute their products to the consumer, and who know the demands and conditions of the trade, it would be of great mutual advantage and productive of highly satisfactory results to both.

And so there are many other matters which can well be taken up and developed to the betterment of the retail floral business in New York City; and if the members of the retail branch of this trade will come forward and assist us with their numbers and their counsel, we feel confident that all retail florists and their business will be materially improved, and that this improvement will reach over to the grower and the commission man, and that a more harmonious equitable and mutually beneficial condition will prevail in the trade generally.

CHAS. A. DARDS,
President, Retail Florists' Protective Association of New York.

SPRING SHOW AT BOSTON.

This brilliant annual event is set for March 24 to 28, at Horticultural Hall, Boston. Particular interest attaches to it this year because of the sensational exhibit of Japanese gardening which is being constructed by R. & J. Farquhar & Co., far excelling anything in that line ever attempted indoors in this or any other country. It will occupy about two-thirds of the floor space of the large exhibition hall. Much of the material has been brought specially from Japan. M. H. Waish will as heretofore be a large exhibitor in the Rambler rose classes and extensive contributions of forced plants, spring flowering bulbs, etc., are also assured.

WANTED: HORTICULTURAL EDITORS.

Mr. Editor:—Being a reader of your paper, I have noticed your frequent hits at the inefficiency of the daily papers on matters pertaining to horticulture. They are all guilty of giving us poor reports of things connected with gardening. I do not even exempt the Boston Transcript. But, Mr. Editor, according to your knowledge, has any approach been made to any of the papers by any representative body of horticulturists advising them to secure a practical man; such, for instance, as Robert Cameron of Harvard Botanical Gardens, a man who has the knowledge and facilities to know what is true and what is false concerning those wonderful creations that we hear so much about. Some of us think the press of the Hub of the Universe should take a hint and secure such a one. They have sporting editors, dramatic critics, etc.; why not a horticultural editor?

I should like to hear from others on this matter. I am,

A GARDENER.

THE GREAT ORCHID EXHIBITION AT BOSTON IN 1910.

The preliminary schedule for this notable event has been issued by the Massachusetts Horticultural Society, and those interested can procure copies by applying to Secretary Wm. P. Rich, Horticultural Hall, Boston. Many gold medals are offered and cash prizes from \$100 up to \$1000 in the various plant classes.

FROM CURBSTONE BUYER TO CURBSTONE PEDDLER.

If any street peddler of violets wants to become unpopular all he needs to do is to try to sell his wares to Mrs. Lillian Ashley, a young woman who lives in the Hotel Markwell. She told the West Side Court yesterday why she did not like the flower sellers, and no one blamed her for having a grievance.

She stopped in front of the Hotel Cadillac, Forty-third street and Broadway, on Saturday afternoon and purchased two bunches of violets for seventy-five cents. She had no change, and when the vender saw a ten dollar bill he said, "Just wait here and I'll get the change."

He shoved the tray in her hands and went in the front door of the Cadillac and out the side door. When last seen he looked as if he was preparing for a Marathon, and was running strong, with plenty of roscoe peel, and getting as far away as he could from his tray of violets.

There are some men around that section of Broadway who would not look surprised if the subway came to life and did a Salome dance to a piece of bread and butter. They are peddling their wares in a tray of violets and apparently offering them for sale was new. They rose to the occasion, however, and began to form in line. Some of them who dated the ownership of their last violet at the time of Sysonby's death declared life would not be worth living if they did not have a bunch, and some ticket speculators began to traffic in the advantageous places in the line.

Mrs. Ashley was dismayed and tried to hide the tray with poor success. "Sam" Berger, a theatrical manager, came along and, seeing her predicament, took the tray. The line faded away, but he sold the violets. Mrs. Ashley saw a man at Forty-seventh street and Broadway yesterday who she thought was the one who had taken her money, but he proved an alibi in the West Side Court and was discharged.—N. Y. Herald.

Emil Lange, a florist of New York city, recovered a verdict of \$3,000 against the city in the Supreme Court March 11 for injuries he received when he fell into a coal hole on one of the Staten Island municipal ferry boats.

AMERICAN ROSE SOCIETY

Annual Meeting and Exhibition Held at Iroquois Hotel, Buffalo, New York, March 17, 18, 19

New York Chosen As Next Meeting Place

Officers Elected

PRESIDENT—August Poehlmann, Morton Grove, Ill.; **VICE-PRESIDENT**—Frank R. Pierson, Tarrytown-on-Hudson, N. Y.; **SECRETARY**—Benjamin Hammond, Fishkill-on-Hudson, N. Y.; **TREASURER**—Harry O. May, Summit, N. J.
EXECUTIVE COMMITTEE—For Three Years—Peter Bisset, William F. Kasting.

A bright, sunny afternoon following a somewhat squally morning welcomed the rose lovers to Buffalo, on Wednesday, 17th inst. The gathering of old friends was as usual at these national meetings, delightful, and west, east, north and south met and greeted one another in the rotunda of the Iroquois with hearty gratulation while the exhibits were being put in order and the judges were doing the arduous duty in the big ball room up stairs. Members of the executive board of the S. A. F., fresh from their sessions at Cincinnati, were on hand full of cordiality and enthusiasm and the intimate fraternal spirit always so pronounced between the leaders of the two national bodies was given a fresh kindling.

The First Session.

The first session of the society was called to order at eight o'clock on Wednesday evening by President August Poehlmann, who read the following address, which was attentively and appreciatively followed by the audience:

PRESIDENT'S ADDRESS.

Ladies and Gentlemen, Fellow Members of the American Rose Society: Following previous custom, it devolves upon me to address you at this, our tenth annual convention.

Through the courtesy and cordial invitation extended to this society by the Buffalo Florists' Club, represented by their able leader, Mr. William Kasting, and associates, we find ourselves here tonight. What these men have accomplished to make us feel welcome, no one can fail to see.

Buffalo, lying as it does almost midway between the large rose-growing centers of the East, West, North and South, is ideally situated for our convention and exhibition. It is only eight months ago since the Buffalo Florists' Club in conjunction with the Niagara florists, participated in entertaining the Society of the American Florists most royally, ample proof that we are indeed in the hands of friends who appreciate our coming, and whom we in turn can but thank most heartily for their brotherly, generous, hospitable spirit.

Here, then, are past friendships renewed, new friendships formed, and

opinions exchanged,—all of which serve to make us enjoy this old world, and enrich us in the knowledge of the beautiful. From these gatherings inspirations are given to something more lofty, more divine; something in the future superior to what we had heretofore.

Here we find the real enthusiast, wrapped up in wonder at the progress made in the growing of the Queen of Flowers, "The Rose."

Who, that has any material interest or love for roses, can help but admire the beautiful specimens arrayed here

located or obtainable. Study well your varieties, their habits, wants and hardiness, the soils and localities wherein they will thrive best, and then proceed. Comparatively little has been done in this line, when we consider the immense unbounded resources at our hands, and the society's aim, which is: "A Rose for every Home, a Bush for every Garden." This branch of the work is left almost entirely to the nurserymen, many of whom have established an immense business, and who, like the commercial rose growers, are ever on the alert for something new with which to delight their customers, and thereby advance their own interests.

By placing the various roses best adapted to the different localities, past the experimental stage where good results are obtained, you will do much toward discrediting the doubts and fears of the investing public and create an unprecedented demand.

In this connection, it occurred to me that a good place to bring outdoor roses more prominently before the public, would be to obtain permission from public officials to plant plots or individual bushes in public squares, gardens or parks, without charge, showing the name of each variety and of the party who supplied them, in small yet plain letters.

One of the principal attractions at these annual exhibitions is to see those new creations of the floral world, those new wonders of the rose kingdom. We see, we like, we buy, we try. They make good, or we lose out. On first failure, we may try again. A race-horse is good only when he makes good. He may be a good looking but be out of the running. So with many of our pets; they are relegated to the background if the remuneration is not sufficient. The ambitious grower is never satisfied to leave the trial of new varieties to his neighbor, but will try himself to find a winner. Often these new things turn out pretty hot ones. It is quite natural that there are many disappointments. It cannot be otherwise. One winner, however, will cover the shortcomings of a multitude of raw ones.

New Roses.

The breeders, hybridizers and introducers of new roses deserve encour-

F. R. PIERSON

Vice president elect American Rose Society.

for our inspection. Who of you, lovers and growers of the rose, but what came to this gathering with a certain object—that object to improve yourself in your chosen profession?

Out-Door Roses.

In the matter of out-door roses and other subjects, so many valuable suggestions have been submitted in former conventions, which appear in the Annual Bulletins, that I hardly know what more to offer. To my mind, the field for, and sale of, out-door roses is unlimited wherever good rose soil is

agement and support, even if they manage to put one over occasionally. New varieties put life in the business. Keep on striving for high standards; the trade demands it.

In the cut roses, a number of new delegates are in the field looking for recognition. Notably among these are White Killarney and My Maryland. Both will be extensively grown. The society offers ample reward to its exhibitors, and deals fairly with all new introductions.

Progress is Certain.

Your various committees have faithfully attended to and accomplished the work imposed on them. Your secretary in particular was indefatigable and conscientious in the full performance of his duties, to which I can attest by reason of his voluminous correspondence, and deserves the sincere thanks of this society.

I would like to impress once more on all interested in the sale and culture of outdoor roses the need of disseminating reliable knowledge amongst the public.

During our meetings a number of very instructive essays will be read by men experienced in their lines, which will be entitled to our careful thought and consideration. Discussion which usually follows will open up new sources of knowledge and give to us new ideas. Of one thing we are certain; we are progressing with the times; let us forever keep on doing so.

To further the society's work and aim, we want it to be known that all lovers of the rose are welcome to our ranks.

To place the society on a solid financial footing, we ask you to be with us. Annual membership dues are \$3.00; life membership, \$50.00.

To the Buffalo Florists' Club and Associates, who have provided the society with workers to carry on this exhibition, and have looked after the society's welfare, I wish to again express our hearty thanks, hoping that each of you feel well repaid for the pleasure it has given us to be with you.

THE SECRETARY'S REPORT.

Secretary Hammond next gave a synopsis of the minutes of the last convention in an interesting manner, and then read his annual report:

No society could have a more loyal set of backers than has the American Rose Society. The past year has seen the society sustained by a number of men who claimed the privilege of assisting in meeting all expenses. President August F. Poehlmann has taken the keenest interest in affairs. Separated by distance as a society such as this is it requires a long view to keep all matters together and moving.

The schedule of prizes has been carefully revised by the committee appointed by the President, Messrs. J. N. May, Robert Simpson, Alexander Montgomery, Frank R. Pierson and Benjamin Hammond. The first schedule was made up ten years ago and remained in force until this season. Of this schedule Mr. Lonsdale of Girard College, Philadelphia, says it is good for five years.

Last November during the National Flower Show in Chicago a general meeting of the Rose Society was held at which time the sum of \$350 was pledged by the gentlemen then pres-

ent as a fund for the prizes to be offered this spring. At that meeting the important matter of ways and means was talked over freely. The offer of medals as prizes of honor was advised and stress was made of the propriety of making use of the society's medals. The mint of the United States at Philadelphia has the society die. There never has been a gold medal struck, the value of which would be determined by its weight when struck. A few silver and bronze medals were once made. These have been distributed except one bronze medal.

The secretary would suggest as one practical way to largely extend the usefulness and membership of this society that one silver and one bronze medal be offered as a rose prize to local horticultural societies to be known as the American Rose Society's prize for the best display of roses, without any regard to variety, at the local show. But that each society applying for the same, shall have at least one regular and two associate members of the American Rose So-

LEONARD BARRON

Secretary New York Horticultural Society.

ciety. This idea is advanced as the outcome of the discussion at the meeting referred to above. To put this to an available test I am authorized by a gentleman to say that he will pay for six silver and six bronze medals to be used as a start in this direction to popularize our society.

The standing of the American Rose Society seems to be growing, and it should be, for the rose as a commercial flower is the most commanding. The rose growers of America should recognize the society's essential value.

President Poehlmann in response to a demand by interested parties has appointed a committee to pass upon the very important matter of Registration of New Roses. The chairman of that committee is ex-president Robert Simpson. This committee would give us prestige as a regular standing committee, as large interests may come before it for consideration.

The annual bulletin of the society was issued after the close of the cal-

endar year 1902, thus bringing all business up to the year's end. This book tells its own story. The cost of it was a little over half covered by the advertisements furnished by a few at a rate of ten dollars for each page.

Without the least taint of discourtesy the secretary would bring a matter to notice; that is, a request that when a prize is offered in money that it be sent in as soon as possible and furthermore if named for a special purpose and not so won that it may revert at once to the general fund to make good the total amount always required for the regular prize list.

Our life membership has not increased the past year. Our invested fund has, however, reached the total of \$2,950 in the hands of our efficient treasurer Mr. Harry O. May. We have tried to keep in touch with each of our members on record but so far the responses to the annual due bills have not been as full as is desirable.

We have received notice of the death of Miss C. A. Pryer of New Rochelle, N. Y., one of our earliest members and constant supporters.

At the last annual meeting the subject of a rose journal was one of moment. The tentative effort to start it into being with the cost defrayed by an advertising card was side-tracked by the proposition to launch and support it by subscription for a year as a trial. This plan never materialized. In the meantime the Gardeners' Chronicle of New York has offered to give a magazine page each issue for the use of the American Rose Society as its popular paper. I hold a little money sent in for the rose journal project which will be returned.

The show before us is the tenth annual exhibition. Those previously held were in New York, Philadelphia and Boston. In these cities an exhibition was held for succeeding years, in Washington and Chicago one and now in Buffalo, the metropolitan city of western New York, in as fine a hall as the best we have had.

The secretary herewith desires, and properly so, to extend his thanks for the various courtesies and aid he has received from many persons in the interest of the society and most particularly to the editors of the American Florist, The Florists' Exchange, The Florists' Review and HORTICULTURE. If the Rose Society has fame it is largely due to the friendly support received without cost from these publications.

THE TREASURER'S REPORT.

Treasurer May then presented the following report for year ending March 12, 1903:

Receipts	\$2,132.07
Disbursements	1,689.93
To balance on hand.....	\$183.14

In addition to the above general account four life members have joined the Society, making a total of fifty-nine.

The money of the life membership is added to a Permanent Fund, the interest from which is used in current expenses.

Permanent Fund..... \$2,950.00

Peter Crowe here took the floor and enrolled as the sixtieth life member.

New York the Next Meeting Place.

Frank R. Pierson and Chas. B.

THE FRUIT AUCTION COMPANY ANNOUNCES DAILY SALES AT AUCTION

200-202-204 Franklin Street
NEW YORK

of FOREIGN AND DOMESTIC GROWN Roses, Shrubs, Evergreens, etc., Bulbs of every description, Flowering Plants, Palms, Bedding Stock, etc., from leading growers and importers.
Catalogues Mailed on Request. Correspondence Invited.

SPECIAL—On Tuesday, March 23d, we will offer an exceptional assortment of Holland Roses, Rhododendrons, Azaleas, Shrubs, Evergreens, etc. Also a consignment of Tuberoses, Gladioli, Canna Roots, Dahlias, etc., in all sizes—true to name. Thereafter every day (except Monday) throughout the season.

TERMS CASH

JOHN P. CLEARY, Auctioneer

PROMPT DELIVERY

Growers and dealers will please note that account sales with remittance is rendered IMMEDIATELY AFTER AUCTION.

THE FRUIT AUCTION CO., 200-202 204 Franklin St., New York

P.O. Box 640.

UNTIL FURTHER NOTICE SALES BEGIN AT 10:30 A. M.

Telephone 1515 Franklin

Weathered then extended an invitation from the Horticultural Society of New York and the New York Florists' Club, respectively, to hold the next meeting in New York City at the Museum of Natural History, and presented a formal invitation from Secretary Leonard Barron of the Horticultural Society. The invitation was accepted by unanimous vote.

Other Business.

Wm. F. Kasting on behalf of the Buffalo Florists' Club invited the visitors to a banquet in the Iroquois Hotel on Thursday evening. The discussion of the disposition of special prizes unawarded at any show was participated in by the debating giants of the society, and the question was finally referred to Messrs. Pierson, Valentine and Farenwald for consideration. Harry A. Barnard of London was here discovered in the audience and called upon for a talk which gave much pleasure, especially when referring to the quality of flowers on exhibition; he said "the half had not been told," and he made some pertinent comparisons between conditions existing here and in England, adding an eloquent plea for the outdoor rose as a subject for the cottage garden.

The Judges' Report.

The judges' report recommended that a committee of three be constituted to examine all entries for exhibition hereafter, to see that exhibits conform strictly to the requirements of the rule, that long stemmed flowers be placed on the floor or on tables not higher than fifteen inches, and provide for uniformity in size and style of vases in each respective class. The latter brought out a debate that will long be remembered, and the whole report was referred to the executive committee with full power.

Election of Officers.

Election of officers was next in order and resulted as follows:

President, August Poehlmann; vice-president, Frank R. Pierson; secretary, Benjamin Hammond; treasurer, Harry O. May; executive members for three years, Peter Bisset and Wm. F. Kasting. Walter W. Coles then read his paper.

The Exhibition.

The exhibition was pronounced su-

perior to last year's. Among the finest things were the decorative group of seven tall vases of White Killarney, fifty flowers in each, also vases of new sports and seedling carnations and fern novelties from The F. R. Pierson Co., Tarrytown; twenty cyclamen plants of extraordinary perfection from Charles Sandford; the Killarneys and Richmonds from A. Farenwald, which have never been excelled, and the White Killarneys from Waban Conservatories. Mrs. Jardine from several exhibitors was better than ever shown before, and My Maryland was in fine shape.

Special Awards.

The A. N. Pierson vase for 100 Richmond was won by A. Farenwald. For 12 roses (American Beauty barred) W. H. Greaves was first, E. A. Slatery, second. Waban Rose Conservatories took the Welch Bros.' cup with 25 White Killarney. The Farenwald prize for 36 My Maryland went to Robert Simpson, who also took the Cook prize and the Special Prize offered by the Lakeview Rose Gardens. The Michell tray for 50 Killarneys went to A. Farenwald, and the Pulverized Manure Co.'s prize for 25 American Beauties went to Edward Towill.

A special prize was awarded to Fred Burki for 36 Pink Killarney. The Silver Medal and Certificate of Merit were awarded to Waban Rose Conservatories for White Killarney, which scored 87 points.

Among the exhibits not mentioned above were Mrs. Jardine from Robert Scott & Son, not for competition; Cherokee and South Orange Beauty from W. A. Manda; carnations Dorothy Gordon from Joseph Heacock Co., Shasta from Baur & Smith and O. P. Bassett from Bassett & Washburn.

List of Awards.

- 50 blooms Killarney—A. Farenwald, 1st; Bassett & Washburn, 2d.
- 50 blooms Richmond—Edw. Towill.
- 25 blooms American Beauty—Bassett & Washburn, 1st; Edw. Towill, 2d.
- 25 Bride—Poehlmann Bros. Co., 1st; Fred Burki, 2d.
- 25 Bride—Peter Crowe, 1st; Fred Burki, 2d.
- 25 Cardinal—Poehlmann Bros. Co.
- 25 Rosa Reid—W. H. Elliott, 1st; Peter Crowe, 2d.
- 25 Mr. Maryland—Robert Simpson, 1st; A. N. Pierson, 2d.
- 25 Mrs. Jardine—Robt. Scott & Son, 1st; Edw. Towill, 2d.
- 25 Mrs. Potter Palmer—Poehlmann Bros. Co.
- 25 Mme. Abel Chatenay—Robert Simpson, 1st; Poehlmann Bros. Co., 2d.
- 25 Ivory—U. S. Cut Flower Co.

- 25 Killarney—Poehlmann Bros. Co., 1st; Peter Crowe, 2d.
- 25 Wellesley—Gude Bros. Co.
- 25 Richmond—Edw. Towill, 1st; W. H. Elliott, 2d.
- Collection of Teas and H. T's, six or more varieties, not less than 12 of a kind—Gude Bros. Co.

Thursday Morning's Session.

The judges' report was presented and accepted.

A telegram was received from Mrs. G. M. Hubbard, Twin Oaks, Washington, offering to establish a permanent fund to provide a gold medal to be awarded once in five years to raisers of American varieties of worthy new roses. The offer was accepted and on motion of W. J. Stewart, Mrs. Hubbard was unanimously elected to honorary membership.

F. R. Pierson reported for the special committee recommending that no special awards be hereafter advertised in the schedule until they have been deposited with the society, and that all special premiums offered shall be accepted only on condition that they go to the premium fund of the society if not awarded, unless the donor otherwise specifies.

Geo. D. Leedle then read a paper on "Roses as Popular Home Flowers and how they are grown," for which a vote of thanks was recorded. Leonard Barron then made the offer on behalf of The Garden Magazine to place in the hands of the society's officers gold, silver and bronze medals to be awarded not in competition but as honorariums for progressive achievement by workers in behalf of the rose. This offer was accepted with the thanks of the Society. The paper of J. F. Huss on "The Rose Garden" was then read by President Poehlmann and ordered by vote to be given the widest possible dissemination.

Thursday Evening.

On Thursday evening the banquet was held. Resolutions were read on the death of Louis M. Noe and E. V. Hallock; also final resolutions thanking the local people for their generous courtesy and hospitality.

Mr. Barron presented his stereopticon lecture with slides showing the different purposes for which garden roses can be used, emphasizing the desirability of working along the Rambler lines and urging that the process of development in future must be along the production of varieties from use of species hitherto not used by hybridists.

A. N. PIERSON, Inc., Gromwell, Conn.

Unquestionably the finest rose of recent introduction, offered to the trade today is

WHITE KILLARNEY (Waban Strain)

This we offer for delivery after February 15, 1909, at the following prices:

60c per 100, \$5.00 per 1000. Catalog on application.

PERSONAL.

Frank Rouiller of Hartford, Conn., has just returned from a visit to his parents in Switzerland.

J. H. Grove, formerly of Chicago, has accepted a position in the Crookes Greenhouses, St. Joseph, Mo.

A. Lacroix of San Francisco has moved to Alameda, Calif., where he will continue in his profession of landscape gardener.

Mr. W. Roach employee of F. Dancker, Maiden Lane Florist, Albany, N. Y., has been to Providence, R. I., attending the funeral of his brother.

C. L. Washburn of Bassett & Washburn, Chicago, has returned from West Baden, Ind., where he has been taking treatment, much improved in health.

Visitors in Boston: Arthur Zirkman representing M. Rice & Co.; J. J. Karins representing H. A. Dreer; Albert Pochelon and Walter G. Taepke, Detroit.

Visitors in Chicago: H. P. Scherer, Fort Wayne, Ind.; P. A. Obertin, Kenosha, Wis.; T. B. Coumandros, manager Golden Rule Plant Dept., St. Paul, Minn.

Recent visitors at Albany, N. Y.: H. Hansen, Catskill; Jas. Kearns, Jr., Locust Grove Violet Houses, Rhinebeck; Morris Cohn, representing Wertheimer Bros., New York.

Visitors in Boston: P. Hamilton Goodsell, New York; Eric Wetterlow, Manchester, Mass.; Robert Hunnicks, Newport, R. I.; H. A. Barnard, representing Hugh Low & Co., London.

The North Shore Breeze for March 6 presents as a cover illustration a fine portrait of our old friend and florist, Edward S. Knight, now chairman of the Board of Selectmen and member of the Board of Assessors of Man-

chester-by-the-Sea, Mass. We congratulate Manchester on its good judgment, as demonstrated in so good a selection.

Peter Murray has been elected tree warden of Fairhaven, Mass. He has also been awarded the contract for the care of Cushman Park, the most recent gift of H. H. Rogers to his native town.

William Stuart, of the University of Vermont, Burlington, has received an appointment in the plant bureau of the Department of Agriculture, Washington, D. C., and will take up the work at the close of the college year.

Chicago florists contributed flowers to be sold by twelve young ladies at the Grand Opera House, March 15. Ada Lewis appeared for the first time as a star and the proceeds of the evening were for the benefit of the Anti-Cruelty Society.

Violet Blue Rose

A Remarkable Novelty

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely corn-flower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy.

For descriptions of this great novelty, as well as many others, send for Booklet.

We go through the block from 14th Street to 13th Street, but our address is still

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St., NEW YORK CITY.

PHILADELPHIA NOTES.

M. Barber, Chicago, was a visitor in Philadelphia, March 10th and 11th.

Visitors this week: Albert Pochelon, of L. Bemis Floral Co., and Walter Taepke, Detroit; J. B. Keller, Rochester; and T. Malbrane, Johnstown.

W. P. Craig left for Cuba and Isle of Pines on the 13th inst. Business in connection with his father's 170 acre plantation. If conditions are favorable, may remain at Isle of Pines as resident manager of the estate.

W. C. Smith, 60th and Market Sts., has sold three of his five houses to be torn down. Several buyers are dickering for the other two. The northern section of the place only is to be retained, and the business will be exclusively retail hereafter. The retail business in this section has been rapidly improving of late years.

Much interest has been expressed here about the new sweet pea "Greenbrook," mentioned in a recent number of HORTICULTURE as being the fore-runner of a new race of unique form. The raiser has been asked to exhibit same at our spring show opening, Tuesday, the 23rd inst., and continuing three days. The exhibit will no doubt be on hand if the crop is in good form.

The Robert Craig Co. intend to build this summer on their property at Norwood, Del. Co., Pa., and have been inspecting various new structures recently put up by the most expert builders. On the 17th inst. the senior

member of the firm went with D. T. Connor to Brandywine Summit, Chester Co., Pa., to look at one of the latest triumphs of the Lord & Burnham Co., of which firm Mr. Connor is the Philadelphia manager.

Charles Sim, Rosemont, Del. Co., Pa., writes from San Francisco, Cal., March 12th, that he and his party are at the turning point for home in the course of their long trip. He states that San Francisco is very dusty, and that there is an immense amount of building going on, also street improvements galore, after the 'quake. He speaks in glowing terms of the courtesies extended to all visitors by Samuel McLellan, of Golden Gate Park.

PUBLICATIONS RECEIVED.

We have received from the Home Gardening Association of Cleveland, Ohio, a very interesting report on the aims and work of this excellent organization, with an account of the accomplishments of the pupils in the training gardens for 1908. The report

shows conclusively the good influence exercised by these school garden projects and the readiness and enthusiasm with which the children accept them. They are doing a great and good work.

The New York Agricultural Experiment Station, Directors' Report for 1908, by W. H. Jordan.—This report shows how efficiently the very moderate sums of money appropriated by the state are devoted to the purposes of agricultural education. A new building for administrative and demonstration purposes is asked for. Bulletin No. 205, which accompanies the report, is devoted to a summary of what has been previously published regarding Alfalfa Troubles, and Bulletin No. 306 is on Sulphur Sprays for Blister-Mite.

The Geo. M. Garland Co., Des Plaines, Ill., are sending out a very clever folder in colors which is stamped with "the seal of approval" and is sure to be opened and read by those who receive it. Send for one.

HENRY F. MICHELL CO., 1018 Market Street, PHILADELPHIA

Dreer Special Offer OF Hardy Perennials

NEW OR LITTLE KNOWN VARIETIES WORTHY OF SPECIAL ATTENTION

TROLLIUS (Globe Flower)

PRIMULA CORTUSOIDES SIEBOLDI. These are not so well known as they deserve; they are of free, vigorous growth, and can be flowered in pots in early spring, and respond quickly to forcing when placed in a temperature of 50 degrees, forming pretty pot plants in a short time, making excellent window plants, which meet with ready sale when in bloom.
We offer six distinct varieties, from pure white to the deepest rose in color, \$1.50 per doz.; \$10.00 per 100.

RUDBECKIA RAYS OF GOLD. In this new variety we have a refined form of the popular "Golden Glow," to which it is identical in color, habit, etc., but the flowers have narrower petals, full to the centre, forming a perfect ball of gold, \$1.50 per doz.; \$10.00 per 100.

ANCHUSA ITALICA DROPMORE VARIETY. A grand improvement on the type, with intense deep blue flowers, \$2.00 per doz.; \$15.00 per 100.
ANTHERICUM LILIASTRUM GIGANTEUM. A giant form of the N. Bruno Lily with very large white flowers, \$2.50 per doz.; \$20.00 per 100.

AQUILEGIA HELENAE. One of the best of the Columbines, large pretty blue flowers, with large white corolla, 85 cts. per doz.; \$6.00 per 100.

CAMPANULA PERSICIFOLIA HUMOSA. A very large semi double form of the peach Campanula, flowers of a pleasing shade of blue, \$1.50 per doz.; \$10.00 per 100.

DELPHINIUM GOLD MEDAL HYBRIDS. The finest strain ever offered in mixed varieties, \$1.25 per doz.; \$8.00 per 100.

DELPHINIUM BELLADONNA. The freest flowering of all Delphiniums, it is never out of bloom, beautiful turquoise blue, \$3.00 per doz.; \$15.00 per 100.

FUNKIA ROBUSTA ELEGANS VARIEGATA. A decided improvement on all variegated forms, \$1.50 per doz.; \$10.00 per 100.

HELENIUM RIVERTON GEM. A new variety that originated on our trial grounds. Flowers old gold, suffused with bright terra cotta, changing as they mature to a wallflower-red, \$1.50 per doz.; \$10.00 per 100.

HELENIUM RIVERTON BEAUTY. Another variety which originated with us, quite distinct in color, which is lemon-yellow, with a large disc of purplish-black, \$1.10 per doz.; \$10.00 per 100.

HELIANTHUS SPARSIFOLIUS. The most desirable of all the hardy sunflowers, especially valuable as a cut flower, 85 cts. per doz.; \$6.00 per 100.

FOUR VALUABLE HEMEROCALIS. The four varieties here offered are great improvements upon the well-known Yellow Day Lilies.

Aurantiaca. Very large, bright, orange-yellow, sweet-scented flowers, 15 cts. each; \$1.50 per doz.

Aurantiaca Major. Large trumpet-shaped, sweet-scented, deep orange flowers. Requires protection, 35 cts. each; \$3.50 per doz.

Florham. Large golden-yellow sweet-scented flowers; very free flowering, 15 cts. each; \$1.50 per doz.; \$10.00 per 100.

Gold Dust. Large golden-yellow flowers, 15 cts. each; \$1.50 per doz.

INCARVILLEA DELAVAYI. Popularly known as the hardy Gloxinia; extra strong roots, \$2.00 per doz.; \$15.00 per 100.

IRIS PALLIDA DALMATICA FOLIA VARIEGATA. A strikingly handsome variegated leaved form of this beautiful blue Iris, 35 cts. each; \$3.50 per doz.

GYPSOPHILLA PANICULATA FLORE PLENA. This is a perfect gem and as a summer cut-flower invaluable. We have a large stock of strong roots to offer this season, \$2.00 per doz.; \$15.00 per 100.

LUPINUS POLYPHYLLUS ROSEUS. This is a most attractive rosy pink form of Lupines, producing gigantic spikes of flowers, \$2.00 per doz.; \$15.00 per 100.

PENSTEMON GENTIANOIDES SENSATION. Gloxinia-like flowers in a variety of bright colors, including rose, cherry, crimson, purple, lilac, etc. For bedding they rival Phloxes, Petunias, etc. Not quite hardy; 3-inch pots, \$1.00 per doz.; \$7.00 per 100.

STOKESIA CYANEA ALBA. A white form of the popular blue Stokesia, equally valuable and a desirable addition; strong plants, \$1.25 per doz.; \$8.00 per 100.

CHOICE NEW TROLLIUS. (New Globe Flowers.) The five varieties listed below are decided improvements on all sorts heretofore offered; of exceptional large size and good, rich colors.

Gotterfunke. Large open orange-yellow flowers.

Helios. Very free flowering, pure yellow, on strong branched stems.

Leuchtkegel. One of the finest deep orange reds.

Lichtball. Large, globular orange-yellow flowers on stiff stems.

Salamander. Soft orange-colored flowers of globular form, 35 cts. each; \$3.50 per doz. The set of 5 for \$1.50.

MASSACHUSETTS AGRICULTURAL COLLEGE.

Dedication of New Buildings.

The dedicatory exercises of French Hall and the Durfee range of greenhouses connected with Massachusetts Agricultural College, Amherst, were held on the afternoon of March 12, Prof. F. A. Waugh presiding. President Butterfield welcomed the people. Prof. E. A. White, W. H. Bowker and J. K. M. L. Farquhar of Boston were the speakers. Mr. Bowker spoke entertainingly of Henry F. French and Nathan Durfee. Mr. Farquhar's subject was, "What the greenhouse has done for horticulture." He showed many views of greenhouse enterprises across the water and told of the various crops grown, closing his address with views in the United States. A flower show was arranged in the laboratory. Designs made by the pupils under the direction of N. J. Fennelly displayed much skill. Carnations were

exhibited by The F. R. Pierson Co., Peter Fisher, Pierce Bros., Patten & Co., J. W. Adams & Co., H. H. Rogers, Jas. Garthley gardener, Worcester Conservatories, E. B. Beals; Waban Rose Conservatories and F. R. Pierson Co. showed White Killarney roses; A. N. Pierson, Eber Holmes, Robert Montgomery, and W. H. Elliott, roses; Wm. Sim, sweet peas and violets, and Edw. MacMulkin, baskets for table decorations.

The Short Course.

The short course which just closed was successful in every respect. This has been largely due to the splendid co-operation shown by the practical men. They have been most generous in giving the students the results of their years of experience. In every case this has been done without remuneration. The college also appreciates deeply the generosity of the practical growers in contributing so liberally to the students' flower exhibit. The townspeople showed a remarkable interest in this exhibit and the laboratory at French Hall was crowded during the hours of exhibition.

Practically all the short course students have positions and there were applications for several more men than the college could supply.

The last day of the course Mr. Wm. Sim of Cliftondale gave a most interesting and instructive talk on "Sweet Pea Growing under Glass." He brought with him fifteen varieties of splendidly grown sweet peas which made his talk especially valuable. E. A. WHITE.

SUMMER SCHOOL OF AGRICULTURE.

The summer school of agriculture, established two years ago at Massachusetts Agricultural College in Amherst, will be continued in 1909. In fact it is now regarded as a permanent institution, having proved decidedly popular and successful during the last two summers. The attendance comes from all parts of New England, but most largely from Massachusetts, a surprisingly large proportion being from the cities. School teachers predominate, but a good many land and lot owners go for the sake of the short practical courses in agriculture and horticulture.

The school this year will be run for six weeks in July and August, with courses in field crops, gardening, dairying, fruit growing, live stock, chemistry, plant life, bird life, insect life, etc., etc. Some of these courses are specially designed for grade teachers, some for high school teachers, others for practical people who do not teach, others for clergy, so that everyone who has a week or more to spare can find something useful and interesting to do.

MUSIC HALL MARKET EXHIBITION.

Indications are for a very large and representative show on Saturday, 20th inst., at the Boston Co-operative Flower Market in Music Hall, Boston. Entries have been received from leading carnation growers all over the country and the rose growers, plantmen and producers generally will be well represented.

We have received from Henry A. Dreer, Philadelphia, Pa., a set of beautiful postal cards, giving colored views in their greenhouses, nurseries, aquatic gardens, seed testing fields and ornamental department. Anyone who sends an order to Dreer's gets his acknowledgment on one of these cards, hereafter.

The Third Spring Exhibition of the St. Louis Horticultural Society will be held on March 24-26, at the Grand Ave. Masonic Temple. The rules and prize list have been published and copies may be had on application to the secretary, Otoi G. Koenig, 617 1/2 Florissant Ave.

A Profitable Side Crop

Asparagus plumosus is a main crop with many growers having extensive modern plants but those with less up-to-date establishments, or parts of same defective in lighting or otherwise unsuitable for high grade crops, will find this subject one of the very best. We have prepared a cultural circular giving concise directions how to make money out of this crop. Send for it. No charge. An important feature in asparagus culture is good seed. The P. M. quality of greenhouse grown seed has earned a high reputation for freshness and purity. It is the true nanus and greenhouse grown. Send for trial pkg., 100 seeds fifty cents, if you wish to experiment only. In quantity \$3.75 per 1000 seeds, \$32.50 per 10,000 seeds. Asparagus Sprenger 75c. per 1000, \$5.00 per 10,000 seeds.

MASSACHUSETTS HORTICULTURAL SOCIETY.

Dr. H. J. Webber, professor of experimental plant breeding in Cornell University, spoke before the Massachusetts Horticultural Society February 13 in the Saturday lecture course. His subject was "The Outlook for Plant Breeding," and he said in substance:

Despoiling Our Resources.

The nineteenth century has been characterized by Alfred Russell Wallace, the great English biologist and contemporary of Darwin, as a century of despoilation of the natural resources of the world. In our greed for wealth, the soil, minerals, forests and all natural resources, rightly the heritage of the children of the world for all time, have been wantonly depleted without thought of the future generations that must follow us. In the beginning of the twentieth century it is meet that we should pause in our mad race for wealth and thoughtfully consider if we are doing our duty by our children and our children's children, who are to inherit the earth after we are gone. It has been said that the

greatest of all inventions which we inherit is the alphabet, and I presume it may be as truthfully claimed that the greatest of all heritages which have come down to us from our ancestors are the cultivated plants developed by centuries of unconscious selection for man's cultivation and use. As agriculture is the foundation of civilization, so the cultivated plants are the foundation of agriculture, as plants must necessarily precede animals to support them.

The early history of our cultivated plants is shrouded in mystery, the wild types from which they have sprung being in many cases entirely unknown, the modifications which have taken place being so profound in many cases, as to preclude the recognition of the wild prototypes if they are now living. Each century has inherited increasingly better and better sorts from the preceding century. It would seem to us today, that we have nearly reached the limit of perfection, yet I am led to wonder when I review the tremendous possibilities opened to me by my past fifteen years of research in the field of plant breeding, if we are really doing all in this field of development which the world has a right to expect of us.

If we are to feed the increasing millions of our population with our soil depleted in fertility, with our mineral deposits of nitrate of soda, potash and phosphates approaching exhaustion, we must use strenuous methods to improve our plants to the highest degree of efficiency.

Where to Look for Relief.

Where, now, can the breeder enter with profit into this field? When our nitrogen fertilizers fail, where are we to get fertilizers for our great cereal crops which are more important than any other crop in feeding the world? Wheat, corn and rice are not legumes. With what can we fertilize our potatoes, which in many countries, are the staple article of food and the valuation

of which in the world as a whole, exceeds that of our "King Corn." It is quite probable that the various legumes known to fix free nitrogen can be improved, made more important and led to assume a much greater part in food production. Beans, which are nitrogen-fixing legumes, now make a flour, from which buns, biscuits, griddle cakes, etc., can be made which nearly equal similar products from wheat and corn flour. Beans, peas and other legumes, must ultimately be bred particularly for this purpose. Several wild legumes, as yet entirely undomesticated, produce tubers which are fairly large and wholesome as food. These may be bred as substitutes for potatoes, by breeding varieties suited to growth on nitrogen-free soils.

NEWS OF THE CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The regular March meeting on the evening of the 16th was well attended and interesting throughout. Communications from the Co-operative Flower Market, inviting the club members to visit their exhibition on Sunday, and from the North Shore Horticultural Society to attend their meeting on March 19, were received and accepted and an invitation for the club to visit in a body the greenhouses of the W. W. Edgar Company on Saturday, April 3, to see the Easter plant display, was referred to the executive committee to make arrangements accordingly. Harry A. Barnard, traveling in the interests of Hugh Low & Co., London, was introduced as a welcome visitor in Boston and in a very few moments had his audience fairly hypnotized by his very clever and entertaining eloquence. He gave unstinted praise for the excellence of the culture especially in carnations that he had seen during the few days he had been in America and for the cordiality with which he had been received by the fraternity. His little speech was brimful of pleasantry and humor and was applauded to the echo.

Robert Cameron was then introduced and read a grand paper on the subject most close to his heart always—a plea for the more general use of hardy perennial plants in parks, cemeteries and rural estates. Mr. Cameron prefaced his paper with a most feeling and tender reference to the fact that he was filling the sad vacancy caused by the sudden death of E. V. Hallock of New York, who was to have been the lecturer of the evening. He referred to Mr. Hallock's death as a great loss to the entire horticultural world and voiced the sympathy felt here for our sister organization in New York, which had lost a noble president and faithful friend.

Mr. Cameron's paper was brilliant in its composition, satirical in places and reasonable and convincing throughout. We hope to be able to reproduce it in our columns in due time. It brought out a goodly response in discussion and a standing vote of thanks was accorded its gifted author.

On the exhibition table were some interesting displays, including Eupatorium Windmannianum and mushrooms from T. Coles, Canna Tarrytown from Eber Holmes, Schizanthus Wisetonensis, and its dwarf variety and S. grandiflora from Duncan Finlayson and an array of eighteen vases, distinct varieties, of sweet peas from Mr. Sim, among which Greenbrook and Pink Beauty and several seedlings were especially noticeable, and for which a report of merit was awarded to Mr. Sim, the other exhibitors being accorded a vote of thanks. The identity of the canna shown as Tarrytown was the topic of some discussion and it is in order for the introducer, F. R. Pierson, to

straighten out the uncertainty existing in the minds of some of the Boston experts.

Seven new members were taken into the fold.

On motion of James Wheeler it was voted to send letters of sympathy to the family of the late E. V. Hallock and to the New York Florists' Club. Considerable discussion arose over a proposal to donate \$25 for a special prize at the Music Hall Market exhibition and was not carried. F. W. Fletcher drew the attention of members to the proposed increase in the tariff on greenhouse glass and it was voted to send strong protests on the subject to all Massachusetts congressmen, also to the Ways and Means Committee in Washington.

LENOX HORTICULTURAL SOCIETY.

The regular meeting of the Lenox Horticultural Society was held Saturday, March 6th, President A. Jenkins occupying the chair. Messrs. George W. Allwood and D. Ferguson were elected members. Annual and peren-

HARRY A. BARNARD,

Representative of Hugh Low & Co., London; a visitor at the Gardeners' and Florists' Club, Boston.

ennial exhibition will be held July 28th, and the fall exhibition Oct. 26-27. Schedules are printed and can be had upon application to the secretary. A. J. Loveless was awarded a diploma for a display of amaryllis flowers, some of them being very rich in color, and he gave a short talk on their culture. Following the question, "What is the cause of disease in Liliium Harrisli?" a very interesting discussion took place, but no definite conclusion was arrived at. Several instances were cited where large growers had thrown away thousands of diseased plants.

Rose and Carnation Night Saturday, April 3rd, and it is safe to say that competition in the various classes will be keen, as carnations are grown quite extensively in and around Lenox. After business is dispensed with there will be a smoker, when members who were not asked to sing at the dinner will have a chance to display their vocal talent.

MORRIS CO. GARDENERS' AND FLORISTS' SOCIETY.

The evening of March 10 was our "Carnation Night" and L. J. Reuter of Westery, R. I., was our essayist. Mr. Reuter's fame as a carnation grower preceded him here, and to this may be credited in a great measure the full house we had. We had to borrow chairs from the outside to accommodate the extra visitors. A very delightful talk on Carnations was given us, the speaker being entirely familiar with every point of the subject. He contrasted solid benches and raised benches and was partial to the solid. He uses both at the present time. He told us of his way of treating cuttings in the sand, which was new to most of us. His house is so arranged that as soon as the cuttings are rooted he can decrease or shut off the bottom heat from a batch without interfering with the one next to it. A rising vote of thanks was tendered him.

We had not as many novelties as other years but what we had was good and so were the standards. A big vase of Alma Ward from Cottage Gardens, Queens, L. I., took every eye and everyone who could carried away a bloom. It got our certificate long ago. Vote of thanks given. A display of Dorothy Gordon from Joseph Heacock, Wyncote, Pa., received a well-merited certificate of merit.

Red seedling No. 1 from John S. Green, Morristown, got certificate of merit last year; vote of thanks. Ruby from S. J. Reuter & Son, was voted "A fine full flower; committee would like to see it in larger quantities to judge for certificate." Through delay in transit President Taft from Scheiden & Schoos, Chicago, came too late to be judged. Three vases of carnations, Robt. Craig, Enchantress and Winsor from A. R. Whitney, H. B. Vyse, gardener, received cultural certificate. Vase mixed carnations from A. C. Van Gaasbeck, Orange, N. J., John Dervan, gardener; cultural certificate. Carnations Variegated Lawson, Winsor and Lawson from G. E. Kissell, Charles Steele, gardener, got a cultural certificate. Carnations Enchantress, Afterglow and Mixed from Florham Farms, A. Herrington, Supt., got cultural certificate.

From Florham Farms were a plant of Cattleya Luddemanniana alba, flowering the first time in this country; first class certificate of merit. Collection of Catt. Luddemanniana, showing some very fine and distinct types; cultural certificate. Collection of stocks—Queen Alexandra, Beauty of Nice and Crimson King; cultural certificate.

Dr. Leslie D. Ward, Andrew R. Kennedy, gardener, had a fine lot of well-grown cinerarias of a very fine strain; cultural certificate. M. B. Metcalf, Orange, N. J., Geo. Wraight, gardener, had a lot of fine stock Empress Elizabeth; cultural certificate. Totty's Amaryllis "Crimson King" showed a remarkable flower.

Among the visitors was H. A. Barnard of the Hugh Low Nurseries, London, Eng. He had at 6 o'clock that evening completed his 48th year with the firm, and he looks good for 25 more. He made a telling speech.

which was cheered to the echo. H. A. Bunyard (same initials) was acting as his guide. The H. A. Bunyard prize for best plant in flower is to be competed for on April 11 next.

April 14 is Rose Night. An essayist from the outside is promised. The carnation men have had their innings now we shall see what the rose men can do. EDW. REAGAN, Sec'y.

NEW JERSEY FLORICULTURAL SOCIETY.

Carnation night was observed by this Society at their rooms in Orange, on the 12th, with appropriate ceremonies. There was a meritorious floral display, a paper on the Carnation by William Lyons and addresses by visitors from other parts. The new Jaybreal, Pink carnation Mrs. Pfeuffer was displayed by John L. Pfeuffer of Irvington, N. J., who addressed the meeting. He claimed superior advantages for his flower as a commercial sort, as a heavy cropper of good size and fragrance, a free bloomer during the months of December and January. Henry Hornacker of East Orange exhibited some well-grown Victory, which were awarded a certificate of merit. Thomas J. Grey of Boston addressed the meeting, saying: "We have had last week in Boston one of the finest exhibitions of carnations the country has ever seen and we are going to have two more. We have two flower markets, one meeting in Music Hall and the other in the Park Street Church, where it is said 'God is upstairs and the devil in the cellar.' I congratulate you upon the display you have made here tonight, for I have not seen its superior in color or clever cultivation." The paper by William Lyons, gardener to Robert R. D. Foote, of Morristown, N. J., was read by the secretary, as the writer was prevented from coming by sickness in his family. A lively discussion followed its reading upon the merit of outdoor cultivation, feeding and lifting.

The principal exhibitions were as follows:

Carnations by A. C. Van Gaasbeek, gardener John Dervan; Charles Hathaway, gardener Max Schneider; Charles Munn, gardener John Hayes; S. and A. Colgate, gardener William Reid; William Runkle, gardener D. Kindsgrab; Henry Hornacker: Eupatorium, violets, stocks and hyacinths, Max Schneider; stocks Empress Elizabeth, Mr. Metcalf, gardener Geo. Wright; Dendrobium thysiflorum, J. Crosby Brown, gardener Peter Duff; Cattleya Schroderae, Wm. Reid; Orchids, Lager and Hurrell. J. B. DAVIDS.

DETROIT FLORIST CLUB.

The last meeting of the club was made quite interesting through a paper on "Forcing of Dutch Bulbs," read by Mr. Chas. Plumb. It contained no specially new features but all the practical questions were so well covered that there was nothing left to start a discussion after its reading.

The principal general discussion was the coming fall show. It will be a great undertaking, worthy of the efforts of a city twice the size of Detroit. Still enthusiasm is just beginning to get a foothold among the boys and as this club does not know how to spell failure the result can be easily foreseen.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The regular meeting of this Society was held in Pembroke Hall, Glen Cove, N. Y., on Wednesday evening, March 10. President Everett occupied the chair and about fifty members were present. The Horticultural Hall committee appointed two months ago, reported that a suitable site could be acquired at a reasonable cost. On a ballot being taken, a majority voted in favor of the project. Whenever necessary preliminaries are completed the ground will be purchased and steps taken for the erection of a Horticultural Hall in Glen Cove.

A most interesting and instructive paper was read by Mr. Elmslie on "Tree Doctoring." The essayist has made the care of trees his special study for a number of years and dealt with his subject in a practical manner. He emphasized the fact that less "doctoring" would be required if trees were properly cared for when young.

A keen discussion arose over the question of how to prevent and cure the stem-rot so prevalent in forced lettuce. A. Mackenzie in answer to this question said there was no cure, but he thought we would have less of the so-called stem-rot if care were taken not to wet the foliage when watering. He also said that a free circulation of air at all times excepting in extremely cold weather is absolutely necessary.

Messrs. Jaenicke, Durhie and Garrett acted as judges at the monthly competition. G. Wilson again headed the list in the points competition, with a superb lot of W. & D.'s Snowball cauliflower. The points competition was as follows: G. Wilson, cauliflower, 90; V. Cleres, carnations, 89; H. Gant, sweet peas, 85; J. Elmslie, carnations, 85; P. Reul, antirrhinum, 85. G. Wilson was awarded a cultural certificate for Beauty of Nice stock. A. Wilson, Summit, N. J. was elected to active membership.

W. H. MACKENZIE, Cor. Sec'y.

S. A. F. EXECUTIVE BOARD.

Cincinnati.

The Executive Board of the Society of American Florists and Ornamental Horticulturists convened at Cincinnati on Saturday evening, March 13, and the sessions were continued until the 16th. The official report of same will be forthcoming at an early date, but we are at liberty to say that the meeting was enthusiastic and successful in a high degree, and the prospects for the convention next August are exceedingly rosy.

After the evening session on Saturday, the visitors were escorted to the meeting of the local Florists' Society, where hospitality was freely extended and interesting reminiscences indulged in. On Sunday Mr. and Mrs. J. A. Peterson entertained the committee at their home; on Monday a banquet at the Sinton Hotel was enjoyed, and on Tuesday a trip to R. Witterstaetter's was the order of business, and here again hospitalities were unlimited. The banquet on Monday was presided over by Mr. McCullough and brilliant responses were made by President Valentine, Messrs. Eugene Dailledouze, George Asmus, F. H. Traendly, W. N. Rudd, Judge Vesey, E. G. Hill and

many of the local lights, including the veteran, B. P. Critchell, who was an active participant in the first convention, twenty-five years ago.

CONNECTICUT HORTICULTURAL SOCIETY.

The regular semi-monthly meeting of this Society was held on March 12th, President Huss presiding. Two new members, Charles Turner and E. P. Cahill, both of Hartford, were elected. The Society voted to hold a banquet, that has recently been under discussion, on the evening of April 12th, after the Lenten season. James Chambers entertained the meeting by reading a poem by William Miller, entitled "The Gardener's Song;" and J. A. Weber read a short, original paper on the "Culture of Mushrooms," in which he recommended the spawn obtained in this country, rather than that affected by the salt water in transit from Europe. A delightful display of cinerarias was tabled, comprising nearly fifty plants with blooms of various striking colors. The judges were John Gerard and James P. Ralph, of New Britain, and Clarence H. Wiley, of Hartford. John Coombs was awarded a score of 85 points, J. F. Huss 80 points, and J. A. Weber 75 points. Mr. Chambers presented a paper on "The Cineraria," covering well its history and culture. President Huss announced that Prof. F. A. Waugh, of Amherst, Mass., would be present to address the Society at its next meeting on the 26th inst.

GEORGE W. SMITH, Sec'y.

Melrose, Conn.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The regular monthly meeting of this society was rather slimly attended on the 16th inst., on account of the spring show being only one week distant. Routine matters in connection with this event were the principal topics under discussion. Several new prizes for roses were announced. The date of the spring show for 1910 was fixed for March 19 on account of the early Easter next year. James Goodier, gardener for C. G. Roebeling, exhibited and was awarded as follows: Cattleya Trianae Roebelingiana, sepals and petals pure white, lip faintly tinted slate blue; first-class certificate: Cattleya Guatemalensis, Epidendron Auranica X Cattleya Skinneri; special mention: Dendrobium nobile Ashworthianum, a very fine plant of this pure white dendrobium; first-class certificate.

David Rust, secretary, reports excellent prospects for some good exhibits at the spring show, which opens on Tuesday, 23rd inst., at 2 p. m., continuing Wednesday and Thursday. Cineraria stellata will be a prominent feature, many of the leading growers having made a specialty of this item lately. Primula obconica will be another strong card. The usual show of azaleas, hyacinths and daffodils will be up to high water mark from present indications. All kinds of spring flowers will be strongly represented and it is expected that a good many of the leading novelties in roses and carnations will be on exhibition. The show will undoubtedly be worth coming a long way to see.

ST. LOUIS FLORIST CLUB.

The meeting of the club on March 11 was attended by about twenty members. President Young was ill and Vice-President Edwin Danker failed to appear, so J. F. Ammann was prevailed on to take the chair. It was hoped that J. A. Valentine would arrive in time to talk over convention matters with us, but in this we were disappointed. The various committees reported. The bowling and shooting committees stated that they are organizing teams for the convention; the former bowl every Monday night, John Connon, chairman; the latter meet for practice at Kirkwood every week, Frank Venneman, chairman. J. F. Windt, chairman of the committee to eliminate crepe pulling, said they are doing good work and asked the club to vote that they are opposed to the practice; also to publish the proceedings in the daily papers, which was unanimously carried. The fall flower show was fully discussed and the conclusion reached, that two shows would be a financial loss. On vote it was decided that the secretary should correspond with the secretary of the Horticultural Society in regard to uniting in one big show. Walter Ritzer tendered his resignation, as he is going to South America, and it was accepted with regret. Mr. Ammann spoke feelingly on the death of E. V. Hallock, president of the New York Florists' Club. The meeting then adjourned. The next meeting will be held on April 8.

ALBANY FLORIST CLUB.

A special meeting of the Albany Florist club was held Thursday evening, March 11, at the store of W. C. King. Arrangements were made to hold a floral exhibition in November. Frederick Goldring was named as president, A. De G. Wemple, secretary and Louis Menand, treasurer.

The following committees were named: Hall committee—P. Hyde, A. Whittle, T. Snare, F. Henkes, H. W. Riggs and E. S. Hazeltine; program, printing and advertising—E. F. Meany, W. C. Gloeckner, W. Roach, F. Breare, J. H. Moran; decorating and arrangements—S. Goldring, W. C. Kurth, W. C. King, Philip Bender, F. Conley, C. Sanders, J. Murnane; premium and selection of judges—E. F. Tracey, Wm. W. Hannell, Watervliet, J. H. Snyder, Rhinebeck, Louis Wood, Fishkill, C. Sullivan, P. Warner, Newtonville.

INDIANA STATE FLORISTS' ASSOCIATION.

This association at a meeting held March 2nd, arranged to co-operate with the State Board of Agriculture in the establishment of a department of floriculture at the State Fair this fall. This year premiums amounting to \$1000 will be paid in the floriculture department. A committee was named to make inquiry regarding the sentiment of Indianapolis people toward a fall chrysanthemum show which the florists would like to hold.

The committee consists of H. L. Wiegand, A. F. J. Baur and Fred Hukriede. Reports show that the carnation meeting held here in January was a success from a financial point of view.

AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS.

At a meeting of the American Association of Park Superintendents held at the Genesee Hotel, Buffalo, on March 17, the date for the convention at Seattle, Wash., was set for August 9, 10, 11. President Duncan, Secretary Mulford, Theodore Wirth and J. W. Thompson were appointed a committee to make all arrangements. An invitation was received to spend the fourth day at Tacoma.

THE AMERICAN CARNATION SOCIETY.

Carnation Registered by Dailedouze Bros., Flatbush, N. Y.

"The White House." Color white, very large with stiff stem and excellent calyx; a good keeper, good bloomer and good grower.

ALBERT M. HERR.

Lancaster, Pa.

CLUB AND SOCIETY NOTES.

The Milwaukee, Wis., florists are planning to hold a big flower show in November. H. V. Hunkel is chairman of the committee of arrangements and C. C. Pollworth, Nic Zweifel, W. Zimmermann, J. G. Heitmann, A. F. Kellner and C. Dallwig are his able assistants.

At the meeting of the Lake Geneva Gardeners' and Foremen's Association (Wis.) on March 6, officers and directors were elected as follows: President, A. J. Smith; vice-president, James Livingston; secretary, Albert H. Reupke; treasurer, Wm. Wahlstedt; Directors, Axel Johnson, Frank Johnson, Wm. P. Longland, Robt. Sampson, Miles Earrett and the officers. Meetings are held the first and third Saturday evening of each month in the Woodmen's Hall.

The fifteenth annual meeting of the Massachusetts' Fruit Growers' Association was held at Worcester in Horticultural Hall, March 10, 11. Wilfrid Wheeler of Concord, G. C. Sevey, editor of The New England Homestead, H. L. Frost of Arlington and others spoke on vital topics and discussions followed. A stereopticon lecture by H. B. Fullerton was given in the afternoon, when the Worcester County Horticultural Society united with them. Officers were elected as follows: J. W. Clark, president; E. D. Bliss, vice-president; S. T. Maynard of Northboro, secretary and treasurer; J. E. Ellsworth, auditor.

The Worcester County Horticultural Society, Worcester, Mass., closed its winter session on March 11 with a banquet at which 380 were present. Brief talks followed the feast, wherein A. P. Rugg made a suggestion regarding the cultivation of window gardens. Prof. Craig suggested the better cultivation of the men and women engaged in the business. M. C. Burritt gave a glimpse into the workings of the Department of Agriculture at Washington. H. B. Fullerton extolled the opportunities for raising celery in this section, and W. P. Rich brought the greetings of the Boston Society. Dancing was indulged in until a late hour.

Obituary

Louis M. Noe.

Louis M. Noe, the extensive rose-grower of Madison, N. J., died at his home at 730 A. M., Thursday, March 11th, after a lingering illness. Mr. Noe was born in Chatham township, May 13, 1847, and was of French descent, his grandfather, Louis Noe, having come to this country as a soldier with Lafayette and served through the Revolution. He studied law for one year with Guild and Lumm, Newark, N. J., but later devoted himself to caring for his landed interests. In 1872 he went into the fruit and nursery business with his brothers-in-law, Samuel and O. N. Brant, under the firm name of Brant, Noe & Brant. From a small beginning, they became the largest peach growers in New Jersey, having 1000 acres in peach trees. Mr. Noe was regarded as an authority on peach culture all over the country. In 1884 he established his rose gardens in Madison, N. J. At the time of his death Mr. Noe had about a million square feet of glass in Madison; besides he owned a half interest in the Brent & Noe Floral Co., of Chicago. American Beauties were his specialty in roses, though he largely grew other kinds. He was a member of the Christ Methodist Church, Madison. A widow and three children survive him. A son, Louis A. Noe; a daughter, Marie, wife of Lincoln Pierson, and another, Miss Lilian May Noe. Mr. Noe was of a sunny disposition, kind-hearted, and a liberal supporter of all worthy enterprises. He was loved by everybody who knew him, and at his funeral which took place at 2 o'clock from Christ Methodist Church, on Sunday, it seemed all Madison turned out, besides the old-time florists many of whom came a great distance. The floral tributes filled two carriages. Orchids, lily of the valley, roses and lilies were in evidence everywhere. A noteworthy piece was one from his employes, an immense design containing no less than fifteen thousand violets.

E. R.

John N. May writes of the late Louis M. Noe: "He was a man of very broad liberal views and was highly respected by all who knew him, courteous, kind and considerate of all his employes, having many other interests outside of his particular business as a rose grower."

Resolutions passed by the board of directors of the New York Cut Flower Company:

Whereas, Louis M. Noe, our friend, counselor and for some time vice-president of our organization, has been called from us by death, leaving a void, which to us seems one that cannot be filled; and Whereas, We who have been associated with him so long in this organization feel that it is but proper that we place on record our estimate of his character and worth, and the sincere sorrow which each feels at parting with such a dear friend, able associate and worthy collaborer; therefore, be it

Resolved, That the members of the board of directors of the New York Cut Flower Company do hereby extend to the family their sincere sympathy at this bereavement, assuring them that by his death not only are we made mutually mourners for his beloved and respected friend but that in

the death of Louis M. Noe we have been deprived of the advice and assistance of one of our most useful members.

Resolved, That this preamble and resolution be placed in full on the minutes of this Company, a copy of the same be published in the trade papers and also in the local papers of Madison, Chatham and Summit, New Jersey, and that an engrossed copy be sent to the family.

HENRY HENTZ, JR.,

S. C. NASH,

P. I. MOORE,

Committee.

Patrick Lawlor.

Patrick Lawlor, one of the best-known arboriculturists in the United States, died March 10 at his home, No. 206 Barclay street, Flushing, New York. He was seventy years old, and came from Ireland fifty-nine years ago. For four decades and more he had charge of the old Parsons Nurseries in Flushing. In that capacity he toured the world in search of rare trees, which were shipped to Flushing, and under his management were disseminated.

Helen C. Pennock.

The grim destroyer, which comes to all sooner or later, last week invaded the fold of S. S. Pennock at Lansdowne, Pa. and left that family minus one pet ewe lamb, Helen C. Pennock, aged four. The sympathy of the trade is freely extended to the sorrowing family.

Lafayette A. Gates.

Lafayette A. Gates, a retired florist of Cleveland, O., who had been to Florida in search of health, died at the Grand Hotel, Cincinnati, on February 22. He was 60 years of age and leaves a widow and daughter.

J. S. Haskins.

J. S. Haskins, a native of Vermont, who conducted a florist store at 22d St. and Wabash Avenue, Chicago, for a number of years prior to 1890, passed away on February 28, at the age of 87.

J. J. Nussbaumer.

J. J. Nussbaumer who, for thirteen years has been engaged in the greenhouse business at San Angelo, Texas, died on February 28 at the age of 49. A widow, son and mother survive him.

Harry J. Hess.

Harry, the 12-year old son of J. J. Hess of Omaha, Neb., was stricken with diphtheria and died on March 1. The sympathy of the trade is with the mourning parents.

H. W. Baudry.

Harry W. Pandry, a nurseryman of La Porte, Ind., committed suicide on the morning of March 6, after a prolonged illness.

Mrs. G. A. Rolin.

Mrs. G. A. Rolin, whose husband is a member of the firm of Newlander & Rolin, Denver, Colo., died on March 1.

The increasing importance of the fruit growing industry and the consequent necessity of vigorous spraying led the members of the horticultural society at a recent meeting in Wichita, Kansas, to decide that it would be an advantage to have a plant manufacturing insecticides located in their vicinity. At present the East has a monopoly of this industry and the high freight rates are a burden to the western people.

METHODS OF PROPAGATING PLANTS.

By Jackson Dawson.

As announced in our last week's issue, Jackson Dawson of the Arnold Arboretum was unable to be present at the last of the season's lectures of the Massachusetts Horticultural Society Saturday, March 6, 1909, to speak on "Methods of Propagating Plants," but owing to illness was compelled to send in his paper to be read by Secretary W. P. Rich. J. A. Pettigrew of the Boston Park Commission presided.

Seeds, the paper stated, should always be selected with care, and different seeds require different treatments. Those of the plum and peach, for instance, will not germinate until they have been frozen hard. Many tree seeds are packed in dry earth all winter, and some of the hard kinds must be soaked in warm water before planting. Only fresh seed should be used.

Soil and situation are next to be considered. A deep rich loam well manured and as free from weeds as possible should be selected, sheltered from north and west winds. Planting in rows is preferable to broadcast sowing. Large seeds should be planted twice the depth of the seed—say an inch for beech or oak and two inches for hickory. The soil should be neither dry nor wet. Many tree seeds will not come up until the second year. Red and white maple seeds should be sown as soon as gathered and if well cared for will come up in one year. When seeds are sown in the fall, as soon as the ground is frozen, cover with hay or pine needles. As soon as plants are up they should be cultivated and kept free from weeds. All watering should be stopped after the first of September to harden the wood. Ploughing between the drills is helpful.

Seeds just arrived from foreign stations should be treated with unusual care. If mildewed, they should be treated with a weak solution of copper sulphate. Nearly all deciduous plants should be transplanted after the first year. Box planting is a good system because it facilitates handling of the plants. About April put the boxes in frames where they will get the morning sun. In winter they can be kept in good condition if covered with sphagnum moss or pine needles. The critical time with young conifers is the first three weeks before they have a crown bud. Hot sun and excessive rain kill thousands of trees. After August they will need very little special care.

The propagation of kalmias, rhododendrons and plants of this class is especially difficult, and should not be attempted except in a greenhouse. They must be transplanted frequently. A sprinkling of hot sand will destroy fungi without destroying the plants.

Many shrubs and trees can be grown from cuttings or from pieces of the root. The elm is an example of the latter class. The willows root readily from wood cuttings. Many of the roses it is almost impossible to grow from hard wood. Many plants root easier from soft cuttings in summer than from hard wood cuttings. Shrub cuttings should be five or six inches long but willows may be longer. If the ground is well sheltered cuttings may be planted out in frames or nursery

rows in the fall. The soil should be good and deep and well watered. By the end of the second year they should be ready for transplanting. In growing soft-wood cuttings boxes or frames should be used, and need much more care than the hard ones. The earlier rooted plants can be set out in frames in spring and will be in good shape by winter if well cared for. Plants with stolons or underground stems, can be propagated from cuttings. Many plants wanted on their own roots can be had by layering. Layers are branches of plants cut partly through and buried in soil. They will then root at the eyes or place of cutting. By twisting the branch the flow of sap can be prevented. The sap must be regulated. Almost any branch or vine can be grown this way. Grapes may be cut off from the parent plant in the fall, but maples must be kept on the main plant two years.

Mr. Dawson's paper did not go into all the methods of grafting, but explained some of its features. All woody plants may be grafted. Old orchards may be made vigorous by grafting, although generally grafted plants do not live as long as plants on their own roots. There are some fifty methods of grafting, but these are modifications of some five or six ways. Scions should be cut before the sap is well started, and grafting should be done in the spring. Scions should be well-ripened wood at least one year old. The paper described the various technical processes of inarching, grafting by approach, tongue grafting, bottle grafting, cleft grafting, side grafting, etc. All methods of grafting can be used on roots. Budding consists in taking a bud from one plant, with a piece of bark, and inserting it in a cut in another plant. Most nurserymen propagate more by budding than by grafting.

DURING RECESS.

Lenox Horticultural Society.

The annual dinner of this society was held at the Curtis Hotel Thursday, March 4th, and was a decided success, about eighty members and friends being present. The night was far from being ideal as a blizzard was raging at the time, otherwise the attendance would have been much larger. After doing justice to the good things provided by Landlord Curtis, President A. Jenkins spoke in behalf of the society, and introduced A. McConachie as toastmaster for the evening. Thos. J. Grey in a humorous speech spoke on behalf of the Gardeners' and Florists' Club of Boston, and the North Shore Horticultural Society. During the course of the evening a telegram was read from A. T. Boddington, New York, regretting his inability to attend and wishing the members a pleasant time. Various other persons contributed to the success of the evening, namely, Mrs. J. Clifford, Mrs. Geo. Mole, Messrs. W. Glennan, F. Howard, W. Jack and W. D. Curtis. Upon a suggestion from the toastmaster a rising vote of appreciation was accorded to W. D. Curtis for the splendid banquet, and closed with the entire party singing Auld Lang Syne. The committee, of which E. Jenkins was chairman, are to be congratulated upon the success attending their efforts.

Auburn, N. J.—Fire on March 4 completely destroyed the seed house of William England.

St. Louis, Mo.—Walter Retzer, vice-president of the St. Louis Seed Co., St. Louis, Mo., has disposed of his interest in the firm and will go to South America.

CATALOGUES RECEIVED.

Fraser Nursery Company, Huntsville, Ala.—Surplus List No. 2.

S. C. Moon, Morrisville, Pa.—Wholesale Price List for Spring 1909.

W. H. Elliott, Brighton, Mass.—Price List Folder of Roses, Asparagus, etc.

Rockmount Nursery, D. M. Andrews, Prop., Boulder, Colo.—Catalogue of Hardy Garden Material.

Louis P. Faulk, West View, Pa.—Wholesale Price List of Rooted Cuttings and Potted Plants.

Barnes Bros. Nursery Co., Yalesville, Conn.—Descriptive and Illustrative Catalogue of Fruit and Ornamental Trees, Shrubs, etc.

Thomas J. Grey Co., Boston, Mass.—Seed Catalogue for 1909. Full of good material and strong on agricultural implements, as usual.

Mrs. Bessie M. Rupert, Portland, Me.—Descriptive List of Dahlias. A well-selected list, including many of the choicest novelties.

Meier & Shoemaker, Cincinnati, O.—“A Book of Interest to Seed, Plant and Bulb Buyers.” Price list of flower and vegetable seeds, plants, etc.

Conard & Jones Company, West Grove, Pa.—Trade Price List, 1909. Illustrated; cover picture, new white Canna “Mont Blanc Improved.”

W. W. Rawson & Co., Boston, Mass.—Special Catalogue of Dahlias. A splendid list which every dahlia fancier should have. Handsomely illustrated.

Ralph M. Ward & Co., New York City.—Wholesale List of Lilies and Japan Products, French and Dutch bulbs. Many interesting illustrations, views in Japan, etc.

Wilhelm Pfützer, Stuttgart.—General Catalogue and Price List of Seeds and

Ornamental Plants. As usual, interesting and reliable. Gladioli in colors form cover illustration.

W. A. Manda, South Orange, N. J.—Novelties and Specialties for 1909. Dracaena Mandaiana and Polypodium Mandalanum are cover illustrations well worthy of the honor.

J. S. Wilson Floral Co., Des Moines, Ia.—Wholesale Trade List, Spring 1909. Undoubtedly the forerunner of something bigger in the future but a good starter for a new concern.

Haskell Implement and Seed Company, Boston, Mass.—General Seed Catalogue. Devoted largely to farm and vegetable garden seeds and agricultural implements. An attractive publication.

Mohican Peony Gardens, Sinking Springs, Pa.—An interesting booklet on the peony, in which is comprised a general price list of one hundred varieties of double peonies, selected as the best extant.

T. C. Thurlow & Co., West Newbury, Mass.—Special Price List of Cherry Hill Nurseries. Ornamental trees and shrubs, deciduous and evergreen, herbaceous plants, etc., are specialties with this well known firm.

M. H. Walsh, Woods Hole, Mass.—Handbook of Roses. A beautiful publication with attractive cover in colors, showing ramblers roses, Snowdrift and Bonnie Belle, on front and Paradise and Exelsa on back page.

W. A. Manda, South Orange, N. J.—“Pocket Garden Dictionary and Catalogue of Everything Pertaining to Horticulture, 1909.” A complete list of outdoor and indoor material freely illustrated and carefully edited.

Valdesian Nurseries, Bostic, N. C.—Surplus list of Forest and Shade Trees, Shrubs, Roses, Berry Plants, etc. Wholesale only. A half million of California and Amoor River Privets for spring delivery are among the special offers.

Elm City Nursery Co., New Haven, Conn.—Catalogue for 1909. A publication at once ornamental and useful. Well edited and indexed, and brim full of suggestion and valuable information on the subject of ornamental shrubbery and trees.

Wagner Park Conservatories, Sidney, Ohio.—“A Catalogue of Some Beautiful Flowers.” This is an art publication from start to finish, and the taste displayed in its make-up is creditable to author and printer alike. Cover conventional, in two colors on cream-tinted paper.

New England Nurseries, Bedford, Mass.—“New and Rare Things Worth While Planting.” This publication is a supplement to the general catalogue sent out by this enterprising nursery establishment. It lists many gems of recent introduction as well as the best of the older varieties that deserve to be more widely known, in trees and shrubs and hardy border plants.

Of Interest to Retail Florists

THUMB TWIDDLING.

Many new stores open and wonder why customers don't come. The public is coy and has to be wooed. How to woo it, is the question. One thing is sure: the man who sits down with his feet upon the desk waiting for the public to come and woo him is lost. What is wanted in a new store or other enterprise is a man of brains and action. One who the minute he gets on his job makes things begin to happen! Is there business to be got there? How can it be got? Set your subordinates to work and hustle! Not only that, as to ordinary trading, but begin to think of constructive work. Is there a waste space anywhere that can be made productive? An obsolete building that occupies valuable space? A poorly lighted house with nothing in it while it might be growing ferns or asparagus? A swamp to be drained so that

BUSINESS CHANGES.

Mohawk, N. Y.—William Dobler has
leased the Snell Greenhouses.
Findlay, O.—William Fellebaum has
withdrawn from the firm of E. J.
Foster & Co.
Ilion, N. Y.—Edward J. Baker, of
Ilion has purchased the florist busi-
ness of Hakes & Son.
New York, N. Y.—Charles Thorley
will move to West 28th street on April
15. A. L. Young & Co. have leased
the store at 46 West 28th street.

FIRE RECORD.

Fire completely destroyed the new
residence of C. C. Sanders, Henby
road, St. Louis, on Monday, March 15,
at 4 o'clock A. M. The family were
all asleep when the fire was dis-
covered and had to flee for their lives.
The loss is covered by insurance. The
family have returned to their old home
on Delmar blvd.

ST. LOUIS NOTES.

The Schaffer Floral Co., who recently
opened a floral establishment on 6th
St., have decided that the venture did
not pay and will close up the place
March 22. Mr. Julius Schaffer, presi-
dent of the company has accepted a
position with Adolph Brin.

J. A. Valentine, president of the S.
A. F., stopped over in this city on
his way to attend the Executive Com-
mittee meeting at Cincinnati on March
13. He was taken in charge by O. G.
Koenig, Fred Meinhardt and Theo.
Miller, and after an automobile tour of
the city and supper at the Washington
Hotel, he left on Friday night.

Mr. Morris Cohn, representing Wer-
theimer Bros., was a visitor in Albany
this week.

Flower Market Reports.

BOSTON The market remains about the same as last week; little if any fluctuations as regards prices. White carnations are more in abundance, with roses a close second. Many large orders have already been received for Easter and it looks on the surface at the present writing that the business of last year would be more than doubled.

BUFFALO The first part of the previous week trade was rather quiet in the cut-flower line though the balance of the week, especially Saturday, found a livelier situation, stock being plentiful, especially colored carnations. White material was in much better demand and cleaned up satisfactorily. Violets were in fine form and sold somewhat better than previous week. Lily of the valley is still on the quiet side, as well as tulips and other bulbous stock. Callas have been in heavy supply with little or no demand. Roses are coming in a little more plentiful and choice stuff sells readily. There is a good supply of greens.

CHICAGO The usual mid-Lent increase in business was looked for and Chicago florists, both wholesale and retail, were not disappointed. What they did not look for, however, was the dropping off of stock. The almost total lack of sunshine for weeks has greatly reduced the supply of nearly everything. There is a special dearth in white carnations, more noticeable because upon them depends the possibility of the green carnation for St. Patrick's Day. While many retailers declare the taste for this unnatural flower is fast dying out the books of the wholesalers find orders increasing. Roses are not plentiful, though good Beauties are not so hard to find as last month. Bridesmaids and Killarneys are close rivals, Killarney bringing a slight advance in price. All bulbous stock is going at fair prices and throughout the season very little has been lost. Too large shipments of eastern violets have had a tendency to keep prices lower than Chicago growers wish and the market continues to remain about the same. Chas. McKellar finds sales on gardenias fairly good. Cattleya Schroederae stock is fine but the trade in general seems to prefer a deeper color. On the whole trade is unusually good for the Lenten season. The sales of shamrock plants are steadily increasing and this season will show a great advance over last.

DETROIT The reports received from various retailers during the last week are encouraging and the Lenten season so far has been better than usual. Stock is still at low ebb, especially carnations, but the presence of a large variety of bulbous flowers eliminates this scarcity to a great extent.

INDIANAPOLIS There has been no perceptible falling off of business since the opening of the Lenten season; the demand for all occasions has averaged up encouragingly and has been well distributed among the dealers. Good Beauties are still scarce, there being no surplus even with the light demand. Tea roses are plentiful

and sell at a very moderate price. Carnations are fine and cheap. Bulbous stock is quoted at surprisingly low figures and is being displayed in immense quantities. Sweet peas and lily of the valley, violets, daisies, are moved daily in large numbers. The best Easter lilies are sold to advantage. Cattleyas are scarce and have advanced in price. Quantities of green goods are being handled.

PHILADELPHIA A brisk demand for carnations was a leading feature of last week's market. Whites especially were in demand and seemed to be scarcer than usual. The scarcity is not easily explained as these usually bloom as freely as other varieties. The demand is also obscure; but it may be partly explained by the unlovely custom of dyeing them green for St. Patrick's. Roses, also, sold a little better and, as for quality, the Killarneys and Richmonds and Jardines that are now coming in are simply magnificent. As expected, American Beauty has commenced to produce again more freely and is now coming in abundantly, the quality of the long-stem specials being exceptionally fine for the season. Southern daffodils have made their advent in quantity. The large flowered varieties meet with ready sale, but there is very little demand for the small kinds. Tulips are now pretty well cut out, and those coming on are mostly for the Easter market. First-class tulips sold well this year, and it is to be hoped that growers will hold to the same conservative planting policy another year. It is the easiest thing in the world to overdo the tulip market. More than ever the shamrock has been featured

by the retailers for St. Patrick's week this year. There is perhaps not much money in them but they are cheap, and a windowful of them tastefully beribboned is a pleasing and popular sight for the passing throng. The department stores gave little pots of these by the hundred thousand free to their customers, which is bad in one way and good in another. One thing is sure: more shamrocks are being sold every year; so that the giving free in past years has evidently helped this trade rather than hurt it, when all is said and done. There are too many violets around for the demand. Lily of the valley is also a trifle too plentiful. Cattleyas have taken on another spurt of blooming and prices are easier. Easter lilies are selling better than callas now—a reversal of recent conditions. There is any amount of mignonette, freesia, lilac, and such minor items to be had on moderate terms. The usual Saturday clean-up to the street men failed on account of the activity of Old Boreas and Jupiter Pluvius.

WASHINGTON Now that Washington has pulled itself together a little after the dreadful recent storm, trade has improved and prices have not had their usual Lenten tumble, though this may be partly due to the fact that owing to such continued cloudy weather there is not an overplus of stock. Pennsylvania is shipping flowers here, particularly California violets, at such a ridiculously low figure that local growers cannot begin to compete with them. There has been an immense run on jonquils and narcissi lately for cheap luncheon decorations.

EVERYBODY KNOWS

Park, Cemetery and Landscape Gardening cannot be properly done without the aid of an accurate leveling instrument.

Bostrom's Improved Levels, No. 2 at \$15.00 and No. 3 at \$25.00, are conceded by all who **KNOW** to be the only Levels on the market which meet all the requirements, at the price.

Our guarantee back of every Level we sell, and satisfied users in every State in the Union heartily endorse every claim we make.

Shipping weight 12 lbs. Description on request.

WASHINGTON PERSONALS.

Peter Bisset of Twin Oaks, has gone to Buffalo to attend the convention of the American Rose Society.

The Washington public, and particularly the friends of the contracting parties, were very much surprised on Friday last when F. H. Kramer and his cashier, Miss Chedel, slipped away in a big touring car and were quietly married in Rockville, Md.

C. L. Reynolds of U. S. Botanic Gardens, who was hurt so seriously some time since by a runaway horse, has had another experience with the same horse, the result being a scarred head, but not so serious as before. His limb is out of the plaster cast.

NEWS NOTES.

N. Stratford, N. H.—Frank R. Jones has leased the Foss greenhouses.

Pendleton, Ore.—F. J. Prann is making preparations to start in the nursery business here.

Rosindale, Mass.—The greenhouses of Oscar Knight, Beach street and Belgrade avenue, were entered on March 12 and a quantity of flowers stolen.

Banksville, Conn.—Fred Farwell has resigned his position as gardener at Conyers Manor and started in business with his uncle, Louis Elliott, at Katonah, N. Y.

NEW YORK MARKET.

The market is in a very inactive condition. The last of the week things seemed literally to go to pieces and on Monday and Tuesday a similar condition prevailed. It was especially pronounced on tea roses. The only bright spot was white carnations, which moved at a lively pace. Orchids and gardenias are in excellent demand.

MOVEMENTS OF GARDENERS.

Victor May, formerly at Elm Court, Lenox, Mass., has taken a position with T. W. Head, at Groton, Conn.

Joseph King is reported to have resigned his position as gardener to Jesse L. Eddie, Normandie Heights, N. J.

Olof Haahr has resigned his position as gardener to John A. Stewart, Madison Ave., Morristown, and John Whelan, for the past three years gardener to C. W. Armour has secured the position, to begin April 1.

A. R. Kennedy of Brook Lake, Madison, N. J., is reported to have resigned his position. Mr. Kennedy has been one of the most active members of the Morris County Gardeners' and Florists' Society during the time he has been in Madison and prominent in all the exhibitions held by the Society, competitive or otherwise. If the report is true and Mr. Kennedy decides to leave us the Society will feel the loss. The best wishes of every member will be with him wherever he goes.

State Street merchants in Chicago cabled an order for a handsome floral piece to be presented to H. G. Selfridge in London on the opening of his big department store, March 15. Mr. Selfridge was formerly manager for Marshall Field & Co.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

THE QUESTION OF STRENGTH

IT is conceded that the strongest and most durable structure known is "THE IRON FRAME." And when you have all the *Modern* features combined in this type of construction you have "The Ideal Greenhouse."

The picture shows the beautiful symmetry of my "Curved Iceless Eave" — no heavy antiquated shading members. And I also make a specialty of having my work harmonize with surrounding conditions. Note how the mason work on greenhouse conforms to that on adjacent stable.

The advice of "The Practical Greenhouse Builder" is at your disposal for the asking.

HEADER FACTS

You know that it is not safe construction to depend on a couple of nails, toed into the header, to hold the bars.

The same roof bar brackets that are such stiffeners on our eaves, we also use at the header.

An angle purlin stiffens the cypress header, which is grooved for the glass, and milled with a drip gutter.

Other construction facts shown in new circular — send for it.

Hitchings & Company
1170 Broadway New York

The Purely Practical

Here's a house 18 ft. wide and 50 ft. long with two compartments. You see the shingle sides are substituted for the usual masonry foundation, which of course makes a less expensive job but quite as attractive. There are many little wrinkles we can point out to you to bring your house within a certain limited expenditure. None of these wrinkles however will in any way affect either the superior growing qualities or endurance of the house. It will be our sectional iron frame construction just the same. The best thing for you to do, is get in touch with us.

Lord & Burnham Co.

Main Sales Office: 1133 BROADWAY, N.Y.

BOSTON: 819 Tremont Building, PHILADELPHIA: 1215 Filbert St.

ABOUT ITS ERECTION

Taken side by side, with conditions equal, the U-Bar house can be erected with least trouble and greatest speed. Look at a U-Bar house and it is plain enough why — rafter and roof bars combined in one — the entire frame reduced to a mere web — no complicated fittings to bolt up — one third less glazing to do, because the glass is spaced one third wider — simply straight away work from start to finish. If yours is a case where time counts and where greatest endurance and highest productiveness are requirements, then send for a catalog and get in immediate touch with us

DEVOTED TO THE
FLORIST, PLANTSMAN, LANDSCAPE GARDENER AND KINDRED INTERESTS

PUBLISHED EVERY SATURDAY AT 11 HAMILTON PLACE, BOSTON, MASS.

SUBSCRIPTION, \$1.00 PER YEAR

NEW DAHLIAS

Plants for Delivery April 1st.

JACK ROSE, (Decorative). Rich velvety crimson, early and free blooming on long stems, an ideal cut flower.

VIRGINIA MAULE, (Decorative). Delicate tint of shell pink, it certainly is the coming commercial pink Dahlia.

PRINCESS VICTORIA, (Show). Pure creamy yellow, without shade or tints; from bud until old age.

ETHEL SCHMIDT, (Show). Pure white, flushed delicate pink, dotted and penciled crimson.

SENSATION. A new double century, vivid vermilion, heavily tipped white.

BIG CHIEF. A new double century, brilliant cherry red, margined rich velvety maroon.

GLADYS, (Century). Each petal has a brilliant rose crimson center divided from the broad rose pink edge by a white penciling.

FRINGED 20TH CENTURY. Similar to 20th Century in color, the petals are deeply cleft, giving it a fringed appearance.

ROSE PINK CENTURY. Clear rose pink, immense size, perfect form and suffused soft rose lake.

FRINGED BEAUTY. An other fringed Century, large white overlaid suffused soft rose lake.

50c each, \$5.00 per Doz., \$35.00 per 100, except Princess Victoria which is \$1.00 each, \$10.00 per Doz.

For prices on one of the best collections of Standard Varieties at \$2.00 to \$6.00 per 100, see our General Wholesale List.

For Geraniums and Miscellaneous Greenhouse Stock see our issue in March 20th. For Early Vegetable Plants see Vegetable Advertisement.

**NEW
ROSE**

WHITE KILLARNEY

We Know You Will Want to Buy White Killarney

Every live, progressive, up-to-date grower who has seen it is buying it; but when you buy White Killarney, be sure you get the right White Killarney (the Waban variety). When you buy from us you get the variety that has been exhibited and certificated, and the one that has attracted such favorable mention.

If you are in the vicinity of New York, we should be glad to have you call and see White Killarney growing at our Scarborough range, and you will say at a glance—as everyone has who has seen it growing—that it is by far the best white rose that has ever been placed on the market.

It is not only a good winter-flowering rose, but is good the entire year, and it is a splendid shipper. Read the following letter received from Mr. Willis N. Rudd, Secretary of the Society of American Florists, dated January 18th, in which he writes as follows:

"Dear Mr. Pierson:—I cannot refrain from writing you and expressing my admiration for the White Killarney as shown at Chicago on Thursday. It is an exquisitely beautiful thing and attracted much attention. I took half the blooms home with me, and they were finer on Saturday than they were at the show. The record is that these blooms were shipped from Tarrytown, staged and exhibited during the afternoon. They were then carefully wrapped up in a box, and remained in that box until one o'clock Friday morning, at which time I reached home; improved in quality up to Saturday, and were in fairly presentable condition on Sunday.

"In addition to being the most beautiful white rose of its class which I have seen, this demonstrates its splendid keeping and shipping qualities."

W. N. RUDD."

We were awarded Silver Cup at National Flower Show, Chicago, for best new rose with White Killarney; also Silver Medal Horticultural Society of New York.

Strong plants, 2 1/4 inch pots, own roots, now ready for delivery, \$30.00 per 100; 250 for \$70.00; 500 for \$125.00; 1000 for \$250.00. Grafted plants, ready April 1st, \$35.00 per 100; 250 for \$82.50; 500 for \$150.00; 1,000 for \$300.00.

Catasetum maculatum

Male Flowers

Female Flowers

In the great natural order of Orchideæ the genus *Catasetum*, together with its allies *Cynoches* and *Mormodes*, stands out very prominently from the rest of that great and varied family. It is not the beauty of their flowers, for these are as a rule more homely than beautiful, but the wonderful construction of these flowers and the habit of producing from the same bulb both male and female flowers which are very distinct from one another both in form and color, that makes these plants so interesting to the lover of flowers and of orchids especially.

Our illustrations show *Catasetum maculatum* with a raceme of eight male flowers and the same plant and pseudo-bulb with a raceme of five female flowers produced about two months later. The male flowers are of a yellowish green color shaded and suffused with brown (usually the flowers of the species are densely spotted with brown) whereas the female flowers are a pea-green with darker shadings of the same color. The male flowers are freely produced on the different species, but it is very seldom one has an opportunity to see female flowers or to see and compare both sexes together. The male flowers, *C. maculatum*, for instance, have been known since 1822 when they were collected by Humboldt and Bonpland at Turbaco, Columbia (see *Orchid Review*, Vol. XVII, p. 38), but female flowers of the genus were not known until 1893 when they appeared at Kew and shortly afterwards at the Royal Botanic Gardens, Glasnevin. They might have appeared elsewhere prior to that time, but were not recognized as belonging to that genus; in fact very little was known in those days of the separation of the two sexes in these genera and to this day the female flowers of some species are still unknown and in a few instances female flowers have appeared where the corresponding male flowers were unknown. It is a very perplexing genus for botanists to work on.

The pictures show the difference between the sexes very plainly except for the two horns which are connected with a case covering the pollen masses. These two antennae or horns descend (or ascend, rather, as the flowers appear to grow upside down) into the pouch and they are so sensitive at the ends, that upon the slightest

touch the pollen mass, consisting of two egg-shaped yellow masses attached to a short column, will be released, jump out with considerable force and stick to whatever insect or other object it may happen to strike.

These sensitive horns which make the male flowers so interesting are absent in the female flowers; the pouch in these latter is much more massive and more globose than in the former and will adhere to the column until the seed is ripe.

The culture of *Catasetums* is very simple. I use osmunda fibre with a little sphagnum moss for a compost, small pots and plenty of drainage. While growing they will require stove temperature, suspended where they can get the maximum of light. Water very sparingly until the new pseudo-bulbs commence to swell out, else they are very apt to rot off. After the pseudo-bulbs commence to swell give plenty of water (occasionally liquid manure) until they are fully matured; then water is at first gradually, and later entirely withheld until the plants start to grow again. They are rested in a temperature of 50 degrees to 55 degrees in full sun.

Naugatuck, Conn.

M. J. Pope

The Great International Horticultural Exhibition in Berlin

This big affair instituted by the Verein Zur Beforderung des Gartenbaues and which takes place from April 2-13 this year, in the Berlin Zoological Garden, enjoys the sympathy of the various authorities, corporate bodies, and of a wide section of the public. The Protector of the Verein is the Kaiser Wilhelm II, who will present a magnificent Prize of Honor from the Royal Porcelain factory. The Crown Prince and the Crown Princess intend to award other Prizes of Honor. A number of prizes will be given by many of the cities of Germany.

An opportune gift

The American Rose Society is to be congratulated on the substantial gift received from Mrs. Gardiner G. Hubbard of Washington, as announced in our news columns last week. Mrs. Hubbard has been a life-long patron of horticulture, formerly at Cambridge, Mass., and later at Twin Oaks, Washington, D. C., from whence have come some widely-known productions—notably nymphaeas raised by her very proficient gardener, Peter Bisset. We hope to see Mrs. Hubbard's good example followed by others not only in the interests of the rose but to encourage and advance the improvement of other floral products. We cannot have too many such friends of the "art which doth mend Nature."

Still they come

While perhaps less altruistic in sentiment, the gift to the Rose Society from our contemporary, The Garden Magazine, is certainly a generous one and the award of the medals offered, in the manner as proposed, cannot fail to awaken an appreciative response. The recognition of meritorious achievement as distinct from competitive preeminence is a step worthy of the highest approbation and if carried on with due care and wisdom will undoubtedly prove a healthy incentive to zealous effort for cultural excellence and in the production of new races and improved types. With the two medal funds above mentioned, three thousand dollars in the treasury, and the cordial support of so many of the most intelligent and progressive men in American Horticulture, a brilliant future seems now assured for the American Rose Society.

A new feature in horticultural exhibitions

The problem of securing the support of the public at horticultural exhibitions, with the double end in view of making these affairs financially profitable and educating the people in flower appreciation and garden art, is far from being satisfactorily solved in this country. To the extent that the spring show now in progress in Boston is an effort in that direction its outcome will be peculiarly interesting and may have a far-reaching bearing on the manner of planning and carrying out future enterprises of like character in Boston and elsewhere. Not all halls are fitted for the placing of such an exhibition as the one under consideration. Adaptability for concerts, balls and similar social affairs and adaptability for garden shows where water may be thrown around with impunity, are not exactly reconcilable under one roof and in this connection it may be stated that the Japanese garden which is so strong a feature in the present show is the only attempt since the completion of the Horticultural building, to take advantage of the peculiar features of this hall on the lines as intended by the gentlemen responsible for its planning. Because of these very departures from the conventional style and construction of assembly halls this building has been the subject of more or less criticism. While it is conceded that radical changes must be made before the hall can be rented to advantage and made to yield the much-needed annual revenue, yet it is gratifying that at last a partial demonstration of its possibilities as originally planned has been given the members and the public. Those who visit this show will perhaps better understand what we have had in mind when urging the necessity of breaking away from the antiquated and uncared-for system of long tables with rows of flower vases and rows of fruit plates if we expect to awaken public interest in horticultural exhibitions.

Sodium Cyanide and Potassium Cyanide

Editor of HORTICULTURE:

Dear Sir:—The following explanation concerning sodium cyanide and potassium cyanide may be of interest to readers of your paper.

Both these substances are composed of cyanide, combined in the one case with sodium and in the other with potassium. With salts of equal purity there would be more cyanide in the sodium cyanide than in the potassium cyanide in the ratio of about 5 to 4. Potash costs more than soda, and there is less soda in the one than there is potash in the other.

When the sulphuric acid is added, the cyanide is let loose and potassium or sodium sulphate is left behind in the dish and, while the sulphate of potash is more valuable than sulphate of soda, this is not a matter of any moment, for it is not common to use this impure sodium sulphate as a fertilizer.

From the horticultural point of view the consideration is the gas made from the sulphuric acid and the cyanide, and it can make little or no difference whence it comes in the case of these two salts.

From the commercial point of view, the question is, to get cyanide as cheaply as possible. It is common to quote prices on these two chemicals not so much per pound for one or the other, but to quote a price in the ratio of about 5 to 4 of the cyanide content. In this case the buyer may pay his money and take his choice unless there are some minor points that may influence him, in one way or the other, of which we have not spoken.

As a matter of fact we would expect that the cyanide in sodium cyanide should be purchased a wee bit cheaper than cyanide in potassium cyanide for the reasons above mentioned; unless the manufacture of the sodium salt is more expensive, which we do not believe. So on the whole there can not be any tremendous advantage in the use of either one over the other.

Rudley M. Pray

British Horticulture

THE PERPETUAL FLOWERING CARNATION SOCIETY

An interesting display is expected at the show which will be held by this Society in London on March 24th. At the annual meeting it was reported that a scheme for the registration of the names of new varieties has been adopted. The scale of points for judging and for awarding certificates and awards of merit has been altered. A variety must gain at least 85 points to entitle it to a first-class certificate, and 75 points to entitle it to an award of merit. The points allowed are as follows: Color, 20; size, 20; fragrance, 10; substance, 10; calyx, 5; habit of plant, 20; form, 15. Two cups have been presented to the Society—one by the American Carnation Society and the other by Lord Howard de Walden. It has been decided that these trophies shall be held as challenge cups in perpetuity.

THE R. H. S. FIXTURES

An exceptionally fine display was made at the forced spring bulbs show at the Royal Horticultural Society's hall on March 9th. An excellent list of fixtures has been arranged by the Society for the remainder of the year. On April 20th an auricula and primula show will be held, and on May 14th there is to be a show of

tulips. The spring flower show takes place at the Temple Gardens on May 26th. The first Masters' memorial lecture is to be delivered by Prof. Hugo de Vries, on June 22. The summer show at Holland Park takes place on July 6. Other important dates are July 21, carnations; July 23, sweet peas; Sept. 16, autumn roses; Dec. 1, colonial grown fruit and vegetables; Dec. 8, winter carnations.

London, Eng.

W. H. Adsett.

Recollections of Father Terry

I had heard occasionally of this patient, hard-working man, and about seven years ago I made him a visit. It was when his glorious peonies were in full bloom. Up to that time his collection was the finest I had ever seen. The man impressed me from the first. His was the soul of beauty. He was a favorite of good mother Nature and seemed at home in her very "holy of holies." How he loved his flowers. We spent a long time among them and I helped him name some of them.

He had already originated some 50 kinds of plums and had named perhaps 75 kinds of peonies. The number afterward reached 100. With soul attuned to the beautiful, with an intense desire to benefit the world with his new creations, in financial matters he was as helpless as a child. I contrasted his condition with Kelway of England. Taking out half a dozen of his finest, Terry had as choice a collection as Kelway. The races each was propagating were different; very many of the English born were far too delicate and sensitive to our western condition. Planted side by side, one class in a trying season would hardly produce a flower while those born in Iowa were full of vitality and the great robust blossoms would seem to look down on their foreign sisters with pity.

The difference between the two men was largely in printer's ink. One man was selling plants of no especial merit at enormous prices and another was selling very fine ones at a low price and the whole stock seemed to go begging. I asked him how much he was selling a year? Only about \$100 out of that splendid collection. The sight was pathetic. All around was dilapidation. The barn had been burned up. The house was poor, old, unpainted and uncomfortable. The wife—a noble woman—was working beyond her strength. It recalled the case of Bull of Concord fame—a wonderful faculty for blessing the country and the age and no faculty whatever for getting money out of it.

You need not wonder I took the case, writing for papers with a half million circulation. I told as best I knew how of his grand work. Two years after I visited him again and he was selling \$1,000 worth a year and soon after he sold most of his collection for \$2,500. The help did me good and it was but justice to him.

I spent his 80th birthday with him. His soul was still young and he was planning for the future. He and his wife belonged to one branch of the Saturday Saints. Not the Utah polygamous bunch but to the evangelical branch led by the sons of the founder who are utterly repudiated by the main body of the Mormons. Such a man ought not to be forgotten. He named and put on the market too many peonies. But at least 10 of them are of superior merit. They will perpetuate his memory and his soul will smile through them upon thousands of admirers for years to come.

York, Neb.

C. S. Hammon

NEWS OF THE CLUBS AND SOCIETIES

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Meeting of the Executive Board.

Pursuant to the call of President Valentine the regular mid-Lent meeting of the Executive Board was held at the Sinton Hotel, Cincinnati, March 13, 15 and 16. Those in attendance were President Valentine, Messrs. Traendly, Vesey, Gillett, Dailledouze, Asmus and Rudd.

The usual routine business was transacted, including the adoption of a program for the annual convention next August.

A protest against the charges for space at the late trade exhibition at Niagara Falls was received and after careful consideration of the matter the following resolution was adopted:

"In view of the fact that it is not shown that the parties protesting were charged on any different basis than many other exhibitors who have paid their bills without protest, the board cannot see how in justice to the other exhibitors any rebate can be made in the special cases in question." In view of the dissatisfaction at the late trade exhibit and of the constant friction between exhibitors and managers in years past, it was decided that for the next exhibition the charges for space would be largely reduced and in consideration of that reduction the exhibitors would be required to furnish their own tables and cloth covering for them.

The question of rules for the exhibition was referred to a special committee with instructions to prepare and present at a later session a thorough revision of them.

The report of the treasurer and the financial report of the secretary for the year 1908, and also supplemental reports covering the months of January and February, were received. The financial reports of the secretary were presented as approved and endorsed by a firm of public accountants, in accordance with a resolution adopted at the meeting of 1908. These reports were submitted, together with the vouchers, to a committee consisting of Messrs. Traendly and Vesey, and were examined by them and reported correct, and were then received by the board.

A recommendation from the society for the election of an honorary member was considered, and it was decided that as there was no specific provision for the election of an honorary member in the by-laws, it was inexpedient to authorize such action.

It being considered that the presidential addresses in the past have not been properly acted upon and that many important recommendations have failed of attention, the president was requested to appoint a committee in advance of the convention and to submit to the members of this committee copies of his address, and the committee be instructed to make a special report on the address and its recommendations and some time to be specifically set aside in the program for

a general discussion of the address and its report.

A proposed amendment increasing the fee for life membership from \$25 to \$50 was received and ordered printed in the program for action at the next convention.

A request from the Cincinnati Florists' Club that they be allowed to issue tickets and collect admission from the general public on Thursday in place of receiving any portion of the proceeds of the trade exhibition otherwise, was granted.

It was decided that all interest on the society's funds, both general and permanent, collected during the year 1908 should be transferred to the permanent fund.

In connection with the committee of the local club, the board examined the halls submitted for the trade exhibition and the meetings, namely: two floors in the Music Hall for the trade exhibition and the Odeon Hall for the meetings, and accepted them. The usual appropriations were made for the year.

The secretary was authorized to deposit copies of the old reports of the society now on hand with various experiment stations, libraries and public institutions willing to accept and care for them, when it would appear that such deposit would render them available to the public and advance the general interests of horticulture.

The treasurer's report showed that the permanent fund now amounted to over \$6,000, and it was deemed that steps looking to the permanent investment of the same be taken and a committee consisting of Treasurer Beatty and Messrs. Vesey and Dailledouze was appointed to make such investment.

The following resolution to the memory of the late Edward V. Hallock was received and adopted:

To the memory of Edward V. Hallock.—We, the members of the Executive Committee of the Society of American Florists and Ornamental Horticulturists, in session assembled, have no words at our command that will express our sorrow for the taking from our midst of our fellow worker and beloved friend, E. V. Hallock. We desire to extend to his family our heartfelt sympathy. He was a good man and true, honorable and conscientious and loved by all who knew him. Peace to his ashes; not ours, but *Thy* will be done. Therefore be it Resolved, that these few lines be spread upon the minutes and a copy be forwarded to the bereaved family.

The Exhibition Rules Committee reported that a proper revision of the rules would require very careful consideration and would take more time than was available. They were therefore given power to act in the matter at a later date.

Mr. Wm. Murphy having been recommended by Vice-President Gillett and the Cincinnati Florists' Club for superintendent of the trade exhibition, was unanimously elected to that office.

A resolution was adopted that no goods should be sold at retail at the trade exhibition of this society. It was also decided that an advisory committee of three should be appointed for the trade exhibition. E. F. Winterson was appointed chairman of the Sports Committee.

Mr. Rodgers having requested the board to name some persons who

would be qualified to speak regarding floriculture before Chautauqua Associations, the following names were suggested: E. G. Hill, Robert Craig, P. O'Mara, John T. Withers, Leonard Barron.

The visit of the board to Cincinnati was made most enjoyable by the hospitality shown by the local members. The banquet at the Sinton House on Monday evening was a most enjoyable event. The entertainment by the club on Saturday night was most thoroughly appreciated and the invitation extended to the board by Mr. and Mrs. Peterson and Mr. and Mrs. Witterstaetter resulted in most enjoyable visits to their beautiful homes and places of business.

The following final resolutions were adopted:

"In closing the session we wish to tender our thanks to the Cincinnati Florists' Club and its members for their friendly reception, their effective assistance and their magnificent hospitality, and our thanks are especially due to Mr. and Mrs. Peterson and Mr. and Mrs. Witterstaetter for inviting us to their homes and receiving us with such lavish and open-handed hospitality."

Registration of Clematis.

Public notice is hereby given that the Jackson & Perkins Company of Newark, N. Y., offer for registration the plant described below. Any person objecting to the registration of this plant, or to the use of the proposed name, is requested to communicate with the undersigned at once. Failing to receive objection to the registration the same will be made three weeks from this date.

Parentage—*Clematis paniculata* X *Clematis viticella* rubra.

Description—Color of flower, deep carmine. Size and shape of flower and manner of blooming is same as *C. paniculata*.

Name—*Clematis paniculata* rubra.—W. N. RUDD, Secretary.

March 19, 1909.

MINNESOTA STATE FLORISTS' ASSOCIATION.

The monthly meeting of the Minnesota State Florists' Association, held at Snelling Ave., March 16 was well attended.

Primula denticulata exhibited by Mr. L. Boeglin scored 72 points; *Primula obconica* by Nagel & Son 79 points, and violets Princess of Wales by Hans Rosacker 78 points. The final report of the entertainment committee was not yet ready, but the chairman, Mr. Olson, reported a probable deficit of about \$20.00. Messrs. Cosgrove and Underwood from the Board of Managers of the Minnesota State Fair were present and explained matters pertaining to the premium list and larger space for exhibits of cut flowers, etc. It is up to the influential members of the association to work the Legislature for satisfactory appropriation. If the money is forthcoming, the Board of Managers will grant us what we ask for.

Mr. W. H. Frazer, from the State Agricultural School, gave a very interesting talk on Fertilizers and their Analysis, which was thoroughly discussed.

AMERICAN ROSE SOCIETY.

Buffalo's Feast.

The banquet which the Buffalo Florists' Club tendered the American Rose Society was held on Thursday evening instead of Friday, as at first announced, on account of out-of-town guests leaving on Friday morning. President Poehlmann called the meeting to order and resolutions were read on the death of Louis M. Noe and E. V. Hallock. W. F. Kasting acted as toastmaster. He was seated between the Mayor of Detroit and the Mayor of Morton Grove, and remarked upon its being a Democratic banquet, but not politically; this allusion by the toastmaster being warmly received. Mr. Poehlmann made entertaining remarks pertaining to the society and the excellent show that was had in Buffalo, and warmly congratulated the committee and the Buffalo Florists' Club on the able manner in which the affair was conducted. A rising vote of thanks was extended to the Buffalo Florists' Club, and the president further stated that he hoped to see the club members and brother florists of Buffalo and adjoining cities and towns at the next convention in New York the coming year.

Thursday, March 17th, being the 62nd birthday of Mr. Robert Craig, the secretary was instructed to telegraph congratulations to him.

Benj. Hammond, secretary of the American Rose Society, was next called upon and made a characteristic speech full of hopeful augury for the future of the society and its patrons.

Alex. Montgomery, past president and one of Boston's leading rose growers, next made an interesting address on cultural and society topics.

Robert Simpson, another ex-president, made brief remarks regarding the work of the society, stating that new members are continually coming in and better exhibits are being shown every year, which proves that the society is growing rapidly and that much interest is being manifested in the excellent shows which have been held.

The "Florist Mayor" of Detroit, Philip Breitmeyer, responded to the toastmaster's congratulatory introduction with characteristic tact and effect.

J. A. Valentine, president of the S. A. F., was next heard from, and his remarks were warmly received. F. R. Pierson, vice-president elect of the society, contributed a brief talk about the coming show next year. He stated that every effort will be made to make it equal the Buffalo exhibition, and incidentally referred to the agitation for tariff revision on bulbs.

Our report of the prize awards at the Rose Show in Buffalo last week omitted to mention the Traendly & Schenck special premium for vase of fifty American Beauties which was won by the Brant & Hentz Floral Company. The prizes for fifty Killarney were contributed by the Erie Floral Company; for fifty Richmond, by F. R. Pierson; for twenty-five American Beauty, by W. J. Palmer & Son; for collection of Teas and Hybrid Teas, by Robert Simpson; for arrangements of twelve roses in vase, by J. A. Valentine, and for thirty-six Killarneys by E. C. Ludwig.

NEW YORK AND NEW JERSEY
ASSOCIATION OF PLANT
GROWERS.

On March 15th, 1909, the members of the New York and New Jersey Association of Plant Growers visited the establishments of their members on Long Island to inspect the Easter crops. There were eighteen in number, and they travelled over the entire Long Island section in Mr. W. H. Siebrecht's automobile touring car.

One of the objects for which the association was incorporated is to foster the trade and to diffuse information as to pot plant growing. With this object in view the happy party called at almost every member's place on Long Island, and examined the plants in stock for the Easter trade. It was a very instructive day for the members and the information which was gathered made it well worth the time which was lost during their absence from their own establishments. The association has followed this practice for two years and has found it so profitable that it intends to continue the same indefinitely. The party started at the place of Herman Dreyer at Elmhurst, and from there proceeded to College Point and visited Anton Schultheis, and after seeing all the houses in that establishment they passed to Whitestone and visited Louis Dupuy, Pankok & Schumacker and the Hinode Florist Company. From there a long run was made to Jamaica, L. I., where they visited A. L. Miller's greenhouses, and from there the party proceeded to Brooklyn, where at Piel Bros. a bounteous course dinner was awaiting them. After dinner they proceeded to the establishment of John Scott in Flatbush, thence to Peter Wagner, Charles Zeller & Sons on Clarkson street, and also on Lefferts street, Brooklyn, thence to the houses of Louis Schmutz and Frank Manker. It took considerable time to go through each establishment, and when the rounds had been made it was after six o'clock and the party had enjoyed sufficient fresh air in the automobile to gather up a good appetite for the supper which was served to them in the Consumers' Park.

The following members were in the party: Julius Roehrs, Sr., Herman Dreyer, Louis Dupuy, Frederick H. Dressel, Frank Manker, Herman Macner, A. L. Miller, John Miessem, Pankok & Schumacker, Herman C. Steinhoff, Herman Schoelzel, Anton Schultheis, John Scott, Louis Schmutz, Peter Wagner, Alfred L. Zeller, and William H. Siebrecht, Jr., the secretary and attorney for the association. Mr. H. H. Lorenz had charge of the automobile.

BUFFALO FLORISTS' CLUB.

The regular meeting of the Buffalo Florist Club will be held on Tuesday, April 6th, at their rooms and an urgent request is made by the secretary that every member be present as installation of officers is one of the important features. It is being rumored about, that the officers-elect are to tender a champagne banquet after the meeting.

ROYAL HORTICULTURAL SO-
CIETY OF LONDON.

The meeting of this society held in the hall, Vincent Square, Westminster, on Tuesday, March 9th, was literally packed with exhibits from the trade and amateur cultivators and professional gardeners. The attendance of fellows of the society and general public was exceedingly great from noon onward to the close of the show at 6 P. M.

Orchids were not so numerous as on the previous occasion, and some of the novelties were the same. J. Veitch & Sons, Royal Exotic Nursery, Coombe, Wood, Langley and Feltham, all of them in London or within a few miles of it, contributed hybrid *Cypripediums* of *C. villosum* and *C. Euryalis*, which possessed a good deal of variety in shape, purplish-brown spotting or streaks of that tint on the dorsal sepal, all having also more or less white on its margin. The petals and pouch are of various brown tints, tinged with crimson, and the flowers of varying size. A *Laelio-Cattleya callistoglossa* presented very large blooms and a grand lip of a deep purple color. Other orchids shown by this firm consisted of fine varieties of *Odontoglossum crispum*, *Od. Pescatorei*, a *Dendrobium* Ophir, a hybrid between *Den. aureum* and *Den. signatum*, partaking in color—a primrose yellow—of the first named parent, and also of its fragrance something between violets and primroses.

The flowers of the hybrid have a slight purple stain and a number of striations in the throat. F. Sander & Sons exhibited extensively orchids in flower. These included *Cattleya Trianae* Queen Alexandra, with two very large white blooms having an orange stain in the lower half of the throat; *C. T. elegantissima*, with a pleasing fringed edge to the lip and a large sized flower; *Laelio-Cattleya Blechleyensis* Imperiale, having a deep purple colored lip, and all other parts of the flower of paler tints. A hybrid between *Zygopetalum Perrenoudii* and *Aganisia lepidia*, and having the name *Zyconesia Sanderii*, came from the Sander firm, the *Zygopetalum* parent being the prepotent one, as appeared by the decidedly blue tint of the lip, and other features. *Odontoglossum* Harvengtense var. had a yellow ground and a white margin, beside brown blotches on all the limbs of the flower. *Od. Helenus*, derived from a cross of *Od. Harvengtense* and *Od. Coradineli*, is a beautiful flower having a slight suffusion of pink on the lower half of the petals, and a ground color of lemon yellow on all other parts. The sepals are spotted with brown—a remarkable flower of three inches in width. There were several other hybrids having *Od. Harvengtense* as a parent. *Laelio-Cattleya Firebrand*, a cross of *L.-C. Highburyensis* and *C. Trianae*, has yellowish-rose petals and a rosy purple lip and throat of a crimson tint.

A very extensive collection of various orchids came from the gardens of Sir J. Colman, many of them rare in cultivation and admirable examples of cultivation. I noted among the plants *Dendrobium tetragona*, *Den. speciosum* fusiforme, *Sophrora-Laelia* Mariottiana, *Phaio-Calanthe*, the plants hav-

ing chiefly pale tints. These are the Colman varieties; some new Epidendrums—hybrids growing 6 to 8 ft. high and having blooms of various shades of orange-scarlet, hybrids of Den. nobile alba mostly showing light tints.

Mr. Cypher, orchid cultivator, Cheltenham, had several fine things, as for instance Den. Apollo alba and Den. Thwartii and Odontoglossum Wigianum, Od. amabile and others.

First-class certificates were awarded to Cattleya Trianae Grand Monarch, a flower of a rosy purple tint in all its parts, excepting the lip, which is of a rich purple tint stained orange in the throat. It was shown by Mr. Monteith Ogilvie, of the Shrubbery, Oxford. Messrs. Charlesworth & Co. got a certificate for a plant of Brasso-Cattleya. It is a light-colored bloom, boldly fringed with purple. This firm was also awarded a certificate for Odontioda Bradshawiae, a vivid scarlet bloom.

NEW YORK FLORISTS' CLUB.

The annual outing will occur on July 1, 1909, at Duer's, Whitestone Landing. The hustling committee in charge, with H. A. Bunyard, chairman, and J. Austin Shaw, secretary, announce details as follows:

"Steamer Isabel starts at 10 A. M. Breakfast at 12. Dinner at 6. Moonlight sail 7 to 9.30. Bowling, dancing, games. Prizes. Souvenir book. Fine orchestra, big crowd. Gardeners' societies, retail organizations all asked to participate. Tickets \$5.00 for lady and gentleman; \$2.00 for extra ladies; \$1.00 for children under 12.

NORTH SHORE HORTICULTURAL SOCIETY.

At the meeting March 19 the subject discussed was Gloxinias. A fine vase of carnation Beacon was exhibited by Alfred Parson, gardener for E. S. Grew. The Gardeners' and Florists' Club of Boston were guests of the evening and among those present were President William Downs, John Guerin, Julius Huerlin, George E. Baldwin of Carillo & Baldwin, N. J., and John Kirkegaard of the New England Nurseries, Bedford, Mass.

AMERICAN CARNATION SOCIETY.

Carnations Registered.

By Bertermann Bros. Co., Indianapolis, Ind.—"James Whitcomb Riley." Color clear, golden yellow; parentage Lawson and unknown yellow seedling; size 3 to 3 1-2 inches; habit like Lawson but with longer stems.

ALBERT M. HERR.

Lancaster, Pa.

CLUB AND SOCIETY NOTES.

The Inter-Town Dahlia Association held its first meeting of the season on March 19, at Ansonia, Conn.

Prof. F. E. Hitchings, state entomologist, delivered a lecture before the Bar Harbor (Me.) Horticultural Society on the evening of March 18.

The Indianapolis Florists' Club held its regular monthly meeting March 10, with a good attendance. The Club will send a bowling team to Cincinnati this summer.

The following officers were elected

PIERSON DISPLAY OF WHITE KILLARNEY AT BUFFALO MEETING OF AMERICAN ROSE SOCIETY

at the March meeting of the Dayton (O.) Florists' Club: H. H. Ritter, president; H. M. Frank, secretary; Geo. Bartholomew, treasurer.

George W. Cable addressed the Springfield (Mass.) Amateur Club on March 11 on the adornment of home grounds, a subject on which the Springfield people seem to be thoroughly aroused just now.

Patrick F. Reynolds has resigned his position as recording secretary for the Newport Horticultural Society. He has been a most courteous and efficient secretary and his resignation on account of other important duties was very much regretted by the society. He is succeeded by Daniel J. Coughlin, a former secretary.

The R. I. Horticultural Society and the R. I. College united in a course of three lectures, which were given at Providence on March 16, 17, 18, by Wilfrid Wheeler on "Small Fruit Growing on the Intensive Plan," H. W. Collingwood on "Successful Orchard-ing," and J. K. M. L. Farquhar on "Landscape Gardening for Home Decoration," respectively.

Shenandoah, Ia. The Ratekin Seed Co. has announced their intention to erect one of the largest seed houses in the West. The building is to be 60x150, three stories and basement, constructed of brick and cement and fireproof throughout. The approximate cost will be \$50,000.

DURING RECESS.

The Retail Florists' Association of Brooklyn, N. Y., celebrated March 16 with an evening at the theatre and supper later.

The Chicago florists have organized a bowling club to meet each Friday night at 118 Monroe street. At the first meeting held on the 19th, there was a good attendance and a delightful evening was spent. Allie Zech's team carried off the honors. The absence of the ladies was the only drawback. All florists are invited.

On March 18, St. Paul and Minneapolis got together once more for a friendly contest on the bowling alleys. St. Paul was very confident of winning three games, then two, then one. Minneapolis was just the opposite; after the licking they got sometime ago, they were ready to take another dose. It came out otherwise, Minneapolis beat St. Paul in three successive games. St. Paul challenged Minneapolis for another tournament in St. Paul in the near future.

HORTICULTURE

THE EXHIBITIONS

MASSACHUSETTS HORTICULTURAL SOCIETY.

The great spring exhibition at Horticultural Hall, Boston, long planned and talked about and involving an immense amount of work for many during the past weeks and months is on and the town is full of florist visitors from far and near. The exhibition is not only the most pretentious ever undertaken here but is pronounced by all observers to be the most complete and pleasing they have ever seen. The variety, quality and profusion of the exhibits are grand and bewildering and the public are certainly given full value for their money in the glory of color and verdure, the music and the brilliancy of electrical effect.

The large exhibition hall has never presented so impressive a spectacle. The stupendous effort of the Messrs. Farquhar—the Japanese garden which is very inadequately depicted on our cover page—is the great centre of attraction and the visitors troop in sinuous lines continuously up and down its winding paths, over bamboo bridges, under rocky growths and around pools and cascades overhung with purple and white wistarias and quaint contorted maples and thuyas, among great masses of blooming azaleas, lilies, peonies, magnolias, forsythias, spiraeas and a thousand and one species and varieties of shrubbery and rock garden material. The work of arrangement is finished to perfection, even to the crevices of the rocks which buttress the winding walks, which are filled here and there with ferns and mosses and other appropriate things.

M. H. Walsh's great collection of over fifty trained Rambler roses on one side and magnificent group of greenhouse plants from the Harvard Botanical Garden on the other formed an impressive setting for the approach to the bamboo gates which opened into the Japanese garden. Mr. Walsh's roses included quite a number of new comers, both single and double, and the size of flowers is, in many of them, considerably increased over that of his earlier introductions. He was the winner of a silver and a bronze medal in addition to the cash prizes in this class. The big palms in the Botanical Garden exhibit partially screened the orchestra of young ladies in the balcony, so tall were they.

The lecture hall was a veritable blaze of color. The stage and was filled with an enormous group of Easter flowering and foliage plants from Thomas Roland and the opposite end was correspondingly filled by Ed. MacMulklin. Either one of these groups must have contained more than a thousand dollars' worth of plants. Lesser groups occupied the sides of the hall and alternating between them were the mantels decorated by retail florists. The winning mantel was by MacMulklin; the decorations were yellow and green, acacia, daffodils and pansies being daintily used. Mrs. E. M. Gill with a tasteful arrangement of pink carnations, pink ramblers and green was second and S. Hoffman with masses of Killarney and pink

rambler roses was third. The hall was filled with tables and plant groups with a wealth of floral beauty such as has rarely been gathered together. Great masses of feathery *Cineraria stellata*, brilliant amaryllises, cyclamens of wonderful beauty, pot roses, stately ericas, azaleas, acacias, long ranks of hyacinths and tulips and thousands of daffodils made a scene not soon forgotten. Especially interesting to the craft was a balloon trained specimen of *Gloriosa Rothschildiana* beaming over fifty blooms, brought by Arthur Griffin of Newport.

The small hall was radiant with a beautiful display of orchids, carnations, roses, sweet peas, violets and schizanthuses. Roses were effectively shown by F. R. Pierson Co., Waban Rose Conservatories, W. H. Elliott and Montrose Greenhouses, the White Killarney by the first two named being the sensational attraction. Sweet peas by Wm. Sim were in his usual high quality and great variety and Norris F. Comley also staged two vases of peas of phenomenal quality. Patten & Co.'s white Genevieve was a prime attraction among the carnations. In the vestibule John Streifer & Co., had a brilliant group of genistas and standard variegated abutilons.

Among the visitors were W. F. Gude and A. Gude, Washington, D. C.; Henry Wild, Greenwich, Conn.; Frank McMahon, Seabright, N. J.; Ed. Roehrs, Rutherford, N. J.; Chas. Loechner, Max O. Jordan, J. M. Keller, Geo. F. Struck, New York; W. A. Manda, South Orange, N. J.; J. F. Huss, Hartford, Conn.; Timothy McCarthy, Providence, R. I.; R. W. Green, Warwick, R. I.; Wm. Eccles, Oyster Bay, N. Y.; Richard Gardner and Arthur Griffin, Newport, R. I.; C. S. Strout, Biddeford, Me.; Robt. Ballantyne, Canandaigua, N. Y.; Jos. Manda, West Orange, N. J.; E. W. Newbrand, Tarrytown, N. Y.; and a whole swarm of North Shore, South Shore and inland New England gardeners and florists.

Special Awards.

R. & J. Farquhar were awarded a gold medal for Japanese garden. Silver medals were given to Mrs. A. W. Blake (J. L. Smith, gardener), for *Nephrolepis Piersoni*; Mrs. J. M. Sears, Amaryllis; Arthur Griffin, *Gloriosa Rothschildiana*; Harvard Botanic Garden, artistic display.

First-class certificates of merit were awarded to W. W. Rawson & Co., for *Narcissus King Alfred*; W. A. Riggs, *Rose Tausendschon*; Larz Andersen, *Laelia elegans*; E. O. Orpet, *Brassica Catleya Susanna* (*Cattleya Thayeriana* X *Brassavola Digbyana*); Julius Roehrs Co., *Odontoglossum crispum* var. E. B. Dane; Julius Roehrs Co., *Cattleya Schroederiae* var. Surprise; E. B. Dane, *Cypripedium Mandii*; M. H. Walsh, *Rambler Rose Maid Marion*.

Cultural certificates to Thomas Roland for *Cytisus racemosus*; Wm. McGillivray for *Dracaena Godseffiana*.

Honorable mention to Robert Ballantine, Dwarf Blue *Cinerarias*; New Hampshire Agricultural College, seedling carnations.

Vote of thanks to E. O. Orpet for collection of cut orchids.

Regular Prizes.

Azalea Indica—Eight plants: 1st, Edward MacMulklin; 2d, E. W. Breed. Three plants for private growers only: 1st, Wm. Whitman; 2d, Wm. Whitman. Palms—Palm: 1st, Edward MacMulklin; 2d, Mrs. Frederick Ayer; 3d, William Whitman. Libas—1st, Mrs. Frederick Ayer; 2d, Mrs. Frederick Ayer. April Wooded Greenhouse Plants—21. J. R. Leeson, Rambler Roses (for private growers only: 1st, Miss S. B. Fay, Group of Roses All classes admissible open to commercial growers only: 1st, M. H. Walsh; 2d, M. H. Walsh. Forced Hardy Herbaceous and Alpine Plants, arranged for effect—1st, Bellevue Greenhouses. Cyclamens—Twelve plants, in not over seven-inch pots: 1st, Dr. C. G. Weld; 2d, J. S. Bailey; 3d, Dr. C. G. Weld. Six plants, in not over ten-inch pots: 1st, E. J. Mitton; 2d, Mrs. Frederick Ayer; 3d, Mrs. Frederick Ayer. *Cinerarias Grandiflora* type: 1st, W. A. Riggs; 2d, Dr. C. G. Weld; 3d, J. S. Bailey. *Schizanthus*: 1st, Mrs. J. L. Gardner; 2d, J. S. Bailey; 3d, Mrs. J. L. Gardner. *Cinerarias Stellata* type: 1st, Wm. Whitman; 2d, Wm. Whitman; 3d, Mrs. J. L. Gardner. *Hyacinths*—Six pans, six bulbs of one variety in each pan: 1st, W. A. Riggs; 2d, Wm. Whitman. Single pan, with ten bulbs of one variety: 1st, Mrs. J. L. Gardner; 2d, ditto, ditto. Early Tulips—1st, Wm. Whitman; 2d, W. A. Riggs; 3d, Mrs. J. L. Gardner. Late Tulips—1st, W. A. Riggs; 2d, Mrs. J. L. Gardner. *Narcissus*—Collection of Large Trumpet varieties: 1st, Wm. Whitman; 2d, W. A. Riggs; 3d, Mrs. J. L. Gardner. Collection of Short Trumpet varieties: 1st, Wm. Whitman; 2d, Mrs. J. L. Gardner. *Amaryllises*—1st, Mrs. J. M. Sears; 2d, Mrs. J. M. Sears. Group of Easter Flowering Plants—Arranged for effect with palms or other foliage: 1st, Thomas Roland; 2d, Edward MacMulklin. General Display of Spring Bulbous Plants—All classes, arranged with foliage plants: 1st, Wm. Whitman. Orchids—Group of plants arranged for effect with ferns or other foliage plants: 1st, E. B. Dane; 2d, Seth A. Borden; 3d, E. J. Mitton. Specimen plant—1st, Mrs. A. W. Blake; 2d, Seth A. Borden. Roses—American Beauty: 1st, Wm. Ross Conservatories; 2d, F. R. Pierson Co. The Bride: 1st, Montrose Greenhouses. Bridesmaid: 1st, Montrose Greenhouses. Richmond: 1st, Montrose Greenhouses. 2d, W. H. Elliott. Killarney: 1st, W. H. Elliott. Any other Pink variety: 2d, W. H. Elliott. Any other variety: 3d, W. H. Elliott. Any new named variety not in commerce: 1st, F. R. Pierson Co. Carnations—Vase of 100 of one variety: 1st, M. A. Patten; 2d, Crimson; 1st, M. A. Patten; 2d, White Wheel; 3d, Edward Winkler. 25 Dark Pink: 1st, C. S. Strout. Any Winsor shade variety: 1st, C. S. Strout; 2d, M. A. Patten; 3d, Backer & Co. Endmost-shade variety: 1st, R. D. Kimball; 2d, M. A. Patten; 3d, M. A. Patten. Scarlet: 1st, John Barr; 2d, M. A. Patten; 3d, R. P. White. White: 1st, M. A. Patten; 2d, C. S. Strout. White Variegated: 1st, M. A. Patten; 2d, R. D. Kimball. Yellow Variegated: 1st, M. A. Patten; 2d, Violets—Violet—25: 1st, Wm. Sim; 3d, H. M. Howard. 100 Double: 1st, L. S. Small; 2d, H. M. Sanderson; 3d, N. F. Conley. Sweet Peas—Two vases, distinct varieties, 100 blooms in each: 1st, Wm. Sim; 2d, Norris F. Comley; 3d, Wm. Sim. *Abutilons*—1st, R. D. Kimball. Mantel Decorations—1st, Edw. MacMulklin; 2d, Mrs. E. M. Gill; 3d, Sidney Hoffman.

SPRING SHOW AT PHILADELPHIA.

This annual event occupied three days of the week—Tuesday, Wednesday and Thursday. Although smaller, as to bulk and variety, than most of its predecessors, the quality of the exhibits was never better. Hyacinths, tulips and daffodils, were a leading feature, the competition for the prizes being by the seed-materia. Azaleas were conspicuous by their absence—the only notable showing in these being three magnificent plants from the Newbold place, with a six-foot spread, occupying a place of honor

in the main hall. Mr. Batchelor had these in the pink of condition and they deserved all honors. *Cineraria stellata* was shown in grand form and was a great attraction. This species has now become one of the most popular of spring subjects for parlor and conservatory use and for decorative effect at a flower show is far ahead of the hybrids.

Lilies were very fine in all classes, and two magnificent pans each with thirty eight flowers greeted visitors on first entering the hall—gracing the newel posts at the bottom of the stairway. The first prize for these went to the Elkins conservatories; but it was touch and go for Jno. Hedland there, as against the Newbold exhibit. Spireas occupied many prominent places and were the leading feature at the east end of the hall. *Primula obconica* was exceptionally well done, the Pepper lot which Mr. Robertson showed getting first mainly for superior size, while the Newbold exhibit although smaller plants was the best as to color. One lovely pure white flower in the latter was admired by everybody. Callas were a feature and were unusually good. An exhibit of the yellow and pink varieties came from Mrs. Penfield's place and reflected credit on John McLeary, the gardener.

The Dreer premiums brought out an interesting lot of herbaceous plants, which occupied the circle in front of the stage. Roses, carnations, and sweet peas were the features in the four aisles. The sweet peas were staged by William Sim, of Clifondale, Mass., and captured the Burpee premium and a silver medal. Eighteen varieties were shown, all of them the new winter-flowering class originated by Zvolanek, and all in grand shape. No such sweet peas have been seen here before. Mr. Sim also exhibited four vases of violets—The Boston, Princess of Wales, Kaiser Wilhelm and Baroness Rothschild. John Cook, Baltimore, sent Rose My Maryland, also a vase of his new deep pink variety Radiance—the latter being awarded a certificate of merit. John Stephenson's Sons, the Oak Lane florists, made all the experts sit up and take notice with two magnificent vases of Mrs. Jardine roses. Dorothy Gordon, Mr. Heacock's lovely new pink carnation was the most prominent exhibit in this class and attracted much attention. The Pennock-Meehan Co. sent Mr. Cockcroft's new White-Georgia. T. J. McCormick, Baltimore, sent a fine vase of his new variegated seedling, M. Thaw & Co., of the same city, exhibited seedling number 36, a very dark crimson. An interesting collection of cacti was staged by W. H. Ritter, Philadelphia. The seedsmen made a display of seasonable stock in the lower hallways.

The chief prize winners were: William Robertson, Samuel Batchelor, John McLeary, William Kleinbeinz, John Hedland and William Fowler. A first-class certificate was awarded to Arthur Griffin, Newport, R. I., for a fine plant of *Gloriosa rothschildiana*, which was staged by Messrs. Knight & Struck of New York. Edward Towill, Hillside, Pa., fresh from his honors at Buffalo, was on hand with a fine lot of Rose My Maryland.

BOSTON MUSIC HALL MARKET EXHIBITION.

The Boston Co-operative Flower Market held an exceptionally fine exhibition at their market Saturday, March 20, it being the first ever held by this organization.

Roses, carnations, violets and sweet peas were the center of attraction, while many exhibits of plants were also shown, those of Thomas Roland and W. F. Walke being deserving of special mention.

The table decorations and some beautiful designs of set pieces contributed by retail florists also attracted much attention.

The sweepstake prize presented to the exhibitor receiving the largest number of firsts was won by Norris F. Comley.

In the novelty class, orange blossoms from Edward Wood, "bachelor buttons" from Thos. Stock, and crotons from J. Rogers were all excellent.

A vase of gardenias from John Mc-

liam Tailby, John McFarland, Edward Wood, Elijah Cartwright.

Carnations.—Albert Roper, John Barr, Louis Small, Wilfred Wheeler, Albert E. Batley.

Miscellaneous.—Norris F. Comley, Carl Striford, J. W. Simpson, James Lister, Alvin H. Burges.

Below is a list of the awards:

Roses.

25 Killarney. Brannan & Dow special, Robert Montgomery.

25 Richmond. Julius Zinn cup, Robert Montgomery.

25 Bride. Robert Montgomery, 1st; W. R. Morris, 2d.

25 Bridesmaid. W. R. Morris, 1st; Robert Montgomery, 2d.

50 American Beauty. F. R. & P. M. Pearson.

50 Killarney. W. W. Rawson & Co. special, W. H. Elliott.

50 Bride. Montrose Greenhouses, 1st; W. R. Morris, 2d.

50 Bridesmaid. W. R. Morris, 1st; Montrose Greenhouses, 2d.

50 New Rose, 1908 and 1909. Schlegel & Fottler cup. Waban Rose Conservatories with White Killarney.

Carnations.

50 Scarlet. H. L. Sheel, 1st. Beacon;

Plant Group Winning Boston Plate and Window Glass Company's Cup at Music Hall Market Show by W. F. Walke.

Farland was one of the prime attractions of the exhibition and was awarded a first prize, as was also the vase of Killarney roses exhibited by Wm. Elliott.

The officers, judges and special committees to whom is due the credit for the success of the enterprise, are:

Elijah Cartwright, President; Donald Carmichael, Treasurer; John McFarland, Secretary.

Directors.—Edward Wood, Robert Montgomery, N. F. Comley, Albert Roper, L. E. Small, James Quinn.

Executive Committee.—John McFarland, Albert Batley, Albert Roper, John Barr, Robert Montgomery.

Judges: Roses.—Alfred R. Hutson, William F. Molloy, Adelbert Cartwright; carnations, L. J. Reuter, Donald Carmichael, Thomas Capers; miscellaneous exhibits, Thomas Roland, William Walke, Thomas Greaves.

The committees in charge of the exhibits were as follows:

Roses.—Robert Montgomery, Wil-

liam Barr, 2d, Beacon.

50 White. Patten & Co., 1st, White Perfection; E. Cartwright, 2d, Lady Bountiful.

50 Light Pink. John Barr, 1st, Winsor; Littlefield & Wyman, 2d, Enchantress.

50 Dark Pink. Littlefield & Wyman, 1st, Lawson; John Barr, 2d, Lawson.

50 Crimson. Wilfred Wheeler, 1st, Harry Fenn; E. P. Winch, 2d, Harry Fenn.

50 Variegated. John Barr, 1st, Variegated Lawson; Patten & Co., 2d, Variegated Lawson.

Fair Maid. A. Roper special. L. E. Small.

100 seedlings not disseminated. T. J. Grey & Co. cup. A. Roper, Bay State.

Seedlings not disseminated. 50 White, Patten & Co., Genevieve; 50 Crimson, L. E. Small; 50 Dark Pink, Peter Fisher, No. 505; 50 Light Pink, John Barr, 50 Scarlet, A. Roper, Red Seedling; 50 Variegated, A. Roper; 100 Any Color, John Barr, Beacon; 100 Queen, John Barr special, Thomas Capers.

Violets.

100 Lady Campbell. Lewis Smith, 1st; Lewis Small, 2d.

100 Marie Louise. N. F. Comley.

100 Any Other Double. N. F. Comley.

100 Princess of Wales. J. H. Newman, 1st; H. F. Woods, 2d.

Not less than five var. H. E. Fiske Seed Co. Cup. N. F. Comley.

The cup offered by the Boston Plate & Window Glass Co. for 50 Richmonds not being competed for, was directed by the donors to be awarded for the most meritorious display in the exhibition. The winner was W. F. Walke with the group of plants illustrated on opposite page.

A LETTER TO THE DONORS OF THE SCOTT MEMORIAL FUND.

Dear Friends:

Ever since the movement was started to erect a monument to my beloved husband I wanted to thank you for your kind thoughts. The idea, starting as it did in the minds of a few, soon spread into many and later at Niagara Falls, when in so short a time the sum sufficient to place the stone was raised, I felt that it was a true and sincere appreciation for that which he had given you. Whatever he did for the profession of floriculture and the florists' themselves, he did with all the willingness he could put forth. Shakespeare said, "The evil that men do lives after them; the good is oft interred with their bones." Although true in cases, it was not so with my dear husband, for no greater tribute could be paid to the dead than that which you have erected to his memory. When, as in this case, one dear in memory to you, we stand and read what you have said, which is all that could be said of any man however great in the hall of fame, the massive stone and coldness of the situation disappears and only that remains which means so much to us.

I wish I could thank you one and all for myself and family, but I will resort to the press who have been so kind in this matter.

Very sincerely,

MRS. WM. SCOTT AND FAMILY.

Obituary.

Marie C. Hauswirth.

The death of Mrs. Marie C. Hauswirth of the firm of M. C. & J. E. Hauswirth, Chicago, on Friday, March 19, came as a great shock to her many friends. At her request the news of her illness had been kept from most of her acquaintances and few knew that

MARIE C. HAUSWIRTH AND GRANDCHILD

she was not in her usual health till informed of her death. Mrs. Hauswirth was taken ill on Mar. 12 and removed to the German Hospital, where an operation for appendicitis was performed March 17, from which she never wholly rallied, passing away at eleven P. M., March 19. The funeral was from the home, 146 Clybourne Ave., Chicago, March 22nd, and was very largely attended. The pall bearers were her business associates, E. C. Winterson, Joe Curran, Alex. Henderson, Geo. Asmus, E. Blaine and H. N. Bruns.

Among the florists from out of town who attended the funeral were J. A. Valentine of Denver, Colo.; C. C. Pollworth, Milwaukee; Ed. Fancourt, Philadelphia; Fritz Bahr and wife of Highland Park, Ill.

Philip Breitmeyer of Detroit, W. F. Kasting of Buffalo and F. Traendley of New York, were among those who sent floral remembrances.

The Ladies' S. A. F. sent a large wreath. This is the first death in the Ladies' S. A. F.

Marie C. Collnot was born at Laupen, a/n, Wuerlttenburg, Germany, of French and German parentage, Jan. 5, 1864, and came to this country in early childhood. She was married at eighteen to Philip J. Hauswirth and was associated with him in business till his death, Dec. 4, 1907. Mrs. Hauswirth leaves a son, J. Edwin, her business partner since her husband's death, and a daughter, Elsa Hoyt, two infant grandchildren and a brother, Chas. Collnot.

Mrs. Hauswirth was an affectionate mother and her death will be deeply felt as this is the third time the dread visitor has entered the family within fifteen months. As a business woman Mrs. Hauswirth had few equals and in all her busy store life she yet had time to speak the cheerful word to her friends and assist others whenever possible. Hers was a strong character and as her friends viewed her remains lying under a bank of palms in the same place where they had so lately taken a final look at her late husband, they felt that her strong personality had left a lasting impression though she had scarcely reached middle age.

Interment was at Rosehill cemetery.

Mrs. Emily Rose Youell.

Mrs. Emily Rose Youell, wife of Henry R. Youell, died of heart failure Tuesday evening, Mar. 16th, at the family home, 111 Lexington avenue, Syracuse, N. Y., aged 67 years. Mrs. Youell had been ailing some time with bronchitis, but her death Tuesday came unexpectedly.

Mrs. Youell was born in England, the daughter of John Emily Hubbard, the noted veterinary surgeon. She was married to Henry R. Youell forty years ago. She is survived, besides her husband, by three daughters, Miss Mabel Youell, Mrs. Ernest Edwards of Fayetteville, and Mrs. Christopher J. Lambert of Sherburne, N. Y., and by a son Henry R. Youell.

The sincere sympathy of the trade is extended to the family in their bereavement.

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St., NEW YORK CITY.

WHAT TO DO AMONG ROSES IN MARCH.

In this month, early or late according to latitude, elevation and local conditions, all kinds of roses should be pruned, cutting back shoots injured by frost to the first sound, dormant bud. The harder climbing plants on arches, pergolas and fences should be the first to be pruned, removing immature and weak wood, fastening the shoots that are left to the various objects named, at a sufficient distance apart to allow of good growth without much crowding. These climbing varieties, such as the new and scarcer Ard's Pillar (a H. T.), a velvety crimson rose, with large and smooth petals, vigorous and distinct foliage; Bessie Brown, cream-colored, perfect in form and of large size, a variety that has leaped in favor quickly—very fragrant; Climbing Madame de Watteville, very vigorous in growth; England's Glory, a climbing Tea of the form of Gloire de Dijon, but with longer petals, of a pleasing pink-peach tint, a rampant grower and very floriferous; Helene (T.) Ideal (a new climbing Polyantha), a sport from La France, and an improvement in every respect on that favorite variety; Irish Engineer (H. T.), single flowered, a very strong growing rose of a dazzling scarlet tint, the flowers large and usually borne in trusses of 3 to 5 blooms on erect stems; Madame Levassieur (Polyantha), growth robust, very free flowering, in color rosy crimson; and Rubin (a climbing Polyantha) of a deep crimson tint, and blooms larger than those of Crimson Rambler.

Not all roses may be pruned alike. Austrian Briars, Moss, Hybrid China, Lord Penzance and Sweet Briars should be pruned with the other roses in March, but the chief shortening and thinning of the shoots should have been carried out after the flowering of the last season. At the present, the work on these plants will consist of removing unripe shoots, and grubbing up suckers from the roots. Rampant shoots may be now reduced in length.

Hybrid Petunials.—In order to compel the production of bloom on this race of roses in succession, the bushes should be pruned at intervals of 14 days, shortening vigorous shoots to one-third or more of their length, and weak ones more severely, having regard to the variety, that is to the 4th or 6th bud from the base of the shoot.

Most roses require a rich manure to be spread over the roots just below the surface of the ground, as well as a mulch above it if the land be of a light nature, and a slight layer of crumbly soil spread over it so as to hide its presence.

FREDERICK MOORE.

MY MARYLAND ROSE.

How to Grow It Successfully.

One of the most successful growers of the new rose, My Maryland, during the past season, has been Edward Towill, Roslyn, Montgomery county, Penna. On request of HORTICULTURE Mr. Towill sends the following:

My method applies to solid beds only. One great secret of success is in the night temperature. This must be from 62 to 64 degrees—never lower.

When the season arrives for planting young stock, get your houses all cleaned out. Fill with good, stiff rose soil mixed with about 200 lbs. bone dust to a space to plant say on thousand and rose. The grower must use his own judgment in the matter of space and fertilizer as some soil will take more bone than others, but about 200 lbs. of bone on the average is enough for compost for 1000 plants.

Get nice clean plants from 2-1-2 in. or 3 in. pots; plant them about sixteen inches apart and twelve inches across the bed; water well after planting, keep the houses clear of weeds and

G. L. FREEMAN, 388 Appleton St., Holyoke, Mass.

keep the soil loose for a few weeks. Use plenty of water at the growing period. Put a little top dressing of cow manure on when you think the plants are ready to take it; keep the plants growing all the time.

Disbud the same as other roses. Don't cut your roses too early in the fall. Therein lies the reason that so many My Marylands went to sleep last winter. Keep the plants growing all the time. Don't get too greedy in the fall and cut everything in sight. Disbud and keep your plants moving all the time. You can get very long stems by disbudding the same as with Killarney.

When the fall starts keep the temperature at from 62 to 64 degrees at night. The day temperature should be about 10 or 12 degrees warmer. Give plenty of air when the weather is favorable. Don't keep your houses shut down on bright days. Run a pipe and give a little ventilation—raise the ventilators a little and shut down again. Repeat the same two or three times a day to relieve the stagnation of atmosphere.

Syringe heavily when the weather is favorable because My Maryland is subject to red spider. I water freely and feed the plants often with a dry fertilizer. Water the fertilizer in well every time you apply same, which would be once a week probably. Other soils different from that described would not take it as often. The grower must use his own judgment in this matter of the fertilizer.

I used dried blood, bone flour, poultrette and tankage—separate at different times or mixed. Apply a little between the rows of the plants every week and water same in well.

Fumigate the roses about once a week. As regards mildew, I have not seen any on the plants thus far.

ROSE HARRY KIRK.

Dear Sir: Rose Harry Kirk has now passed through a third winter out of doors without any protection except a three-inch dressing of manure over the surface of the bed. This rose is the greatest acquisition since Killarney. There is not an inch of dead wood on any of the plants. The buds are pushing out to the ends of all the branches.

The beautiful blooms were continuous and plentiful all last season. This is surely the best yellow yet introduced.

Very truly yours,
ROBERT HUEY.

AZALEAS

To beat the band, To beat the band, To beat the band

What is the best Double Pink Azalea? It is the Mme. Van der Cruyssen, originated by the well-known Azalea Specialist, M. Van der Cruyssen, Belgium. We have a large stock of them, every plant is as sound as an apple, just covered with buds; just right for Easter. We have them for 60c, 75c, \$1.00, \$1.25, \$1.50 up to \$2.00 each. Bernard Andries alba, \$2.25 to \$3.00; some at \$1.00 to \$1.50. Niohe and Deutsche Perle, 75c, \$1.00, \$1.25, \$1.50. Vervaneana, De Schryveriana (best double variegated), 75c, \$1.00, \$1.25, \$1.50, \$2.00. Empress of India, 50c, 60c, 75c, \$1.00, \$1.25, \$1.50. Simon Mardner, 50c, 60c, 75c, \$1.00, \$1.25, \$1.50, \$1.75. Apollo (red), 50c, 60c, 75c, \$1.00. Professor Wolters, 75c, \$1.00, \$1.25, \$1.50, and some more good varieties, 75c, \$1.00, \$1.25, \$1.50. We have Azaleas by the thousand.

Lilium tuffiflorum, the best in America, 6 in. pot plants, height, 20-25 inch and over, with five buds and upwards to ten buds, 10c per bud; under five buds, 25c per bud.

Cineraria hybrida grandiflora. Henry F. Mitchell's newest improved strain. Our plants this year are very large, long heads of flowers, perfect foliage, and the plants are almost as big as a bushel basket. 6 in., 25c, 50c, 75c, \$1.00.

Hydrangea Otaka, 6 to 7 in. pots, 50c, 75c, \$1.00. **Spiraea Gladstone**, 6 in. pots, 50c, 75c, \$1.00.

Superba Floribunda Japonica, 6 in., 25c, 50c, 75c. **Araucaria Excelsa** largest stock in America, 6 in., 4-5-6-7 tiers, 20-25-30-35 inches high, 75c, \$1.00, \$1.25 to \$1.50.

Araucaria robusta Compacta and Glauca, 6 in. pots, 20 to 35 inches high, 4, 5, 6 tiers, \$1.50, \$2.00, \$3.00.

Kentia Belmoreana, 5 1/2 to 7 1/2 in. pots, 50c, 60c, 75c. **Forsteriana**, 5 1/2, 5 1/2, 6 in. pots, 50c, 60c, 75c, \$1.00, \$1.25, \$1.50.

Ficus Elastica, 4 1/2, 4 1/2, 6 in. pots, 50c, 60c, 75c. **Begonia**, New Improved **Erardi**, a constant bloomer, 5 1/2 in. pots, \$2.50 per doz.

Primula Obconica, full of buds and flowers, 5 to 5 1/2 in. pots, \$2.50 to \$3.00 per doz.

Asparagus Plumosa, 3 to 5 cents.

Ferns, 6, 7, 8 inch, such as **Whitmanii**, **Boston**, **Scottii**, 50c, 75c, \$1.00, \$1.25, \$1.50; **Amerophis**, 5 to 6 in., 50c, 75c.

Hybrid Rose Bushes, John Laing, Brunner, Hermosa, and other good sorts, 6 in. pots, 30 inches high, very strong, 50c, 75c, \$1.00.

Crimson Rambler, newest sorts, 5 1/2 to 6 in. pots, 50 to 75c.

Hyacinths, four best varieties, white, pink, light and dark blue, 4 in. pots, \$1.00 per 100.

Touneol Tulips, this is the best double variegated tulip in existence, three bulbs planted in a 4 in. pot, \$1.80 per dozen pots.

Von Sion Daffodils. Best double yellow daffodil in existence. Three double-nosed bulbs planted in one pot, 5 1/2 to 6 in. pots, \$2.50 to \$3.00 per doz. pots.

All our bulbs are our own importation and are not to be compared with the cheap stuff flooding the market.

Cash with order please. Mention if pots are wanted

NEWS NOTES.

Tomlinson Hall market, Indianapolis, report an unusually heavy trade on flowering plants of all kinds.

Warner & Coy who recently opened a new store at 16th and College Ave., Indianapolis, report things going along very satisfactorily.

George Masson, at present on the Daniel Guggenheim estate, will take a position with W. B. Kinney at Oakhurst, N. J., on May 1.

NOTES ON EASTER PLANTS.

The Outlook at Craig's.

To get a line on the latest and best in Easter plants in Philadelphia one naturally looks up first the recognized headquarters—the big establishment of the Robert Craig Co. At this writing, March 17th, the crops are well forward and an excellent idea can be formed of the good things in store for buyers from now to Easter week.

Judging from the three houses devoted to the lilies at this place there need be no fear as to quality of this Easter requisite. The varieties grown are giganteum, Azores and Formosum. The giganteum is liked best, although it is not quite so early as the others, there being a difference of about ten days. We are informed that there has been very little loss from defective bulbs this year.

Azaleas are, of course, a strong feature this year as always. There is no striking novelty but all the old stand-bys are on hand in all sizes.

Mr. Craig had a twinkle in his eye when we came to the hydrangea houses. He knew he had something in store that would make even a caloused critic like the present scribe sit up and take notice. It is not in size alone but form, foliage, and above all, the number of flower heads to each plant that we have to lift our hat to.

Rhododendrons are now in full flower for pre-Easter use, but the majority are held back until the buds show color and are then immediately removed to a cool house for Easter and later. There is considerable call for these among well-to-do suburbanites for porch decorations before their lawn specimens come in bloom at their natural season.

Genistas are still popular as an Easter plant. They like a rather cool temperature, and very little forcing is sufficient—so that some of the older houses that do not have up-to-date heating can be profitably utilized. The smaller sizes in five and six inch pots are the best sellers.

A novelty for this year is a batch of gold and silver leaved maples. These are in tubs and are about five feet high, well-branched and just coming into bud. The bark is pale green.

Of Crimson Rambler roses, the old form, also the improved variety known as Philadelphia Rambler, are seen in various sizes. The most attractive are plants about 4 ft. high, balloon-trained, 2-1-2 to 3 ft. through. These show fine trusses of bloom—about pea size at present. The new Rambler Tausendschon (Thousand Beauties) is not quite so forward. Mr. Craig says it is more easily forced and earlier, and will be in good shape as soon as the others. Tausendschon was a great seller the past two seasons and the demand has been away ahead of supply.

The Baby Rambler is much in evidence being grown mostly in 5, 6 and 7 inch pots, in natural form, although a limited quantity are to be seen grafted in tree form about 2-1-2 ft. above the pot. A few white and pink Baby Ramblers are also in sight and a few plants have both white and crimson grafted on the same plant as a novelty. The Mrs. Outbush and Baby Dorothy are both grown but they are almost identical as to the shade of

ANTON SCHULTHEIS

Florist
COLLEGE POINT. - L. I.

pink and seem to be about the same thing in every respect. Lady Gay and Dorothy Perkins are also as popular as ever and are given their full share of attention. One of the finest things is a bench of Richmonds in 7s and 8s just coming into bloom. There are also Magna, Druschki, Killarney, La France and Tom Wood.

In spiraea Mr. Craig thinks Gladstone beats them all and has discarded the older forms. There are a few only of the new pink spiraea, Queen Alexandra. There does not seem to be any great demand for this novelty and few growers have plunged on it.

Bougainvillea Sanderiana is one of the choicest of Easter subjects and in great demand among the high-class stores. The specimens run mostly about 3 ft. high with flat, spreading heads about four feet through and literally covered with pink bloom.

A batch of well-done Lorraine Begonia is in evidence and although this is usually held as a Christmas plant there is some demand for it at Easter also. Mr. Craig has struck it right this year in propagating this plant and showed with pride a bench of thirty five thousand young plants, the per centage of loss being well under the usual 15 per cent.

Frutescens and Queen Alexandra comprise the bulk of the Easter marguerite stock although there are a few hundred of the new Pink Alexandra. This latter is a charming thing and quite distinct. The center of the flower is bright pink, the petals pure white and more refined in form than the older variety. This originated with

EASTER STOCK

Send for Price List

MRS. CUTBUSH (New) Pink Baby Rambler
This is a good one, in 6-inch pots at \$6 and \$9 per doz.

BABY DOROTHY (New)
Pink Baby Rambler very similar to Mrs. Cutbush.
5-inch pots at \$6 per doz.; 6-inch pots at \$9 per doz.

HYBRID ROSES
We have an unusually large stock of Hybrids which will be just right for Easter; all the best varieties, including Richmond, Frau Karl Druschki, La France, Mrs. John Laing, Pom Wood, Kilmarney, etc., at \$6 and \$9 per doz.
MAISON CHARTRE, very fine at \$9, \$12, \$15 and \$18 per doz.

HYDRANGEAS
The largest and finest stock of this grand Easter plant that we have ever grown at \$5, \$6, \$8 and \$12 per doz. Larger plants at \$10, \$20, \$25, \$30, \$40 and \$5 each.

RHODODENDRONS
Specially well-budded plants, including all the best varieties at \$1.50, \$2, \$2.50, \$3, \$3.50 and \$4 each. A few larger plants at \$5 each.

RHODODENDRON PINK PEARL (New)
The most beautiful of all the Rhododendrons at \$2.50, \$3 and \$3.50 each.
BOUGAINVILLEA GLABRA SANDERIANA
Magnificent plants, exceptionally well flowered at \$3.50, \$4, \$5, \$6, \$7.50 and \$10 each.

LILACS
Very fine plants, 6-inch to 8-inch pots at \$2, \$2.50 and \$3 each.

ROBERT CRAIG CO., Forty-ninth and Market Sts., Phila., Pa

A few of our leading specialties are mentioned below. The late Easter and the fine weather have helped this year's stock in fine shipping condition.

GENISTAS

A grand stock, grown cool and just right for Easter at \$2, \$3, \$4, \$5, \$6 and \$9, per doz. Larger plants at \$2, \$2.50, \$3, \$4, \$5 and \$6 each.

SPIREA GLADSTONE

Our stock is in superb condition.
6-inch pots at \$5.00 each; 7-inch pots at \$7.50 each; 8-inch pots, made up, at \$1 each; 9 and 10-inch pots, made up, at \$1.50 and \$2 each.

PINK SPIREA

Queen Alexandra, very beautiful.
6-inch pots at \$9 per doz.

DOUBLE DAISY, Queen Alexandra

Well grown and well flowered.
3-inch pots at \$1.50 per doz.; 4-inch pots at \$2.50 per doz.; 5-inch pots at \$4 per doz.; 6-inch pots, very fine, at \$6, \$9 and \$12 per doz.

LILIES

Our stock is exceptionally good this year. Plants with from 4 to 8 blooms at 12 cents per bloom; made-up pans with from 12 to 25 blooms at 12 cents per bloom; plants with less than 4 blooms at 15 cents per bloom.

AZALEAS

We have the largest and finest stock of Azaleas we have ever had, including Vander Cruysen, Vervaeckan, Emp. of India, Emp. of Brazil, Niobe, Bernard Andria, Alba, Prof. Wolters, etc., etc., at \$7.50, \$1, \$1.25, \$1.50, \$2, \$2.50, \$3, \$3.50, \$4, \$5, \$6, \$7.50 and \$10 each. A few larger specimen plants at \$12.50 and \$15 each.
Pyramidal Azaleas, very fine, at \$3, \$3.50 and \$4 each. Small Azaleas for Basket Work at \$3 and \$4 per doz.

CRIMSON RAMBLER ROSES

These plants are unusually fine and will be just right for Easter.

6-inch and 7-inch pots at \$1, \$1.25 and \$1.50 each; 8-inch pots at \$2 and \$2.50 each; plants trained in fan and globular shapes, extra fine, at \$2, \$2.50, \$3, \$3.50, \$4, \$5 and \$6 each; a few larger plants at \$7.50 each.

PINK RAMBLER ROSES

Lady Gay and Dorothy Perkins
In great condition; trained into Fan, Globular and Pyramidal Shapes at \$1.25, \$1.50, \$2, \$2.50, \$3, \$3.50 and \$4 each. Special Ball Shapes at \$1.50, \$2 and \$2.50 each. Special Wire Fan Shapes at \$3 each.

TAUSENDSCHON (New) "Thousand Beauties"

This was our finest Climber last Easter and this year the plants are still better. We cannot recommend the Tausendschons Rambler too highly. Strong plants in 6-inch and 7-inch pots at \$1, \$1.25 and \$1.50 each. Trained plants, Fan, Globular and Pyramidal Shapes, at \$2, \$2.50, \$3, \$3.50, \$4 and \$5 each.

BABY RAMBLE N'DARDS

Exceptionally fine plants, 3 to 5 foot stems, at \$1, \$1.25, \$1.50, \$2 and \$2.50 each.

WHITE BABY RAMBLER STANDARDS

At \$1, \$1.25 and \$1.50 each.
STANDARD DOUBLE-BUDDED WHITE AND RED BABY RAMBLER ON SAME PLANT
At \$1.50 each.

BABY RAMBLERS

Good, strong stock, well flowered, at \$3, \$6 and \$9 per doz.

WHITE BABY RAMBLERS

Very strong plants, well flowered, 6 inch pots, at \$9 per doz.

CHICAGO, ILL.**

Mr. Keller of Bay Ridge and was bought from him and put on the market last year by Dreers.

Among the foliage plants suitable for Easter, first place must be given to the crotons. This place is famous for these, and they can be seen here by the houseful. Next in importance is *Draecena terminalis*, always a prime favorite when well colored, and it is all that can be desired this year. The new *Draecena Mandalaia* is in limited supply and appears to be a grand addition to this family. The green variety (*fragrans*) and the variegated (*Masseana*) are not much in demand for Easter.

Gardenias as pot plants are conspicuous by their absence this year. Presumably the high price of the cut blooms makes this too expensive as a pot plant in competition with azaleas, etc.

We started this little Easter story with the azalea and find we will have to finish with it also, as we omitted to mention a fine lot of the handsome little Japanese azalea with the bright crimson flowers—*Himelegert*. This is a little gem. G. C. W.

A Look In At Schultheis.

Ericas for Easter will be scarce. Last summer was a very severe one for them and many were lost by the New York growers, and the few that were carried through are all sold. Azaleas and rhododendrons will be unusually well flowered this year, judging from what Mr. Schultheis has in sight. Finest of all are the Hy-

drangeas. Never have we seen more shapely plants or more profusely flowered.

Roses are the strongest feature in the Eastern stock this year. Baby Ramblers and Adult Ramblers are seen in goodly quantity but the giant specimens of the latter which have been in evidence other years are missing. The experience last year when the large stock which had taken so much room and labor were left unsold was a practical lesson for the growers and if the buyer wants big Ramblers or big azaleas or big genistas this year he will have to splice three or four small ones together. Flower of Fairfield, the "Ever-blooming" Crimson Rambler is the most interesting thing Mr. Schultheis has. Every shoot brings a flower cluster and the blind growths of the ordinary Crimson Rambler are unknown on this splendid acquisition. Foliage and flowers seem absolutely identical with the old favorite. Nothing prettier or sweeter can be imagined in the Polyantha rose line than Apple Blossom. In color and fragrance the flower well bears out the resemblance to an apple blossom and the persistence of its petals is one of its strong points. Among the true Ramblers *Leuchstern* makes a pretty picture with its rosy pink petals fading to pure white at the base. We almost forgot to mention Catherine Zeimet as one of the most attractive of the dwarf Polyanthas, flowers large, double and satiny white.

Mr. Schultheis is a notable exception in one respect—he finds no fault with his lilies. He has tried a novelty in hyacinth named *Distinction*. Its color is purplish claret and its principal "distinction" is that nobody likes it.

Easter Plants in Chicago.

The cloudy weather which has prevailed for the past six weeks makes the situation a little difficult to forecast. There has been very little sunshine so far in March, and but three days that could be called bright in February.

To begin with, the favorite flower for the Easter holiday, the Easter lily, will not be overabundant. While most of the growers have a fair stock, the supply is scarcely up to usual quantity, and the stems are generally short. Considerable dissatisfaction has been expressed throughout the winter with the lily bulbs which were so mixed that an unusual number of plants had to be thrown out.

Bulbous stock has sold well all the season and Easter will find no surplus but rather a shortage in this line, especially in pans.

A fair supply exists of Crimson Rambler, Lady Gay, Baby Rambler and other rose stock. Rose stock is not so good as could be desired. The

large trained plants will be almost wholly lacking.

Some plants of "bleeding heart" will be seen and look like a desirable acquisition to the variety of Easter plants.

There appears to be about the usual quantity of azaleas, rhododendrons, spiraeas and *Primula obconica*.

Among green plants Boston ferns of large size and good quality are decidedly short in supply at present writing.

AN EFFECTIVE SPRAY.

The following testimonials have been received by Wm. Cooper & Nephews, who are advertising their Insecticide Spray in our columns:

Goldsboro, N. C., July 4, 1908.

I am glad to state that the use of your V1 Winter Spray Fluid was largely instrumental in saving my grape crop, as also currants and other small fruits.

(Sgd.) J. A. WASHINGTON.

Chappaqua, N. Y., June 18, 1908.

In answer to your letter I may state that the Fluid which you sent to me does excellent work. I sprayed about a dozen trees; they are now free from San Jose Scale and looking fine.

(Sgd.) ERNEST ULMER.

Pulteney, N. Y., Nov. 21, 1908.

The V1 Fluid is all right. My trees were in a fine condition all through the year up to the present time; my neighbors all were wondering over it. Half of my apple orchard I sprayed twice, the other half only once. If you could have seen the difference; the one half sprayed twice had larger and finer apples than the half sprayed only once.

(Sgd.) JOHN SCHUSTER.

320 Park St., Upper Montclair, N. J., June 4th, 1908.

Since using your V2 Fluid, where I could find worms by plenty, I now fail to find any. I have also used your V2 on rose bushes for the green fly with good success.

My plums, peaches and pears are in very good condition for young trees and are making good growth. Had I used the V1 I think I should have had no trouble with the disease I am fighting now. I shall recommend your fluids for spraying wherever I can.

(Sgd.) JAMES FETCH.

Dreer Special Offer OF Hardy Perennials

NEW OR LITTLE KNOWN VARIETIES WORTHY OF SPECIAL ATTENTION

TROLLIUS (Globe Flower)

PRIMULA CORTUSOIDES SIEBOLDI. These are not so well known as they deserve; they are of free, vigorous growth, and can be flowered in pots in early spring, and respond quickly to forcing when placed in a temperature of 50 degrees, forming pretty pot plants in a short time, making excellent window plants, which meet with ready sale when in bloom.

We offer six distinct varieties, from pure white to the deepest rose in color, \$1.50 per doz.; \$10.00 per 100.

RUDBECKIA RAYS OF GOLD. In this new variety we have a refined form of the popular "Golden Glow," to which it is identical in color, habit, etc., but the flowers have narrower petals, full to the centre, forming a perfect ball of gold, \$1.50 per doz.; \$10.00 per 100.

ANCHUSA ITALICA DROPMORE VARIETY. A grand improvement on the type, with intense deep blue flowers, \$2.00 per doz.; \$15.00 per 100.

ANTHERICUM LILIASTRUM GIGANTEUM. A giant form of the N. Bruno Lily with very large white flowers, \$2.50 per doz.; \$20.00 per 100.

AQUILEGIA HELENAE. One of the best of the Columbines, large pretty blue flowers, with large white corolla, 83 cts. per doz.; \$5.00 per 100.

CAMPANULA PERSICIFOLIA HUMOSA. A very large semi double form of the peach leaved Campanula, flowers of a pleasing shade of blue, \$1.50 per doz.; \$10.00 per 100.

DELPHINIUM GOLD MEDAL HYBRIDS. The finest strain ever offered in mixed varieties, \$1.25 per doz.; \$8.00 per 100.

DELPHINIUM BELLADONNA. The freest flowering of all Delphiniums, it is never out of bloom, beautiful turquoise blue, \$2.00 per doz.; \$15.00 per 100.

FUNKIA ROBUSTA ELEGANS VARIEGATA. A decided improvement on all variegated forms, \$1.50 per doz.; \$10.00 per 100.

HELENIUM RIVERTON GEM. A new variety that originated on our trial grounds. Flowers old gold, suffused with bright terra cotta, changing as they mature to a wallflower-red, \$1.50 per doz.; \$10.00 per 100.

HELENIUM RIVERTON BEAUTY. Another variety which originated with us, quite distinct in color, which is lemon-yellow, with a large disc of purplish-black, \$1.50 per doz.; \$10.00 per 100.

HELIANTHUS SPARSIFOLIUS. The most desirable of all the hardy sunflowers, especially valuable as a cut flower, 85 cts. per doz.; \$6.00 per 100.

FOUR VALUABLE HEMEROCALIS. The four varieties here offered are great improvements upon the well-known Yellow Day Lilies

Aurantiaca. Very large, bright, orange-yellow, sweet-scented flowers, 15 cts. each; \$1.50 per doz.

Aurantiaca Major. Large trumpet-shaped, sweet-scented, deep orange flowers. Requires protection, 35 cts. each; \$3.50 per doz.

Florham. Large golden-yellow sweet-scented flowers; very free flowering 15 cts. each; \$1.50 per doz.; \$10.00 per 100.

Gold Dust. Large golden-yellow flowers, 15 cts. each; \$1.50 per doz.

INCARVILLEA DELAVAYI. Popularly known as the hardy Gloxinia; extra strong roots, \$2.00 per doz.; \$15.00 per 100.

IRIS PALLIDA DALMATICA FOLIA VARIEGATA. A strikingly handsome variegated leaved form of this beautiful blue Iris, 35 cts. each; \$3.50 per doz.

GYPHOPHILLA PANICULATA FLORE PLENA. This is a perfect gem and as a summer cut-flower invaluable. We have a large stock of strong roots to offer this season, \$2.00 per doz.; \$15.00 per 100.

LUPINUS POLYPHYLLUS ROSEUS. This is a most attractive rosy pink form of Lupines, producing gigantic spikes of flowers, \$1.00 per doz.; \$15.00 per 100.

PENSTEMON GENTIANOIDES SENSATION. Gloxinia-like flowers in a variety of bright colors, including rose, cherry, crimson, purple, lilac, etc. For bedding they rival Phloxes, Petunias, etc. Not quite hardy 3-inch pots, \$1.00 per doz.; \$10.00 per 100.

STOKESIA CYANEA ALBA. A white form of the popular blue Stokesia, equally valuable and a desirable addition; strong plants, \$1.25 per doz.; \$8.00 per 100.

CHOICE NEW TROLLIUS. (New Globe Flowers.) The five varieties listed below are decided improvements on all sorts heretofore offered; of exceptional large size and good, rich colors.

Götterfunke. Large open orange-yellow flowers.

Helios. Very free flowering, pure yellow, on strong branched stems.

Leuchtkugel. One of the finest deep orange reds

Lichtball. Large, globular orange-yellow flowers on stiff stems.

Salamander. Soft orange-colored flowers of globular form, 35 cts. each; \$3.50 per doz. The set of 5 for \$1.50.

The Season's Record.

The season is drawing towards its close, and seedsmen are making comparisons of the year's business with those of the past and particularly of last year, and while the early part of the season showed a gratifying increase, March has been more or less of a disappointment to most of the mail order houses, and the close of the season is expected to show little if any increase over 1908. Those firms which are not strictly mail order houses cannot as yet make comparisons, as local trade on which many of them mainly depend has scarcely opened. Indications are encouraging, however, that the volume of business will be large, and the close of the season will no doubt show a good and satisfactory average. From the wholesale seedsmen's point of view, business has been excellent up to date, and everything points

to a continuance of the same until the close of the season.

Bean Scarcity.

Many weeks ago it was stated in HORTICULTURE that green pod beans were in short supply and that a surprise was in store for the trade if there was an active demand from consumers. The demand has been really better than was anticipated, and there is now akin to a famine in the leading green pod sorts, such as Red Valentines, Burpees and Giant Stringless and Black Valentines, the latter having been virtually out of the market since December, such a potent magnet as \$8.00 per bushel failing to draw out any.

The present wholesale price of choice high grade Red Valentine is \$3.50 to \$3.75, with offerings small, while the Stringless Green Pods are selling at \$4.50 to \$5.00, and very few attainable even at these figures.

As these beans are in more or less active demand as late as July, the opinion expressed by a well-known representative of one of the foremost wholesale houses is worthy of note. He says that before the end of July fancy stocks of Red Valentines will bring \$5.00 and Burpees and Giant Stringless will readily draw \$6.00 to \$7.00 per bushel if obtainable at all. All that stands between the planter and a genuine bean famine is the old and often abused Refugee or "1000 to 1," and even these are advancing in prices and should reach \$4.00 per bushel before the demand is satisfied.

Many varieties of peas are unobtainable in quantity, but the season is nearing its end for peas, and excepting a few bags now and then required by retailers, the demand has about ceased.

About Onion Seed.

Onion seed has been in fair demand, but considerable reserve of Yellow Globe Danvers will be carried over. The Flat Danvers and Yellow Strasbourg are well cleaned up, and these varieties will now draw better prices than the Globes. White Portugal is in short supply, as is also White Globe, though the latter is more readily obtained. Of the reds, Wethersfield and Early Flat Red are pretty well used up, but the Red Globes are still in fair supply.

Corn of some varieties is rather short, the medium and extra early sorts in particular, while Stowell's Evergreen seems to be abundant if one may judge by a price list recently sent out by a Connecticut house offering it at \$1.85. One may doubt the wisdom of these cut prices towards

In writing to Advertisers kindly mention Horticulture

the close of the season after having supplied all regular customers at considerably higher prices. These so-called surplus lists at cut prices are very suggestive of the Hebrew clothier, who has his quarterly cut price sales as a means of getting rid of his junk.

Demoralizing Cutting.

The moral obligation of protecting his customers against these cut prices in so far as he can, would seem to rest on every responsible dealer, but many will load up their regular customers at the best prices they can obtain, then offer any surplus they may have at auction prices.

The so-called surplus cut-price list which makes its appearance in the fall even before the season's crops are in store, and appears at intervals of every few weeks until May, is a pernicious way of securing business, and one of the most demoralizing factors with which the trade contends, and should be discouraged if anything approaching stability is to be maintained. But more later.

The Free Seed Answer.

The seedsmen have got their answer from Congress about the free seed distribution—it being practically a doubling up of the number of packets sent out—the increase being from 36,000,000 in 1909, to 60,000,000 in 1910.

After spending thousands of dollars, passing denunciatory resolutions, and humbly supplicating Congress, this is their reward. Verily the seedsmen's hopes have turned to dead sea fruit. There are reports as to how the Department's orders for seeds have been given which will require some explanation.

Hearing on Proposed Seed Inspection Law at Albany.

Gentlemen:—

At a preliminary meeting called by the writer, at the Hotel Ten Eyck, Albany, March 22nd, at 8 P. M., in order that some action might be taken regarding Assembly Bill No. 736, introduced by Assemblyman Callan, the following seedsmen were present, or were represented at the hearing:

E. E. Brunkerhoff, of J. M. Thorburn & Co., and Alex. Fisher, of Peter Henderson & Co., New York; Edward F. Phipps, of Honeoye Falls, N. Y.; F. H. Ebeling, of Syracuse, N. Y.; Geo. H. Price, of Albany, N. Y.; J. M. Lupton, of Mattituck, N. Y.; H. W. Gardiner, of Troy, N. Y.; Chas. Eckstein, of Whitney-Eckstein Seed Co., Buffalo, N. Y.; M. Parker, of Jerome D. Rice Seed Co., Cambridge, N. Y.; Nat. Seed Co., of Troy, N. Y.; Parker & Bennett, and Sherman & Eberle, of Albany, N. Y.; Fonda, James Vicks' Sons, Mandeville & King, Averill, Hathaway, Crossman Bros., Briggs Bros., and Brewster, Crittenden & Co., of Rochester, N. Y.

The above-mentioned parties were also present at the hearing of the bill which took place at 2 P. M. on the following day before the Committee of Agriculture, Mr. C. Fred Boshart, chairman. No definite conclusion was arrived at at the hearing, but Chairman Boshart suggested that we appoint a special committee of seedsmen to draft a bill and co-operate with Assemblyman Callan, and to report to the Committee on Agriculture again on March 30th.

With reference to this act, "To amend the agricultural law, entitled 'An Act in relation to agriculture, constituting chapter one of the consolidated laws in relation to inspection and sale of seeds,'" we understand the

penalty for violation of the law as expressed in Assemblyman Callan's bill is as follows:

"Every person violating any of the provisions of this chapter shall forfeit to the people of the State of New York the sum of not less than fifty dollars nor more than one hundred dollars for the first violation and not less than one hundred dollars nor more than two hundred dollars for the second and each subsequent violation. When such violation consists of the manufacture or production of any prohibited article, each day during which or any part of which such manufacture or production is carried on or continued, shall be deemed a separate violation. When the violation consists of the sale, or the offering or exposing for sale or exchange of any prohibited article or substance, the sale of each one of several packages shall constitute a separate violation, and each day on which any such article or substance is offered or exposed for sale or exchange shall constitute a separate violation. When the use of any such article is prohibited each day or any part of which said article or substance is so used or furnished for use, shall constitute a separate violation, and the furnishing of the same for use to each person to whom the same may be furnished shall constitute a separate violation. Whoever by himself or another violates any of the provisions of articles three, four, six, eight and nine, or sections three hundred fourteen and three hundred fifteen of this chapter or of section one hundred six, one hundred seven and one hundred eight of this chapter, shall be guilty of a misdemeanor, and upon conviction shall be punished by a fine of not less than fifty dollars, nor more than two hundred dollars, or by imprisonment of not less than one month nor more than six months, or by both such fine and imprisonment, for the first offence; and by six months' imprisonment for the second offence.

This is a matter of vital importance, and we fear, owing to the rush of business at this time of the season the matter is not having as careful attention as its importance warrants, and it is sincerely hoped that there will be a good attendance of the seedsmen at the next hearing which is set down for Tuesday, March 30th.

Yours very truly,

MARSHALL H. DURYEA,

2nd Vice-President of

American Seed Trade Association.

Tariff Committee Meeting of American Seedsmen, Florists and Nurserymen.

According to arrangement, the Tariff Committee of the Society of American Florists, American Seed Trade Association, and the American Association of Nurserymen, met in Buffalo, at the Hotel Iroquois, to compare notes as to the interests that each had in common. The S. A. F. were represented by Frank R. Pierson, P. Welch and Benjamin Hammond. The other gentlemen present were: J. C. Vaughan and Mr. White of the D. M. Ferry Co., representing the seedsmen; Irving Rouse, W. C. Barry, W. Pitkin, Chas. Brown and S. H. Payton, representing the nurserymen.

After a conference lasting three hours and a half, the following resolution was passed and signed respectively for the three associations, and this resolution was to be forwarded and used as far as possible with Congress to secure the desired end,—that is, to cut out ad valorem duties and substitute specific, wherever practicable.

We, the members of the American Seed Trade Association, the American Association of Nurserymen, and the Society of American Florists, as represented by our duly authorized Committees, and speaking for these three great industries (practically all of the commercial horticultural interests of the United States), unanimously agree upon the following resolution:

Whereas, There is now pending in the National Congress a tariff measure, known as the Payne Bill; and,

Whereas, This bill may without prejudice

OF INTEREST TO RETAIL FLORISTS.

Washington Notes.

The florists report an unusually good business during the past week and on Wednesday, St. Patrick's Day, some of the stores were practically empty of novelties shortly after the middle of the day. Everywhere was green in evidence and green carnations at \$3.00 per 100 went by thousands. One of the prettiest novelties shown was a green crepe paper cover for Shamrock pans which was tied with green ribbon and with a clay pipe attached. The sale of shamrock has almost doubled that of previous years. Carnations are and have been for some weeks, very scarce, owing, no doubt, to the almost continued cloudy weather. There has been a strong demand for gardenias and they easily bring \$5.00 per dozen in the wholesale market. Cheap bulbous stock is hurting the regular standbys not a little. A very smooth stranger relieved the Gude Bros. of a little

spare change a few days since. He gave his name as Fred. E. Pierce, agent for Admiral E. H. C. Leutz, U. S. N., and ordered flowers to the amount of \$54.00 sent to the Admiral. A cheque for \$75.00 was accepted by the firm and he was given \$21.00 in change. Pierce has since been captured in Cincinnati.

Business is very brisk in DETROIT cut flowers as well as plants. An ever-increasing

shipping trade keeps the wholesalers hustling and the stock at low ebb. Lilies are coming in a little more plentifully. This week will see most of the trade hustling in store decorations. Several of the most prominent stores have their spring openings and calls for palms, etc., are brisk. Unfortunately some of the dealers still believe that it pays to rent large palms for two or three days at 50c. per plant. A careful estimate of the price of the plant, cost of keeping, interest on capital invested, and considering that a plant is unsalable after ten decorations, will prove that a charge of 50c. per plant is not adequate.

Chas. McKellar, who has had great
success in handling gardenias for the
Chicago wholesale market, suggests
that florists frequently fail in the
handling of these easily injured flowers
because they put them in water instead
of keeping them in oiled paper.

Flower Market Reports.

The flower market is **BOSTON** generally sluggish this week and should spring weather conditions ensue, as now seems likely, a decided slump in values is a foregone conclusion. Roses are particularly weak and tending downward. They are accompanied by lily of the valley and all bulbous material, excepting lilies, which are doing fairly well. Carnations are also holding their own in good shape, especially the white section.

Trade was quite active **BUFFALO** the past week especially in the shipping line, though there was no great rush, but during these Lenten days there has to come a day once in a while to keep the clerks awake. Choice lines of stock are arriving daily and the retailers have no complaint to make of waiting for stock to fill orders as the coolers have been on the full house list, another instance where the wholesaler carries the largest portion of stock. Variable weather has made the trade irregular, though a satisfactory business is being done by both retailer and wholesaler. A good portion of white material has been consumed while colored stock was weak in demand. Roses are coming in more plentiful daily. Carnations have fallen off somewhat in supply, though plenty to be had and choice stock, all at prices that no one can complain of. Tulips and daffodils were not plentiful, though no demand for lily of the valley which is excellent. Violets, daisies, pansies, freesia and sweet peas have sold readily. There is a good supply of all greens, including Farleyense Adiantum. The trade is looking forward to one of, if not the best Easter that has been had and every indication points toward it.

Business has steadily improved during the past week. The demand for flowers has been good and the volume of trade consequently increased. White sold as fast as received and orders had to be frequently filled with longer stemmed stock than would have been used had short stock been obtainable. Some of the growers state that the quality of Beauties and other roses never was better than at the present time. Lilies are getting quite scarce. Present prospects are for a shortage in supply for Easter. Bassett & Washburn state that they never before have seen the market so bare of lilies and the price so high at this time of the year, and considered it a sure indication of a scarcity at Easter. Carnations are in good demand, all shipping stock selling out clean every day. White carnations are especially in demand, fancy stock bringing maximum quotations the first of the week. Demand for green is good both in smilax and asparagus. Tulips and daffodils seem to have shortened in supply. Shipping trade was very brisk the latter half of the week and Monday, the 22nd, started the new week in the same way. Wholesalers are very much pleased with the state of trade and look for an active market till Easter.

White carnations **PHILADELPHIA** are still off crop, with demand unusually brisk. Pinks and reds are more plentiful (especially Enchantress), but on the whole prices have stiffened up very considerably. Winsor, Beacon, Afterglow, Winona are among the favorites. Many of our growers say that Beacon has beaten them all as a money maker this year. There is call for medium sized whites, such as Queen or Boston Market, and the supply of same is very meager. The general run of roses are coming in a little too plentiful—and yet the demand is excellent. Richmonds are an exception. These are not so many and are cleaning up well. American Beauty is holding its improved form in quantity and quality, especially in the long stems. The price of same is firm and it looks now as if this market would hold unbroken until after Easter. Words fail the rose lover when he looks on the glorious Gardines and Killarneys now coming in. All he can do is dance with joy—and buy. Cattleya Schroederiae is the principal orchid coming in. A darker colored variety would sell better. We have heard of gardenias selling at twenty-five cents a dozen. We have also heard of gardenias selling at five dollars a dozen. The chances are the five-dollar grade was the best value. When a thing gets too cheap people don't want it. "R. K." should possess his soul in patience. He never had and never will, and does not have to, compete with the curb men. A first-class store knows that it is good policy to let good stock go to the dump rather than let a customer Jew them. If they are allowed to do it once they

will want to do it all the time. The few pennies the curb men gather in don't make much difference one way or the other, and in the main they spread a love of flowers among the common people. Single violets are going well but doubles are rather too plentiful. If this weather holds this crop will be in fine shape for Easter. Callas and lilies are going a little better. So is lily of the valley. All the daffodils now coming in are southern grown. Sweet peas are in better favor and bringing good returns.

For Mid-Lent market conditions remain quite satisfactory. The principal call for the past week was stock for store openings and several large weddings, but a reasonably steady demand exists in all lines. Roses and carnations are plentiful and of good quality and move freely. Beauties are not over plentiful but enough to go around. The warm days have affected the outside bulbs such as Dutch hyacinths, tulips, etc., and in many cases stock that was intended for Easter will be ready long before that time. The market is well stocked with bulbous stuff, the demand for which is good. Orchids, lily of the valley and sweet peas seem to be good property with a lively demand. All the florists are very busy. The prospects point to a good stock of everything except lilies for Easter. This seems to be a good market for cheap green stock.

Retailers and wholesalers report business as good in the Twin Cities during the past week. Supply about equals demand, except bulbous stock which is pretty well used up for the present.

EVERYBODY KNOWS

Gardening cannot be properly done without the aid of an accurate leveling instrument.

Bostrom's Improved Levels, No. 2 at \$15.00 and No. 3 at \$25.00, are conceded by all who **KNOW** to be the only Levels on the market which meet all the requirements, at the price.

Our guarantee back of every Level we sell, and satisfied users in every State in the Union heartily endorse every claim we make.

Shipping weight 12 lbs. Description on request.

NEW YORK MARKET.

An embarrassing stagnation which set in two weeks ago and has been growing more pronounced ever since prevails in the cut flower trade, whereby the second or third rate flower becomes the leader in selling power and the finest grades are moved with extreme slowness unless the wholesaler is brought to accept the third class price for same. In short, the local trade in the leading florist stores has fallen off until it is able to handle only a small percentage of the grades produced especially for its needs, and the street trade and the distributors who cater to the plebeian buyer are the main support and relief of the congested wholesale market. This is particularly true as regards roses. Carnations have not been excessively overstocked and are more readily unloaded but there are a good many bursted and otherwise dilapidated specimens on view. Lilies continue very irregular as to grade. Tulips hold their own fairly well, especially some of the best-grown doubles, but other bulbous stock remains at bottom notch, and violets are distinctly a street-stand flower. Cattleyas are of excellent quality and find a steady market. Den-drobium Wardianum is seen in considerable quantities. There are very many undersized and otherwise imperfect gardenias at present, and even the

best specimens are bringing only about one-half of the prices returned two weeks ago. The retail windows are suggestive of the approach of Easter; azaleas, hydrangeas, baby ramblers and other flowering plants occupying the space in which cut flowers were predominant heretofore.

Oakland, Cal.—The store of H. M. Sanborn, florist, 14th and Clay streets, was ransacked by burglars March 11.

WANTED—Situation as traveler. Good knowledge of orchids, stove and general plants and shrubs. Practical experience in Europe. Three years in Orchid Dept. of Hort. L. I. & Co. Good appearance; fluent English, German and French. J. Muller, 34 Bayter St., Toronto, Canada.

Assistant Gardener wanted on a private place, a young man, must be industrious and sober; state experience. Address A. A., HORTICULTURE, Boston.

SITUATION WANTED—First-class carnation grower, sober and industrious, would like a position in the vicinity of Boston. Can furnish good references. H. M., care of HORTICULTURE, Boston.

SITUATION WANTED—First-class French gardener, married, no children, two years' experience in America and 12 years in France; understands greenhouse work; best references; private place. Address Alexander Buteux, 236 West 30th St., New York City.

FOR SALE

FOR SALE—A fine estate situated on high ground at Hyde Park, Mass., near Milton. Two minutes from R. R. station, fifteen minutes to Boston. House, 14 rooms and bath, all conveniences. Corner lot, 47,375 ft. of land, fruit trees, 10 acres. Greenhouse, 118 x 33, built 1908, 6 on sides, 16 centre, 16 x 24 glass. Good opening for commercial florist. Address A. G. Chickering, 53 State St., Boston.

FOR SALE—Retail nursery, sixth year, doing good, steady and increasing trade. Stock in excellent condition. Only local supply for community of 50,000. For particulars address R. N., care HORTICULTURE, Boston.

FOR SALE—Truck Farm, 36 acres, 10,000 ft. of greenhouses, two dwellings, out buildings, good repair, central to seven towns. Price right to quick buyer. Chapin Bros., Pine Brook, Morris Co., N. J.

TWEMLOW'S Old English Glazing Putty,

SEMI-LIQUID,

For bedding glass in sash or for filling cracks or seams in roof joints or frames
OF GREENHOUSES OR HOT BEDS.

THIS PUTTY

Is used in Machine or Bulb.

If too thick for bulb thin with a little
Pure Linseed Oil, boiled.

So thinned it can be brushed into
any crack or leak, making
a solid filling.

THIS PUTTY

makes a solid bed, impervious
to moisture, and holds glass in its
place, and will stop any
crevice or fault.

When once set on dry wood it
does not heave.

NEWS NOTES.

Hartford, Conn.—J. H. Gowen has bought the Woodward greenhouse at Broadview Heights.

Clifton, O.—John A. Hansen lost several hundred dollars' worth of plants during the recent storm of sleet and wind.

Albany, N. Y.—Wm. S. Egerton, formerly superintendent of Albany parks, has started in business here as landscape architect and engineer.

Jackson, Tenn.—T. L. Metcalfe offered a prize for a name for his greenhouses, and as the result his place will be known hereafter as Jackson's Pride.

So. Hadley Center, Mass.—Benjamin S. White has disposed of his business and taken the position of horticulturist on the estate of Joseph A. Skinner.

Chicago. The florists in the wholesale district are grieving over the death of their mail carrier, Philip Sesternhen. He had been a daily visitor for over 12 years.

Worcester, Mass.—Some vandal entered the greenhouses of Chas. B.

Fish & Co. on the night of March 12, broke over 700 lights of glass and cut over 100 shrubs close to the ground.

Keatchie, La.—The Southern Nut & Nursery Co. has added 600 acres to its present tract and will plant same with trees by April 1. The soil in this location is peculiarly suited to pecans.

Los Angeles, Cal.—Fumigation methods in this county have so impressed the Japanese Government that an offer has been made and accepted by Erwin Dingle, secretary of the Horticultural Commission, to visit the domain of the Mikado in August and introduce the process.

Long Branch, N. J.—W. D. Robertson has resigned his position as gardener to W. D. Kinney and will, on May 1, start in business in the greenhouses that he has recently built on his Monmouth Road property. Mr. Robertson's name has become familiar to the readers of HORTICULTURE through the many prizes he has won.

The complaint made by the Florists' and Gardeners' Club of Rhode Island at a meeting on March 15, that the

Rhode Island College at Kingston was selling the product of its greenhouses in Providence in competition with the regular growers, has brought a statement from President Edwards of the college. He plainly states that the administration knew nothing of the alleged agreement with Prof. Wheeler, but as soon as the matter was brought to the attention of the authorities, steps were taken to discontinue the sales.

USE THE BEST.

Economy Greenhouse Brackets

are used by leading growers everywhere. Send for price list and descriptive circular.

BUXTON & ALLARD, Dept. A, Nashua, N. H.

GREENHOUSES BUILDING OR CONTEMPLATED.

Newport, R. I.—Wm. Hay, one house.
Leavenworth, Kan.—C. Hinz, range of houses.

Putnam, Conn.—Alexander Mann, one house.

Indianapolis, Ind.—Albert Pettit, one house.

Independence, Ia.—J. P. Murphy, five houses.

Indianapolis, Ind.—Smith & Young Co., two houses.

Chicago, Ill.—Joseph Vacha, two houses, each 22x100.

Redlands, Cal.—Sidney Hockridge, three vegetable houses.

W. Manchester, Mass.—C. V. R. Crosby, addition 17x29.

Toledo, O.—Krueger Bros., three carnation houses, each 30x250.

Chicago, Ill.—Brant & Noe, two carnation houses, 300 ft. each.

BUSINESS CHANGES.

N. Milwaukee, Wis.—Albert Groth has bought the greenhouses of C. Johansen.

Michigan City, Ind.—Miss Lillian Bowes has moved to the Ledbetter building, W. 7th street.

Cincinnati, O.—Mrs. Wm. Cunningham has leased the greenhouses to A. J. Horning, of Toledo.

Concord, N. H.—G. J. Benedict, of Canaan, has leased the greenhouses of W. M. Colby at 25 South street.

Warren, O.—Hartman Bros. have sold their market gardening business to J. F. Davis, of Wardner, Idaho.

Independence, Ia.—J. P. Murphy has bought out E. M. Bissell, who will retire from business on account of ill health.

Minneapolis, Minn.—Oscar Carlson has bought out the interest of his partner, Mr. Sandberg, and will carry on the greenhouses alone.

PATENTS GRANTED.

913,681. Boiler. Walter A. Berry, Chaitanooga, Tenn.

913,790. Lawn Trimmer. Jacob Weber, Chicago, Ill.

913,791. Lawn Sprinkler. Darius W. Wells, Oakland, Cal.

912,953. Implement for Hoeing and Topping Growing Plants. Adolphus P. Granger, Nashua, Iowa.

914,227. Weeder. Ambrose Barkley, Pipestone, Minn.

CATALOGUES RECEIVED.

American Nursery Company, New York, N. Y.—Handbook of Trees, Shrubs, Vines, Ornamental Plants and Fruits, for Lawns, Parks, Gardens, Streets and Country Estates. This is a publication worthy of more than a passing notice. It is handsomely printed and illustrated in sepia. It is abridged somewhat as to numbers of varieties which is commendable and the text is accurate and reliable. The covers bear fine illustrations of Abies concolor and hardy rhododendrons.

FIRE RECORD.

Brunswick, Ms.—The Hamilton greenhouses, leased by Frank Williams, were badly damaged by fire on March 16. Loss \$1,000, with no insurance, is reported.

Sparta, Wis.—The plant of Z. K. Jewell & Co. was badly damaged by fire in the early morning hours of March 10. The boiler shed was destroyed and the glass in four houses so badly broken that the intense cold prevailing at the time killed the stock. The loss is reported as \$2,500, with no insurance.

INCORPORATED.

Middletown, Conn.—F. Brewer Co.; W. B. Brewer, Grace A. Brewer, W. U. Pearne.

Troy, O.—The Southwest Nursery Co., by S. A. Coppock and others; capital, \$10,000.

THE QUESTION OF STRENGTH

IT is conceded that the strongest and most durable structure known is "THE IRON FRAME." And when you have all the *Modern* features combined in this type of construction you have "The Ideal Greenhouse."

The picture shows the beautiful symmetry of my "Curved Iceless Eave"—no heavy antiquated shading members. And I also make a specialty of having my work harmonize with surrounding conditions. Note how the mason work on greenhouse conforms to that on adjacent stable.

The advice of "The Practical Greenhouse Builder" is at your disposal for the asking.

CHICAGO 25th & 26th Sts.

WHAT ARE YOU LOOKING FOR?

Just a greenhouse that "answers the purpose," or one that more than answers it? Do you want a house that will produce more blooms through December, January and February than any other house constructed any other way? Then buy a U-Bar. It is the lightest house built—and if it is lightest, it is most productive. It is a house with every possible decay point fully protected.

Send for fully illustrated catalog.

U-BAR GREENHOUSES

PIERSON

DESIGNERS AND BUILDERS

U-BAR CO.

1 MADISON AVE. NEW YORK

Gable of the last Shadeless Ridge House. The new one is going up to the left of this.

F. R. Pierson Co. Builds Another Iron Frame House

IT is to be an exact duplicate of this one which we built for them in 1906, excepting that in place of the wooden sill on top of the concrete wall, Mr. Pierson is going to try out one of concrete. It looks practical to us.

Mr. E. H. Kroninger of Allentown, Pa., who has just ordered a house 57 feet wide and 400 feet long, decided, however, upon our Cast Iron Sills for his concrete sides.

The frame work of the Pierson house is already up. It is 55 feet 6 inches wide by 300 feet long. The north pitch is $37\frac{1}{2}$ degrees, the south $26\frac{1}{2}$ degrees, making a ridge height of 23 feet 5 inches. The sides are 6 feet 6 inches high from grade to the Ice-Clearing Plate at the eaves.

The iron rafters are welded at the eaves to the Guaranteed Wrought Iron Posts which are partially imbedded in the concrete sides, and extend into the solid concrete footing 2½ feet below grade. Reinforced concrete is used up to the usual height of boarding, and tapered off near the top of the inside face to take the sill.

It has been customary to hinge the side sash directly to the fascia on the interior side of the galvanized plate, but here a fascia is not used at all, and the sash are hinged directly to the plate,

Interior, looking towards same gable.

But it is looking directly at the roof itself that you appreciate the lightness and strength of our construction.

greatly decreasing the shade at this point.

When his first house was ordered, Mr. Pierson insisted on having an arrangement of the side ventilation that would extend the least possible into the walks; so "L. & B." got busy and designed a specially compact gear with 6 inch arms, and carried the shaft directly through the posts which serve as bearers. As a result no part of the apparatus extends into the walks beyond the line of the side heating pipes.

In the ridge ventilation the operating rod is brought directly down through the bench and a miter gear used, with a hand wheel placed at side of bench. This leaves the bench entirely free.

The $1\frac{1}{2} \times 1\frac{1}{4}$ inch cypress bars are screwed directly to the angle iron purlins which prevent their shifting.

It is a significant fact that after both Mr. Pierson and Mr. Kroninger, this season, went exhaustively into every feasible kind of construction on the market, they came back to where they started—the I. & B. Sectional Iron Frame.

To build wide houses with experimental constructions which are but a few months old, is taking a risk few growers can afford. When you invest several thousand dollars in a house you should not take chances. The L. & B. Sectional Iron Frame has stood the test of years, and is now, as at the start, the ideal construction.

Before you build give it the very serious consideration it deserves. It will be greatly to your advantage to take it up with us.

HENDERSON'S INVINCIBLE ASTERS.

A superior type, of healthy, robust growth, producing long-stemmed flowers of immense size and perfect form.

The plants are of very healthy, robust, branching growth, about two feet high, producing, on long stems, massive, paeony-formed flowers of perfect form and faultless outline, and exceedingly double to the very center. When well grown the flowers of Henderson's Invincible Asters average $3\frac{1}{2}$ inches across: 4-inch flowers are quite common, and if grown especially for cut flowers, the side branches pruned, allowing a plant to carry not over 8 or 10 flowers, one flower to a stem, their size will then be enormous, measuring $4\frac{1}{2}$ and 5 inches across. These magnificent blossoms being gracefully poised on strong, well-leaved stems, 15 to 18 inches long, resemble good-sized Chrysanthemums, and are unspassed as cut flowers.

WHITE KILLARNEY

We Know You Will Want to Buy White Killarney

Every live, progressive, up-to-date grower who has seen it is buying it; but when you buy White Killarney, be sure you get the right White Killarney (the Waban variety). When you buy from us you get the variety that has been exhibited and certificated, and the one that has attracted such favorable mention.

If you are in the vicinity of New York, we should be glad to have you call and see White Killarney growing at our Scarborough range, and you will say at a glance—as everyone has who has seen it growing—that it is by far the best white rose that has ever been placed on the market.

It is not only a good winter-flowering rose, but is good the entire year, and it is a splendid shipper. Read the following letter received from Mr. Willis N. Rudd, Secretary of the Society of American Florists, dated January 15th, in which he writes as follows:

"Dear Mr. Pierson:—I cannot refrain from writing you and expressing my admiration for the White Killarney as shown at Chicago on Thursday. It is an exquisitely beautiful thing and attracted much attention. I took half the blooms home with me, and they were finer on Saturday than they were at the show. The record is that these blooms were shipped from Tarrytown, staged and exhibited during the afternoon. They were then carelessly wrapped up in a box, and remained in that box until one o'clock Friday morning, at which time I reached home; improved in quality up to Saturday, and were in fairly presentable condition on Sunday.

In addition to being the most beautiful white rose of its class which I have seen, this demonstrates its splendid keeping and shipping qualities.

W. N. RUDD."

We were awarded Silver Cup at National Flower Show, Chicago, for best new rose with White Killarney; also Silver Medal Horticultural Society of New York.

Strong plants, 2 1/4 inch pots, own roots, now ready for delivery, \$30.00 per 100; 250 for \$70.00; 500 for \$125.00; 1000 for \$250.00. Grafted plants, ready April 1st, \$35.00 per 100; 250 for \$82.50; 500 for \$150.00; 1,000 for \$300.00.

In writing to Advertisers kindly mention Horticulture

Rhodora canadense L.

Rhodora canadense is a native shrub, from 2 to 3 feet high, found in rather moist locations from Canada to the mountains of Pennsylvania. As one of the many beautiful representatives of the large plant family, Ericaceae, it is one of our prettiest harbingers of northern spring. When in May, after long and patient waiting, the sun has melted the thick ice and snow in the Canadian forests and birches and alders in the Maine lowlands begin to leave out, then this shrub, on still bare branches, unfolds its masses of bright, purplish pink blossoms. Standing in clusters their vivid tints lend life to the, for the largest part of the year, dreary, comfortless aspect of the northern bogland. Confronted with this bush of fire in the real wilderness the human eye in wondering gaze realizes the fact that Nature in her kindness sometimes strikes the gayest color notes where otherwise the general character of the vegetation seems to be bare of all cheerfulness. Wherever I met *Rhodora canadense* in masses and had the good fortune to see their waves of blossoms in full glory, be it along the edge of the woods, in glades, or on open pastures, they always impressed me as part of the strong tuneful floral interlude of the brief, and, while brief, amazingly active and productive, growing period characteristic to all vegetation of the North.

Seeing this shrub among the more pretentious members of its family, noteworthy the mollis and pontica azaleas or the evergreen Catawbiense varieties of rhododendrons on the shrubby borders of cultivated gardens we are apt to think very little of it. In the wilderness we at once perceive its true significance. Here we understand Ralph Waldo Emerson's beautiful poem on *Rhodora* at a glance.

The aforesaid makes it sufficiently evident that our *Rhodora canadense* is not an ornamental garden shrub in the common meaning of this term. It endures, however, on its native home, the inclemencies of our long winters without the least harm and grows under conditions and in a soil where very few of our more tender flowering garden shrubs will thrive. For this reason it merits its space in wild gardens of our northern states where it is easily naturalized and generally appears well in keeping with the native vegetation. The bright and cheering colors of its masses of little blossoms as floral greetings of the spring are so charming that if seen once they will seldom leave the memory of a true plantlover.

Richard Rothe

Northeast Harbor, Me.

European Horticulture

NEW LILACS RAISED BY THE LATE W. PFITZER, STUTTGART

For many years efforts have been made by hybridists and others to improve the blossom of this harbinger of spring, and handsome shrub. Foremost in the ranks of hybridists is Mr. Victor Lemoine of Nancy, France, who has put into commerce many single and double-flowered varieties. Herr Louis Spath Baumschulenweg, Berlin, is another successful raiser of lilacs who has been especially fortunate in single-flowered varieties. Still more successful was the late Wilhelm Pfitzer of Stuttgart, who carried out his crosses in his private garden, situated at the foot of the Stuttgart Hasenberg, with the newest and best known beautiful varieties. Hundreds of seedlings were selected in flowering time, carefully transplanted, and put under observation in the following years. These were sorted, the best chosen for propagating purposes and the rest thrown away. After repeated selection three varieties, color plates of which are given in *Die Gartenwelt* for March 11, are to be put into commerce next autumn. *Perle von Stuttgart* is double flowered, pearly rose in the bud, passing to lilac rose with a white reflex, with spike of great size and graceful form. *Frau Wilhelm Pfitzer* is single-flowered, of a fine rosy lilac tint, the bloom making a pyramidal slender spike that is very ornate. It is a free bloomer. *Kate Harlin* is likewise single-flowered, of an alabaster white. The flowers are of a large size, stand at an equal distance asunder, and this gives the spike a light, elegant appearance.

BROKEN BRICK IN POTTING SOILS

Much has been said in recent years about the cultivation of Odier (English) Pelargoniums in the German gardening press; and M. H. Seeger, writing in *Moller's Deutsche Gartner Zeitung*, No. 11, 1909, contributes the following advice regarding potting for these plants: "I plant my English Pelargoniums in rich, turfy loam, leaf mould, sand and a good proportion of brick dust mixed with those ingredients. According to my belief the dust is a means of warding off attacks of green fly, at least the fly does not appear as abundantly. I suppose the brick dust imparts a bitter taste to the juices of the plant which the fly does not like. The flowering of the plants is more abundant. I use the brickdust as early as the month of August for the cuttings; and it is my opinion, that the young plants come better through the winters by its use."

FAVORITE VARIETIES OF FUCHSIAS

There are several varieties of the Fuchsia which are great favorites in the neighborhood of the Hartz mountains which are regarded by the public as being invaluable, and have been cultivated in that region for many years by the market growers in masses. The plants are favorites with the florists and those who supply the markets for the reason that they grow with rapidity and come to the flowering stage quickly, besides being very free to bloom. February cuttings develop with proper culture into capital market plants by the month of May. these varieties are *Enile de Wildman*, a double white or robust growth and very floriferous. *La Coree*, double, calyx carmine, corolla white: the flower large and long enduring. *Mad. Eva Boeg*, single flowered, calyx flesh colored with green points, corolla magenta, and of great length. A good variety for hanging baskets etc., is *Voltaire*, semi-double, calyx scarlet, corolla plum col-

ored with rose red veining; an inexhaustible bloomer. It makes a good standard.

A DISEASE OF VIOLA CORNUTA VARIETIES

A peculiar disease has appeared on the Tufted Pansies (large flowered *Viola Cornuta*) which makes itself apparent in the inward rolling up of the margins of the leaves; and the disease appears mostly in dry weather and in plants growing in poor soil, whilst it is scarcely to be observed during moist weather and in rich soil. In the spring there is scarcely any trace of the disease but in the chief flowering and afterwards the disease becomes very general till autumn when it is much less apparent. The injury done by the mite on the plants attacked, is to greatly lessen the quantity of the bloom, which on healthy plants is uninterrupted till late autumn. The disease has extended itself widely in Switzerland, and it has appeared likewise in England. The cause of the disease is a mite belonging to *Eriophyes*, in England known as *Eriophya Violat*. The creature lives in the curled-up leaf edge, causing by its sucking of the sap the uprolling of the edge. A similar malady has long been known, according to Darboux and Houdard, to infest *Viola calcarata* and *V. canina*.

THE BOTANIC GARDEN AT KEW

This, the largest botanical garden in the world, which can look backward to an existence of 350 years and is three times larger than the recently established garden at Dahlem near Berlin, was visited in 1908 by 2,716,220 persons, that is, 260,000 more than in the previous year. The number of visitors in the last two years is the highest in the course of its existence. In the last ten years (1898-1907), about 16 1/2 millions of people have visited the gardens. The highest number in one day (in August) was 93,388 and the lowest number (January 21), 68 persons.

ENGLISH DAHLIA TRIALS.

We learn that the English National Dahlia Society will hold this year two shows in September next and inaugurate three trials in order to ascertain the varieties suitable for decorative purposes in the flower garden. There will be trials of Show and Fancy varieties at the Royal Horticultural Society's garden at Wisley. Cactus varieties at Shenfield in conjunction with Mr. J. T. West, an eminent dahlia specialist, and of Pompon varieties at Slough, superintended by Mr. C. Turner of the Royal nurseries at that town. Garden Dahlias will be grown under name, and two specimens of each variety should be forwarded to the superintendent of the R. H. S.—Mr. Wright, and addressed, if by railway or the post, to The Gardens, Wisley, Ripley, Surrey, a notice of their despatch being sent by post in either case. In regard to the other trials, new varieties of the Pompon and Cactus varieties are alone invited, which will be grown under numbers. Moreover, comprehensive collections of dahlias in commerce are requested to be sent in not fewer than two plants of each variety, not later than the end of the month of May. Persons wishing to send their new varieties should notify their wish to Mr. E. F. Hawes, Royal Botanic Garden, Regents Park, London, N. W., together with the names of the varieties. Packages should be forwarded carriage paid. The plants will be judged by a special committee of the N. D. S.

SAXIFRAGA DR RAMSAY.

This pretty silvery-leaved Saxifrage bears the name

of an enthusiastic horticulturist, and was raised by Mr. Robert Lindsay, Kaimes Lodge, Midlothian, N. B., by crossing *S. Macnabiana* and *S. Lantoscana superba*, both of which species have silvery leaves. In habit it favors the last named species. The flowers are white with a few red spots that effectively set off the bloom. The rosettes are of a silvery-grey tint, and the plumose spikes of bloom are bent over as in *S. Lantoscana superba*. It is a good doer but too many flowers should not be allowed to develop. Mortar, rubble or pieces of lime stone should be mixed with the soil, *Saxifragas* having a liking for lime.

SOPHRONITIS ROSSITERIANA

This species differs from the allied garden varieties *S. coccinea* or *S. grandiflora* in having much more brilliant flowers, which are not much smaller. The color of the flower is not easy to describe; it is a glittering red orange that is not common in nature. The color of *Impatiens Holsti* is that nearest to it. The lip shows more of an orange tint. The flowers have a longer petiole, and in consequence are more elevated over the leaves than are those of *S. grandiflora*, the pseudobulbs are more slender, and erect and the leaves smaller. The plant is a native of Brazil in the high mountains and is met with growing on the rocks, therefore it should be afforded a light position, near the glass, and a moderate degree of warmth. The blooms endure for several weeks in good condition. The plant does not require much moisture at the root nor to be often syringed.—*Die Gartenwelt* for March 6, 1909.

EPIDENDRUM VARIEGATUM. HOOK.

Comes from South America. The blooms are of a yellow color tipped with brown. The roots come much in contact with the air and fix themselves firmly on cork. Certain Epidendrums refuse even this support. Perhaps because the surface of the cork quickly becomes dry is the reason for this, and in any case better results are obtained with plants fastened to cork than to wooden blocks.—*Die Gartenwelt* for March 6, 1909.

A ROSE GARDEN FOR BERLIN.

A project is afoot to form a Weltrosarium, the largest in the world, consisting of 10 morgens of land (a morgen measuring 3.122 square yards, English). Britz, near Berlin, offers the most suitable site for such a garden, the soil, a sandy loam being eminently fitted for the growth of roses, and for which it is celebrated, there being at the present time 125 morgens under rose culture at that place. The rose garden will not only draw visitors at the flowering time of the rose, but will also be available for scientific research by professional people, and laity, at any time.

Friedrich Möhrke

Godetia Schamini fl. pl.

See Colored Plate With This Issue.

The godetias are excellent border annuals flowering profusely all through the summer and thriving in a rather dry, sunny situation. Nicholson and Bailey class godetia as a sub-genus under *Oenothera*, the Evening Primrose. The beautiful double-flowered variety illustrated was introduced in England three years ago.

SUPPLEMENT
HORTICULTURE, VOL. IX, No. 14
APRIL 3, 1909

Brasso-Cattleya Susannae

To the best of our knowledge this is the first hybrid to be exhibited of American origin with *Brassavola Digbyana* as a parent. This was used as a pollen parent the seed bearer being the type plant of *Cattleya* x *Thayeriana*; thus the *Brasso-Cattleya Susannae* contains $\frac{1}{4}$ *C. Schrodere*, $\frac{1}{4}$ *C. intermedia*, and $\frac{1}{2}$ *Brassavola Digbyana*. The color is a uniform pearly pink, and the flowers were fully expanded a month before being exhibited before the Massachusetts Horticultural Society, March 25th, thus showing valuable lasting qualities inherited from *C. Thayeriana*.

Fully expanded, the flowers are five inches across, and the plant though small promises to produce even better results when as strong as one yet unflowered.

Horticulture in the Newspapers

Editor HORTICULTURE:

I notice with much interest the note concerning horticultural editors, in your issue of March 20th, and take this opportunity to call attention to the work that is being done by the National Council of Horticulture through its Press Bureau work. It has been the aim of the Council to prepare authentic articles on horticultural matters, that would be acceptable to the newspapers, and at the same time give accurate information to the general public. While the work thus far has not been all that might be hoped for, a good beginning has been made, and the general subject of horticulture has been exploited along broad lines, and renewed interest in various phases of the subject has been created at very little expense.

The Council has on its mailing list, leading newspapers in all sections of the country, as well as newspaper syndicates through whom the articles go to some 2,000 papers, thus reaching a total of nearly 3,000 different publications, with an estimated aggregate weekly circulation of two or three million. The cost of editing and distributing to these papers four short articles has been \$30.00 per week, exclusive of the very small amount spent in the preparation of articles, as most

of them have been prepared free of expense to the Council. With a competent person, giving his full time and thought to this work, articles of the greatest merit might be furnished the entire year, and should have the backing of non-commercial organizations, equally interested in all branches of horticulture and national in its scope. Such organization is embodied in the National Council, and if its endeavor to exploit horticulture could be universally supported, the influence for good could hardly be over-estimated. Moreover, there is a great demand for this kind of information by the newspapers, and the horticultural interests warrant much stronger backing than has thus far been given to further the work.

It seems to me that if all of the horticultural interests could combine, and secure the services of such a man as Mr. Robert Cameron of the Harvard Botanical Gardens to prepare and edit such articles, and distribute them to the newspapers throughout the country, as the Council is now doing, the funds for such work would be well spent and would redound to the profit of the commercial horticulturist, whether he be a landscape gardener, nurseryman, fruitgrower, florist or a seedsman.

Boston
 warms up

Our news columns in this issue supplement the cheering report of last week in connection with the Spring Exhibition at Boston, with the very gratifying news that the affair will bring an unprecedented profit to the Massachusetts Horticultural Society. The key to the hearts and the pocket books of the Boston public, generally looked upon as impervious, has been found for once, anyway. A contributor to *The Bean Pot* said recently, "Every Boston woman has—A Boston Bag. A subscription to *The Transcript*. A bill at R. H. Stearns. A seat at the Symphony concerts. A rubber plant. A Purpose." Developments of the past fortnight indicate that she has had something else, for the time being, at least—a ticket to the Spring Flower Show and A Purpose to traverse the paths, bridges and grottos of the Japanese Garden, and we might add that it required the services of two policemen at the gates to hold her in check. The two groups of views which we present in this issue, together with the large view used as a cover illustration last week, will, we think, convey to our readers evidence on which to base an idea as to whether or not the Boston woman got full value for her ticket.

Easter
 greeting

To its rapidly growing family of readers, HORTICULTURE extends its fifth annual Easter greeting, with sincerest wishes that the cheery confidence and buoyant hopefulness characteristic of these spring days

"While ilka thing in nature join
 Their sorrows to forego"

may as the season glides along prove to have been but the foretaste of a happy reality. Apart from its religious sentiment the Easter time awakens in us a joyous response to the exultant spirit of reanimated Nature, the very mention of the word brings the aroma of daffodil, primrose and apple blossom, and he surely must be in the lowest depths of despondency who cannot, under such inspiration, cast off his burden of past reverses and brace himself for a new tussle with fortune. For the florist, Easter has an added significance—a very practical side. For many it means the fruition of long months of preparatory application and unremitting toil. We would express our hope that good weather may favor them at this critical time, that every plant and flower so carefully nurtured through the long winter for this great festival may be just ready at the right moment and that business for the florist throughout this broad land may hum as it has never hummed before.

A success
 and its lesson

It is quite evident from the reports on Clubs and Societies which have been appearing in our columns of late that there is awakened activity all along the line and that especially the exhibition enthusiasm is again rampant after a period of timidity due to various causes, one of which was undoubtedly the manifest lack of interest in these enterprises on the part of the public. The unprecedented success of Boston's spring show after so many years of torpidity will no doubt have a braising effect and arouse new confidence in places where bitter experience has taught wariness heretofore. Some will begin to question whether the public indifference to our displays, put up with so much labor and self-sacrifice, is not, after all, largely our own fault and possibly reflect that we ask too much when we expect the public to interest themselves in our products from the same view point as ourselves. If the Boston experience is to help brace up our courage let it also teach us the lesson we have been so slow to learn, that, if our exhibitions are to

prove financially successful, then in the making of our schedules, in the preliminary exploiting and advertising, and in the management generally, the public caprice must be taken into consideration and first place given to the providing of meritorious novelty—not alone the novelty which inspires the expert grower but that which will appeal irresistibly to the people who draw their wallets at the ticket office. Then let the revival proceed.

Rose My Maryland and Its Requirements

Dear Editor:—

I have noted with considerable interest what has been said in various horticultural papers in reference to the new rose, My Maryland. Most of the writers attribute the failure of some growers to lack of heat. This, I think, is correct, and applies especially in the fall months when a heavy crop has been cut, and perhaps cut rather far back in order to get long stems.

Some growers may have been deceived by the action of the rose itself during the hot months in making such a free and wonderful growth, but this in itself is some proof that it enjoyed heat. I note that most writers recommend a temperature of 62 to 65 degrees. I have grown it on a bench rather successfully at 60 degrees and I have seen it growing at Mr. Cook's for three years on the bench also, at about the same temperature, and at all times doing well. It may of course demand a somewhat higher temperature in the solid bed, and it may do even better than I have seen it, at a higher temperature on the bench. At any rate I see no reason why any one should fail with the rose if they keep it at a somewhat high temperature and are mindful of the fact that it is a gross feeder.

Baltimore, Md.

The Formosa Lily

Editor HORTICULTURE:

Dear Sir:—Noticing the article written by Mr. Ambrose Secker, I beg to differ from him as to the results obtained in forcing *Lilium Formosa*, as they have been giving me excellent results. I had only 6-8 size bulbs and have run as high as seven flowers to the stalk. I potted mine in 4-inch pots and put under carnation bench until December, then planted out in benches where chrysanthemums had been grown previously, with temperature at night 50-55 degrees and days 70 degrees, until buds were well formed, then I ran the temperature up to 80 degrees in day time. As to their not being true I must say that *Formosa* were not offered to me as a special sort. That there has been a lot of substituting done is without a doubt. I have seen two lots in two different places which were bought for *L. Formosa*; well, they were simply trash.

Freeport, L. I.

The Concolor or Silver Fir of the Rockies

The finest tree on the Hunnewell estate at Wellesley, Mass., was of this kind when I last visited the place. The Tenney estate at Methuen has some noble specimens. T. C. Thurlow has some of exquisite beauty. The pungen, though so resplendent while young gets ragged at 25 and has to be discarded, but the concolor keeps right on, growing more beautiful with age. Take one of the silver type out in the open where it can develop and there is nothing to surpass it. There is another remarkable thing about it; though growing so far from the sea, when moved east it will endure the ocean spray as well as any evergreen we have.

Go with me into their own habitat. We find them in the most brilliant dress at an altitude of 10,000 feet above sea level. Here is a grove of them in gala attire. Some are light green, others are of a deeper color. The last year's growth is of sapphire, the new growth is emerald, both with silver tinting; the under side of the needle is ermine. So there are several shadings on the same tree. One tree has large purple cones; another beside it has those of pale green. These cones are about the size of an ear of early sweet corn. As they mature the color deepens, and from them there exudes a gum clear as crystal.

Now stand back and let the sun and gentle breeze put all this beauty on exhibition. The older and newer growth show marked variations. The cones are in harmonious contrast with the foliage, while the clear gum is flashing like diamonds. Take it all in all there is beauty enough to lure one across a continent.

As with the pungen there is a marked individuality in them. Here, for instance, stands one in the open where it has a chance to develop. Could it be transferred in all its native splendor to the grounds of an eastern millionaire it would be beyond price. It is shapely and cone-like in form—the body straight as an arrow. It is of that rich and varied glauca or silvery coloring. It flashes and shimmers in its radiance. Yes, it is the most charming tree on earth, increasing in beauty till it is a century old. It is one of the best for the East, and in the West I have known it to endure a succession of dry years in the sod out on the open prairie.

In Minnesota and the Dakotas it is very beautiful, but owing to the seed being gathered in the foot-hills it is somewhat tender. This year, however, a very heavy freeze caught all the foot-hills seed and there was not a cone on the trees. Going higher up, where they were growing among the pungen and Engelmann spruce, they seeded abundantly and one man secured about 1,000 pounds.

These high altitudes correspond with the north. You go up the mountain from the temperate zone to the arctic circle. In the foot-hills the oak is of fair size; as you ascend it is smaller and smaller, till it is the size of the currant bush. Then above timber line there is nothing; you are in the Arctic zone. So seed from the upper belt will be hardly all over the north and in Manitoba. This upper belt also has trees of exquisite beauty.

York, Nebraska.

NEWS OF THE CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

Field Day.

The club will hold a field day on Saturday, April 3, 1909, at Waverley, Mass. Members and friends are invited to take electric car leaving Park Street Station for Waverley at 1 P. M. Any who cannot leave in time for this car will arrive in season by taking the following one.

The establishment of W. W. Edgar Co., near Waverley R. R. Station will first be visited. Many of our members will have pleasant reminiscences of previous visits paid here. After an inspection of the stock growing here, Edgar Bros. will be visited, and later the establishment of Peirce Bros. in Waltham. The character of the Easter stock to be seen at the places named, should make the visit one of peculiar interest and profit, and a large attendance is hoped for.

Annual Banquet.

As already announced, the annual club banquet will be held at Horticultural Hall, on Wednesday evening, April 14, 1909. From the advance sale of tickets, it is evident that the coming occasion will be more largely attended than ever before.

Tickets are \$1.50, and can be had from William Downs, J. W. Duncan, W. N. Craig, James Wheeler, Joshua Lawson, Peter Fisher, J. K. M. L. Farquhar, Robert Cameron, and Peter M. Miller. Order what you need, at once; positively none will be sold after Saturday, April 10.

Reception at 6 o'clock; banquet at 6.30. As toastmaster we will have Judge C. W. Hoitt of Nashua, N. H. There will be a few select songs and readings appropriate to the occasion.

A fine orchestra will furnish music for the dancing, which it is hoped will be under way not later than 9 P. M.

All contributions of flowers should be addressed to Decoration Committee, Gardeners' and Florists' Club, Horticultural Hall, Boston, not later than 3 P. M., on the afternoon of banquet.

Regular Club Meeting.

In a later circular, members will be notified of the lecturer for our meeting on April 20. Suffice to say now that we have something interesting in store. Mr. L. J. Reuter, Western, R. I., will favor us with a paper on roses. Paste these dates in your hat:

Field Day at Waverley, April 3, 1 P. M.

Club Banquet, April 14, 6 P. M.

Regular Club Meeting, April 20, 8 P. M.

W. N. CRAIG, Secretary.

WILLIAM DOWNS, President.

SOUTHAMPTON HORTICULTURAL SOCIETY.

A special meeting of this society was held Thursday, March 18, President Halsey in the chair. G. W. Gomersall, landscape architect of Nyack, addressed the meeting on the arrangement of flower beds. His lecture was very interesting and was followed by questions and discussions.

CH. H. GUILLOZ.

CONNECTICUT HORTICULTURAL SOCIETY.

The regular fortnightly meeting of the society was held on the 26th instant, President Huss presiding. About forty members were present, emphasizing the need of more commodious quarters, as some occasionally are obliged to stand. The business proceedings were promptly dispatched, including the accession of one new member, J. M. Harper, of Hartford; and the extension of a rising vote of thanks to Mr. Huss, and the award to him of the society's diploma, for his exhibition of a half-dozen beautiful specimen plants of amaryllis, which were the objects of many flattering comments. The meeting was then addressed by Prof. E. A. White, of the department of floriculture of the Massachusetts Agricultural College, who gave a very comprehensive view, assisted by powerful lantern slides, of the great work being carried on by his college in fitting students for the vocations of floriculturists, landscape gardeners, market gardeners, etc. Many modern greenhouse plants were illustrated, and the tendency toward light but strong sash in greenhouse construction, to minimize shade, was emphasized. The lecture was greatly enjoyed and a vote of thanks tendered to the lecturer. The lanterns were under the efficient care of Herbert O. Warner, of Hartford. The society's forthcoming banquet will be held on April 12th, at Long's Hotel, Hartford. To avoid Fast Day, the next meeting of the society will be held on April 2d, and will be favored by an address by John Gerard, of New Britain, on "Revelations of the great seed houses of Europe."

GEORGE W. SMITH, Secretary.

NEW ORLEANS HORTICULTURAL SOCIETY.

The regular meeting of this society was held on March 18 in Kolb's hall. After routine business, the subject of beautifying the city was taken up and upon suggestion of Secretary Panter a motion was made and unanimously carried that the services of the society be tendered to the city officials to assist them in beautifying the city. Several rare orchids were exhibited by J. A. Newsham, who gave some interesting facts regarding them. P. A. Chopin spoke of the Harrisii lilies from St. James as being superior to the Bermuda lilies. E. Baker read a paper on "Elementary horticulture in public schools," which received a vote of thanks and the indorsement of the society.

DETROIT FLORIST CLUB.

A special meeting of the club was well attended and started the ball towards a fall show next Nov. 10, 11, 12, 13. The Wayne Pavilion is a most suitable place measuring 200 x 110 ft.—quite a size but not one whit too large to hold all the enthusiasm the members are showing.

ROCHESTER (N. Y.) FLORISTS' ASSOCIATION.

At the last regular meeting of the Rochester Florists' Association action was taken and decided upon to hold a plant and flower show this fall. That the exhibition committee is out for all there is to it, is noticeable on account of the calling of a special meeting for the purpose of enlarging this committee to twenty members. Our membership has grown by leaps and includes all the prominent nurserymen, seedsmen and supply house representatives, and from the boundless enthusiasm which exists, this—the first Rochester flower show—promises to be a hummer. Chairman Chas. Vick of this committee has assured us of the very liberal support of the business men here in the matter of prizes and of their desire to see such a floral show a complete success.

SCRANTON (PA.) FLORIST CLUB.

The second annual show of this club was held on March 27, 28, with fine exhibits from local florists and novelties from a distance. T. B. McClintock, William MacDonald and Schultheis & Co., were largely represented among the prize winners in numerous classes; G. R. Clark completed successfully in the various rose classes, taking first in all except White Killarney when F. R. Pierson Co. was first and second went to him. Among the exhibits not for competition A. N. Pierson had a vase of rose My Maryland, Joseph Heacock Co. sent carnation Dorothy Gordon, J. W. Webster & Avoca, Pa., had a fine display of ferns and flowering plants. The judges were George Payne, Dover, N. J., Paul Mader, Stroudsburg, and William Clark Scranton.

AMERICAN CARNATION SOCIETY.

Carnations registered—By Dana R. Herron, Olean, N. Y.—"Olean." Parentage, Winsor and unknown seedling of Winsor growth; color, pink; size of flower, 3.1-2 inches; habit, long, stiff stems with perfect calyx; a very full and fragrant flower.

ALBERT M. HERR.
Lancaster, Pa.

CLUB AND SOCIETY NOTES.

The Pasadena Gardeners' Association (Calif.) will hold their annual spring show on April 12 and 13.

The regular monthly meeting of the Florists' Club of Washington, D. C., which would have been held next week, has been postponed till the second Tuesday after Easter to prevent its conflicting with the Easter rush.

The Milwaukee Florist Club have named Nov. 14 to 18 as the dates for their flower show, in order not to conflict with the shows in the large cities in the West. They hope with a premium list of \$5000 to secure exhibits from all sections of the country.

The Tri-City Florists' Club at the last meeting at Davenport, Ia., elected the following officers: President, C. O. E. Boehm; vice-presidents, H. Pauli,

HORTICULTURE

BOSTON SPRING SHOW

VIEWS IN THE JAPANESE GARDEN AT HORTICULTURAL HALL
Exhibit of R. & J. Farquhar & Co.

H. Gaethje, John Staack; secretary, John Temple; treasurer, Wm. Knees. The meeting on April 8 will be held with Wm. Knees in Moline.

The Boston Market Gardeners' Association were the guests of Walter E. and Edwin Lenk, at their greenhouses in Halifax, Mass., on March 20. After a tour of the eight immense houses they were conducted to the shipping room where a banquet was served, followed by the regular business meeting. Prof. Haskins of the Hatch Experiment Station spoke on "Fertilizers" and Prof. Pickett of N. H. Agricultural College on the "Relation of the Experiment Station to the Farmer and Market Gardener." The party left on a special at five o'clock.

ST. LOUIS SPRING SHOW.

On Wednesday, Thursday and Friday of the past week the St. Louis Horticultural Society held their third annual spring flower show with good success. Although the exhibition was not as large as promised those in the trade who viewed it say that it was a real pretty show and the stock, both plants and cut flowers, on exhibition was of the best quality. The city park department had the largest display, having eight separate groups in different parts of the hall; those of course were not for competition.

Fred H. Weber was the only one who showed "made-up" retail work, he entering in all classes and taking all the first prizes. Wm. Schray & Sons, Koenig Floral Co., C. Young & Sons Co., showed some extra fine blooming bulb stock and competed in all classes. Among those who showed cut flowers were Chicago Carnation Co., W. J. & M. S. Vesey, John Steidle, J. F. Ammann and A. C. Brown. F. C. Weber and Theo. Miller showed cut stock in designs, making very attractive displays, but not for competition.

Vaughan's Greenhouses and Geo. Kuhl showed some well-grown plants. Visitors present from outside the city were W. J. Vesey, Fort Wayne, Ind.; Geo. Kuhl, Pekin, Ill.; Albert Hey, Western Springs, Ill.; J. F. Ammann, Edwardsville, and A. T. Pyfer, Joliet, Ill. The judges were Andrew Meyer, Sr., R. F. Tesson and Albert Hey.

A band of music during the evening made things pleasant for the visitors. On the opening day the rain-storm kept many away but on the last two days the weather was fine and the evening attendance was large.

The awards as handed out by the judges were as follows:

Collection of Bulbous Plants in bloom, Wm. Schray & Sons, first; Koenig Floral Co., second.

Fifty foliage and blooming plants, Wm. Schray & Son, first; C. Young & Sons, second.

Ten geraniums in bloom, Koenig Floral Co., first; C. Young & Sons Co., second. Mignonette, Geo. B. Windler.

Specimen plant in bloom, Wm. Schray & Sons, first; C. Young & Sons, second.

Lily of the valley, Wm. Schray & Sons, first; Wm. Schray & Sons, second.

Five vases of carnations, 5 varieties, 25 flowers each, John Steidle, first, with

Chicago Carnation Co., second, with Beaton, A. Carnegie, Euchantress, White Enchantress and White Perfection.

Fifty white carnations, Chicago Carnation Co., first, with White Perfection; W. J. & M. S. Vesey, second, with White Lawson.

Fifty light pink, W. J. & M. S. Vesey, first, with Pink Lawson; Chicago Carnation Co., second, with Splendor.

Fifty dark pink, Chicago Carnation Co., first, with Aristocrat; W. J. & M. S. Vesey, second, with Lawson.

Fifty red, Chicago Carnation Co., first, with Victory.

Fifty any other color, W. J. & M. S. Vesey, first, with Winsor.

Twenty-five pink roses, John Steidle, first, with Killarney; J. F. Ammann, second, with Chateaux.

Twenty-five white roses, W. J. & M. S. Vesey, first, Bride; J. F. Ammann, second, Bride.

Twenty-five red roses, J. F. Ammann, first, Richmond.

Lily of the valley, F. H. Weber, first. Basket of spring flowers, F. H. Weber, first; Koenig Floral Co., second.

Table decoration of spring flowers, F. H. Weber.

Display of hardy shrubs in bloom, Wm. Schray & Sons, first; Koenig Floral Co., second.

RHODE ISLAND PREPARES FOR NEW ENGLAND FRUIT SHOW.

A meeting was held at the rooms of the State Board of Agriculture at the State House, Providence, R. I., March 23 to organize a State Branch of the New England Fruit Show which is to be held in Horticultural Hall, Boston, October 19-24 next, and the following gentlemen were elected as an exhibition committee to represent the State of Rhode Island:

R. M. Bowen of Providence, chairman; John J. Dunn of Providence, secretary and treasurer; Prof. A. E. Stene for Washington county; William Williams, Bristol county; Thomas G. Mathewson, Kent county; Louis G. K. Clarner, Providence county, and James Robertson for Newport county.

Mr. R. M. Bowen was also previously elected vice-president of the combined New England organization in connection with the Fruit Show. An effort will also be made to hold a Corn exhibition in connection with the Fruit Show. J. R.

EXHIBITION NOTES.

The paid attendance on one day alone—Friday, March 26—at the Boston Spring Show, exceeded by 20 per cent., the entire receipts for the four days' show one year ago and so lively was the popular interest that it was decided to keep the exhibition open for another week. New exhibits have been placed in the general classes and the Japanese Garden is even more attractive than it was last week, many of the wisterias and other flowering shrubs having come into fuller bloom. Among the new exhibits this week is a remarkable display of sweet peas from William Sim, the equal of which has never been staged in this country. The public interest continues unabated and it seems now assured that the affair will net a clear profit to the Massachusetts Horticultural Society of at least \$5000.

Exhibition matters seem to be looking up in an encouraging way in various other places. We learn from the Milwaukee papers that the Milwaukee Florists' Club is planning for a mammoth show to be held November

14 to 18, next, at the Auditorium, for which a premium list of \$5000 is being prepared. Our Milwaukee brethren seem to realize the necessity of having something out of the stereotyped run to bring out the public. According to our information this is to be accomplished possibly by the presence of Luther Burbank and some of the products of that widely-advertised gentlemen.

The preliminary list of premiums offered by the Horticultural Society of Lake Forest, Ill., for the third annual exhibition, to be held in the third week of July, 1909, has just been received. It is a very comprehensive schedule, with no less than 173 classes provided for vegetables, fruit, plants, flowers, floral arrangements, models of landscape garden work, etc. J. W. Scharfenberg, Lake Forest, is secretary.

The North Shore Horticultural Society is also early in the field with a neat schedule of prizes for two exhibitions to be held at Manchester, Mass., in July and August. Besides the regular cash prizes a big list of special premiums donated by friends of the Society, is offered, including valuable cups and medals. John D. Morrison is secretary.

And still another preliminary premium list has come to our desk. The Detroit Florist Club announces that it will hold a Fall Flower Show in Wayne Pavilion, November 10 to 13. The schedule comprises over one hundred classes, cash premiums throughout, only three of which are open to competition outside of the membership of the Club.

SOME NEW ROSES.

Of these worth growing mention may be made of Evangeline, a hybrid Wichayaniana (Walsh); flowers white, carmine tipped, coming in clusters, with petals 2 inches across. The leaves are of coppery tint and large size.

Goldfisch (Paul & Son, 1907); a deep golden yellow flower shaded with violet changing to pale canary, and produced in abundant trusses. The plant is rather rampant in growth.

Starlight (Paul & Son, 1908); a single-flowered variety, with blooms having much prettiness, and which are large in size; white suffused with pink of a velvety texture.

Tausendschon (Schwartz, 1906); one of the most beautiful of Polyantha varieties, with flowers of the tint of peach bloom, which changes to rosy carmine as it ages. It is fragrant and produces about a dozen blooms in a truss. F. M.

NEW PARK COMMISSIONER FOR BOSTON.

Mayor Hibbard has announced the appointment of Robert Swain Peabody to succeed Charles E. Stratton as a member of the board of park commissioners for the city of Boston. He is a graduate of Harvard, is a former president of the American Institute of Architects and is president of the Boston Society of Architects.

In a moment of absent-mindedness last week we recorded Mr. Julius Roehrs as en route for the Ghent quinquennial exhibition. The Berlin exhibition is what we ought to have said, of course.

THE ROSE GARDEN.

Written for the American Rose Society Meeting at Buffalo, N. Y., by J. F. Huss, Hartford, Conn.

It may be an inopportune moment to write, when nature is in winter garb, about the Rose Garden; still the very name is enough for the rose lover to stimulate his thoughts, which bring back everything so highly interesting in the rose garden. Everyone may not care to have a garden of roses exclusively, but who among lovers of flowers would not like to have in his own garden such a scene as that of three years ago which the Rose Committee witnessed at our place in Hartford, which for private uses may be taken as a model.

But we cannot leave the rose with this notice. Grand as are the masses of roses we have occasionally met with, we have never yet seen anything even approaching our conception of the scenes of grandeur and beauty that might be worked out by the massing of the modern varieties of roses. A rose garden is now almost indispensable, either as a part of, or as an adjunct to, every large and comprehensive garden. If in the original plan of a garden it cannot be conveniently worked in with the general floral arrangement, then a separate piece of ground is set aside for the purpose. This I have often seen, and always found it a most interesting spot. But apart from the immediate question, whether there is a separate rose garden or not, roses should be found plentifully in every general garden, on account of the varied forms they are capable of assuming, either naturally or by training. They are seldom out of place anywhere. What with dwarfs, standards and climbers, there exists ample material to adorn the most select position, or to obliterate the most awkward spots, bringing them into harmony with the general design. But what should the form of a rose garden be? I will give my ideas as briefly as possible.

The Form of the Rose Garden.

It should be formed, if possible, on level ground, with as many beds as the space selected will allow. Such beds should be four feet wide, planted with three or four rows of plants, two feet apart, and a grass border three of four feet between beds will enable anyone to reach each plant to cut the roses without stepping into the bed. Such grass borders are very easily kept, mowing them once a week with the lawn mower. At the same time this grass walk sets off the flowers to great advantage. With some fifteen or twenty beds, with a double amount of well selected, best flowering varieties, say, forty plants in each bed, it will well make a very attractive collection. These beds may be in the form of a square or oblong. The rose garden can be made very attractive and artistic. All depends upon the gardener who has charge, or upon the landscape gardeners who have to make designs for a small bed or a regular rose garden. The rose garden should be surrounded with a border, three feet in width, which should enclose it, planted with Hybrid Teas, a few fine standards of French Briars, or of laxa stock, which are the two most flexible stems for the layering in the fall. A very light wire fence with a three-

fourths inch iron post, with two or three wires a foot or eighteen inches apart, and planted with Crimson Rambler roses will make an excellent appearance from the distance.

Pergolas and Terraces.

A still further imposing scene can be obtained by forming a pergola, which can be easily constructed with three-fourths inch gas pipe driven into an eighteen inch cedar or locust post, eight feet high with a cross on the top from one post to the other, with a grass walk between, as many of our rose visitors will remember having seen at our place, which was pronounced by all as a veritable Paradise of Roses. Such a pergola or arch should be planted with as many varieties as there are posts, or not more than two to a post, as with our progress in hybridization of so many valuable climbing roses the choice is at everyone's command; and the most gorgeous sights can be obtained of most bewildering beauty with plants that bring forth their blossoms at the same periods as the Hybrid Perpetuals, Teas or Hybrid Teas. Again a rose garden may be laid out on a terrace, as ours is located. There may be a bank sodded or sown with grass seed. But such a bank should be in full harmony with the rest of the rose garden and should be planted with trailing roses pinned down, making it a "bed of roses." It will add greatly to the rose garden. Good taste and art should be exemplified in every detail of a rose garden. We have a great many dwarf roses, like the Baby Ramblers and the Midget roses, that are used to form borders, especially around Hybrid Perpetual beds, to hide the bare ground. They are very attractive, and the result is one that will meet with delightful approval from every lover of rose gardens.

Soil and Manure.

Almost any soil will grow roses, as we see them in yards or gardens, providing a proper selection of varieties is made, and attention is given to the application of suitable manure. Roses, of course, enjoy a rich soil, but to keep adding cow, horse, and pig manure upon a naturally rich ground is not as beneficial as a change to nitrate of soda in the case of light soils, or soda for those that are naturally very close and stiff. This subject is therefore more a question of judicious manuring than selection. The Golden Rule is to add what the ground is most deficient in, and never to apply close moisture-retaining manure to a soil that is naturally stiff and moist. A very dry and sandy compost may easily be made suitable, by adding a few loads of stiff fibrous loam and clay, also by manuring with fairly well-rotted cow manure; while in many cases, by adopting the opposite plan, a stiff, poor soil may be worked into equally good condition. The ideal material is fairly stiff, not too wet, and not less than at least three feet in depth, with a good drainage, so that by heavy showers the roots are not left in water. With such well-prepared rose beds they can be enriched at will. Roses will thrive perfectly well for at least eight to ten years. After that time, if still in good condition, they should be gradually transplanted in late fall, the plants well pruned out, suckers cleaned out,

and the soil deeply trenched and mixed with good rotted manure, and the roses replanted, when they will thrive anew and will last for many years. But we should never lose sight of the newer varieties of roses, using them to supplant such older varieties as have lost their usefulness. A wide-awake gardener or lover of roses will naturally keep up with the times.

Pruning and Tying.

Pruning in the New England States cannot be very well done before the 1st of April, as the uncovering of the winter protection is usually begun by that date. This has been my experience. The pruning of every class of roses is a very vital operation. All useless wood should be carefully cut out, retaining only the good strong canes, and Hybrid Perpetuals and Hybrid Teas are pruned alike, say, a foot from the ground. You can easily retain the same height from year to year, as they should always, every year, be renewed with new canes and the old ones cut out. As to climbing roses the pruning is very different, as you keep five or six long canes around each of the posts you have for the arch, and keep these young ones as long as they cover the intended arch, or pergola. The old wood is cut, but sometimes we have not enough canes to fill the desired effect, and one or two of last year's growth is retained, and the side shoots are cut back to two or three eyes. The canes are then very carefully tied up with fine willows, as the European well-trained gardener uses, or with any other material as is commonly used, in such a clean way, so that strong winds will not move them from their holdings. The same operation is used to decorate a wire fence. As for the trailing roses, they are pinned down so as to cover well the bank with the low canes, and top shoots are cut back to two or three eyes. The pruning done, the soil is at once loosed up carefully with a spade fork.

Watering, Mulching and General Care.

One thing should not be lost sight of, and that is, to have water close and conveniently at hand. As soon as the plants begin to bring up the growth of leaves, they need to be syringed nearly every day, to keep red spider, aphid, and green flies away in the dry season. This method has been followed with splendid success for many years. And when later the rose bug or chaffer appears, slugshot is used with splendid effect, and having the water on hand, can easily be cleaned off before visitors arrive. There is nothing more inviting than to see a clean, well-kept rose garden with clean leaves and perfect flowers, but careful watchfulness has to be kept constantly over it. At the beginning or middle of June give a good mulching with short stable manure of two or three inches thick, as roses like a cool footing, and this is extremely beneficial to excellent culture, preventing the soil cracking or drying off, and it is the means also of retaining good foliage and better perfection of bloom. And when the blooms make their appearance great care should be taken of the common enemy, the rose bug, which is a very troublesome one in most localities; they must be picked off and careful watch maintain-

BUNGALOWS AND ROSES IN CALIFORNIA.

ed. The withered flowers must also be carefully picked up, and no petals left on the ground. This is a strict rule among well-kept rose gardens. A watchful eye should be always kept on budded roses, as they often throw up suckers, which must be at once removed, or mischief will be the result. I have seen at Lenox, a fine rose bed that was neglected for two years, and on the third year there was nothing left but suckers, which had outgrown all the grafts. At the beginning of August the plants will have thrown root canes from three to five feet high. These should be cut back to three feet. This simple light pruning will strengthen the canes for the following flower season, and at the same time will give a pleasing sight of uniform harmony to the garden.

Winter Protection.

Winter protection, in this cold, heartless latitude, plays a very important part. One who comes from south of New York would not think of protecting roses, as experience has taught us all over the New England States, except where near salt water. At the end of November or December, or in fact as soon as heavy frosts are due, but before such frosts arrive, standard roses are detached from their stalks and the crowns bent down. A hole in the ground is made and the crown laid in it and partly covered up with the soil, with two cross sticks to hold the branches down. All Rambblers are laid down in the same manner. Hybrid Teas and Hybrid Perpetuals are bent half down tied over each other, and as soon as heavy frost is in sight all the rose garden is covered with a light layer of leaves, and with long straw manure or bed hay. One year we did not cover our ramblers, and in the spring all were frozen to the very bottom. I find a little extra work will save lots of trouble, and pay well in the end.

WHY SO MANY SMALL GROWERS FAIL WITH ROSES.

Paper read before the American Rose Society meeting at Buffalo, N. Y., by W. W. Coles.

In traveling over the country visiting floral establishments we find that not over 20 per cent. of the small growers make a success of roses. In fact, by far the larger per cent. do not get enough out of their rose space to pay for the fuel. I have reference only to the florists who grow roses, carnations, and a general assortment of flowers and plants in a limited area. I know there are quite a number of florists, with but 10,000 to 25,000 feet of glass, who make a specialty of roses and whose stock is a credit to many of the larger growers. But this paper is for the small, all around grower, and if it benefits even a very small per cent. I shall feel well repaid for the short time it has taken me to pen these remarks.

Conditions.

The first great handicap is a lack of suitable conditions. Carnations bedding plants and a general line of stock are grown in the same house, in same temperature, with success varying from fair to very good. Then roses are attempted. Under such conditions they cannot be kept at the proper temperature without hurting the other

Famous as are the bungalows of California, half their charm, it is undisputable, would be lost were they robbed of their floral decorations. The trailing rose, in particular, gives beauty to the

stock. Often they cannot be properly syringed on account of soaking other stock close by, and red spider gets a foot hold. Sometimes doors left open carelessly or necessarily for other purposes, causes a draught and starts mildew. On account of spoiling tender stuff in the house, fumigation is put off and aphids gets a hold. Shading is put on for other stock, and roses suffer under their part of it. Under such conditions it is practically useless to try to grow roses.

If a separate house can be devoted to roses the above conditions can be eliminated. But even then there are usually many difficulties. A night fireman is seldom kept and while the temperature may be kept right in daytime it is allowed to fall at night. Then the grower usually has so many other duties that the houses are sometimes neglected. If the house was not built for roses perhaps the heating is inadequate and things cannot be kept right even with the best of attention. The above are conditions as they exist in hundreds of places. Added to this is a lack of knowledge of rose growing, and greatest of all, whether the knowledge be great or small, is the lack of doing what is known. The grower knows that he should plant early in June but it is put off on account of the press of other work. He knows he should syringe and fumigate regularly, but for one reason or another it is not done. We will give a few general cultural remarks but insist that the grower's success depends on combined knowledge and doing.

Culture.

On such places the grower usually puts in a batch of cuttings, roses, carnations, geraniums, etc., in January or February. When rooted they are usually potted off and grown in the same house with a miscellaneous lot of plants. The result is usually a weak lot of plants covered with red spider and mildew. They are shifted from 2-inch pots to 3-inch and sometimes grown under shaded glass. Sometime in June or July they are planted on a bench, the glass still shaded, and a few panes of glass out here and there; which, however, he will put in good shape next week. But next week he is busy with the funeral work and the

bungalows, and down near the base of Mt. Lowe, porticos, touched off with the climbers, touch the heart of every stranger. The photo shows such a one.

FELIX J. KOCH.

following week the carnations in the field must be hoed or weeded and he thinks the roses will grow if they receive water once a day. The result is, in September or October, when his plants should be strong and healthy for the winter, they are weak and puny, but the red spider and mildew are still with them. To make matters worse a few roses are needed during the summer for funeral work and the life is cut out of the plants to save (as the grower thinks) expenses. A few roses are usually cut in October and November at a time when they can be bought from \$2.00 to \$4.00 per 100, but from December 1 to April 1, when roses are wanted and usually scarce, his plants are standing still and do not return enough to pay for the fuel it takes to keep them alive.

The Remedy.

In the first place the small grower or retail florist who uses but an average of 75 to 100 roses per week should not try to grow his own cut roses. He would make more money to buy them from some good grower, but those who feel that they must or will grow their stock should plant nothing but strong, healthy, clean plants. If he cannot grow them he should buy them and plant them in good rich, new, mellow soil, some time during the month of June. If the house is shaded, even if only slightly, see that it is all removed.

The next important thing is to repair all broken glass and as soon as one is broken or blown out replace it at once as you would have to do in winter. From July 1 to September 1 give them lots of air and lots of water at all times. I firmly believe there are more roses ruined during the summer for want of water and air than from any other cause. It is money well spent to hire sufficient help in June to plant roses, as one month in June and July for roses planted on a bench is worth three times as much as in October and November. Keep the buds pinched off until the plants are strong and healthy and breaking freely, and at this point a top dressing of cow manure will be beneficial.

Do not grow too many varieties. For the small grower or beginner I would recommend but three kinds:

Brides, Bridesmaids and Richmond. Don't fool with the American Beauty; let the Beauty specialists attend to them.

If roses must be grown in a small way give them as many of the advantages that they receive on larger places as possible. Acquire as much knowledge as can be gained from reading and practical experience and then see how large a percent of this knowledge can be put into practice.

AMERICAN LANDSCAPE ARCHITECTURE.

Professor F. A. Waugh of Amherst spoke before the Massachusetts Horticultural Society on February 20, on "American Landscape Architecture."

The art of landscape gardening is now well established in America, he said. A considerable number of professional landscape gardeners serve a constantly widening circle of clients, and a new and higher standard of public taste is being raised. It is worth while to ask the question whether in landscape architecture we have achieved anything worthy of our time, anything responding to the spirit of the twentieth century, anything distinctive, representative, national, American.

"This," he said, "is precisely the question I seek to raise. My subject is not 'Landscape Architecture in America,' but 'American Landscape Architecture.' The former subject is quite worth while, but it leads straight to the latter. We ought to study whatever landscape architecture there may be in the land, but finally we want to know what there is in it that is American."

An Unworked Field for Criticism.

Continuing, the lecturer said the field of landscape architecture criticism is almost unknown; and this fact presents unquestionably the greatest handicap under which the art labors. The landscape architects themselves appear to be not only blind to this defect, but they seem almost to present an organized opposition to every improvement in this direction.

He considered the refinement which criticism has brought to literature. "A progressive literature without constant criticism is an impossibility. Most productive writers recognize this. They welcome intelligent criticism, even when it rests heavily on their own works. Some writers and all publishers industriously cultivate criticism. In like manner the arts of acting, painting, sculpture and music enjoy the stimulus and direction of a well organized criticism. On every hand, in every art (except only landscape architecture) criticism is welcomed and the critic is recognized as filling a position of legitimate service."

An Attitude of Disapproval.

Professor Waugh here gave interesting facts concerning his own correspondence with landscape architects in America. Some data and some valuable expressions of opinion have been secured, he said, but the big result of the whole investigation is to show the very general and hearty suspicion in which all such inquiries are held. Some landscape gardeners politely but firmly refused to give any information regarding their own works or anybody's else.

"Let us understand now and ever-

more," said he, "that this attitude is wrong and harmful. The right way is to welcome and assist criticism. Well-informed, intelligent criticism will clear the air, will set a standard of taste, will foster a wider and better appreciation of our gracious art, will tend to the improvement of technique, will set higher ideals before our professional workers, and in a thousand ways will help both the makers and the enjoyers of landscape pictures."

The speaker then passed to a consideration of American works and workers, through the Colonial period, the ante-bellum period, the post-bellum period and the present time, which, he said, is marked by a wide development and popularization of the art, and by many skilful workers and "an unprecedented eclecticism in style."

Downing and Olmstead Compared.

He told of Andrew Jackson Downing, "by all odds the first American landscape gardener," who was a nurseryman before he became a gardener. Judged by the number of and character of his disciples, this name is the most illustrious in the entire history of American agriculture, horticulture or gardening, Professor Waugh declared. He aimed at the informal or "natural" style, which, however, was apt to be constrained and stiff and far short of the present day style.

Frederick Law Olmsted, the leading designer of the period after the Civil War, was spoken of at length, and some of the public places he beautified were described in words of praise. "Of these," said the speaker, "the best known are the World's Fair at Chicago (especially the Wooded Island and Lagoon), Mount Royal Park, Montreal; Baltimore, N. C., and the railway station grounds of the Boston & Albany Railroad. If we add to this list Franklin Park, Boston, and the Muddy River Parkway we have a reasonably representative selection of his best and most characteristic work."

"Olmsted introduced a new appreciation of natural scenery. He first taught us to admire Nature in her own dress. Downing was a lover of natural landscape, but this element of his character was not brought strongly forward in his landscape gardening. Adaptation to site and surroundings was the keynote of Olmsted's work, and this also amounted to a new discovery in landscape art. He discovered the native flora. Gardeners everywhere were planting Japanese magnolias, purple beeches and Camperdown elms. Olmsted turned boldly, and not without violent opposition to the commonest roadside shrubs. With the richest indigenous flora of any country in the world, we were still planting the species and varieties of European nurseries. We may remark further that this use of the native flora was the one Olmstedian principle most quickly acclaimed and adopted by others."

Use of Native Plants.

"The native plants were used in large quantities. Common dogwood and viburnums were put in by carloads. For the first time in the history of landscape art, plants were adequately massed. This principle was not carried to extreme, however; and in fact it has not yet received the development which it merits. Indigenous

plants were given their natural environment. Much attention was given to the development of this principle, especially by some of the followers of Olmsted."

"His roads were peculiar and characteristic—and peculiarly and characteristically successful. A considerable part of their success is due to their adaptation to the contour of the land. He appears to have been the first conspicuously to adopt the principle of rhythm in natural landscape composition, though any artist composing freely and with a proper feeling for his work will inevitably follow this method more or less. This method cannot be formulated in a sentence, but every artist at least will understand what it signifies."

The Opportunities in America.

In conclusion Prof. Waugh said:

"Landscape gardening now enjoys unprecedented opportunities in America. These opportunities come both through the presence here of many excessively wealthy patrons of the art and through the democratic patronage of municipalities and public institutions."

"The old controversies over styles have been hushed and instead of them we now enjoy a remarkably catholic taste and eclecticism of treatment. We have all grades of the natural style, every shade of adaptation of the Italian style, examples of the Japanese style, and hundreds of excellent works which meet the requirements put upon them frankly and adequately without reference to any set "style." This breaking away from set and conventional styles indicates that American landscape gardening has now taken root in its own soil. The services of the profession have passed largely from private into public fields. The leading problems now are not private estates of gentlemen, but municipal parks, playgrounds, and city planning. So broad a field of benevolent humanitarianism was never before opened to any art."

The Outlook.

"My own judgment is that American landscape architecture, as it comes more and more to its proper estate, will be influenced more and more by the native landscape. It will conform itself in a larger and more fundamental way to the topography and the scenery of the continent. American landscape architecture will some day utilize the boundless resources of natural scenery. Niagara Falls must some day be the center of a public park. The Yellowstone geyser region is already reserved and should some day be developed by the skilled hand of a competent landscape architect. The big trees fall into the same order. And some day the Rocky Mountains, the great plains, the Florida Everglades, the Great Lakes, the Mississippi and the Hudson, Lake Champlain and the Adirondacks must all be opened up to public use as a past generation opened up the coal mines of Pennsylvania, the forests of Wisconsin and the gold veins of California. Here is the most magnificent opportunity that landscape architecture ever had, and this is the field in which this greatest of all arts will become finally, magnificently and characteristically American."

CEMENT BENCH CONSTRUCTION

This topic is becoming more important each year owing to the increased price of lumber, and the fact that in a few years it decays and has to be renewed, which is not only a source of annoyance to the grower but also a large item of expense. A properly constructed cement bench will last as long,

and cut six inches longer than the desired width of the bench. Every eighth and ninth board from the end has a half circle cut out so that when the edges of the two boards are placed together a round hole five inches in diameter will be formed. There should be two rows of these holes, each hole four feet apart each way.

Under these holes the soil should be removed, digging a hole about eight inches in diameter and four inches deep, filling same with wet cement. Into this wet cement the five-inch cement posts should be imbedded, so that the top of each post comes flush with the cross boards, or flooring. It is easier to distribute these cement posts and to imbed them in the wet cement as the flooring is being constructed.

The posts can be manufactured at odd times by the use of the Wittbold Leg Mold (Fig. 1), 25 of these leg molds being sufficient to manufacture as many posts as may be needed.

On the cross flooring of six-inch boards a clamp (Fig. 2) should be nailed or screwed, spaced four feet apart on each side. Against these clamps a side board, seven inches wide, should stand on edge. You will note that Fig. 2 clamp comes in two pieces, the outer part of which should be screwed or nailed to the boards, or flooring.

and even longer, than the greenhouse itself. Robert Simpson, Clifton, N. J., who is growing roses on cement benches, says there is no difference in the stock grown on cement benches and that grown on wooden benches, under the same conditions. This is also true with carnations, bedding and bulbous stock, and decorative stock.

In the most practical benches the sides, bottom and posts are as one continuous piece of cement. Temporary posts, 2x4, are driven in the ground within five inches of the height you wish the bench. These posts are in two rows, four feet apart each way. On the top of these posts are run 2x4 stringers, standing on edge. On these stringers are placed cross boards, 1x6,

unite with the top of the cement posts already placed.

Fig. 3 shows the use of drainage slots, which are a shell of iron sheet-top, and one and a half inch at bottom, and contain two grooves into which the wire netting can be fitted.

Fig. 2.

This method of drainage is preferred by some, while others prefer the rounding, six inches long, one inch wide at holes made after the cement has partially hardened by the use of the drainage tool. These holes can be spaced as near or far apart as the requirements of the soil or conditions may require.

After the cement is thoroughly hardened the six-inch inner board can be

KEY TO FIG. 3

removed, the inner part of the clamp be taken off, the temporary posts removed, and the stringers and flooring will then drop, and you can use the lumber for the construction of other benches.

Fig. 3 will illustrate the method of applying the clamps; Fig. 4 will show cross section of the bench. The completed bench is simply one continuous piece of cement, with one inch side board and one inch of cement flooring,

supported by five-inch posts. There are no other supports or obstructions except these posts. This bench can be constructed at a cost for material of 2 1-4¢ per square foot.

C. M. DICKINSON.

PLANTING FOR WINTER EFFECT IN THE NORTHERN STATES.

A Paper by George E. McClure, before the Society of American Florists.

During the really marvelous decade through which we have passed, in which the masses have shown a response to the education which has been imparted to them by the many landscape gardeners, artists and nature lovers, who have labored with such untiring devotion to the cause of outdoor art, the people of the northern states have learned to appreciate the beauties of the winter season, and though, to many, the term winter is equivalent to death, in that all activity of growth is at rest, they do not realize that rest is as necessary as growth and that even in the tropics there is a season of rest though it may not be expressed in the same manner as in our snowbound latitudes, yet to others winter means only a change from the pervading green of summer, through the high coloration of fall, to the gray effect of the woods and the brilliant berry and evergreen effects with a ground work and background of glistening snow. The subtle effects are always lost in summer by the massive foliage and it is only the hand of winter that can reveal them to us.

The Long Northern Winters.

When we realize that in the northern parts of the northern states there is a winter season of from four to five months' duration, it behooves us to study our material thoroughly in order to make our home surroundings, whether large estates or small city lots, as attractive and delightful as the art of the landscape artist can suggest.

Winter Pictures.

The aim of this paper, which might more properly be called "planting for

winter effect in the northern part of the northern states," is to stimulate the growing desire of aesthetic people in this belt of our country, to produce landscape pictures which will gladden and cheer through the winter season. Although many excellent articles have appeared in recent years in our best journals on the subject of planting for winter effect, yet almost all of this valuable information has been written for winter effects which could be produced in the latitude of New York City or along the Atlantic Coast as far north as Boston, and in many cases this information, as applied to the region of the Great Lakes has often resulted in partial, if not complete failure. This has served to discourage those who sought to reproduce the winter pictures painted by writers from a more temperate region. Although a great many of the trees and shrubs which are useful for planting for winter effect, come from foreign lands and are useful in this country only when extremes in temperature are not very severe, yet a long list of iron-clad materials is at hand to select from for the extremely cold regions of our northern states.

The Beautiful Winter Woods.

When we contemplate planting for winter effect, the mind turns first to the evergreens, then to berry plants, and to the bright colored branches of the dogwoods and osiers, etc., but seldom do we think of the beautiful effect of the winter woods, the persistent foliage of some of the beeches and oaks, which although brown and dry, yet is cheerful in its effect. Little is thought of the beautiful shades of brown, grey and white, in the trunk and branch, or of the variety of the framework of the various trees, which gives an element of strength to the winter landscape, or to the variety in trees and shrubs, in the delicate tracery of their

smaller twigs, as evidenced by some of the birches and alders, etc., in the trees, and in the shrubs by such as *Stephanandra flexuosa*, the coral berry (*Symphoricarpos vulgaris*) and some of the spiraeas. Among the deciduous trees which are attractive during winter might be mentioned the oriental plane (*Platanus occidentalis*), which, with its pendant balls of fruit borne high against the sky, seem to take away the barrenness of the deciduous trees, and is suggestive of the Christmas decorations so admired by the young folks, on Christmas trees. While this tree is beautiful in winter it has also much to recommend it as a fast growing tree for summer effect. Its beautiful bark, with the irregular patches of green and grey, is also interesting in the winter season. In much the same manner the liquidambar (*Liquidambar styraciflua*) is interesting with its fruit in pendant spiked balls. Its symmetrical form of growth and extremely corky branches are noticeable to those who are only casual observers. The shell bark hickory (*Hickoria ovata*) while suggestive of strength is also especially interesting on account of its peculiar bark formation, which is unlike any other common species of tree. If planted near the shell bark hickory and other trees with rough bark the American Beech (*Fagus ferruginea*) shows to advantage, as its grey bark is the smoothest of any of our hardy American trees, and never fails to attract attention from those who seek the beauties of winter as found in our woods. It is also especially attractive in winter as the young trees often hold their dry leaves as do some of the oaks well into the winter. Among other trees which might be mentioned as being attractive in winter, from the standpoint of their bark coloration, are the yellow branched linden (*Tilia platyphyllos* var. *aurea*), the Babylo-

nian willow (*Salix Babylonica*), and the white willow (*Salix alba*) with its brownish yellow branches, the white poplar (*Populus alba*) and its fastigate variety *Bolleana* with their grey-green bark, *Acer Pennsylvanicum* with its white striped bark and greenish twigs, the red birch (*Betula nigra*) with its brown bark, the canoe birch (*Betula papyrifera*), the white birch (*Betula populifolia*), and the European white birch (*Betula alba*) are the most beautiful white barked trees. Their graceful outlines are one of the delights of winter landscape, but unfortunately they are afflicted with the birch borer, which, in some localities, is so destructive that the culture of the trees has been abandoned. When it is possible for them to thrive they are charming if planted along with some of the pines, such as the white pine (*Pinus strobus*), and the pitch pine (*Pinus rigida*). The birches also thrive in sandy soil, which is favorable to the pines themselves. The effect of the white bark against the perpetual green background of the pines is to many more delightful in winter than when the birches are covered with their summer foliage. This beautiful effect is particularly noticeable in the region of Albany, N. Y., where it is the feature of the winter landscape.

The Mixed Forest.

Excellent winter effects are also obtained by what the forester terms the "Mixed Forest," which is a mixture of deciduous and coniferous trees. This forest growth is often to be found along the Great Lakes belt, and the effect is often very beautiful. It would be well if we would learn from nature and reproduce these effects in our parks and large estates. While it is out of the realm of this paper to mention fall coloration effects, this "Mixed Forest" effect is unparalleled when we behold the tints of the maples mixed with the dark green pines, and the impression produced is one that lingers in the memory of the most casual observer.

The Conifers.

While we can secure much pleasure from the observation of trees in their bark, twig and fruit formation, yet the most impressive winter effects are largely produced by using the hardy coniferous evergreen with a lavish hand. In this connection it may be said that an infinite variety of evergreens is not necessary to produce fine effects, and while the list of the iron-clad evergreens, suitable for northern climate, is woefully short, yet we have no reason to be disturbed. On larger places the liberal planting of pines and hemlocks for screening unsightly buildings and checking the force of the winter winds will have much to do with the successful treatment of the place, for one can better appreciate the subtle beauties of a winter landscape if protected from the force of the icy wind by an effective screen of tall and stately evergreen trees. The most useful large growing pines for northern planting are the white pine (*P. Strobus*), the Austrian pine (*P. Austriaca*), and the Scotch pine (*P. sylvestris*). The soft effect of the delicate needles of the white pine when young, and its stately appearance when old, place it pre-eminently in the lead, while the larger needles of

SHORT COURSE CLASS AT MASSACHUSETTS AGRICULTURAL COLLEGE

the Austrian and Scotch pines contrast well and give variety. The only objection to the use of the American hemlock is that it cannot be employed near large cities on account of the smoke and sulphur gases, which are always present in manufacturing districts. In both large and small places the Douglass spruce (*Pseudotsuga Douglasii*) with its dark green foliage and the Colorado blue spruce (*Picea pungens*) and its varieties, *glauca* and *Kosteriana*, give variety to the winter landscape. For immediate effect and for filling in between the more permanent pines and spruces the Norway spruce (*Picea excelsa*) is useful, but as it very often outlives its usefulness at an early age it is only useful for the purpose of temporary effects. The mountain pine (*P. Mughus*) is the most useful of the low growing evergreens for our northern climate and is not out of place on the smallest lawn. When massed at the foot of larger evergreens it is extremely effective. Some of the junipers can safely be employed in the north. And by far the most effective of all is *Juniperus virginiana glauca* the glaucous form of the common red cedar. It is much more hardy than the type and it will thrive in the smoky atmosphere of the city as will no other cedar. Its whitish effect, like that of the Colorado blue spruce, is particularly striking. *Juniperus Chinensis stricta* is also an evergreen of the first rank for the north.

For low planting (*Juniperus Sabina*) the savin Juniper is excellent, while *Juniperus communis* var. *nana*, which is still lower in growth, gives us an opportunity to produce an evergreen carpet when it is desired. As a useful hardy evergreen we cannot overlook the Japanese yew (*Taxus cuspidata*). It is a welcome addition to the list of really hardy evergreens. The American arbovitae (*Thuja occidentalis*) in its numerous varieties is also useful as a northern evergreen, but prefers the shelter given by wind breaks. Its

golden variety (Var. *aurea*) is extremely useful as it is really golden and adds a touch of bright color which harmonizes well with the prevailing deep green of the majority of evergreens. In sheltered positions it is safe to use the pea fruited *retinospora* (*R. pisifera*), and in some cases the silver *retinospora* (*R. squarrosa* var. *Veitchii*), but although this is fairly hardy it is often injured by the winter sun. While the evergreens enumerated do not include all of the coniferae that are hardy along the region of the Great Lakes, yet they do include the very hardest species, and these are sufficient to produce a winter picture, which as far as coniferae are concerned, will be effective and leave little to be desired.

The Broad Leaved Evergreens.

What is true of the paucity of the really hardy coniferous evergreens in the Great Lakes or northern regions, is still more true of the broad leaved evergreens. One of the very few which is hardy under all conditions is the *Yucca* (*Y. filamentosa*); when planted in large masses it is a cheering sight in winter, to say nothing of its profusion of bloom in summer. It is doubly welcome, but its value as a winter plant is its chief asset. Even a solitary specimen on the lawn is an evidence of life in the snow.

The rhododendrons, which are first thought of among the broad leaved evergreens, can be used safely and effectively in the northern part of the northern states, but only under the most ideal conditions, and with the best of care, and it is only too often that they eke out a bare existence. Conditions under which they would flourish in the regions of New York and Philadelphia would be fatal in the lake regions, and success is only reached by eternal vigilance. When such a sight is seen as that in Highland Park, Rochester, N. Y., we are forced to believe that rhododendrons will thrive and be considered a factor

THE BOSTON VIOLET

The people today are looking for New Violets just as much as they are for new roses or carnations.

THE BOSTON VIOLET

For the past three years has been placed before the most skeptical buyer in America and they prefer it to any other.

THERE'S A REASON

The Boston Violet is the largest, the most fragrant, it has a very pleasant color, and it is a great keeper.

THE BOSTON VIOLET

Is a variety that is early grown, it is the strongest grower and is in crop from September to May.

THE BOSTON VIOLET

Was awarded a First Class Certificate of Merit by the Massachusetts Horticultural Society and a Report of Superior Merit by the Gardeners' and Florists' Club of Boston.

PRICES — \$2 per 12. \$120 per 100, \$100 per 1000

PRINCESS OF WALES VIOLET — \$15 per 1000

WILLIAM SIM, : : CLIFTONDALE, MASS.

in the winter gardens of the north. If the planting beds are thoroughly prepared and epsom salts judiciously used they will be a success. Very effective grouping can be obtained by using the great laurel (*R. maximum*), *R. Catawbiense*, and the numerous hardy hybrids.

What is true of the rhododendrons is also true of the mountain laurel (*Kalmia latifolia*) and *Andromeda floribunda*. The boxwood (*Buxus sempervirens*) cannot be called a northern plant, but the more uncommon *Buxus arborescens* will stand a temperature below zero without covering if well established. Excellent examples of it are to be seen in Geneva, N. Y., which are over four feet in height. Its foliage is coarser but it is an excellent substitute for the European species. Its usefulness as a winter plant cannot be overestimated, especially in formal work. I have the temerity to mention this species of box only after having seen it withstand severe winters.

The best evergreen ground cover is undoubtedly the periwinkle (*Vinca minor*). Its ability to thrive under adverse conditions of light render it useful for other things besides winter effect. It is an excellent ground cover between evergreens and rhododendrons; its cheerful green is not only beautiful to the eye, but the plant acts as a protection from deep freezing of the soil. When it is planted in mass in the open, or on the edge of shrub border, in company with *Rosa blanda*, it makes a unique combination, as the brilliant large fruits of the rose are borne near the ground and just over

the groundwork of green vinca, the effect is suggestive of the Christmas season.

Another broad leaved evergreen which is useful in the northern latitudes is *Euonymus radicans*, which as a low climber takes the place of the English Ivy. As a creeper it is seen at its best. The sun of February and March often burns some of the upper leaves, but whenever it produces its red berries it is a thing to be desired.

The Japanese honeysuckle (*Lonicera Halliana*), while not considered an evergreen, yet retains its green leaves until long after Christmas in sheltered situations, when used as a trailer, but not when used as a climber as the leaves are more exposed to frost and wind and are not as persistent. As this plant is used for covering banks in open ravines, and around rocks and boulders, it has a cheery effect on a winter day.

Berried Shrubs and Trees.

One of the chief delights of a winter garden is the effect of the berried shrubs and trees, and of course we always think of berried plants in relation to Christmas, and very naturally to the holly that is so extensively used at that time. The northerner is denied the use of this most regal plant, but whenever evergreen leaves and red berries can be combined, it is regarded as the highest perfection of winter effect.

A few years ago I conceived the idea of using the winter berry, or leafless holly (*Ilex verticillata*), which is more profuse with its berries than the southern holly, along with the Eng-

lish privet (*Ligustrum vulgare*), mixing the two kinds and planting in masses. The privet retains part of its green leaves until January and has splendid trusses of brilliant black berries, and the effect of these black berries and green leaves, with the dense masses of red berries of the leafless holly, give the effect that is obtained in English gardens by the famous holly plant. The *Ilex* is vigorous as also is the privet, and the whole in time becomes a tangled mass and the effect glorious. Sometimes the leafless holly is planted along with the mountain laurel, but as the laurel is low and the *Ilex* high, the green leaves and berries are not together and the effect not as good. Even though it is not always possible to secure a background of green for berried plants in the winter, it is not always desirable as the snow itself is a sufficient background for many berried plants. Among the most common and best of our berried plants are the common barberry (*B. vulgaris*) with its racemes of brilliant berries which remain well into the winter, the Japanese barberry (*B. Thunbergii*) with its single yet thickly borne berries of as brilliant a hue, and the high bush cranberry (*Viburnum opulus*), whose bright and large trusses of berries last until the new leaves are formed in the spring, and are very striking. Many of the endless number of forms of *Crataegus* are useful for winter effect, and although their fruits are not persistent during the entire winter season, yet many are glorious in the early winter. *Euonymus Bungeanus* holds its fruits very long; in fact it is better than the "Wahoo," or

strawberry tree (*E. Americana*). The sea buckthorn (*Hippophae Rhamnoides*) is also attractive in winter because of its yellow black dotted fruit, which is very persistent. Many of the roses are extremely beautiful as their fruits are often large. One of the best is the Japanese rose (*Rosa rugosa*), whose large haws or berries are highly colored and remain long on the plant to brighten up the landscape. *Rosa multiflora*, whose fruits, although smaller, are borne in large clusters and last all winter. *Rosa lutescens* has the largest fruit, some of which are one inch long and are borne in clusters of four. *Rosa blanda* is also useful.

The privets, both the common (*L. vulgare*) and the Japanese (*L. Itoha*), have large clusters of shining black berries, and are very striking with a background of the snow. The snow-berry (*S. racemosus*) with its profuse masses of white berries, and the coral berry (*S. vulgaris*) are both splendid species for effective winter planting. When planted in masses in richly prepared borders, they produce riotous masses of fruit. The European buckthorn (*Rhamnus catharticus*), so often used for a wind break, has attractive black fruits, as has also *Rhodotypos kerrioides*. The stag-horn sumac (*Rhus typhina*) produces a marked effect in a winter landscape with its antler-like dense clusters of berries. The smooth sumac (*R. glabra*) is also useful as a winter fruit plant.

The European mountain ash (*Sorbus aucuparius*) with its bright red berries in large clusters is especially useful for winter effect, and the yellow-berried form is also useful for variety. With an evergreen background they are especially attractive. Among the vines for winter effect nothing can surpass the bitter-sweet (*Celastrus scandens*) with its winter array of orange berries, where the vine is allowed to grow as a shrub, forming an uneven mass of twining stems; covered with attractive fruits it is particularly fine. *C. articulatus* is also a splendid berried vine similar to the bitter-sweet. *Vitis heterophylla*, whose grape-like clusters of whitish-blue berries offer a variety in berry color, are also interesting from the standpoint of winter effect.

The variety of berried plants is not seriously limited by the effect of the higher latitudes, and when planting for winter effect is planned we may enjoy a profusion of color all winter, which will please the eye and make our winter walk through park or home grounds a joy which belongs peculiarly to the winter season.

Bright Colored Twigs and Stems.

One of the very best opportunities for brightening up the winter landscape is offered to us with a lavish hand in the bright colored branches and twigs in shrubs and trees. Who of us has not been charmed after the leaves have fallen with a large mass of the red osier dogwood (*Cornus stolonifera*) as seen from the window of a train; the effect is lasting. A number of the cornus are useful in planting for winter effect. The best is *C. alba Siberica*, and *C. stolonifera* for red stems, and *C. stolonifera* var. *flavi-*

ramea for the yellow effect of its branches. When planted in large masses beside the brilliant green branches of *Kerria Japonica*, the effect is really wonderful. There are numerous species of cornus, among which might be mentioned *C. Amomum* and *C. circinata*, with bright colored bark which gives us shades of color, which are useful for winter effect, and as their berries are quite persistent and usually of a bluish white shade, the contrast between stems and fruit is good. The red stems of *Rosa lucida* are also used to advantage.

In large shrub borders, along margins of ponds and edges of creeks, the brilliant colors form an important part of the winter landscape. About the best are the golden branched willow (*Salix vitellina* var. *aurea*) and the variety *Britzensis* with reddish branches. *Salix viminalis*, the basket willow, has also bright yellow stems and is especially valuable. *Salix purpurea*, the purple osier gives us a chance to introduce a purple hue into the winter landscape, which in the distance is particularly enchanting. *Salix palmaria* has also purple branches and is very useful. As a purple branched shrub, *Berberis vulgaris purpurea*, the purple leaved barberry, is often used in small plantations.

(To be continued)

OBITUARY.

Ernest Weber.

Another sudden death among the Chicago florists was that of Ernest Weber, which occurred Mar. 23. The funeral was from the residence, 2386 Lincoln Ave., Mar. 25, and was largely attended by his friends in the trade.

Ernest Weber came to Chicago direct from Germany, twenty-five years ago. After working for various florists, Mr. Weber and his brother Fred started in business together. Later on Fred was ready for a place of his own, and since that time Ernest has continued the business alone. Mr. Weber was known as a very successful grower and his loss will be felt in the market as well as socially. He left no children and the sympathy of the trade is extended to the invalid wife. Mr. Weber was ill but two days with erysipelas and his sudden death was a great shock.

Mrs. William E. Doyle.

Katherine E., wife of William E. Doyle of Boston, died on March 29 from the effects of a shock with which she was recently stricken. Mrs. Doyle was born in E. Cambridge, Mass., in 1848. She is survived by her husband and three children.

Warren B. Madison.

Warren B. Madison, professor of animal husbandry at the State Agricultural College, Kingston, R. I., died on March 22, of pneumonia. He has been

THE "PURE SEED BILL" AT ALBANY.

At the second hearing on Assemblyman Callan's Pure Seed Bill, which took place at Albany March 30, the following gentlemen were present: F. A. Sherman, of Sherman & Eberle and D. Bennett, of Barber & Bennett, Albany, N. Y.; H. W. Gordinier and Nott, of Nott Seed Co., Troy, N. Y.; Alex. Forbes, of Peter Henderson & Co., and Marshall H. Duryea, of Henry Nungesser & Co., New York City.

The bill in question has been amended along the lines of adulteration, and while we cannot yet give any definite information, we have every reason to believe that Chairman Boshart's committee on agriculture will report favorably on it.

PLANT IMPORTS.

Entered at New York, March 23 to 30, 1909:

From Rotterdam: A. T. Boddington, 2 cs. bulbs; H. F. Darrow, 29 cs. plants; Wm. Elliott & Sons, 40 cs. do., 14 cs. trees; McHutchison & Co., 165 cs. plants, 16 bls. do.; P. Ouwerkerk, 69 cs. trees; C. B. Richard & Co., 11 cs. plants, 1290 cs. shrubbery; O. J. Smith, 18 cs. plants; Stump & Walter Co., 4 cs. trees; Sundry forwarders, 166 cs. plants, 15 bls. do., 12 cs. trees.

From Belgium: Alpers & Mott, 3 pgs. plants; Hussa & Co., 5 cs. plants; Vaughan's Seed Store, 1 cs. plants.

A VALUABLE APPLIANCE.

Simultaneous with the spring air, the robins and the daffodils, the wide awake grower begins to consider plans for extending and rebuilding his houses and improving his heating apparatus. For the man with this spring fever on we have a word of candid advice—that is, read the advertisement of the Castle Circulator in this issue. Growers who installed this device last year are enthusiastic in appreciation of its usefulness to them. We have seen the testimonials and know the men who wrote them.

Potash

is not the only plant food required to make plants productive; but commercial fertilizers which contain less

Potash

than 9 to 12 per cent (according to the requirements of different crops), should be reinforced with Sulfate or Muriate of Potash, until they are well balanced.

POTASH

POTASH IS PROFIT

Potash makes larger, sounder, finer flavored fruit. Every 2 lbs. of Sulfate or Muriate of Potash added to 100

lbs. of Fertilizer increases the Potash by 1 per cent.

Send for free book on Fertilizing, prepared by practical experts, of great value to the fruit-grower.

PUBLICATIONS RECEIVED.

Pronunciation of Plant Names. Published by The Gardeners' Chronicle, Ltd., London, England. This little volume is reprinted from the list of generic names prepared originally by the Rev. C. Butler, M.A., and published in the Gardeners' Chronicle in 1908. Perusing it we find that it does not follow the Nicholson pronunciations as given in the Dictionary of Gardening and indeed, where Nicholson has attempted to introduce pronunciations radically different from common usage the list now before us adheres to the popular pronunciation in a majority of cases. The volume is one which every gardener and florist should have at all times conveniently at hand. The Gardeners' Chronicle has put the craft under obligation to it for providing this useful information in so compact and convenient a form. The book is neatly bound in cloth and can be supplied from the office of HORTICULTURE, post paid, at 50 cents per copy.

Cyclopedia of American Agriculture, by L. H. Bailey. Volume IV., Farm and Community. Published by the Macmillan Company, New York. This is the last volume of the series. Like its predecessors it is colossal in its scope and to give any adequate idea of the contents or even an outline of the broad topics treated in the brief space of a newspaper notice is an impossibility. Dr. Bailey has drawn upon a wide list of helpers in the work, no less than 137 contributors to this volume alone being listed, many of them writers, investigators and edu-

cators of world-wide repute, and a further list of 181 is given of those who have assisted in reading proof and in other ways. The agricultural wealth of North America, The historical evolution of North American agriculture, Phases of the agricultural shift, The natural resources of agriculture, Law and labor, Business organizations in agriculture, Social and service association, Education by means of agriculture, Governmental

and legal aid and control are the broad divisions under which the topics are classed. Eighty pages are devoted to biographical sketches of men eminent in the history and development of agriculture and rural life in America. Many portraits are here given and there are 25 full page half-tones as well as numerous figures interspersed throughout the book, which contains 659 pages, octavo.

We think it can be stated without

NEW GERANIUMS

If you are interested in Geraniums we would call your Special attention to the collection of 1907-1908 Novelties we have to offer this season, fully described on pages 3-17 of our 1909 Geranium catalogue, as near as possible with the introducer's description. We have made a specialty of importing New Varieties for several years, and fully believe that this represents the best collection we have ever offered, or in fact the best collection ever gotten together in this country, embracing a range of diversified coloring with combinations of marking almost endless. Every color and shade in Geraniums is among them.

SPECIAL OFFER FOR IMMEDIATE ACCEPTANCE. OUR SELECTION OF KINDS.

For \$10.00 we will send one each of 100 kinds made up from the 1907 and 1908 Novelties. For \$6.00 we will send one each of 50 1908 Varieties. For \$5.00 we will send one each of 50 1907 Varieties. These offers are for strictly Cash and our selection of kinds. Do not ask us to send less than the number mentioned in each offer. In standard kinds we have an immense stock of fine plants from 2 in. pots at prices running from \$2.00 per 100 to 50c each. We will send 1000, 50 each of 20 good sorts our selection, for \$18.50. Cash with order.

We have the following in fine shape from 2 in. pots, \$2.00 per 100, \$18.50 per 1000; 25 of one kind at 100 rates; 250 of one kind at 1000 rates.

Achryanthus Emersonii and Besteri Mosaica, Ageratum, 5 kinds, Alyssum, Clonaria Maritima, Candolleana, Centaurea Gymnocarpa, Hardy English Ivy, Florist Ivy, Lobelia Kathleen Mallard and Crystal Palace Gem, Fetunia Drees's Superb Single, Salvia Bonfire Smilax, Verbena, Coleus Golden Bedder, Verschaffeltii, Queen Victoria and Eldorado, Tradescantia.

Salvia Zurich, \$3.00 per 100, \$29.50 per 1000.

Hardy Chrysanthemums, 75 kinds, \$2.00 per 100; 1000 our selection 50 kinds \$18.50.

JULIUS ROEHRS CO., Rutherford, N. J.

far of contradiction that no work hitherto published has contained so much, so enlightening and so interesting information on the great economic, social and humanitarian topics inseparably connected with and dependent upon the mighty industry which we call American agriculture. The previous volumes have covered the questions one must consider in the choice, layout and organization of a farm, practical reviews of the crop products of the farm and a discussion of the animal products. All these are of the highest value to the agriculturist and in their usefulness are practically inseparable but the volume now issued is really perfect in itself and is full of information of much interest and value to many to whom the previous volumes would not appeal directly. It will be no mistake, therefore, for such to purchase Volume IV, as an independent work, complete in itself. The book can be supplied from the office of HORTICULTURE at publisher's price, \$5.00 net.

The annual Report of the U. S. Department of Agriculture for year ending June 30, 1908, has been issued. It is a volume of 862 pages filled with information on all topics relating to agriculture and so diversified that the reader, whoever he may be, and wherever his interest may lie, is sure to find something in it directly applicable to his own needs. The different bureaus and divisions are all represented by their special reports. It is interesting to learn from the report of the Chief of the Bureau of Plant Industry that the work of establishing the Easter lily bulb industry in southwestern California has made rapid and encouraging progress during the past year. One firm has three acres in cultivation and expect to have from fifteen to twenty acres during the coming season. It has been found that a marketable bulb can be raised in California in one year from

the date of setting out the small seedlings.

Vol. 6, No. 20, Bulletin of the New York Botanical Garden has been issued, under date of March 22, 1909. It contains the annual report of the officers in the different departments, schedule of expenditures and list of members. The report of Dr. Britton, Director-in-Chief, shows that noteworthy progress has been made during the year in the development of all departments of the Garden. The collections of living plants, herbarium specimens and books have been much increased. A part of the second series of public conservatories has been completed. The work of collecting plants in Tropical America has been continued and the educational work, such as lectures, scientific meetings, etc., has been carried on with gratifying results.

Annual Report of the Forestry Department of the City of Springfield, Mass., for 1908. W. F. Gale is City Forester of Springfield and this report shows that he is doing good work.

Dreer Special Offer OF Hardy Perennials

NEW OR LITTLE KNOWN VARIETIES WORTHY OF SPECIAL ATTENTION

TROLLIUS (Globe Flower)

PRIMULA CORTUSOIDES SIEBOLDI. These are not so well known as they deserve; they are of free, vigorous growth, and can be flowered in pots in early spring, and respond quickly to forcing when placed in a temperature of 50 degrees, forming pretty pot plants in a short time, making excellent window plants, which meet with ready sale when in bloom.
We offer six distinct varieties, from pure white to the deepest rose in color,
\$1.50 per doz.; \$10.00 per 100.

RUDBECKIA RAYS OF GOLD. In this new variety we have a refined form of the popular "Golden Glow," to which it is identical in color, habit, etc., but the flowers have narrower petals, full to the centre, forming a perfect ball of gold,
\$1.50 per doz.; \$10.00 per 100.

ANCHUSA ITALICA DROPMORE VARIETY. A grand improvement on the type, with intense deep blue flowers, \$2.00 per doz.; \$15.00 per 100.

ANTHERICUM LILIASTRUM GIGANTEUM. A giant form of the N. Bruno Lily with very large white flowers, \$3.50 per doz.; \$30.00 per 100.

AQUILEGIA HELENAE. One of the best of the Columbines, large pretty blue flowers, with large white corolla,
85 cts. per doz.; \$5.00 per 100.

CAMPANULA PERSICIFOLIA HUMOSA. A very large semi-double form of the peach leaved Campanula, flowers of a pleasing shade of blue,
\$1.50 per doz.; \$10.00 per 100.

DELPHINIUM GOLD MEDAL HYBRIDS. The finest strain ever offered in mixed varieties,
\$1.25 per doz.; \$8.00 per 100.

DELPHINIUM BELLADONNA. The freest flowering of all Delphiniums, it is never out of bloom, beautiful turquoise blue, \$3.00 per doz.; \$15.00 per 100.

FUNKIA ROBUSTA ELEGANS VARIEGATA. A decided improvement on all variegated forms,
\$1.50 per doz.; \$10.00 per 100.

HELENIUM RIVERTON GEM. A new variety that originated on our trial grounds. Flowers old gold, suffused with bright terra cotta, changing as they mature to a wallflower-red,
\$1.50 per doz.; \$10.00 per 100.

HELENIUM RIVERTON BEAUTY. Another variety which originated with us, quite distinct in color, which is lemon-yellow, with a large disc of purplish-black,
\$1.50 per doz.; \$10.00 per 100.

HELIANTHUS SPARSIFOLIUS. The most desirable of all the hardy sunflowers, especially valuable as a cut flower, 85 cts. per doz.; \$6.00 per 100.

FOUR VALUABLE HEMEROCALIS. The four varieties here offered are great improvements upon the well-known Yellow Day Lilies.

Aurantiaea. Very large, bright, orange-yellow, sweet-scented flowers,
15 cts. each; \$1.50 per doz.

Aurantiaea Major. Large trumpet-shaped, sweet-scented, deep orange flowers. Requires protection,
35 cts. each; \$3.50 per doz.

Florham. Large golden-yellow sweet-scented flowers; very free flowering
15 cts. each; \$1.50 per doz.; \$10.00 per 100.

Gold Dust. Large golden-yellow flowers,
15 cts. each; \$1.50 per doz.

INCARVILLEA DELAVAYI. Popularly known as the hardy Gloxinia; extra strong roots,
\$2.00 per doz.; \$15.00 per 100.

IRIS PALLIDA DALMATICA FOLIA VARIEGATA. A strikingly handsome variegated leaved form of this beautiful blue Iris,
35 cts. each; \$3.50 per doz.

GYPSOPHILLA PANICULATA FLORE PLENA. This is a perfect gem and a summer cut-flower invaluable. We have a large stock of strong roots to offer this season,
\$2.00 per doz.; \$15.00 per 100.

LUPINUS POLYPHYLLUS ROSEUS. This is a most attractive rosy pink form of Lupines, producing gigantic spikes of flowers,
\$2.00 per doz.; \$15.00 per 100.

PENSTEMON GENTIANOIDES SENSATION. Gloxinia-like flowers in a variety of bright colors, including rose, cherry, crimson, purple, lilac, etc. For bedding they rival Phloxes, Petunias, etc. Not quite hardy,
3-inch pots,
\$1.00 per doz.; \$7.00 per 100.

STOKESIA CYANEA ALBA. A white form of the popular blue Stokesia, equally valuable and a desirable addition; strong plants,
\$1.25 per doz.; \$8.00 per 100.

CHOICE NEW TROLLIUS. (New Globe Flowers.) The five varieties listed below are decided improvements on all sorts heretofore offered; of exceptional large size and good, rich colors.

Gotterfunke. Large open orange-yellow flowers.

Helios. Very free flowering, pure yellow, on strong branched stems.

Leuchtkugel. One of the finest deep orange reds.

Lichtball. Large, globular orange-yellow flowers on stiff stems.

Salamander. Soft orange-colored flowers of globular form.
35 cts. each; \$3.50 per doz. The set of 5 for \$1.50

What is the best Double Pink Azalea? It is the Mme. Van Der Cruyssen, originated by the well-known Azalea Specialist, M. Van Der Cruyssen of Belgium. We have a big stock of them; every plant is as good as an apple, just covered with buds; just right for Easter. We have them for 60c, 75c, \$1.00, \$1.25, \$1.50 up to \$2.00 each. Bernard Andreas alba, \$2.25 to \$3.00; some at \$1.00 to \$1.50. Niche and Deutsche Perle, 75c, \$1.00, \$1.25, \$1.50. Vervaneana, De Schryveriana (best double variegated), 75c, \$1.00, \$1.25, \$1.50, \$2.00. Empress of India, 50c, 60c, 75c, \$1.00, \$1.25, \$1.50. Simon Martini, 50c, 60c, 75c, \$1.00, \$1.25, \$1.50, \$1.75. Apollo (red), 50c, 60c, 75c, \$1.00. Professor Wolters, 75c, \$1.00, \$1.25, \$1.50, and some more good varieties, 75c, \$1.00, \$1.25, \$1.50. We have Azaleas by the thousand.

Lilium Multiflorum, the best in America, 6 in. pot plants, height, 20-25-30 inch and over, with five buds and upwards to ten buds, 10c per bud; under five buds, 12c per bud.

Cineraria hybrida grandiflora. Henry F. Michell's newest improved strain. Our plants this year are very large, big heads of flowers, perfect foliage and the plants are almost as big as a bushel basket, 6 in., 25c, 35c, 50c, 75c, \$1.00.

Hydrangea Otakae, 6 to 7 in. pots, 50c, 75c, \$1.00.

Spiraea Gladstone, 6 in. pots, 50c, 75c, \$1.00.

Superta Floribunda Japonica, 6 in., 25c, 35c, 50c.

Araucaria Excelsa largest stock in America, 6 in.,

4-5-6-7 tiers, 2-25-30-35 inches high, 75c, \$1.00,

\$1.25 to \$1.50.

Araucaria Robusta Compacta and Glauca, 6-8 in.

pots, 20 to 35 inches high, 4, 5, 6 tiers, \$1.50, \$2.00,

\$3.00.

Kentia Belmoreana, 5 1/2 to 5 1/2 in. pots, 50c, 60c,

75c. **Porteriana**, 5 1/2, 5 1/2, 6 in. pots, 50c, 60c, 75c,

\$1.00, \$1.25, \$1.50.

Ficus Elastica, 5 1/2, 5 1/2, 6 in., 25c, 35c, 50c.

Begonia, New Improved Erfordin, a constant

flowerer, 5 1/2 in. pots, \$1.00 per doz.

Primula Obconica, full of buds and flowers, 5 to

5 1/2 in. pots, \$2.50 to \$3.00 per doz.

Asparagus Plumosa, 3 to 5 cents.

Ferns, 6, 7, 8 inch, such as **Whitmanii**, Boston,

Scottii, 50c, 75c, \$1.00, \$1.25, \$1.50; **Amerpholii**, 5

to 6 in., 50c, 75c.

Hybrid Rose Bushes, John Laing, Brunner, Her-

mossa, and other good sorts, 6 in. pots, 30 inches high,

very strong, 50c, 75c, \$1.00.

Crimson Rambler, newest sorts, 3 1/2 to 6 in. pots,

50 to 75c.

Hyacinths, four best varieties, white, pink, light

and dark blue, 4 in. pots, \$12.00 per 100.

Tounezel Tulips, this is the best double variegated

tulip in existence, three bulbs planted in a 4 in.

pot, \$3.00 per dozen pots.

Von Sion Daffodils. Best double yellow daffodil

in existence. Three double-nosed bulbs planted in one

pot, 5 1/2 to 6 in. pots, \$2.50 to \$3.00 per doz. pots.

All our bulbs are our own importation

and are not to be compared with

PHILADELPHIA, PENNA.

CULTURE OF ASPARAGUS PLUMOSUS.

The following article is a synopsis of the experience of many growers and has been edited by Charles E. Mehan, one of the most extensive growers for the Philadelphia market.

There are various species and varieties of asparagus grown for ornamental purposes. The commonest of all is the smilax (*Asparagus Medeoloides*), which has been grown by florists for generations.

Asparagus plumosus has also been grown for many years, and *Asparagus Sprengeri* is another well-known subject. The best of all, *Asparagus plumosus nanus*, is not a dwarf variety, as its name would imply, but is distinguished chiefly by the fullness and flatness of its fronds, so that the botanical name is largely a misnomer. The variety itself is very distinct indeed, and great care should be taken (in buying seeds) that the genuine *nanus* is procured.

Many otherwise well-posted people are ignorant of the vast difference. The new crop seeds are usually ready in January, and as soon thereafter as convenient they may be sown. The variety is a shy seeder. In a whole house there may be only a few seed-bearing strings. Growers should, therefore, fight shy of cheap offers in this connection, as the true *nanus* can not be sold cheap.

Any good rich soil, covered with a little sand, will do to start the seed in. The temperature should be about 65 deg., and as nearly constant as possible.

When the plant is well-rooted transplant to a deeper soil, or into a three-inch pot. In its young stage the plant is salable for filling ferneries and like purposes, and when a year old should be planted into solid beds for string development. It is usually grown in solid beds and should have perfect drainage. This matter of drainage is one of the most important points. It will not prove a profitable subject unless it has good drainage. Lay the bed carefully with rocks at the bottom so that the water can escape freely. Over this put a compost of heavy loam, leaf mould, and well-rooted cow manure. The plant is a heavy feeder and one-fifth of cow manure is not too much.

A well-lighted house is not essential, although better results can be obtained where conditions are modern and ideal. If there be height enough to run the strings up to seven or eight feet, the crop can be grown fairly well. Set the plants about eight inches apart and ten inches between the rows. Frequent

ANTON SCHULTHEIS

Florist

COLLEGE POINT, - L. I.

syringing is necessary to keep down red spider and other insect enemies. The strings should run from horizontal wires, one set at the bottom of the bed and the other on the roof of the house. The strings should be green, so as to harmonize with the foliage when cut. Meyer's Silkaline in various sizes is the best.

When the plant is well established it is not only the leader that is profitable, but the young sprays can be taken from the bottom and sold without injuring the plant.

As soon as the first crop is cut new strings are put in and another crop started. This goes on year after year, and as the plant gets older it becomes more vigorous and profitable for eight or ten years. After that time it is desirable to take up the plants and fill up the bed with fresh soil and manure.

The houses must be shaded from the hot sun as soon as bright weather commences in the spring. White lead, whitening and kerosene oil is the mixture generally used. In many places the cut worm has been a serious pest in asparagus culture, and about the only remedy is to pick them during the night, as they generally take shelter under the thick foliage during the day. The late William Scott said tersely:

"More and more every year do I see the great usefulness of a bed of *Plumosa* in a retail establishment. We would be lost without it. Don't attempt to grow it on a bench. Give it a foot of good soil on top of mother earth. Like all its family it likes plenty of manure."

Don't forget that all the *Asparagus* family are gross feeders. Top dress frequently—at least once or twice in a season. Beds should be four feet wide with two-foot walks between, so as to give convenience for stringing and training.

MRS. CUTBUSH (New) Pink Baby Rambler
This is a good one, in 6 inch pots at \$6 and \$9 per doz.

BABY DOROTHY (New)
Pink Baby Rambler very similar to Mrs. Cutbush.
5-inch pots at \$6 per doz.; 6-inch pots at \$9 per doz.

HYBRID ROSES
We have an unusually large stock of Hybrids which will be just right for Easter; all the best varieties, including Richmond, Frau Karl Druschki, La Frauce, Mrs. John Laing, Tom Wood, Killarney, etc., at \$6 and \$9 per doz.
MAYNA CHERRY, very fine at \$9, \$12, \$15 and \$18 per doz.

HYDRANGEAS
The largest and finest stock of this grand Easter plant that we have ever grown at \$5, \$6, \$9 and \$12 per doz. Larger plants at \$1.50, \$2, \$2.50 \$3, \$4 and \$5 each.

RHODODENDRONS
Stately, well-budded plants, including all the best varieties at \$1.50, \$2, \$2.50 \$3, \$3.50 and \$4 each. A few larger plants at \$5 each.

RHODODENDRON PINK PEARL (New)
The most beautiful of all the Rhododendrons at \$2.50, \$3 and \$3.50 each.

BOUGAINVILLEA GLABRA SANDERIANA
Magnificent plants, exceptionally well flowered at \$3.50, \$4, \$5, \$6, \$7.50 and \$10 each.

LILACS
Very fine plants, 6-inch to 8-inch pots at \$2, \$2.50 and \$3 each.

ROBERT CRAIG CO., Forty-ninth and Market Sts., Phila., Pa

A few of our leading specialties are mentioned below. The late Easter and the fine weather have helped this year and stock is in fine shipping condition.

GENISTAS
A grand stock, grown cool and just right for Easter at \$2, \$3, \$4, \$5, \$6 and \$9 per doz. Larger plants at \$2, \$2.50, \$3, \$4, \$5 and \$6 each.

SPIREA GLADSTONE
Our stock is in superb condition.
6-inch pots at \$5.00 each; 7-inch pots at \$7.75 each; 8-inch pots, made up, at \$1 each; 9 and 10-inch pots, made up, at \$1.50 and \$2 each.

PINK SPIREA
Queen Alexandra, very beautiful.
6-inch pots at \$9 per doz.

DOUBLE DAISY, Queen Alexandra
Well grown and well flowered.
3-inch pots at \$1.50 per doz.; 4-inch pots at \$2.50 per doz.; 5-inch pots at \$4 per doz.; 6-inch pots, very fine, at \$6, \$9 and \$12 per doz.

LILIES
Our stock is exceptionally good this year. Plants with from 4 to 8 blooms at 12 cents per bloom; made-up plants with from 12 to 25 blooms at 12 cents per bloom; plants with less than 4 blooms at 15 cents per bloom.

AZALEAS
We have the largest and finest stock of Azaleas we have ever had, including Vander Cruysse, Vervaeckere, Emp. of India, Emp. of Brazil, Nobe, Bernard Andrea Alba, Prof. Wolters, etc., etc., at \$7.5, \$1, \$1.25, \$1.50, \$2, \$2.50, \$3, \$3.50, \$4, \$5, \$6, \$7.50 and \$10 each. A few larger specimen plants at \$12.50 and \$15 each. Pyramid Azaleas, very fine, at \$3, \$3.50 and \$4 each. Small Azaleas for Basket Work at \$3 and \$4 per doz.

CRIMSON RAMBLER ROSES
These plants are unusually fine and will be just right for Easter.

6-inch and 7-inch pots at \$1, \$1.25 and \$1.50 each; 8-inch pots at \$2 and \$2.50 each; plants trained in fan and globular shapes, extra fine, at \$2, \$2.50, \$3, \$3.50, \$4, \$5 and \$6 each; a few larger plants at \$7.50 each.

PINK RAMBLER ROSES
Lady Gay and Dorothy Perkins
In great condition; trained into Fan, Globular and Pyramidal Shapes at \$1.25, \$1.50, \$2, \$2.50, \$3, \$3.50 and \$4 each. Special Ball Shapes at \$1.50, \$2 and \$2.50 each. Special Wire Fan Shapes at \$5 each.

TAUSENDSCHON (New) "Thousand Beauties"
This was our finest Climber last Easter and this year the plants are still better. We cannot recommend the Tausendschon Rambler too highly. Strong plants in 6-inch and 7-inch pots at \$1, \$1.25 and \$1.50 each. Trained plants, Fan, Globular and Pyramidal Shapes, at \$2, \$2.50, \$3, \$3.50, \$4 and \$5 each.

BABY RAMBLE NDARDS
Exceptionally fine plants, 3 to 5 foot stems, at \$1, \$1.25, \$1.50, \$2 and \$2.50 each.

WHITE BABY RAMBLER STANDARDS
At \$1, \$1.25 and \$1.50 each.

STANDARD DOUBLE-BUDDED WHITE AND RED BABY RAMBLER ON SAME PLANT
At \$1.50 each.

BABY RAMBLERS
Good, strong stock, well flowered, at \$3, \$6 and \$9 per doz.

WHITE BABY RAMBLERS
Very strong plants, well flowered, 6-inch pots, at \$9 per doz.

WHAT THE EXPERIMENT STATIONS ARE DOING FOR THE CARNATION GROWER.

Read before the American Carnation Society at Indianapolis by H. B. Dornier.

During the past fifteen years the continually increasing demand for carnations has necessarily led to an increase in the greenhouse space devoted to the cultivation of this plant. With this increase many new and perplexing problems have been forced upon us. There is hardly a plant that has more diseases and insect pests affecting it.

In those states where many carnations are grown the experiment stations have attempted, from time to time, to solve some of these problems. The results of these studies have been published in bulletins and reports of the stations.

Most of the work in the past has been done on a small scale with just a few plants, and the results, to a certain degree, are rather indefinite. Today it is realized, that to have results comparable with commercial work, one must carry on these experiments on a commercial scale. Many of the stations are now building or have built greenhouses which are devoted entirely to special floricultural crops.

In looking over the work done by the various stations one finds that the problems of ten or fifteen years ago are not altogether the problems of today. Some of the earliest work on the carnation was on rust and its prevention and destruction. At that time the carnations were not rust-resistant and were easily affected. Since those days the varieties sent out each year have been more resistant each year until today the rust is not the enemy that it formerly was. No chemical has been found as yet that will eradicate it, and its disappearance is due to a change in the constitution of the host. Its worst days are over.

Stem-rot has been discussed time and time again, but no effective method has been devised for its destruction. Its disappearance will also follow on the breeding of resistant varieties.

The questions of today then seem to be along the line of carnation breeding, methods for the prevention and destruction of insect enemies and problems of nutrition, or, in other words, the proper use of fertilizers.

In order to secure the necessary data for this paper, the writer sent a letter to the director of each agricultural experiment station in the United States requesting such information as could be given regarding results that have been published and also the work which is being carried on at the present time.

No attempt shall be made to discuss the work of the stations in detail, but to give a brief resume of what has been done and what they are doing at present.

The requirements of the carnation naturally prohibit its being grown in certain parts of the country, and so many stations carry on no work along this line. This includes most of the states south of the Mason and Dixon line, and also many of the western states. Replies have been received to

most of these, but the report is naturally incomplete as some have failed to answer. In addition to this information data was secured from an examination of the literature published.

It will be found that most work has been done by the stations of those states which may be called carnation centers. The troubles of the carnation growers were important enough to occupy a part of their time.

Among the stations from which replies have been received are a number where no work has been done. This is not due to a lack of interest but because very few, if any, carnations are grown in the state, and so time and funds have been expended on other crops. Among these are the following southern and western states: New Mexico, California, Louisiana, West Virginia, Alabama, Utah, Montana, Wyoming, Kentucky, Maine, Minnesota and North Dakota also have done nothing along this line.

Florida has attempted to grow carnations but found that northern varieties all failed in the south. The variety Augusta was sent out from there as the only variety suitable for the state. South Carolina grows a few carnations but has carried on no experiments, as there are few floral establishments in the state. In North Carolina the work has been recent and some time has been devoted to root-knot of carnations. Virginia has done nothing but expects to take up work in floriculture in the near future.

Pennsylvania has also done nothing but expects to take up some carnation work as soon as new houses are finished. Ohio has done a little on sub-irrigation and crossing but has published nothing. Michigan has done nothing, due to lack of equipment. Wisconsin has no facilities at present, but floricultural work will begin as soon as new houses are completed. Iowa grows a few plants for class work but has given them no attention as a crop. Kansas has done some work on control of rust but has published nothing. Missouri has confined her work entirely to practical methods of preventing rust and suggests use of dry Bordeaux mixture. In Oregon a little work has been done but no data published. In Washington only a few carnations are grown for class work. Commercially few carnations are planted; time and space being devoted to roses.

Thus far the report shows that there are some stations in carnation growing sections at which floricultural work would be carried on if they had the proper equipment and funds. Several of these have greenhouses under construction and will take up this line of work in the near future. There are, however, a number of stations at which much work has been done with the carnation and where still more is being done.

At the New Hampshire station the following problems are now under consideration:

1. "A test of the value of farm manures judiciously used in the compost heap, as a means of improving the growth of plants, size and other points of excellence in the flower."

2. "A test of the value of commercial fertilizers applied as a top dressing to carnation benches."

3. "How to account for the earliness and free flowering of carnations,

the theory being worked out in seedlings."

4. "Pot culture of carnations during summer months in cold frames compared to field culture."

5. "House culture of carnations compared to outside culture."

6. "Suitable soils for winter culture of carnations."

7. "Inheritance of color in carnations."

New Hampshire has devoted to this work at present time 2500 square feet of glass.

In Vermont Mr. Stuart has done some interesting work on crossing carnations, the results of which appear in the 20th annual report of the station. The work consists of a study of seasonal influence in crossing relative to seed production in which Mr. Stuart arrives at the conclusion that early crosses are most successful, giving a higher percentage of successes, a larger number of seeds and a higher percentage of germination. Some attention has also been given to Mendelian inheritance in the carnation with respect to the unit characters of single and double. He finds that the law holds good in the case of the carnation.

In Massachusetts some work has been done at both stations. At the Hatch station two bulletins have been published. Number 10 deals with fertilizers for carnations and Number 80 gives directions for spraying. The 17th report gives some notes on soil sterilization and the 14th some notes on stem-rot. In the reports of the state station are found notes on stem-rot and analyses of carnations.

In bulletin 128 the Rhode Island station gives the results of soil treatment in culture of carnations. At present a fifty-foot house is devoted to experiments on the effect of various kinds of physical and chemical soil treatment upon carnation growth. This is now only in its second season and nothing has been published as yet.

Connecticut has issued various notes on results of experiments with carnation diseases, effect of lime on development and the use of commercial fertilizers. These have been published in the station reports of 1896, 1897, 1899, 1900 and 1906.

At the Cornell station the carnation has been used in various experiments as crossing, influence of electric and acetylene light, influence of fertilizers on vegetative parts and on vigor, quantity and viability of pollen. Records have been made of work but not printed as yet.

At the State station at Geneva some very comprehensive work has been done. The latest bulletin published (Technical Bulletin No. 7) contains the results of a very careful study of the bud-rot, its causes and control. In addition to this publication the following bulletins have also been issued: No. 100 on methods of "Combating Carnation Rust"; No. 138, "Effects of Common Salt on the Growth of Carnations and Carnation Rust"; No. 164, on "Leaf Spot"; No. 175, "A Parasite upon Carnation Rust"; No. 186 contains notes on stem-rot.

In New Jersey investigations have recently been taken up. At the present time a study is being made of the physical condition of the redshale soil using various proportions of sand and organic matter.

has some very interesting notes on the effects of fertilizer on stiffness of stem, effect of varying amounts of nitrogen, the earliness, different time of setting carnations, continuous cropping without changing soil, and bursting of carnations due to location on bench. At the present time investigations are being carried on to determine effect of cutting selection on vigor of plant and development of color types from seed. A house 20x50 is being devoted to this work.

In Indiana the results of the most important work were given in Bulletin 59 on "Bacteriosis of Carnations." This disease was considered to be due to bacteria but is now known to be caused by punctures of insects and is called Stigmonose. A number of articles also appeared in trade journals at various times. No work is now being done due to lack of greenhouses.

At Illinois the past year was devoted to the repression of thrips on carnations, and during the season from October, 1907, to June 15, 1908, over 63,000 buds were examined; most of the work was done with tobacco compounds. The results of the work have not been published yet.

During the present year two houses, 105x28 feet, are being devoted to an experiment with carnations, testing the value of chemical fertilizers as supplementing stable manures. This experiment comprises thirty combinations of fertilizers, which are repeated with four different varieties in order to check results: 3200 plants are used in the experiment. The fertilizers used are dried blood, sodium nitrate, ammonium sulphate for nitrogen, acid phosphate, ground rock and bone meal for phosphorus, potassium sulphate, wood ashes and kainit for potassium and lime. Several years will be required to complete the work.

The only work done by Nebraska is on the bud-rot of carnation and its accompanying mite. The results of this work were published as Bulletin No. 103.

Ten stations have not been heard from, and as most of them are in regions unfavorable to carnation growing, have probably done no work along this line.

A study of the report will show that the real work in floriculture at the stations is in its infancy, and that the work along the line of carnations is just beginning. The time is not far distant when each station will be devoting a certain amount of time to it.

CARNATIONS UP TO DATE.

A paper read before the Morris County Gardeners' and Florists' Society, March 10, 1909, by Louis J. Reuter, West-terly, R. I.

Carnation culture has already been discussed times without number, and my observations have led me to conclude that each grower has to work out for himself the proper treatment which is required to correspond with the local conditions as they exist. Therefore it is not my intention to go into any lengthy talk on the culture of carnations.

It is possible to lay down certain fundamental principles for the beginner, but these may serve only as a starter and a guide. The resultant success must depend on his own powers to observe, and his ability to distinguish good effects from bad.

Carnations may be seen growing under certain widely differing conditions, such as Enchantress, for instance, growing with a night temperature of 52 deg. and a day temperature of 62 to 65 deg. Then, on the other hand, I have seen very excellent Enchantress growing with a night temperature of 48 deg. and a day temperature of 70 deg. The latter seems to me to be a case of unusual treatment, but where is the room for criticism when the results are satisfactory?

Again we come to the fact that one grower holds his carnations on what we would call decidedly the dry side, and possibly the next day visit another where the soil in the beds is exactly the reverse, and still both have equally good crops. We are constantly finding things to puzzle us in the way of culture and, for that reason, it would seem that explicit cultural directions are worth nothing more than a hint and a guide.

The subject of concrete benches is at this time receiving considerable attention. From an economical point of view these benches have an advantage over those constructed of wood, but the question which arises in my mind is whether raised benches are superior to solid beds with good drainage? Here we come again to the same conclusion: Be guided by your own experience. If no better stock can be grown on the raised benches, then it is much cheaper to use solid beds. My experience has led me to favor the solid beds.

At the present time considerable experimenting is being done in the way of building these concrete benches.

Some are moulded entire, with bottoms, sides, stringers and supports practically in one piece. Others use movable slabs for the bottom, and these can be made at odd times during the winter, ready for the summer rush of repairing and rebuilding. One point which strikes me as important is that the slabs be made as thin as possible and still be strong enough to carry the load. It is also important that the concrete be as porous as possible. The slab about 8 inches wide seems to be better than one 12 inches or more. By using narrow pieces, the drainage is made better, and they should be laid at least an inch apart. What I have stated about these benches is not taken from personal experience, but from what I have seen at other establishments which I have visited. Where raised benches are used, I believe that the concrete constructions will prove to be a good thing, and any ingenious man should be able to work out a cheap and satisfactory way for constructing the same.

There is one subject which has caused many of us some trouble this year, and I would say a few words about that now. My talks with numerous florists since fall, not only growers but store keepers and commission men, have brought out the complaint that the flowers of several of our best varieties are not keeping well. It is true that this season has given us bad weather to contend with, but still we have varieties which practically never give us cause for complaint. Growing conditions, no doubt, may cause this trouble to a certain extent, but we are nevertheless sure that the trouble cannot be entirely avoided, even if great care is taken in ventilating, watering and feeding. What we must do, however, is to watch the new varieties carefully and steer clear of the poor keepers. Such varieties get the wholesale grower into trouble with the retailers, and the retailer with his customers, and the ultimate result is to hurt the sale of the carnation.

The numerous reports in the trade papers have covered very thoroughly the many new varieties which have been shown this season, but a few words further may not be out of place at this time. It is not my intention to speak of every new variety which has been shown. There are too many for me to attempt that, but I will simply say a few words about several which have made an impression on me while at the Indianapolis meeting of

the Carnation Society, and also those seen at several establishments which I have visited. The show in Boston two weeks ago brought out many of the favorites, and at that time it was possible to judge several varieties as to their keeping qualities on account of the long distance they had traveled before being staged.

Bay State has shown up well wherever exhibited. It shows good keeping qualities and is a large, bold, attractive flower, with excellent stem. There seems to be no other variegated in sight to compete with this variety.

Apple Blossom is a very well formed flower, with the general color effect resembling Prosperity, but not as deep in color as the latter (quite often coming all white). The stem is very good, and it is surely a good traveler as well as an attractive novelty.

Pink Delight has been well thought of by nearly every one who has seen it, especially those who have seen the plants growing at Lafayette. The blooms are not very large, but enough so for commercial purposes, and the form and stem are very good. It is a true salmon pink, and should take well with the public. As a producer it seems to give excellent results.

While at Lafayette we saw a large number of seedlings of all colors and types, but two scarlets and a crimson stand the strongest in my memory. They will be undoubtedly heard from later. I believe one of the scarlets—Hoosier Lad—is to be introduced next season. The latter is a fancy bloom, with good color and the growth is heavy and strong in every way.

W. N. Rudd also showed a very promising crimson which is still under

number. The form of bloom, stem and color are good, and it is claimed to be a good producer and a clean grower.

Ruby has been shown well in a number of exhibitions. It is a fancy bloom, having excellent form and stem. The color is not too dark, and as a keeper it outpoints the average crimson grown heretofore. The growth is ideal, free, upright and clean.

A vase of crimson shown in Boston by F. R. Pierson Co. was also very attractive. This variety should be heard from later, as it holds up well with the best in sight, as to color, form and stem.

If I were asked what variety of those being introduced this year pleased me most of all I have seen, it would be hard for me to decide. But I must say a few words in particular for May Day. In this variety we find a shade of color which had been lacking among our commercial sorts. The color is a clear, lively satin pink, but that is not saying enough. We cannot find any standard variety to compare it with. When Enchantress of good color is placed beside it, May Day receives all the attention. It is in the Enchantress shade but a great improvement; the stem is strong and graceful, of good length and, judging from the plants seen growing at Richmond, we would call it a good producer.

The Chas. Knopf Floral Co. have a seedling named Admiration, to be introduced next year, which should take well with the growers. The points of excellency in this variety are, in a few words, large handsomely formed blooms, strong stem, and ideal calyx. The color is the most attractive point, however, it being an even, soft pink,

Now is the proper time to place your order for Lilies, Roses, Carnations, Sweet Peas, Violets, Daffodils,

deeper than Enchantress, with no salmon, and it does not fade out at the edges.

Sangamo and Superba are both excellent varieties, having very long stems, with sufficient strength to hold the flowers erect. They are both good keepers.

Dorothy Gordon resembles Rose Pink Enchantress very much, but is a decided improvement over that sort.

In whites, we have several showing up well. Shasta has attracted considerable attention by its nearly perfect form and pure glistening white petals and good keeping qualities. Mrs. J. C. Vaughan impresses me as a white from which we may expect something good. The flower is well built, loose and attractive, and it is of good size and of excellent stem. I have not seen it growing, but from reports of those who have, would say that it is free and clean. The cuttings at any rate are starting out in good shape, showing a vigorous habit.

Although the bloom of Georgia is not very large, it is of good commercial size, and if it will produce freely this variety should prove valuable. It is a good keeper and the color pure white.

I neglected to mention among the scarlets Mrs. O. P. Bassett, which was shown in Indianapolis. In the scarlet classes it showed up well, and we hope to find in this one a profitable variety. Some growers have been disappointed in Beacon this year, and with victory steadily losing friends, there is room for a good commercial scarlet.

For some years back, the market has been bare of yellow carnations, but there are now three in sight. It re-

mains to be seen what will become of them. We should at least get one from these. J. Whitcomb Riley is a very striking bloom, bold and rugged, with Lawson characteristics. A point of value in this sort is the absence of pink or red markings. The bloom is a clear color of the ideal shade of yellow, not too dark nor too light. Kanarie Bird as staged in Boston showed up well, and Mr. Pierce of Norwood, R. I., has a yellow with a fine stem, the bloom somewhat resembling the old Eldorado. Although the sale of yellow carnations is not heavy, there is always a chance to use a limited number to an advantage, and a good one will be welcomed.

A visit to the new range of the E. G. Hill Co is especially interesting this year. Novelties in roses and carnations are to be seen here, and there are several carnations on trial which should be heard from. I cannot mention any one in particular, as it would be necessary for one to watch them in growth and habit in order to decide which is best for commercial purposes. I remember, however, that a white and a scarlet looked especially good. The concrete construction of benches is being tried here, and we found this establishment interesting throughout on account of its up-to-date equipment.

SELECTION AND CROSS FERTILIZATION OF THE CARNATION.

A paper read by Peter Fisher, Ellis, Mass., at the Massachusetts Agricultural College, Amherst, Mass., February 24, 1909.

I presume you have already been addressed on the subject of the best types of greenhouse construction, and as this plays a very important part in the improvement of the carnation, I will merely touch upon the subject.

My preference is for a span-roofed structure, with continuous ventilation, on each side of the ridge, and on sides, with raised benches, thus insuring a free circulation of air. The house may be built running north and south, or east and west, as location and other circumstances permit.

The east and west aspect has the advantage for about six weeks in midwinter: the north and south about equal during early spring and fall, with a decided advantage during hot weather.

Selection of Varieties for Crossing Purposes.

Only the healthiest and most vigorous stock procurable should be used and such varieties as embrace a wide range of self-colors are most desirable.

To obtain the best results, the col-

ors should be classified, keeping the different shades of light pink, dark pink, whites, crimson, reds, etc., together. By following up this method, a much larger percentage will come true to color in crossing than where this is done promiscuously or haphazard.

A High Standard of Culture Is Essential to Best Results.

If the plants at the period of cross-fertilizing are in robust health, producing strong, vigorous shoots, which usually mean correspondingly large blooms, the seeds will invariably be large, of much greater vitality, producing strong and vigorous seedlings, from which one may naturally expect something phenomenal.

On the other hand, if the parent plants are poorly grown, weak, spindling, and lacking in stamina, their seedling progeny is sure to be of like quality. The most decided results, and greatest advances in my experience have always been obtained from parent plants exhibiting unusual strength and vigor.

There is not, as far as I know, any means of ascertaining beforehand just what the result of a cross will be. If crosses are made between colors of a like shade and their progeny year

Choice Seasonable Flowers

after year, by continuing this method the seedlings will, to a large extent, be a reproduction of the parents as to color. Habit of plant will often resemble either parent, or be exactly intermediate, but there is no certainty in the matter, as the most un-looked for colors appear at times, such as a pure white from the crossing of two reds, or vice versa. We can only hope and work towards the desired end, and if we stick to it long enough success will ultimately crown our efforts. One can invariably attain to anything they make up their mind for, providing they have the staying qualities, which defeat only spurs on to greater effort, and here let me tell you is the explanation for the "good luck" of many. It comes simply by stick-to-it-iveness. By some I have been termed "lucky" in the production of some desirable varieties. I leave this to your own judgment. For instance, I worked six years without satisfactory results, to procure a worthy successor to "Daybreak."

About "Luck."

During these years I raised hundreds of similar color, but, as the song says, "There was always something wrong." Flowers too small, or too large and split or stems too weak, plants lacking in constitution, something out of balance. In these efforts I had been using the pollen of Daybreak on other varieties. It occurred to me that I might be working along the wrong lines, so I reversed my tactics. By using the pollen of the Lawson color cerise on the variety Mrs. Bradt, a white ground variegated with

red—I procured Enchantress.

The Lawson was raised from Daybreak, a flesh colored variety pollen from Van Leeuwen, a dark pink.

You see the color of Daybreak cropping out. Was this simply CHANCE or was it the working out of Mendell's theory? There is food for reflection and careful study along these lines. Again when I tell you that from a batch of first-year seedlings tested three years ago, we retained 250 scarlets for a test in the greenhouse, today we have three left of the 250 varieties, with the possibility of disseminating ONE. Of the remaining 3250 we retained four with a possibility of disseminating 2 or 3 at most. Think of it—4 out of 3500, then tell me where the luck comes in! Yet a few years ago hundreds of those varieties so discarded would have been called wonders. It is owing to the present high standard of the carnation that it becomes more difficult each year to produce a decided acquisition. Yet, looking backward through the earliest years of my experiments, I can see where I discarded many a fine carnation through this critical sifting down. Still it is much better to be on the safe side.

The Time to Work.

The best time to commence cross fertilization is during late October or early November, that is, just after the disappearance of flies and bees that usually come into the greenhouses on the approach of cold weather.

Pollen at this season is also more plentiful than during December, Janu-

ary or February. The best time in the day to cross fertilize is from 11 A. M. to 2 P. M., the earlier the better (providing, of course, that the day is warm and sunny, and the pollen perfectly dry). In transferring the pollen, some use a magnifying glass, camel's hair brush and pair of tweezers. I have never used either, until recently when I find it necessary to use eye glasses. I do not believe in the method practiced by some in removing the petals of the flower when half developed, as I think it injurious to the normal development of the other important parts of the flower, so essential to success. My custom is to split the calyx in three or four places, so that the petals can drop down around the stem, thus leaving the pistil, stamens, anthers and stigma fully exposed to light and air. The stamens can in this way be easily removed between the thumb and finger (fore-finger) with the anthers and pollen intact, and transmitted as desired.

In using the camel's hair brush for conveying the pollen there is danger of getting it mixed, as it is difficult to clean the brush, before using on a different cross. In crossing, one should always have a definite object in view—an ideal to work up to. Keep in mind the very best of the various types now in existence—also their defects, then go to work with a determination to excel. The first requisite and one to be always kept in mind is a healthy, vigorous constitution, that means disease resisting; next comes color, always indispensable, for no matter if all other

NEW YORK

points have been obtained and the color is undesirable, the plant is only good for re-crossing, because of its desirable habits; then one must work for the necessary stem and strong calyx to hold the flower erect; size, form, substance and last but not least fragrance, must all be considered—fragrance I regard as indispensable. The process of cross-fertilization is so simple that I need not go into it in detail.

Applying the Pollen.

One must study the various varieties to be used, and fine judgment is sometimes required to know when the flowers have reached the proper stage for the experiment. In some varieties the pollen is perfectly ripe and ready for use as soon as the flower expands, while in others it does not appear for several days after the bloom develops. On the ends of the stamens are the anthers which, when they burst, produce the pollen. When ripe it is in the form of a powder. The stigma is the part to which the pollen is applied and as it reaches the proper stage for fertilization the upper surface assumes a rough, hairy appearance. It is now ready for crossing, and upon this surface the pollen should be spread, being careful that it is properly ripe and dry, when it will be seen to adhere easily. If fertilization has taken place, the petals of the flower will wilt and fade within from one to two days, and often in a few hours, which is a sure indication that the operation has been a success.

After the petals dry up, they may be removed without danger of injury to the seed pod forming, and to prevent accumulation of moisture which might

otherwise cause the pod to decay. Flowers fertilized early in October and November will usually ripen their seed in about 6 or 7 weeks.

Gathering the Seed.

The seed pods should be picked with 4 to 6 inches of stem attached, carefully wrapped in paper, or enclosed in envelopes and allowed to dry thoroughly. This usually requires about 2 weeks. The seed should then be carefully removed and planted at once.

Flats thoroughly drained with a layer of 1 to 2 inches of ashes, over which a like quantity of sifted loam of a light sandy nature has been spread, makes an ideal compost. Level off carefully, press moderately firm, sow in rows 1 to 1-2 inches apart and 1-2 inch deep, which can be made by pressing a narrow strip of wood into the soil, cover carefully with about 1-2 inch soil, water with a fine sprinkler and place upon a shelf in a light situation out of the reach of mice, who are extremely fond of carnation seeds—one mouse, if he "gets busy" will destroy hundreds of seeds in a night. This happened to me one season when I had sown the seeds in 4-inch pots, which were placed on a bench, and I had omitted to cover them with a sheet of glass, as was my custom then. I lost almost an entire season's seeds by my neglect in one night, and I confess I did not feel very kindly toward that mouse next morning.

Care of the Seedlings

Great care should be taken to keep the soil moderately moist. If the sun is bright, a paper should be spread over the flats during the day, and removed towards evening. This prevents

too rapid evaporation. The seed will usually germinate in from four to ten days, when all shading should be removed and the flats kept in a light airy position free of draughts. It requires good judgment in watering to prevent damping off by excess of moisture, or injury by becoming too dry. When the seedlings have developed their second leaves, they should be transplanted into small pots or flats: I prefer the latter as there is less danger of a check by becoming too dry. They should be kept in a light, airy position to insure a compact growth, in a night temperature of 45 to 50 degrees. Then they can be planted in the field during May when danger of check from frosts has passed. Plant in rows similar to general varieties. Those making a compact growth, bushy growth should not be stopped back but allowed to bloom, to determine whether it is worthy of being transplanted into the greenhouse later for a further test. Those inclined to run up with a single stem and no side growths should have the centres pinched out, so as to induce a bushy growth, so valuable later, should the variety prove an acquisition. The idea of encouraging the seedlings to bloom early is to be able to select from the field those worthy of further trial in the greenhouse. This enables one to save much valuable space that might otherwise be taken up by worthless sorts.

Selection.

It is often desirable to save single varieties exhibiting profuse blooming qualities and healthy, vigorous constitutions,—select those with a strong well formed calyx, and wide

84 Hawley St., Boston

petal, make the single variety the seed bearer, using pollen from extra double and even split varieties. Later I may be able to give more definite data from experiments in this direction. Beacon is the first variety I have disseminated, raised from a single yellow variety crossed with a double scarlet seedling. The selection of desirable colors is a very important matter. One is apt to get enthused about some particular shade, prejudiced in favor of his own, so to speak, for you know every fellow usually "thinks his own crow the blackest."

The buying public are, after all, the

real critics and I have found it to be a pretty safe rule to abide by the taste and selection of the ladies, as they inspect and comment upon the various shades of color, in the seedling house. I can well remember when Enchantress was in its second year with some 35 plants in bloom, the ladies used to stop and exclaim, "Magnificent, Exquisite"—of course a smile of satisfaction on my part was the result, as I thought, "Here is a winner"

In conclusion let me urge upon you to get all the theory you can—put it into practice—but don't stick to any man's "say so." Work with a definite object in view—keep careful notes—watch results, and keep before you as a watchword and guide to success, first, last and all along—the word, "Selection."

AN INTERESTING COMPARISON.

The wholesale prices quoted Feb. 20 for the Covent Garden flower market furnish some interesting figures when compared with prices on this side. We find gardenias \$1.00 to \$1.50 per dozen, against our \$4.00 to \$5.00; Cattleyas \$2.00 to \$3.00, against our \$6.00 to \$9.00; but there is not such a vast difference when it comes to roses and carnations. Bridesmaid and Liberty are quoted at \$8.00 to \$12.00 per 100, while Enchantress and Lawson bring \$3.00 to \$4.00. Niphetos, Mermet and Perle seem to be still standard varieties over there. "Generals"—by which we presume they mean General Jacqueminot—are quoted at from \$8.00 to \$10.00 per 100. Our great American standby, American

Beauty, is not quoted at all. Neither are Richmond, Killarney, nor even the Bride, French Brunners being the highest price on the list, being quoted at from \$2.00 to \$2.25 per dozen. Anemones, myosotis, daffodils and similar subjects are quoted by the dozen bundles, so it is not so easy to make comparisons. Lilacs and smilax are quoted by the bunch; but the Londoners evidently think this word unsuitable for asparagus, as that item is listed by the bundle and is honored by being quoted in three grades—long, medium and short. White Ten-Week stocks and mimosa are quoted by the "pad." Why these could not be put into a bunch or a bundle is somewhat obscure. Perhaps the commission men use these to pad the returns to their growers. Perhaps the ladies use these items as shoulder pads or bustles. Anything is possible when it comes to the vagaries of fashion.

G. C. WATSON.

A Profitable Side Crop

Asparagus plumosus is a main crop with many growers having extensive modern plants but those with less up-to-date establishments, or parts of same defective in lighting or otherwise unsuitable for high grade crops, will find this subject one of the very best. We have prepared a cultural circular giving concise directions how to make money out of this crop. Send for it. No charge. An important feature in asparagus culture is good seed. The P. M. quality of greenhouse grown seed has earned a high reputation for freshness and purity. It is the true nanus and greenhouse grown. Send for trial pkg., 100 seeds fifty cents, if you wish to experiment only. In quantity \$3.75 per 1000 seeds, \$32.50 per 10,000 seeds. Asparagus Sprengeri 75c. per 1000, \$5.00 per 10,000 seeds.

Of Interest to Retail Florists

ROCHESTER (N. Y.) PLANT NOTES.

Appropos of the approaching Easter season, local florists are quite apprehensive. Owing to the continued cloudiness and many sudden changes in temperature, all material has to be hurried along, especially lilies of the Giganteum and Multiflorum varieties. There will be a noticeable shortage of these plants, whilst of all other kinds of plants there seems to be an abundance. Some exceedingly well grown plants of *Schizanthus Wisetonensis* are to be seen at the greenhouses of R. Sibley (E. Berry, gardener). These are in 6 inch pots, and a perfect mass of orchid-shaped flowers which need only to be seen to be fully appreciated. This plant can be very profitably grown from seed, and is useful either cut or potted.

The new Rambler rose Tausendschon can be seen in plenty at Salter Bros.' This rose is proving to be of exceptional keeping quality, and as an outdoor climber is very satisfactory. Some plants of Winan's Rambler (Majenta) are also seen, its rich color and large flower heads looming up among many other plants.

The new designs of Hart's Handy Handle are fully appreciated by the store men here, and have met with great approval wherever displayed. The retail trade find it a decided acquisition in trimming effects. S.

W. J. Palmer of Buffalo, already recognized as one of the foremost florists of the country, has entered the field of literature with an interesting series of notes accompanied by six illustrations of new bridal bouquets in the Ladies Home Journal for April, 1909. The cover carries a beautiful picture in colors of one of the handsomest of these, a bouquet made of lily of the valley, cattleyas and Farleyense fern. Its simplicity of arrangement conveys a good lesson to those florists who think a big mop of dangling ribbons is an indispensable adjunct in tasteful bridal bouquet making.

We can truly see that
DETROIT Lent is about over, not
alone because some are
beginning to pickle flowers but be-
cause our attention is already on prepa-
ratory work and booking orders for
Easter. Looking backwards we can
safely say that Lent has been better
than several weeks before. A general
revival of trade in the retail district
can be noticed and this ought to
strengthen our hopes for a very busy
Easter. All indications point towards
it and it will be mainly up to ourselves
to make a success and deliver such
goods as will give satisfaction although
the price paid for them may have been
out of the ordinary.

Flower Market Reports.

BOSTON The "early bird" in search of the Easter worm is abroad in the land and is keeping the wholesale dealer busy giving quotations and taking orders for Easter shipments but, apart from this, very little is going on in the cut flower business. In fact, things are almost at a standstill and it is fortunate that the product is not heavy as there is little encouragement in sight. The supply is moved fairly well under the circumstances. White carnations are an exception to the general rule and are enjoying a little activity due to the light supply. The plant trade has been good, Easter orders being given well in advance and the stock unsold in growers' hands already reduced to the remnants.

Trade has been fairly good the past week but high prices are out of the question. The buyers practically have their way, as the abundance of all stock received by the wholesalers daily accumulates too fast. Roses are in oversupply. All varieties, including Beauties, are more plentiful, but the high prices of some days back has still a tendency to obstruct sales. Other materials such as sweet peas are very fine and have sold quite readily, while violets have no special demand. Lily of the valley is going slow, though it is hoped it will make up during Easter time. Other stock in good supply.

CHICAGO Will the Easter demand be unusually great, and if so, will there be stock enough to meet it? are the questions Chicago florists are trying to answer just now. Lilies always the cause of anxiety as Easter approaches, are unusually so this year. There may be lilies enough to go around, as some claim, but that there are enough that are good is quite another question. The fact that the large retail stores have placed their orders earlier than usual is of significance. Also that some of the heaviest growers had booked their entire stock before the first shipments began, means that there is nothing left for "repeat" orders or for the man who waits till the last week to place his order. The man who can sell any kind of a lily may find it easy, but the man who uses only good lilies will have to be alert. With carnations the matter is different. While many growers have their plants off crop there are enough whose plants are in right condition to permit a fairly good supply. This is especially true if we have a few days of sunshine. The scarcity of the white carnation still exists and must throughout the season, for it seems to result from a lack of planting, an over abundance of pale pink taking its place. These will work off well at Easter. Both the quality and supply of roses are good at this writing and unless weather is extremely unfavorable will remain so. Bulbous stock, cut and in pans, have sold well all the winter and no great amount has therefore been kept back for the close of Lent. A feeling generally prevails that the Lenten season of 1909 has been a good one for the florist and as the end approaches many express themselves as highly gratified.

INDIANAPOLIS

Trade the past week has been brisk and active. Store openings of various kinds have been using not only quantities of decorative material but flowering plants and cut flowers. There has been no overstock of anything. Good Beauties and all other varieties of roses can be had for nearly half what they were two weeks ago. The quantity, quality and demand of carnations could not be more satisfactory. Easter lilies are somewhat on the scarce side. A large supply of fine sweet peas are having a good run. Violets are cheap, with supply ahead of demand. Bulbous stock of all kinds continues plentiful. The topic of vital interest at present is Easter stock. Should this warm spell keep up it would hasten stock along and perhaps cause a scarcity. Lilies seem to be very scarce with some growers. There appears to be great demand for green goods of all kinds. The sale of plants is increasing daily.

PHILADELPHIA

The usual pre-Easter slump took place last week in the cut flower market. Such a condition was not unlooked for, but it was greatly aggravated by the activity of some one or more of our retailers with political influence stirring up the police department again to keep the curbstone men off Market and Chestnut Sts.—a spasmodic and periodical exploit as unwise as it is pernicious to the best interests of all the trade; especially at this season of the year when the curb men are of the greatest advantage in keeping the market from a disastrous break prejudicial to all concerned. The usual Saturday clean-up did not take place in consequence,

and much of the week's surplus had to go to the dump. Roses on the whole were of excellent quality and in large supply—considerably more than the market could absorb—and prices as a rule broke badly. American Beauties sold out fairly well. Many specials had finally to go for same rates as lower grades, however, and the general situation was distinctly under the previous week's quotations. Richmonds have been scarce but have taken on a new spurt and are more plentiful. Killarneys and Jardines make a better showing both as to price and quality than Brides or Bridesmaids. The carnation situation is not quite so congested as in roses, and stocks have cleaned up fairly well. Single violets are nearly over. The outlook for Easter on the violet crop is that they will be on the scarce side. The main dependence will have to be on frame grown stock. The quality of the lily of the valley now coming in is only fair, and the demand is sluggish. Considering present conditions, sweet peas are holding their own very well, and are one of the most satisfactory items. Prices good, quality good, demand all right. No life in the cattleya market. First quality gardenias are in demand but there is a large amount of poor grade stock that is hard to move at any price. Easter lilies are selling well. The Easter bookings for these, both cut and plants are very lively, many of the best stocks being already engaged. The early bookings were at from ten to twelve but the market has stiffened within the week and nothing decent can now be had for less than fifteen to seventeen. Out of town demand for the general run of Easter plants is excellent.

EVERYBODY KNOWS

Gardening cannot be properly done without the aid of an accurate leveling instrument

Bostrom's Improved Levels, No. 2 at \$15.00 and No. 3 at \$25.00, are conceded by all who KNOW to be the only levels on the market which meet all the requirements, at the price.

Our guarantee back of every Level we sell, and satisfied users in every State in the Union heartily endorse every claim we make.

Shipping weight 22 lbs. Description on request.

NEW YORK MARKET.

The flower market experienced a very poor week's business last week and the present conditions are not much better. The situation is perhaps a little more easily handled on account of somewhat reduced receipts on certain lines, but the supply of everything is more than ample. Beauties are not so plentiful, carnations are not too abundant and the bulbous stock is about even with the demand. The line most affected by the lack of activity is the tea roses. These drag along very wearily and the special grades are hardest to handle. Nothing is said about Easter as yet that is worth quoting except that there seems to be a well-founded impression that lilies of first quality will not be in over supply. Plant dealers are practically sold out on all desirable staples.

WASHINGTON NOTES.

Cold weather has retarded out-of-door planting and packing, and cut down the flower supply. There is a scarcity of Easter lilies reported and those of poorer quality than is usual.

Boston.—W. H. Elliott is about to open a city distributing depot for his product, on Park street.

INCORPORATED.

The Aitken Co., conducting a flower business in Springfield and Worcester, Mass., have incorporated with capital of \$5,000. C. S. Meacham is president, Mark Aitken, treasurer.

Bangor, Me.—New Floral Co., E. G. Hutchins, E. B. Hutchins, C. A. Hutchins; capital, \$10,000.

NEWS NOTES.

S. Hornbrook has taken a position as gardener for Clement Moore, Hackensack, N. J.

Brockton, Mass.—Violets suspended from the ceiling were the anniversary decorations of a department store, and over a thousand bunches were used.

In ordering goods please add "I saw it in HORTICULTURE."

The Payne Steel "T" Bar Greenhouses

The Lightest The Strongest

Half foot Size

HOUSES of this type are constructed with both curved glass eaves and straight glass eaves. Least amount of shadow. Least amount of wood. No drip. Greatest durability.

JOHNA. PAYNE

Greenhouse Designer and Builder

260-274 Culver Avenue

JERSEY CITY, N. J.

ICE CLEARING EAVES

ANGLE iron eaves are fast replacing the old style heavy wooden eaves plate. They are MORE DURABLE, CAST LESS SHADOW and give the house more stiffness.

SO MUCH OF THE ANGLE IRON IS EXPOSED TO THE INNER HEAT OF THE HOUSE, that they CLEAR OF ICE very quickly.

Sash Bar Clips

NO SOLID CLIP OR SOCKET TO CATCH AND HOLD THE MOISTURE.

NO MITER CUTS OF THE BAR—THE WHOLE BAR IS EXPOSED TO THE AIR, JUST RESTS ON and BUTTS AGAINST THE CLIP.

CAN BE PAINTED ANY TIME ALL OVER. NOTE THE LUG CAST ON THE TONGUE TO RECEIVE THE GLASS. ALL NICE POINTS COVERED IN THIS EAVE, EVEN TO THE DRIP GUTTER. SAMPLE CLIP MAILED UPON REQUEST, FOR EAVE OR GUTTER.

ASK ABOUT THAT IRON FRAME GREENHOUSE.

THE QUESTION OF STRENGTH

IT is conceded that the strongest and most durable structure known is "THE IRON FRAME." And when you have all the **modern** features combined in this type of construction you have "The Ideal greenhouse."

The picture shows the beautiful symmetry of my "Curved Iceless Eave"—no heavy antiquated shading members. And I also make a specialty of having my work harmonize with surrounding conditions. Note how the mason work on greenhouse conforms to that on adjacent stable.

The advice of "The Practical Greenhouse Builder" is at your disposal for the asking.

The Castle Automatic Circulator

The Summit of Perfection. No Device has ever been Invented for Forced Hot Water Circulation which will do what this little machine accomplishes, for Economy in First Cost or in Operation. Requires no Supervision or Manual Manipulation. Prices and Discounts on Automatic Circulator, several sizes, with or without Motors, also Testimonials from Large Greenhouse Establishments, east or west, furnished on Application.

While the method of producing a forced circulation of liquids is the same as in the Original Electric Circulator, some modifications in construction which we consider to be of vital importance are made.

The great improvement of its being equipped with a valve which requires no manual manipulation to change from forced to gravity circulation will be at once recognized as extremely valuable.

A is a light brass valve, hinged as shown at K, on the outer end of valve shaft fitted with Index pointer H, protruding through valve casing as shown in half tone. This Index shows at a glance the position of the valve in the pipe. When the propeller C is running the liquid is drawn in at the arrow I, follows the courses shown by 2, 3, 4 and 5, as it impinges on valve A, the valve being very light, is thrown up as shown, closing the gravity system and passes on into system as shown by 6. The instant the propeller ceases to act the valve A drops and opens up an unobstructed gravity flow from 1, 7 and 8 to the system. It has been demonstrated that for ordinary and usual duty there is no advantage to be gained by use of three way valve which must be operated manually. Another valuable feature of this style of Circulator is it can be readily installed by any one who has the mechanical ability to cut out a length of return pipe sufficient to take in the top I, screwing on the flanges J, J, (which are furnished) and bolting the pipe and Circulator flanges together. The propeller chamber, B, is fitted to top I rigidly, consequently the propeller shaft E cannot be sprung or cranked in its bearings D, K, L, and is always in line with top I and return pipe. The pulley S is attached on projecting end of shaft E and supported by bearing F, held in place by saddle D. The bearings F, K, L are bored out in

absolute truth, the backward thrust of propeller being taken up by step M and cap N. The shaft propeller and bearings are made of best Tobin bronze, bearings K and L have water lubrication, F is fitted with oil cup.

The motor may be placed wherever desired and connected by round or flat belt

passing of any part of the electric current to the apparatus, which we have found sometimes occurs, if the motor is not kept clean, thereby losing power and giving a shock of greater or less intensity to any one coming in contact with the Circulator or attachments. The motor may be operated by an electric switch

placed in any convenient place, and at a distance from the boiler or fire room, as the instant the propeller starts into action the automatic valve is thrown up and the water passes into the boiler and system, when the electric current is switched off the propeller stopping the valve drops and the gravity system becomes operative. In cases where the electric current is not obtainable, or too expensive, gasoline engine or water motors may be used. It is not necessary to run Circulator continuously. As soon as the thermometer on the return shows approximately (within ten to fifteen degrees) the temperature of the flow from the boiler, it can be shut down, the automatic valve opens to full capacity, and the pipes and water therein, being all heated to within a few degrees of each other, the gravity operation is so accelerated that the system will keep up its heat for from one to three hours.

The Circulators are built in three sizes, Nos. 2, 3 and 4, with tons on connections to returns complete up to eight inches in diameter.

Patent Applied For

BOSTON, MASS.
CASTLE
AUTOMATIC CIRCULATOR

to pulley S. It will be recognized that this is a very desirable feature, as the motor may be located away from the dust, ashes and heat of the heating apparatus, also obviating any necessity of insulating it to prevent, in using an electric motor, the

A Special Bargain. I have on hand, complete, ready for delivery, three new No. 4 and one No. 3, of the original Electric Circulator which will be sold at less than one-half price F. O. B. Boston. This is a genuine bargain. We should not make this offer were it not that our stock-rooms must be cleared to make room for the Automatic Type which we are now making exclusively. Don't delay if you want them.

W. W. CASTLE COMPANY,

170 Summer Street, Boston.

SPLENDID PARK GREENHOUSES

AN octagon palm house with curvilinear houses on either side, erected by us at Central Park, Davenport, Iowa, makes a layout both highly ornamental and every way practical,—and a park proposition surely must embody both. Back of the palm house is the work room with bedding plant houses on each side of it. If you would like to look it over, we shall be glad to forward you a photograph.

Our work extends over the entire country. We recently erected an ornamental range of houses at Menlo Park, California, and are now shipping materials for another greenhouse at San Francisco. **WHEN CALIFORNIANS ARE WILLING TO "PAY THE FREIGHT" FROM NEW YORK, IT CERTAINLY LOOKS WELL FOR THE SUPERIORITY OF L. & B.'S CONSTRUCTION.**

If you intend building a greenhouse send for our 72 page Greenhouse Book, or perhaps our Handy Hand Book, which illustrates every part used in a greenhouse, would be of more service to you. We also issue our Two P's catalog, which is filled with useful information.

If you will advise us what you have in mind, we will send whichever catalog best meets your needs.

LORD AND BURNHAM COMPANY

1133 BROADWAY, NEW YORK and Boston and Philadelphia.

We thought the readers of Horticulture would be interested in this startlingly light interior of a U-Bar house, and suggest that you write to PIERSON U-BAR COMPANY, 1 Madison Avenue, New York, for their catalog.

**NEW
ROSE****WHITE KILLARNEY**

We Know You Will Want to Buy White Killarney

Every live, progressive, up-to-date grower who has seen it is buying it; but when you buy White Killarney, be sure you get the right White Killarney (the Waban variety). When you buy from us you get the variety that has been exhibited and certificated, and the one that has attracted such favorable mention.

If you are in the vicinity of New York, we should be glad to have you call and see White Killarney growing at our Scarborough range, and you will say at a glance—as everyone has who has seen it growing—that it is by far the best white rose that has ever been placed on the market.

It is not only a good winter-flowering rose, but is good the entire year, and it is a splendid shipper. Read the following letter received from Mr. Willis N. Rudd, Secretary of the Society of American Florists, dated January 18th, in which he writes as follows:

"Dear Mr. Pierson:—I cannot refrain from writing you and expressing my admiration for the White Killarney as shown at Chicago on Thursday. It is an exquisitely beautiful thing and attracted much attention. I took half the blooms home with me, and they were finer on Saturday than they were at the show. The record is that these blooms were shipped from Tarrytown, staged and exhibited during the afternoon. They were then carefully wrapped up in a box, and remained in that box until one o'clock Friday morning, at which time I reached home; improved in quality up to Saturday, and were in fairly presentable condition on Sunday.

"In addition to being the most beautiful white rose of its class which I have seen, this demonstrates its splendid keeping and shipping qualities.

W. N. RUDD."

We were awarded Silver Cup at National Flower Show, Chicago, for best new rose with White Killarney; also Silver Medal Horticultural Society of New York.

Strong plants, 2 1/4 inch pots, own roots, now ready for delivery, \$30.00 per 100; 250 for \$70.00; 500 for \$125.00; 1000 for \$250.00. Grafted plants, ready April 1st, \$35.00 per 100; 250 for \$82.50; 500 for \$150.00; 1,000 for \$300.00.

Campanula Glomerata

CAMPANULA GLOMERATA DAHURICA

Courtesy Mt. Desert Nurseries

The clustered bellflower, *Campanula glomerata*, is a hardy perennial meriting general attention both by the landscape gardeners and garden owners. Plants produce large, dense clusters of funnel-shaped blossoms in great profusion. The prettiest and for that reason best known variety thereof is *Campanula glomerata dahurica*. This bellflower blooms from June to August, being at its best on Mount Desert Island in Maine by the middle or latter part of June, single stalks reaching a height of about 18 inches. Their terminal, bright violet blue

flowers have proven to be a very desirable material for filling vases. As a garden plant our campanula gives a most effective border in front of taller herbaceous plantations, and has also been used to good advantage in rock gardens. It survives the winters of the northern states well under cover of leaves while south of New York it may require little or no special protection. The clustered bellflowers prefer an open position, thriving best in well matured and cultivated garden soil. Under favorable conditions plants spread out very rapidly and in the course of a few years form a perfect mass of roots, plants and subsequently flowering stalks.

Similar in its habit is *Campanula glomerata alba*, a pure white form possessing the same free-flowering qualities as the former, while the new *Campanula glomerata acaulis* bears its bright blue, densely-set clusters on short stalks. The vivid

green of the leaves of this novelty adds considerably to the beauty of its general appearance. I believe that *Campanula glomerata acaulis* has a just claim for liberal space in American rock gardens.

Richard Rothe

Northeast Harbor, Me.

European Horticulture

THE ROYAL HORTICULTURAL SOCIETY

We may at length rejoice in the fact of winter having left these islands and that all the seasonable operations in gardens, orchards and fields can proceed without hindrance from the elements. As was noted, the Vincent Square Hall forced plants are even now the main stay of the horticulturist, but plants of the open air will soon be making their appearance. On Tuesday, March 23, the hall was filled to overflowing with choice things of the garden. The more striking of these was Messrs. Sutton & Son's grand display of cactus-flowered cineraria; such a lot of plants of this dwarf floriferous strain has never been seen before in this country. They are a great improvement on the leggy, straggling stellata strain, and are a long way ahead of them as decorative plants for the greenhouse, cool conservatory, jardiniere, etc. Among other specialties, a fine lot of rhododendrons, Ascot Brilliant, Pink Pearl and Mirabile, carrying grand trusses and big, beautiful blooms came from Messrs. J. Veitch & Sons. Messrs. Heath and Sons showed a comprehensive collection of the once greatly admired, fragrant-leaved Cape Geraniums, which fashion banished for fifty or more years. Now we are getting them back again, with some additional varieties, thanks to the efforts in hybridizing of the late Dr. E. Bonavia. Messrs. W. Bull & Son seem to be waking up

after playing a Rip Van Winkle part for several years. This firm once famed for the introduction of new orchids and other species of plants, showed some fine hippeastrums.

Carnations were greatly in evidence, and Messrs. W. Cutbush & Son had a new variety in Lady Millar—a cross between Enchantress and the creamy pink Souvenir de la Malmaison. It takes after the latter in build and color, and is a full flower. Lady Nora Brassy is another novelty of the Robert Craig strain, in color royal purple. A singular looking Begonia Saturne, having flowers of a lurid pink tint mounted on very tall stems was an exhibit from Messrs. Cannell. H. B. May who is far-famed for his fern culture showed a beautiful selection of species and varieties, the osmundas being varied and highly ornamental. We observed cristata undulata and purpurascens.

Orchids were fairly abundant. Messrs. Sander & Sons showed *Cypripedium Curtisii* Sander's variety; *Phaius hybridus*, a cross between *P. grandifolius* and *P. Wallichii*; the flower has brown sepals and petals and is of a crimson color in the throat. Messrs. Charlesworth & Co. showed a new *Phaius* F. W. Wigan, a brilliant colored variety having a rich rosy crimson lip and throat.

Keep up
 your advertising

Is it possible for a business to get so strong and its owner so widely known and influential that he can safely discontinue advertising?

Statistics say—No. The brightest and brainiest business men of today who keep their finger constantly on the pulse of modern commercial affairs say—No. They declare that while a competitor exists or there is a chance for a competitor to start, while there are other goods in the same line that have access to the market, it is conclusive that any concern, however successful and popular hitherto, must keep everlastingly at it. Cease to strive and it will not be long before competitors will sprint ahead and then it will soon be in the air that you are becoming a back number. And when that does happen it will cost you more than all you have saved by your ill-advised economy and deluded self-confidence to regain the ground you have lost.

Our cover
 illustration

Cineraria stellata has only in very recent years come to the front in our horticultural exhibitions and then, as a rule, contributed by the private gardeners, the commercial growers apparently pinning their faith on the well-known "hybrids" type with its more conspicuous and highly developed individual blossoms and more compact habit. We think, however, that the stellata section of this useful spring flowering greenhouse annual is worthy of much more general cultivation. Rapid improvement has been made in brilliancy and variety of color, size of flower and symmetry of habit since its first appearance at Horticultural Hall, Boston, about a dozen years ago. Considering the beauty of the plants shown at this year's exhibition of the Massachusetts Horticultural Society we can hardly subscribe to our European correspondent's characterization of *C. stellata* as "leggy and straggly." On this point we think the picture on our cover page, which shows one of the group of plants exhibited by Martin Sullivan, is good evidence of the tidiness of the plant and the fact that the stellata groups almost eclipsed the fancy-flowered varieties in the eye of the visiting public tells the rest of the story. Florists should grow it in quantity not only for pot plant purposes, but for use in cut state for decorative work.

Organizations
 Multiplying

Our news columns this week record the starting of two more societies,—the Tree Doctors', already launched, and the Sweet Pea enthusiasts, about to be. At the present rate of increase we shall before long have a myriad of clubs, societies and associations each working to advance the interests of its particular niche in American horticulture. We are glad to see them breeding. There's plenty of room in the Temple of Fame for all and the sum total of their specialized work must add immeasurably to our horticultural knowledge and influence. There is no department of horticulture and its allied industries that cannot be advanced and strengthened by organized work under unselfish and broad-spirited policies. Any other policy, especially a censorious spirit as regards other organizations, should be carefully guarded against. "In union there is strength" applies to organizations with equal force as to individuals. Mutual respect, mutual toleration and frequent, joint action on matters of mutual interest is the very best sort of preventive against misunderstandings and reprisals. Some day, perhaps, the great opportunity may come and the right man appear, with the adequate qualities of leadership, to make the S. A. F. the acceptable meeting ground for all these diverse yet interwoven interests. Why not?

Gardening
 on natural lines

The "Japanese Garden" which has taken Boston by storm during the past two weeks will, we believe, prove to have been much more than a transient sensation. As an impressive example of the possibilities in gardening it may mark the beginning of a new era, the popularizing of home gardens arranged on lines following the simple beauty of Nature's work and the abandonment of the crude and unnatural arrangements with which the people, for lack of education in better things, have surrounded their homes. It was a revelation to the public and has set them athinking. Its conception and arrangement was a triumph of artistic genius.

More about Formosa Lily

Editor HORTICULTURE:

Dear Sir:—Note concerning Formosa Lily from Charles Lenker in last week's issue much appreciated. I am glad to see these opinions in the trade papers, and this is a means that should be taken more generally in bringing the growers' troubles and successes before the trade. If I have been correctly informed, the lily in question grows wild in Formosa, and is there gathered by natives and shipped to Japan, for repacking or growing on. If I can see clearly, and from reports of local and distant growers, the demand for Formosa bulbs was enormous last year, so much so that some orders were refused, and others cut in two. How then were orders filled if not from these imported wild bulbs? Some growers secured good bulbs as perhaps Mr. Lenker did, giving perfect satisfaction, but what about the many who were sadly disappointed in the product of the Formosa bulbs—one grower of 1500 having fully 50 per cent with but two flowers on, remainder three to five. As to temperature, mine were treated as formerly, when good results were secured, and other bulbs grown in same house with same treatment have prospered amazingly. But Formosa—alas.

My object in writing to HORTICULTURE was for the purpose of drawing the attention of the trade, and incidentally the introducers to facts as they are. The very fact that Mr. Lenker "has seen two lots in two different places," is cumulative evidence that "trash" has been substituted. Is it not time that some measures were adopted for protection against such substitution? However, it's up to the dealers handling the bulb. I must reiterate my first statement, that the Formosa as first grown by me was A 1. and more like them could be very profitably used. To discard the variety would be utter folly. What we do want, however, is good healthy first-class bulbs packed to reach us in good condition.

Rochester, N. Y.

Rubrose H. Chedden

Climbing Roses under Glass

Editor HORTICULTURE:

I would like to know what temperature is best for growing climbing roses. Those I have are Marechal Neil, Lamarque, Gloire de Dijon. I would also like to know if they would do any better if the glass was shaded.

E. G.

The proper temperature at which to grow climbing roses such as Marechal Neil does not differ materially from that required for the ordinary tea roses, that is, while the plants are making the growth from which the flowers are to come later on. It is in the process of ripening the wood and starting up again to get the crop that a little manipulating of the temperature is required. This is done by gradually lowering the temperature and withholding water until the wood assumes a nice firm appearance. Here is really the most important part of the operation, for, without well ripened wood, the flowers will be few and of poor quality. In starting them up after the ripening treat them about the same as a Hybrid Perpetual, beginning with 45 degrees and gradually increasing until the maximum temperature is reached, which should not exceed 60 degrees. If you follow this course successfully you will have "a sight fit for the gods."

Natick, Mass.

Alfred Montgomery

Art in the Garden

From the earliest time of which we have any record the more civilized of mankind has been wont to plant a garden near his dwelling place, and some of the earliest books were on the subject of gardening; but at no period has the love of gardening—in its widest sense—been more general than at the present time which is doubtless evolved from the hereditary inclination for this pursuit in which men and women have indulged throughout all time; and there is probably no more fascinating recreation than the developing of ideals in gardening effects, a pleasurable occupation which can be followed by both rich and poor.

The art of gardening has probably never been at a higher standard of excellence than at the present day, but this is, however, more the case in connection with the growing of individual plants to perfection together with the propagation and growing of plants in general: in these matters the average professional gardener needs little or no instruction. But the word "Art" in the title of this paper is used in a totally different sense.

A CAUSE OF FAILURE

Many of the most successful raisers of plants, who take numerous prizes at fairs, are often wanting in artistic taste, and are apparently unable to lay out and plant a garden in an artistic manner. The many failures which one sees are, in most cases, evidently caused by the fact that the individual responsible did not understand how to apply artistic principles to the designing of the garden rather than to any want of skill in carrying out the details. It is in this connection that we use the term "art," and there is no reason why our gardens should not be examples of the truest and highest art.

Landscape architecture (we use the term in preference to landscape gardening because gardening is more the cultivation of and caring for plants) is unquestionably a fine art, for art is the creation of organized beauty, whether upon canvas, marble or the surface of the earth.

As various degrees of talent exist among artists in oils, water-colors and stone, the same variation in skill is to be found in landscape artists. To excel in either of these branches of art a born and trained artist is required, and although the possession of genius like that of Raphael or Turner is more a question of endowment than training, at the same time a genius requires to study first principles, and every one studying along those lines is capable more or less of increasing his knowledge of and skill in the art he follows.

FIDELITY TO NATURE IS TRUE ART

The dominant object of ornamental gardening should be to beautify home surroundings, and this can only be accomplished by composing into a pleasing picture, lawns, trees, shrubs and other accessories of a garden. But to have anything beautiful and artistic it must be true. The ancient Greeks knew this, hence their success in giving form to beautiful things. A garden should be the home of the highest form of art because it is the home of the natural and living, not artificial and dead, things. True art is always marked by fidelity to nature, and it is the want of naturalness which often causes our gardens to be inartistic.

In this connection we do not overlook the fact that in a few positions what is known as the "architectural" is more appropriate than the "natural" style, but such positions are very rare, and exist only in sufficient numbers to prove the natural to be the more perfect.

Arthur S. S. S.

(To be continued.)

NEWS OF THE CLUBS AND SOCIETIES

CONNECTICUT HORTICULTURAL SOCIETY.

To avoid Fast Day (which is April 9th in this State), our Society's first meeting of the month was held on the 2d instant. Owing to the slight indisposition of President J. F. Huss, the first vice-president, John Gerard, of New Britain, presided. One new member was received; namely, Otto Gubitz, of Hartford. A very interesting and instructive paper was read by Mr. Gerard, giving a vivid description of the plans and operations of some of the great seed houses of Europe, whose names are little known to the public, because of the fact that they never advertise, but whose institution and great activities are well known to the European and even transatlantic seed trade. Mr. Gerard received a vote of thanks from the Society. A small collection of choice gloxinia blooms, contributed by T. B. Brown, of Windsor, was tabled. Messrs. James Chambers and J. A. Weber were appointed to judge the display. Their report was of a commendatory character, and, on their recommendation, a vote of thanks was passed to Mr. Brown. The secretary was instructed to communicate with the proper officials of the New Haven and New London County Horticultural Societies, with a view to the arrangement of a joint one-day's outing, next fall, to Amherst, Mass., especially to see the work of the agricultural college and the experiment station there. Walter L. Goodwin (State senator from this district) and J. A. Weber were appointed a committee to use their endeavors to effect the passage of a bill now before the legislature of this State, appropriating \$9,000 (instead of \$4,500, as heretofore) of the State funds for the aid of incorporated agricultural societies in giving premiums. If the bill be enacted, our society will receive \$200 annually, for this purpose, instead of \$100.

GEORGE W. SMITH,
Secretary.

NEW ENGLAND DAHLIA SOCIETY.

This Society announces its second annual exhibition to be held at Horticultural Hall, Boston, on September 10, 11 and 12, 1909. The schedule which is now out provides for 126 classes of which 16 are special—the others covering the various classes of dahlias and providing for the award of ribbons and diplomas. Copies of the schedule may be obtained from the secretary, Maurice Fuld, 5 Union street, Boston.

AMERICAN CARNATION SOCIETY.

The American Carnation Society members please take notice, that all of the papers, etc., pertaining to the secretary's office have been forwarded to our new secretary, A. F. J. Baur, Indianapolis, Ind.

Dues, registrations and all other matters pertaining to this office should now be addressed to Mr. Baur.

Respectfully yours,

ALBERT M. HERR.

A NEW ORGANIZATION.

On Monday, March 29th, at a meeting held in the offices of the Munson-Whitaker Company, New York, a new organization had its birth which will be known as the Employers' Association of Landscape Foresters and Commercial Entomologists.

The rules adopted by the society are very stringent, and, as indicated by its name, it is exclusively for employers actively engaged in the business and able in every way to qualify in the practice of scientific tree surgery and commercial entomology.

Its objects are to promote good fellowship and individual improvement, and, as a body, to fight the "tree butchers" and fraudulent dopers, who are everywhere mutilating trees and imposing upon the public, and it is hoped that with such an organization much will be done in advancing the interest of the public, through the members and press, in the protection of our beautiful trees from diseases and the destructive work of insect pests by scientific treatment, thus placing the science of tree surgery and commercial entomology on a higher plane.

The following charter members were enrolled: John T. Withers, Jersey City, president; James E. Whitaker, Boston, vice-president; F. A. Bartlett, Stamford, Conn., secretary-treasurer; H. L. Frost, Boston and Chester L. Whitaker, New York, examining committee; Lewis H. Wise, Jersey City, and G. H. Allen, New York.

Another meeting will be held some time in April to complete the organization. A special meeting will be called by the president in the near future to enroll new members. A number of applications have already been received. A convention will be held annually to discuss scientific matters in connection with the profession and to enlighten the public in the care and preservation of our beautiful trees.

After the meeting a banquet was held in the fashionable "barn room" at Mouquins, Sixth avenue. After the genial president had welcomed the guests he introduced Mr. H. L. Frost as Toastmaster, who very ably filled that position. Dr. George E. Stone, Ph. D., botanist and pathologist of the Massachusetts Agricultural College, Amherst, Mass., was the chief speaker of the evening and gave some interesting reviews in connection with his experience in the use of wood preservatives in the treatment of cavities. Addresses were made by Messrs. Leonard Barron, W. E. Maynard and H. L. Jones. George H. Wyckoff and W. B. Pratt gave interesting talks on the value of oils and leads for the destruction of our insect enemies. Mr. Wyckoff's partner, Mr. Rose, John F. Marion and Alex Guttman, all made entertaining remarks and Addison T. Hastings, City Forester and Park Superintendent of Jersey City, outlined the extensive work being done in that city. The floral decorations of the table, generously contributed by Mr. Guttman, were very beautiful.

K.

A PROPOSED SWEET PEA ASSOCIATION.

The following letter which has been widely distributed among sweet pea specialists, is self explanatory:

April 3rd, 1909.

Dear Sir—Acquiescing in the desire to start a National Sweet Pea Association, on the lines of other kindred societies, I write to ask you for your support in an effort to stimulate a general acceptance of the idea, and to give impetus to the good seed that has fallen, so that it may bring forth a hundred fold and blossom into a live and useful organization.

The Sweet Pea is the poor man's Orchid, easy of culture and loved by all, is becoming more popular every year and can be seen in flower practically all the year round, thus taking the so called Christmas varieties.

President Harry Turner of the New York Florists' Club, will lend his influence to the project, inasmuch that the June meeting (with the consent of the club) will be set aside for a Sweet Pea exhibition; on this date, June 14th, it is proposed to organize the National Sweet Pea Association and to arrange a program for future action.

The exhibition will be a modest first effort. W. Allee Burpee writes that "he would be pleased indeed to offer a cup and contribute towards the expenses of establishing such a society." Arthur T. Boddington also promises a cup and any necessary contribution.

Won't you help the cause along either by your good wishes and moral support or other manifestations of good will and interest? It is going to be a success—it must be a success. Awaiting your kind reply,

Truly yours,

HARRY A. BUNYARD,

Secretary pro tem.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Registration of Begonia.

Public notice is hereby given that J. A. Peterson, of Westwood, Cincinnati Ohio, offers for registration the plant described below. Any person objecting to the registration of this plant or to the use of the proposed name is requested to communicate with the undersigned at once. Failing to receive objection to the registration the same will be made three weeks from this date.

Name President Taft.—Description—A sport from Begonia "Agatha"; it originated in our greenhouse about 2 years ago. In growth it is much stronger and sturdier than Agatha or Gloire de Lorraine, to which class it belongs. In color a beautiful shade of soft rosy-pink, deeper and richer than Agatha or Gloire de Lorraine. The flowers more than cover a silver dollar. It is a free and continuous bloomer from November to April. Height about 15 to 18 inches. Foliage large, shining, dark green.

W. N. RUDD,

Secretary.

Date—April 2, 1909.

CLOSING EVENTS OF THE BOSTON SPRING EXHIBITION.

The spring exhibition at Horticultural Hall, Boston, closed on Sunday night, April 3, after a phenomenal run of 11 days. The door receipts amounted to nearly \$7,000, and the treasury of the Massachusetts Horticultural Society will be enriched by fully \$5,000. On Saturday fully 2,000 school children attended the show on special invitation. Extra prizes for new exhibits were bestowed on S. J. Goddard for carnations, R. D. Kimball, Edw. MacMulkin, Miss S. B. Fay, Thomas Roland, John Barr, Mrs. E. M. Gill, Harvard Botanic Garden and others. Wm. Sim got a silver medal for sweet peas and two certificates of merit for violets and James F. M. Farquhar had conferred upon him the unusual honor of a special diploma for distinguished service in the artistic landscape skill shown in the construction and arrangement of the Japanese Garden, which was so important a factor in the success of the exhibition. This is the second instance of the bestowal of such an award during the eighty years of existence of the society, the only other similar award having been made to the late Marshall P. Wilder many years ago.

FLORIST CLUB OF PHILADELPHIA.

The monthly meeting of this club, held on the 6th inst., was rather slimly attended, most of the members being busy with Easter work. John Westcott gave an interesting talk on his recent trip to the Isle of Pines. For a winter resort, Mr. Westcott thinks the island par excellence, and has serious thoughts of making it an auxiliary to Barnegat Bay. William P. Craig threw rather a damper on the subject from a business standpoint, and was corroborated by Messrs. Graef and Coleman who had spent eight days with him on the island investigating. The mosquitoes are fierce, the jiggers ferocious and the heat and drouth very trying. Transportation poor and expensive. No harbors and no deep water. The gentlemen mentioned stated that they were glad they had made the trip, glad they went and still gladder to get away again. Robert Craig's real estate speculation at this Caribbean paradise is accordingly knocked on the head.

CHICAGO FLORISTS' CLUB.

The regular monthly meeting of the Chicago Florists' Club was held at the Union restaurant, April 1st.

Ten new members were accepted. Considerable time was taken up with a discussion of the by-laws and copies of the proposed changes will be printed and circulated at the next meeting. Andrew Benson, rose grower for Bassett & Washburn gave a talk on the rose show in Buffalo. Four new names were proposed for membership.

Wm. G. Badgley is to lecture on the Rose before the Morris Co. Gardeners' and Florists' Society on April 14. "Rose Night" is a big night with this club. Usually quite a number of novelties are shown. The club is making efforts to get as many as possible this year. Madison and Chatham are expected to do their part in standard varieties.

PERPETUAL FLOWERING CARNATION SOCIETY.

The cultivation of the winter flowering carnation is extending in Great Britain rapidly, especially in the south; and nothing fosters it more than the fine displays to be observed at the exhibitions of the Perpetual Flowering Carnation Society and those of the R. H. S. The much older tree carnations still find cultivators among the craft, but their heyday is over, for, although the colors of the blooms are in many instances admirable, and the forms good, the plants are as a whole lacking in vigor, length of flower stems, and size of the blooms. And gardeners prefer the new strains with their larger blooms, fine distinct colors, great vigor of growth, and the florists prefer them as general decorative material. We are still inclined to value the non-seriated blooms of the carnation of all sections and endeavors are being put forth to impart this smoothness to the new varieties, and doubtless will result in the desired end being attained; and we shall then have the looked for perfection of form, together with large size of bloom and the glorious tints now getting so common on the American and English strains. The show held on March 24 at R. H. S. Hall was of great extent and largely consisted of amateurs' contributions; the trade contributed also to some extent and had held over their exhibits from the Royal Horticultural Society's meeting on the previous day, thus adding to the interest of the show. The blooms were of higher quality than at any previous show.

The American Carnation Society offered a challenge cup for three vases containing new varieties put into commerce by Americans in 1906, and two following years. Messrs. Bell & Sheldon, carnation specialists of Guernsey, were awarded this cup for the varieties Afterglow, Aristocrat and Winsor; 2nd, Mr. A. F. Dutton, who showed Winsor, Afterglow and Victory. Mr. C. Engel was 3rd.

For a group of not fewer than twelve varieties shown on a table 10 feet by 3 feet, and any kind of foliage allowed for a decorative purpose, only one exhibitor appeared—Mr. Hayward Mathias. This group consisted of Gladways—a dark crimson bloom, smooth petalled, and of the perfection of form; excellent blooms were observed of Winsor, Britannia, Mrs. Lawson, Mrs. H. Burnett, White Perfection, White Lawson, Enchantress, Robert Craig, etc. The exhibitor was awarded the 1st prize.

In the color classes the best 36 blooms, white, W. H. Lancashire was 1st; and in the 18 blooms class, white, Bell & Sheldon took the 1st prize with Lady Bountiful. In the blush class, W. H. Lancashire was 1st with Enchantress; in the larger class, that for 36 blooms, Bell & Sheldon took the 1st prize in the class for light pink, salmon, or rose colored varieties, with Winsor in the 36 blooms class; and Mr. Dutton was the winner in the 18 blooms class with Rose White Enchantress. For 36 blooms, deep pink, W. H. Lancashire was 1st for grand blooms of Mrs. T. W. Lawson, and Bell & Sheldon for the best 18 blooms, with Afterglow. C. Engelmann took 1st for Carola, a bloom of a deep crimson tint of good

substance in the petals, which are serrated; Bell & Sheldon were the 1st in the class for 18 blooms of the same color, with President. The best in the larger class for scarlet blooms was Victory, shown by the Newport Carnation Nursery, and the best 18 blooms of the same color were shown by Bell & Sheldon, viz., Britannia. In the class for 18 blooms of any other, Jessica, shown by the Newport Carnation Nursery, was 1st; and Mr. C. Engelmann, 1st, was the exhibitor of 12 blooms of any variety not yet sent out with Carola.

There were some "decorative classes" in which bouquets, vases of varieties, baskets of market carnations, ladies' sprays and button-hole bouquets, entered for prizes.

The trade exhibits consisted of groups of cut blooms and Mr. H. Burnett was the recipient of a gold medal for an excellent group of the finest varieties. A silver gilt medal was awarded to Messrs. Hugh Low & Co., for a capital and lavish exhibit arranged in a sort of temple. In this display Black Chief was noted—a flower in color and shape like the old Clove carnation, and very free flowering. C. Engelmann received a gold medal for a big display. No awards were made to any new carnations.

The show was an undoubted success, and the attendance of the public particularly gratifying to the promoters.

FREDERICK MOORE.

CLUB AND SOCIETY NOTES.

The contract for erecting the new building for the New Hampshire Horticultural Society at Dover, has been awarded to the Central Building Co., of Worcester, Mass.

The annual meeting of the Albany Florist Club was held April 1st and largely attended. Two new members were admitted. The coming floral show was discussed. The next meeting will be held May 6 at the store of W. C. King.

The Gardeners' and Florists' Club of Baltimore were favored with a talk by Richard Vincent, Jr., at their meeting on March 22, and a superb exhibit of geraniums from his extensive stock at White Marsh including over 150 varieties. Ulrich Brunner roses were exhibited by M. Hannigan.

MOVEMENTS OF GARDENERS.

Sabine Botton succeeds Robert Marshall as gardener at Peter B. Bradley's, Hingham, Mass.

John Fraser is reported to have resigned his position as gardener to Philip Kearney, Columbia Road, Morristown, N. Y.

Robert Marshall has left Brailley Hill, Hingham, Mass., and has taken charge of the J. R. de Lamar estate at Glen Cove, N. Y.

Roland H. Messenger has resigned his position at the Bradley greenhouses, Brattleboro, Vt., and taken a position with C. W. Dunham.

Wm. H. Thomas, for the past twelve years gardener to F. C. Blanchard, Convent, N. J., has given up his situation. Mr. Blanchard does not expect to keep up the place this year, but will rent it if possible. Mr. Thomas was the first secretary of the Morris County Gardeners' and Florists' Society.

During Recess

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

Saturday, April 3, was "Field Day" and a good number of the members of the club took advantage of the secretary's invitation and enjoyed the trip to Waverley, to get a glimpse of the Easter stock. The greenhouses of the W. W. Edgar Company were first visited and Mrs. Edgar with Mr. Bartsch, the foreman, was present to extend a cordial welcome to the visitors. After an inspection of the contents of the houses a light lunch was partaken of and President Downs made brief appreciative remarks, calling for three cheers for Mrs. Edgar, which were promptly given. Wm. J. Stewart and M. H. Norton were called upon as old friends of the late Mr. Edgar and each responded expressing pleasure at seeing the stock in such creditable shape for the Easter demand. All were favorably impressed, particularly with the lilies and azaleas, of which there was a great display. Especially suggestive as a good use of extra space was the row of tomatoes trained against the back side of the large plant houses and also on the supports of the roof. They carried a heavy crop of fruit rapidly ripening and indicated a very profitable result.

The next place visited was the Edgar Brothers' two big houses nearby. These houses, one 30x200, the other 40x200, are planted exclusively to sweet peas, with young stocks for Decoration Day blooming, between the rows. The peas were planted late hence have not yet reached the height of the crop but it is believed by the Messrs. Edgar that they will acceptably fill the gap between the winter market crop, which will soon be on the wane, and the summer supply from outside.

Next and last Peirce Brothers' big range on the road to Waltham was visited and as usual, much was in sight to interest and instruct. Peirce Bros. started with 75,000 bulbs, *Formosa Giganteum* and *Multiflorum*. The *Formosa*s are all gone now. The

ORCHIDS Cattleya Mossiae

has arrived in first-class condition. We sell our plants at our store, 41 West 28th St., New York. Our PRICES are LOW and our STOCK is FIRST-CLASS. Write us for particulars and prices and by so doing you will be sure of the facts.

G. L. FREEMAN, 388 Appleton St., Holyoke, Mass.

stock look very fine and the loss from unsound bulbs has been less than usual. Spireas, azaleas, carnations, etc., are all grown, as everything has always been, in Peirce Bros.' in enormous quantity and the electric vats will get no rest for this week.

CHICAGO FLORISTS' CLUB.

The Chicago Florists' Club gave a Ladies' Night, April 2, at the Grand Pacific Hotel. A very enjoyable evening was spent and the attendance was good. It was pronounced by all to be a success. Similar occasions are planned to occur in the near future. Mrs. Geo. Asmus, Miss Ludwig and Mrs. Leonard Kill carried off the ladies' prizes in the games, while Messrs. Johnson, Kruchten and Scott won the honors for the gentlemen. Refreshments were served.

On the same evening occurred the regular meeting of the Florists' Bowling Club. Though at a busy time the attendance was larger than before and the members are enthusiastic over the outlook.

In the handicap game that evening E. Johnson of Randall's, won 1st, August Barnett of Hunt's, 2nd, Wm. Graff of Friedman's, 3rd.

BOWLING RECORDS.

Astoria and Flatbush, N. Y., met on the bowling alleys at Astoria to contest for supremacy, under the double inspiration of old rivalries and a watch and silver cup put up as prizes by Phil Kessler. Astoria won the whole outfit. Scores in the two scrimmages were as follows:

Astoria		Flatbush	
Miesem,	129	123 Zeller,	93
Goodson,	129	121 Schmutz,	133
Schickel, W.	115	100 Duff'z,	P.

A Profitable Side Crop

Asparagus plumosus is a main crop with many growers having extensive modern plants but those with less up-to-date establishments, or parts of same defective in lighting or otherwise unsuitable for high grade crops,—will find this subject one of the very best. We have prepared a cultural circular giving concise directions how to make money out of this crop. Send for it. No charge. An important feature in asparagus culture is good seed. The P. M. quality of greenhouse grown seed has earned a high reputation for freshness and purity. It is the true nanus and greenhouse grown. Send for trial pkg., 100 seeds fifty cents, if you wish to experiment only. In quantity \$3.75 per 1000 seeds, \$32.50 per 10,000 seeds. *Asparagus Sprengeri* 75c. per 1000, \$5.00 per 10,000 seeds.

The New York Florists' Bowling Club will bowl at Thum's Alleys, on Monday afternoon, April 12, instead of Monday evening as the regular meeting of the Florists' Club takes place on that evening.

A NEW NURSERY CONCERN.

The Lowell M. Palmer estate at Stamford, Conn., has been sold to the Fernwood Nursery. The Fernwood Nursery has recently been incorporated, with the following officers: B. J. Ezechel, president; J. J. Davidson, vice-president; L. G. Bernheimer, secretary and treasurer, New York office 53 West 30th street. The president of the company, B. J. Ezechel, is well known for many years among the florist trade of New York. Sam A. Woodrow, recently engaged in the wholesale plant business at 53 W. 30th street, has been engaged as traveling salesman.

The L. M. Palmer estate, for many years under the supervision of that expert plantsman, A. Hans, is far famed for the splendid collection of hardy conifers, rhododendrons and ferns gathered together and raised by Mr. Hans. The estate consists of about eighty acres.

PERSONAL.

Visitors in Toledo—Robert Rahaley and Alb. Pochelon of Detroit, Mich.

Chicago visitors: A. T. Pyfer, Joliet, Ill.; Alex. Siegel, St. Louis, Mo.

H. R. Hughes, Chicago, is convalescent, following a severe attack of La Grippe with heart complications.

Visitors in Albany: Harry Meyer of Louis Meyer & Bro., New York; Fred M. Simon, agent for Wolf & Co., Philadelphia.

Miss Ethel Merrill of Portland is in charge of the new flower store opened at Westbrook, Me., recently by N. W. Hannaford.

R. LeRoy Laughlin has taken charge of the business of the Laughlin Seed Co., at Kenton, O., which includes their eastern agency.

Wm. McM. Brown, who has contributed some interesting cultural articles for HORTICULTURE during the past year, has resigned his position.

tion with W. N. Craig on the Ames estate, North Easton, Mass., and started on April 9 for the Pacific coast, with a view to possibly locating there.

Willard Asmus, ten-year-old son of George Asmus of the Schiller Co., Chicago, is recovering from an attack of incipient appendicitis.

Visitors in Boston—E. J. Harmon, Portland Me., John Wilson, Burlington, Vt., Prof. E. A. White, Amherst, Mass., D. F. Roy, Marion, Mass.

Arthur Smith has resigned his position with Peter Smith & Sons, Detroit, Mich., and will start in business as a landscape architect at Spokane, Wash.

W. Desmond, formerly with the L. S. Donaldson Co., Minneapolis, has gone into partnership with T. Souden. Their store is located on Hennepin avenue, where they occupy a very prominent corner and make a fine window display. Charles Snell, formerly of New York and later of Chicago, is the successor of W. Desmond at L. S. Donaldson's.

HENRY F. MICHELL CO., 1018 Market Street, PHILADELPHIA

PHILADELPHIA NOTES.

Clasius Davis, gardener for the late William P. Henzey, the millionaire locomotive builder, has been left a bequest of five thousand dollars in the will of the deceased. Mr. Davis has been a faithful employee for many years and Mr. Henzey did credit to himself in recognizing efficiency and loyalty. But why don't our millionaires go further and leave some of their surplus to the Horticultural Society? The wise ones around Boston did that, fifty years ago, and look where horticulture is there today!

A campaign of education in this direction is a crying need. There are oceans of money around Philadelphia, and all it needs to get a good big endowment fund for our Horticultural Society is to bring its merits and possibilities forcibly before our leading citizens while they are alive. William Schaeffer (all honor to his memory) gave us our hall but nothing to run it with. What's the matter with the rest of our wealthy men? There is grave

danger at this juncture that we may lose the hall, even. Things are at a crisis.

Personally I think now is the time to call a big meeting of everybody interested to devise ways and means for saving the hall and getting an endowment fund sufficient to make the hall effective. It would be a shame and a disgrace to let things go by the board when we have a three-quarter million property in our grasp with only a bonded debt of two hundred thousand against it.

Where is Bupee, where is Dreer, where is Buist, where is Landreth, where is Meehan, where are all the other old names that have helped to make Philadelphia horticulture famous. Don't any of them want to turn a hand to save that beautiful building which Frank Miles Day designed and which is recognized everywhere as a model of its kind and the crowning monument for all time of its founder, William L. Schaeffer? It is unbelievable that they can be so indifferent.

What is wanted is not their money but their influence and push. If they will put their shoulders to the wheel and interest their millionaire friends, things will soon be put on a solid financial foundation and be kept there.

Howard M. Earl, manager for W. A. Bupee & Co., for the first time in twenty years was laid flat on his back with a severe sick spell, last week of March, the result of overwork and fierce weather. He is about again much to his own joy and that of all concerned. Reported to be a bad patient. Probably lack of practice.

P. Joseph Lynch of the Dingee & Conard Co., West Grove, has just returned from a sojourn at Charlotte, N. C., where he has been superintending the planting of outdoor roses for his firm. The climate and other features at this point have been found to be particularly favorable for this class of stock.

GREENHOUSES BUILDING OR CONTEMPLATED.

Tipton, Ind.—C. King, one house.

The largest and finest stock of this grand Easter plant that we have ever grown at \$5, \$6, \$9 and \$12 per doz. Larger plants at \$1.50, \$2, \$2.50, \$3, \$4 and \$5 each.

RHODODENDRONS
Staple, well-budded plants, including all the best varieties at \$1.50, \$2, \$2.50, \$3, \$3.50 and \$4 each. A few larger plants at \$5 each.

RHODODENDRON PINK PEARL (New)
The most beautiful of all the Rhododendrons at \$2.50, \$3 and \$3.50 each.

BOUGAINVILLEA GLABRA SANDERIANA
Magnificent plants, exceptionally well flowered at \$3.50, \$4, \$5, \$6, \$7.50 and \$10 each.

LILACS
Very fine plants, 6-inch to 8-inch pots at \$2, \$2.50 and \$3 each.

GENISTAS
A grand stock, grown cool and just right for Easter at \$2, \$3, \$4, \$5, \$6 and \$9 per doz. Larger plants at \$2, \$2.50, \$3, \$4, \$5 and \$6 each.

SPIREA GLADSTONE
Our stock is in superb condition. 6-inch pots at \$5.50 each; 7-inch pots at \$7.50 each; 8-inch pots, made up, at \$1 each; 9 and 10-inch pots, made up, at \$1.50 and \$2 each.

PINK SPIREA
Queen Alexandra, very beautiful. 6-inch pots at \$9 per doz.

DOUBLE DAISY, Queen Alexandra
Well grown and well flowered. 3-inch pots at \$1.50 per doz.; 4-inch pots at \$2.50 per doz.; 5-inch pots at \$4 per doz. 6-inch pots, very fine, at \$6, \$9 and \$12 per doz.

LILIES
Our stock is exceptionally good this year. Plants with from 4 to 8 blooms at 12 cents per bloom; made-up plants with from 12 to 25 blooms at 12 cents per bloom; plants with less than 4 blooms at 15 cents per bloom.

AZALEAS
We have the largest and finest stock of Azaleas we have ever had, including Vander Cruysea, Vervaeckera, Emp. of India, Emp. of Brazil, Niobe, Bernard Andrea Alba, Prof. Wolters, etc., etc., at \$7.50, \$8, \$1.25, \$1.50, \$2, \$2.50, \$3, \$3.50, \$4, \$5, \$6, \$7.50 and \$10 each. A few larger specimen plants at \$12.50 and \$15 each. Pyramid Azaleas, very fine, at \$3, \$3.50 and \$4 each. Small Azaleas for Basket Work at \$3 and \$4 per doz.

CRIMSON RAMBLER ROSES
These plants are unusually fine and will be just right for Easter.

6-inch and 7-inch pots at \$1, \$1.25 and \$1.50 each; 8-inch pots at \$2 and \$2.50 each; plants trained in fan and globular shapes, extra fine, at \$2, \$2.50, \$3, \$3.50, \$4, \$5 and \$6 each; a few larger plants at \$7.50 each.

PINK RAMBLER ROSES
Lady Gay and Dorothy Perkins
In great condition; trained into Fan, Globular and Pyramid Shapes at \$1.25, \$1.50, \$2, \$2.50, \$3, \$3.50 and \$4 each. Special Bell Shapes at \$1.50, \$2 and \$2.50 each. Special Wire Fan Shapes at \$3 each.

TAUSENDSCHON (New) "Thousand Beauties"
This was our finest climber last Easter and this year the plants are still better. We cannot recommend the Tausendschon Rambler too highly. Strong plants in 6-inch and 7-inch pots at \$1, \$1.25 and \$1.50 each. Trained plants, Fan, Globular and Pyramid Shapes, at \$2, \$2.50, \$3, \$3.50, \$4 and \$5 each.

BDARDS
Exceptionally fine plants, 3 to 5 foot stems, at \$1, \$1.25, \$1.50, \$2 and \$2.50 each.

WHITE BABY RAMBLER STANDARDS
At \$1, \$1.25 and \$1.50 each
STANDARD DOUBLE-BUDDED WHITE AND RED BABY RAMBLER ON SAME PLANT
At \$1.50 each

BABY RAMBLERS
Good, strong stock, well flowered, at \$3, \$6 and \$9 per doz.

WHITE BABY RAMBLERS
Very strong plants, well flowered, 6-inch pots, at \$6 per doz.

Obituary.

William Hagemann.

This well known importer died on Saturday, April 3, at his residence in Bloomfield, N. J., aged 51 years. Mr. Hagemann had been sick but two days but the attack which proved fatal was one of the series extending back for several months and, in fact, he has been in failing health for two years or more. The funeral was held on Wednesday, April 7.

Mr. Hagemann was deservedly popular with the florist trade of this country, among whom he was widely known, his specialty being lilies, lily of the valley, etc. Previous to his coming to New York he had been en-

gaged in the same business with headquarters in Philadelphia. He was an exceedingly shrewd and far-seeing business man, a genius in his line and with his magnetic personality and tact succeeded in business ventures that would have staggered men of ordinary calibre. Among his competitors in trade Mr. Hagemann was always regarded with the greatest respect and the regret at his demise is deep and sincere among all those with whom he came in contact.

His son-in-law, Paul Kaese, who had been in business with him for a number of years, had left for Hamburg one week previous to Mr. Hagemann's death, to start in business there but he has now been recalled.

Horace C. Smith.

Horace C. Smith, 73, connected for many years with florist establishments and market gardening interests, died on April 2, at his home in Springfield, Mass. He located in Springfield in 1878, and for eight years was foreman of N. J. Herrick's greenhouses, now owned by Mark Aitken.

William H. Derby.

William H. Derby, one of the oldest residents of Revere, Mass., and also one of the best known market gardeners, died on March 31. He leaves one son. He was for many years chairman of the committee on annual appropriations by the town.

J. B. Boland.

J. B. Boland of San Francisco, Cal., died on March 24 at the age of 52. Mr. Boland was a member of the firm of Boland & Sievers at one time and later conducted an independent business. At the time of his death he was located in Kearny street.

Charles Reed.

Charles Reed, one of the pioneer florists of Orange, N. J., died on March 30 at the age of 87. Mr. Reed was a native of Brighton, England, and came to

America in 1860. He is survived by a widow, three sons and a daughter.

The death of Henry Eberhardt, florist, of Catonsville, Md., is announced.

Watson S. Woodruff, Orange, Conn., Pres.; J. C. Robinson, Waterloo, Neb., First Vice-Pres.; C. E. Kendeel, Cleveland, O., Sec'y and Treas. Twenty-seventh annual convention June 2-24, 1909, at Clifton House, Niagara Falls, Ont.

WHOLESALE SEEDSMEN'S LEAGUE.

F. W. Bruggerhof, Pres.; Burnet Landreth, Sec'y.

THE FREE SEED DISTRIBUTION.

In Seed Trade Notes of March 27th, it was stated that the free seed distribution for 1909-'10 was to be increased from 36,000,000 to 60,000,000 packets. An error was made in the number of packets in the 1908 distribution, as the actual number was slightly under 29,000,000. This of course, is not important excepting for purposes of comparison. Just what bearing this immense number of packets or rather weight, will have on the annual deficit of the Post Office Department may be surmised by the statement that if paid for at regular rates it would mean a difference of approximately \$250,000, but this does not cover the entire cost and exact figures cannot be given.

It may or may not be generally known that after the regular bids for the 1909-'10 distribution were disposed of and contracts awarded, a supplementary contract in the shape of a lump sum approximately \$60,000 was awarded to one of the California growers. Many of the items included in this contract are not produced in California, and the successful bidder will have to procure them from other growers in this country and Europe. Only a limited number were asked to bid on this contract, and the winner is said to have made an extraordinarily low bid, many thousands of dollars below the next lowest bidder. Those who are acquainted with all of the facts think the successful bidder will have some difficulty in masticating the mouthful he has bitten off. But more of this anon.

AD VALOREM VERSUS SPECIFIC DUTIES.

The efforts of the seedsmen to get a specific duty on seeds, seems in a fair way to be realized despite the attempts of an assistant appraiser to prevent it. This official, who is a thorough seedsmen and, up to two years ago when he received his appointment, identified with the trade, not content with remaining neutral, has seen fit to butt into this tariff matter and proffer advice to the Ways and Means Committee of the House in opposition to the aims of the seedsmen. He is a very valiant defender of the government, and seems to fear that poor old simple Uncle Sam will become the victim of the designing seed dealer.

The fact that the tariff is so framed that the government cannot get the worst of it unless by deliberate fraud, seems to have escaped the notice of our zealous friend. If the market value of the goods a dealer imports advances after his purchase is made, he

must pay duty on the advance and possibly he penalized in addition, but no allowance is ever made for a decline below the purchase price. Paying duty on the market value is all well enough, but it should be the market price at time of entry whether higher or lower than the purchase price. Under the present system of levying duties no importer can tell what his goods are going to cost, and as most wholesale seedsmen sell the larger part of their imports in advance of the receipt of the goods, they are compelled to base their selling price on the purchase price, and any advance above the latter means more paid in duties which means a reduction in profit, sometimes to the vanishing point. This is why the specific duty is desired, as the dealer can always know what his goods are going to cost him, and there is no good reason why the tariff on seeds cannot be so framed. To illustrate this works out in actual practice, one of the heaviest importers purchased abroad 50,000 lbs. of turnip seed to cost laid down about 12c. On this basis the firm sold 10,000 lbs. at an advance of 5c. per lb. Now, supposing they had been compelled to pay duty on a valuation of 15c. or 20c. per lb., what would have become of their profit? If a specific duty of 4c. per lb. were levied on the seed they would know exactly what it was going to cost, and all anxiety and uncertainty would be removed. Such a duty would be slightly in excess of the present 30 per cent. ad valorem, and over a period of years would be perfectly just to the government. The fact that the man who buys his goods on the market after harvest has to pay more is no sound argument against this proposition.

IMPORTANT ACTION BY THE WHOLESALE SEEDSMEN'S LEAGUE.

Bristol, Pennsylvania, April 3, 1909.

At a meeting of the Board of Directors of the Wholesale Seedsmen's League in New York City, April 1st, the following motions were offered and passed, and on the next day mailed to the President of the United States and the Secretary of Agriculture.

BURNET LANDRETH,
Secretary Wholesale Seedsmen's
League.

Resolved, That the Board of Directors of the Wholesale Seedsmen's League deplore the constantly increasing tendency to swell the amount expended by the United States Department of Agriculture for the purpose of purchase and distribution of common varieties of garden seeds.

The Board respectfully suggests to the President of the United States and the Secretary of Agriculture that a considerable saving or retrenchment in the expenses of the Government could be made by the abolishment of such appropriation without in any way impairing the effectiveness of the Department of Agriculture; and that a further considerable saving to the Government could be effected by relieving the Post Office Department of the expenses incurred in the carrying and distribution of the enormous quantity of franked seeds sent out by the Department of Agriculture. The Board is of the opinion that the free distribution of common varieties of garden seeds and field seeds is of no practical value to the farmers and gardeners of this country, but, to the contrary, is a downright injustice and restraint of trade inflicted upon the seed business.

The Board believes that a continuance of this practice certainly does not tend towards the best development of the na-

tion, as it encourages a dependence upon the Government, which is entirely foreign to the feelings and patriotism of the American people.

Resolved, That while the Wholesale Seedsmen's League as an organization, and its members individually, raise no objection whatever to the fair testing of seeds of grasses, clovers, and other farm seeds, for the purpose of determining if they are adulterated or misbranded, the Association and its members do object to the methods of the agents of the Department of Agriculture of the United States in obtaining such samples for test, as being unfair to the seed merchants and growers, in that the merchants and growers have no knowledge that the samples so reported upon actually came from them.

It seems to the Seedsmen's League but fair that the agent obtaining the samples should leave the merchant or grower a portion of that identical sample under Governmental seal, as provided in the case of testing milk, fertilizers, etc., under the laws of the State of New York and other States.

NOTES.

Hallonell, Me.—Manager Jerrow, of the Elm Brook Farm, has opened a seed store.

Counter trade is still unsatisfactory owing almost entirely to cold, backward weather. Fears are expressed that if the weather does not soon turn warm it will be too late to recover lost ground.

Of Interest to Retail Florists

DETROIT

Business is very good and everybody feels buoyant over the outlook for this coming the most important week in the florist business. The growers have plenty of stock in very good condition indeed wherein the retailer sees his opportunity to give good satisfaction to his customers. Now is the chance for the wholesaler and retailer to compare notes. Consider the work it entails to deliver say 1000 carnations and 200 pots of lilies to the retailers' store. It is not small indeed. But how many boxes and pot covers, not to speak of wrapping paper will the retailer need to pack this number of flowers and plants and how many deliveries will he have to make?

on professors, literary men and jour-
nalists who have contributed to the
instruction of the public.

Clinton, Mass.—A. W. Schneider has
been appointed superintendent of Cen-
tral park, and M. F. O'Malley superin-
tendent of Franklin park. Wm. Mc-
Gowan takes the position of superin-
tendent of moth extermination.

Golden City, Utah.—It is stated that
W. T. Stillwell has resigned his posi-
tion on the Park Commission and B.
Van der Schuit, gardener at the
Deaf and Blind School, will succeed
him.

Mr. F. G. Crane is having erected
on his estate at Dalton, Mass., a large
range of greenhouses. Also a very up-
to-date gardener's cottage. John R.
Shield, who has been with the Crane
family for a number of years, will
have charge of this place.

Boston.—Having gone to Messina
with Edmund Billings, to assist in the
distribution of the Massachusetts re-
lief fund, Philip L. Carbone, the Boyl-
ston street florist, who returned March
31, on the Ivernia, found an uncle,
aunt and cousin had been buried in the
ruins of the stricken city. He assisted
in the recovery of their bodies.

Mr. Carbone has been abroad for
about three months in the relief work,
and to a Boston Journal reporter, who
was the first to shake hands with him
at quarantine, he declared that many
American women—some of them tour-
ists, and others trained nurses—were
among the real heroines of the fearful
disaster, though little has been cabled
to this country of their work.

Flower Market Reports.

BOSTON

On the eve of the great spring festival of flowers we can see nothing to prevent its being the most satisfactory Easter ever enjoyed by the florists of Boston and New England. The demand from far and near which the wholesale markets have experienced all through the week has far exceeded the record to date and is recognized as a good pointer as to what may be expected at the finish. Lilies are practically all sold, four days before Easter and the predicted scarcity seems inevitable. They are of varying quality but the full price will undoubtedly be realized for the low grade stock which those who wait until the last minute will be forced to take. In all other flowers quality is all that could be asked. Carnations are very fine but in light supply as compared with the call; this applies especially to the whites. Roses are very abundant and good. Violets have received a knock-out blow in the hot days of this week—the warmest on record for April—and the prospects for the single violet are very gloomy. The double ones will profit by the situation. All bulbous stock is over plentiful, including lily of the valley which is in very light demand. There is a distinct activity in the line of fancy and specialty flowers such as orchids, gardenias, yellow daisies, etc., which it will not be possible for the market to meet. Smilax is getting scarce. The plant growers are completely sold out on everything worth having, in the flowering plant line.

CHICAGO

At this writing the Easter outlook is very good and even with the doubtful condition of the weather which is warm and cloudy, most florists feel reasonably sure that the unusually brisk Lenten trade will close with a lively Easter. It the weather continues very warm it will hurry stock but this will be an advantage in carnations, for the supply not over plentiful all winter, is decidedly short now. This is especially true in white, so many being used for confirmation and other church services. Violets can scarcely be counted upon and the demand for sweet peas has increased accordingly. Good mignonette is decidedly scarce and the buyers having made up their minds to do without it, it sells slowly. Really fine lilies are seen in abundance at the beginning of the week and they are selling as high as 15c. per bud and bloom in some cases, but the opinion is prevalent that before the week is out first-class lilies will be scarce. Roses were very plentiful during the past week. Trad started out brisk early in the week, but on Wednesday and Thursday buyers were scarce and stock accumulated; but by the last of the week all was worked off and trade was normal again. That roses will be much more in evidence than carnations at Easter is certain, but it is not expected that roses will fall below a fair price for the season. Plant trade has been very heavy and everything is sold out close.

There has been a fair amount of business doing for the season the past week. The supply

and demand seem to be more equally balanced this Lenten season than for a long time as there has been no semblance of a glut and the near approach of the great demand practically removes all likelihood of trouble in this respect. Stock in general, both cut flowers and plants, has rarely if ever been seen in better condition. American Beauty roses have at last become visible and prices have receded considerably. All other roses of extra quality move well at fair prices. Carnations are plentiful and cheap. Snapdragon of fine quality is seen and much called for by particular houses who are glad of a change. Sweet peas have a good calf; the quality was never better. Lilies and smilax appear to be very scarce around this vicinity. The Easter outlook is very promising in most lines although there does not seem to be as much stock in sight as other years.

Flowers of all PHILADELPHIA kinds were very abundant last week and trading rather sluggish as was to be expected. Prices generally ruled low. American Beauty roses improved in quality, and cleaned up better than the general run of stock. Richmonds are keeping up their improved tone, both as to quality and quantity. Bride and Bridesmaid are altogether too plentiful—especially the former. Mrs. Jardine and Killarney were never better, and are among the most satisfactory items on the market. The carnation crop seems to have slackened up very considerably. There is little demand for violets and very few coming in. Cattleya Schroderae continues the leader in the orchid market. The few other kinds coming in

are not in sufficient quantity to cut any figure. Sweet peas are improving in quality and a little later will be in fine shape. The growers of these aim to have a good crop coming in for April and May weddings. Indications point to unusual quality and abundance this year. We have seen better lily of the valley than is now around but it is very fair stock all the same and commands normal figures. Bad weather and the fukir quarantine prevented the usual Saturday clean up.

BUSINESS CHANGES.

Chicago, Ill.—After May 1, E. L. Eaton will be located at 75 Jackson boulevard.

Dalton, Mass.—R. Engelman, florist, has removed his headquarters to the Durgin-McManus store.

Carthage, Mo.—Finn & Son, florists, have moved their downtown office to the Osborn News stand.

Easton, Pa.—D. Burrows Nevins has purchased the greenhouses and retail store of Arthur L. Raub.

Salt Lake City, Utah.—J. F. Walk has taken over the interest of his partner in the Child-Walk Co.

Iowa Falls, Ia.—W. H. Hall has rented the Riverside Greenhouses, and will take possession July 1.

Ft. Wayne, Ind.—The Sherer greenhouses have been sold to E. F. and A. J. Lantier and the former will be in charge of the place.

Chicago, Ill.—The John Davis Co. having disposed of their business to the Crane Co., some of the employees of the former concern will organize as a heating specialty company under the firm name of the John Davis Supply Co. it is said.

EVERYBODY KNOWS

Park, Cemetery and Landscape Gardening cannot be properly done without the aid of an accurate leveling instrument.

Bostrom's Improved Levels, No. 2 at \$15.00 and No. 3 at \$25.00, are conceded by all who KNOW to be the only Levels on the market which meet all the requirements, at the price.

Our guarantee back of every Level we sell, and satisfied users in every State in the Union heartily endorse every claim we make. Shipping weight 3 lbs. Description on request.

NEW YORK MARKET.
Warm weather and the usual pre-Easter quiet have held the flower market where it was one week ago—very much in the dumps. At present writing the stores are giving their attention mainly to the plant trade, having cleaned out the stock of the growers completely and now standing to unload it on the appreciative public. As on previous occasions the cut flower man must stand back as patiently as possible and wait until notified his turn has come. In the meantime the unseasonable weather has been pushing crops along and its effect on most of the cut flower stock is decidedly hurtful. But with more moderate weather conditions there is no doubt the stock provided for the flower buyers will be all right as to quality and quantity. Violets are on the downward course but everything else will be had in abundance with the possible exception of lilies.

A VERDICT FOR ALPHONSE PERICAT.
The trial before Judge Broomall and a jury, March 29, 30 and 31, at Media, Delaware County, Pa., of suit of Elina Wilson of Philadelphia, against Alphonse Pericat of Collingsdale, Delaware County, Pa., resulted in a verdict for the defendant. This suit was for the recovery of approximately \$1,400—

money derived from the sale of orchid flowers alleged to have been wrongfully appropriated by Pericat when employed as gardener by the Wilsons, and is the third suit of a similar character in all of which the defendant has been acquitted. Samuel S. Pennock and David Rust of Philadelphia were prominent witnesses at the trial. A counter suit for twenty thousand dollars damages has been instituted by Pericat for false arrest.

MASTICA
FOR Greenhouse Glazing
USE IT NOW.
F. O. PIERCE CO.
12 W. BROADWAY
NEW YORK

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

Erected at Davenport Neck, New Rochelle, N. Y.

THE QUESTION OF STRENGTH

IT is conceded that the strongest and most durable structure known is "THE IRON FRAME." And when you have all the Modern features combined in this type of construction you have "The Ideal Greenhouse."

The picture shows the beautiful symmetry of my "Curved Iceless Eave" — no heavy antiquated shading members. And I also make a specialty of having my work harmonize with surrounding conditions. Note how the mason work on greenhouse conforms to that on adjacent stable.

The advice of "The Practical Greenhouse Builder" is at your disposal for the asking.

The A. T. STEARNS LUMBER CO.
NEPONSET, BOSTON, MASS.

OUR IRON RAFTER GREENHOUSE

The materials cost more than the less enduring construction, but they cost less to erect.

QUALITY and QUANTITY of blooms exceed other houses, as you know.

You gain in erection costs; save in repair costs and get more money out of your stock. You have a house that will last fifty years and longer.

Write for our figures on your next house.

Hitchings & Company
1170 Broadway New York

The Palm House

PERHAPS you have been thinking that a curvilinear palm house with a tower might cost too much, so why not this even span, straight roofed one? You see they can be made very pleasing in effect.

This one, in connection with several other houses, was erected for the Agricultural College at Storrs, Conn. It is our Sectional Iron Frame Construction.

If this suggestion solves your problem, let us hear from you. If it doesn't, write anyway, for there is no doubt we can give you something else that WILL just fit your case.

Lord & Burnham Co.

Main Sales Office: 1133 BROADWAY, N.Y.

BOSTON: 819 Tremont Building. PHILADELPHIA: 1215 Filbert St.

YOU see in this one the palm house runs the opposite way from the one above, and is considerably larger. The work room is under the left hand house. Of course, there are numerous other combinations that can be made, but in any case the U-Bar construction can never look anything but attractive — it is always the lightest house and so matters least whether located north and south, or east and west.

Let us hear from you

HERE you have a charming little layout, with palm house, two wings and a cosy sort of work room at the end. Perchance this or something similar might suit you? If not, how about the one below?

WHITE KILLARNEY

We Know You Will Want to Buy White Killarney

Every live, progressive, up-to-date grower who has seen it is buying it; but when you buy White Killarney, be sure you get the right White Killarney (the Waban variety). When you buy from us you get the variety that has been exhibited and certificated, and the one that has attracted such favorable mention.

If you are in the vicinity of New York, we should be glad to have you call and see White Killarney growing at our Scarborough range, and you will say at a glance—as everyone has who has seen it growing—that it is by far the best white rose that has ever been placed on the market.

It is not only a good winter-flowering rose, but is good the entire year, and it is a splendid shipper. Read the following letter received from Mr. Willis N. Rudd, Secretary of the Society of American Florists, dated January 18th, in which he writes as follows:

"Dear Mr. Pierson:—I cannot refrain from writing you and expressing my admiration for the White Killarney as shown at Chicago on Thursday. It is an exquisitely beautiful thing and attracted much attention. I took half the blooms home with me, and they were finer on Saturday than they were at the show. The record is that these blooms were shipped from Tarrytown, staged and exhibited during the afternoon. They were then carefully wrapped up in a box, and remained in that box until one o'clock Friday morning, at which time I reached home; improved in quality up to Saturday, and were in fairly presentable condition on Sunday.

"In addition to being the most beautiful white rose of its class which I have seen, this demonstrates its splendid keeping and shipping qualities."

W. N. RUDD."

We were awarded Silver Cup at National Flower Show, Chicago, for best new rose with White Killarney; also Silver Medal Horticultural Society of New York.

Strong plants, 2 1/4 inch pots, own roots, now ready for delivery, \$30.00 per 100; 250 for \$70.00; 500 for \$125.00; 1000 for \$250.00. Grafted plants, ready April 1st, \$35.00 per 100; 250 for \$82.50; 500 for \$150.00; 1,000 for \$300.00.

Papaver nudicaule

South of New York sometimes as early as March, around Boston in April and along the sea coast of Maine in May, the Iceland poppies begin to open their nodding, dark green masses of buds. This papaver as native of the mountainous districts of the northern hemisphere is especially well adapted for the climatic conditions of the New England States; at least, I cannot remember having seen it grown to better perfection elsewhere. Hardly has the winter cover of dry leaves been removed when the pinnate, glaucous foliage, which so far had been lying flat on the frozen ground, commences to rise and, within a few days, as a compact clump of thrifty looking leafage reminds us that spring has come again. Soon the eggshaped buds borne on erect stems appear above the leaves, waiting for the first real warm day to burst open. From now on the Iceland poppy bed is one of the most attractive features of a garden. It is literally aglow with the brightest tints of white, sulphur yellow and red-orange in wonderfully pure solid shades. Light frosts seldom prove seriously injurious to flowers of *Papaver nudicaule*. The next day usually sees them here in the north again swaying in the light May breeze. Their petals possess the same silky lustre as those of the larger flowering annual Shirley poppies. Stems are of good substance, long and thin. Iceland poppies are very useful for table decorations and for filling vases. The length of their spring flowering extends for over a month. After that the plants bloom sparingly until late in autumn, when once more they turn floriferous.

Papaver nudicaule though often classed among the perennials is nevertheless more generally grown as a biennial by progressive herbaceous plant firms. Sowing the seed in spring means a fresh supply of young strong plants for the following year. Like most of the poppies they are rather difficult to transplant while in growing state. It is therefore a wise policy to establish and overwinter plants where they are desired to flower the coming spring. Needless to say, with the necessary care given during the growing season Iceland poppies add much to the cheerful vernal aspect of the garden and homeground.

Roses Under Glass

REPOTTING AND CARE

Repotting is one of the most important of the grower's duties at this season, and stress of other work should prove no excuse for neglecting this duty. Our next season's success depends entirely upon the condition of the stock we plant and if this be weak, starved and pot-bound the produce will find neither a ready nor early market. A half-inch shift is preferred by some growers to a larger one. This, while entailing more work, saves a good deal of room—an item of some importance just now. Plants shifted from a 2½ inch to a 3 inch pot require no drainage. The bulk of the soil added is so small that, providing the soil is properly packed and the material upon which they are set is free from mud, there is no danger of souring.

For a half-inch shift the soil used should be rather fine and not too moist. Disturb the ball as little as possible and leave ample room for water. It is advisable when using new pots not to mix them with the old ones, as they absorb so much moisture that the amount of water necessary in the first watering would reduce the

soil in the old pots to the consistency of mud. Repotted plants should not be allowed to accumulate until there is not a vacant space left in the potting shed. Draughts are very injurious to the soft young growths; and could a more draughty place be devised than the average potting shed?

Young stock, by reason of its soft growing condition, is very susceptible to mildew, and a prey to green fly and red spider, and great care must be taken to guard against these pests if a reputation for good stock is desired.

Watering young plants in pots is a tedious operation if done properly, and to obtain the best results requires good judgment and plenty of patience. When syringing the grafted plants use as little pressure as possible until they are staked and tied, and even then it is not advisable to syringe with the freedom that you would own root stock.

with the wisdom of caution in praising or condemning any flower or plant on its isolated record in any one locality or any one country. In other words even a well-grounded theory based upon practice and experience can sometimes be overturned.

Time for
all to
wake up

Those who can and do "read between the lines" and are clever in assembling and interpreting movements and tendencies at wide-distance vision are generally disposed to accept as a conclusion that we are now on

the eve of an era of great business activity and consequent prosperity. Seed trade, nursery trade, landscape development and the horticultural industries generally are reported to have displayed unmistakable vitality this spring and those who are in a position to judge are unanimous in the belief that, barring unforeseen possibilities of disaster, this is but the beginning of an enormous spring activity to be followed by one still greater next year. This outlook should be taken very seriously into consideration by those of our readers who are in a position to do so and a course mapped out and followed whereby full advantage may be made of it. HORTICULTURE hopes to be taken into partnership in the enterprise which these conditions will surely awaken. No medium exists with better opportunity or facility for contributing the publicity which is an inseparable part of all modern commercial enterprise and none will give more earnest attention and co-operation in any movement on the line of a "bigger, better, busier" horticulture.

Looking backward
as an aid to
looking forward

We have endeavored to give our readers a rather extended and detailed report in this issue of the Easter trade in various centers, more particularly New York,

which is easily the leading flower and plant market in the country. We believe that these reports will be found worthy of careful perusal for it is only when well-informed through the medium of reliable data that the grower can plan his investments wisely and prepare with good judgment for next year's needs. The business of Easter plant growing as a specialty is generally looked upon as one yielding a substantial profit. The manifest prosperity of men who have gone into it extensively fairly justifies this assumption but we rise to remark that its risks are many and the planning which must be done many months ahead requires the exercise of business sagacity of no mean order. It is with a wish to help the growers and dealers who must soon make up their import schedules for next year's material, if possible, that we devote so much space to the details of the Easter results, particularly where these results might be of value in estimating the trend of the demand from year to year. We trust we have covered the ground in a little more useful manner than is the case with most so-called Easter reports and if HORTICULTURE's efforts are credited with having exceptional value we shall feel well repaid.

"Circumstances
alter cases."

Our European correspondent makes interesting reference in this issue to the trouble experienced by British growers in getting good stiff stems on their Enchantress carnations. We think the complaint will be looked upon by the majority of American carnation growers as a somewhat singular one, for Enchantress as grown by our experts seldom shows any lack in the respect mentioned. Whatever the cause may be the fact is only one of many which should impress us

European Horticulture

BEGONIA SEMPERFLORENS HYBRIDA DORNROSCHEN

This beautiful hybrid of *Begonia Socotrana*, fertilised with *B. semperflorens* Lubeca was raised by Herr Moritz König of Wiesbaden. It was, however, like so many other *Socotrana* crosses unnoticed for years, as was the case with *Gloire de Lorraine* which was rediscovered 9 years after its birth, and also with the Veitchian winter-flowering begonias. The bloom is of a silky, pretty rose-pink tint; the leaves are egg shaped and of a fresh green color. The plant begins to form side shoots while yet little more than a cutting, and at a height of 9 inches has become a globular bush and begins to bloom. The plant prefers a light soil, like that found suitable for cyclamens. It is impatient of continuous rainy weather when employed out of doors in beds and groups, the flowers dropping, to reappear on the advent of sunny weather. In the winter season the plant must be placed in a light warm and dry position. If the plant has come through the winter in a good condition, it will afford fifty or more cuttings.

PERPETUAL FLOWERING CARNATIONS

Whether it is the excessive size of the blooms of the present race of the fine American and English carnations and consequently their great weight, or that interbreeding has produced weakness of the stems, the drooping poise of the blooms was very noticeable among those exhibited at the recent show of the Perpetual Flowering Carnation Society. Some of the varieties, notably, *Enchantress* and *White Perfection* had excessively weak stems, and some of them were broken where they touched the edge of the vases. We seem to need greater robustness of growth if the blooms are to remain as large as they now are. Or failing that improvement, a reduction of size in the bloom. Perhaps the addition of silica, or potash, or lime to the soil in which the plants are grown, might impart strength and rigidity to the stems, as these substances do in the case of wheat and other cereals. A drooping carnation may do for plants standing on a window sill, to be observed from below, as we see them in the Tyrol and Italy, but such flowers are out of place in a vase placed on a level with, or below the eye.

A DISEASE OF COFFEE

The cultivation of coffee is being seriously threatened in many parts of the tropical world by a fungus, *Hemileia vastatrix*, nearly allied to rust that infests the wheat plant; and its ravages were very evident about 1880 in the coffee plantations in Ceylon. It is commonly known as the coffee leaf disease, and may be recognized by the clusters of yellow spores which appear mostly on the lower sides of the leaves of affected bushes. So great have been the ravages of this fungus in Ceylon that whereas the exports of coffee from that island were about £3,000,000 in 1880 they now amount to only £25,000. Mr. G. Massee in his "Revision of the genus *Hemileia*" (Kew Bulletin, 1906) gives the geographical distribution. "In the East it is found in India, Java, Sumatra, Malacca, Singapore and the Philippines; also in Mauritius, Madagascar, Fiji and Samoa. In Africa the Arabian coffee has been attacked, namely in German East Africa, Natal, and in the vicinity of Victoria Nyanza. In the northern part of the Transvaal, a small but flourishing industry has been destroyed. The im-

portation of coffee seeds or plant from infected countries is now prohibited."

THALICTRUM DITTEROCARPUM

This is a Chinese species introduced to British gardens by Mr. Wilson, who found it on mountains 4000 feet above sea level. The plant is hardy in the temperate parts of the world, and is a welcome addition to the herbaceous border: it possesses panicles of small, reddish purple blooms, growing to a height of about 4 feet. The *Thalictiums*, (*Meadow Rue*) are mostly low growing fragile plants, with, in some cases, fern-like leaves; *T. minus*, (*Maidenhair Meadow Rue*) might be easily mistaken for the maidenhair fern. They make pretty objects on the rockery, and the leaves are very suitable for mixing with flowers in bouquets. This Chinese novelty is figured in *The Gardeners' Chronicle* for April 3 last.

THE PROVINCIAL HORTICULTURAL UNION OF HANOVER

As a striking instance of the great activity of a province in matters connected with gardening I take the following from the recently issued report. For a number of years the Union has endeavored to foster among the school children a knowledge of the care and cultivation of flowering plants, to which end it distributes annually 5,000 plants together with printed directions for their cultivation. It likewise fosters the cultivation of plants among the working population in general and members of the Union and inaugurates flower shows and the distribution of plants to the value of 200 m. yearly. By lectures and excursions to celebrated gardens and in other directions the Union does its best to inculcate an interest in all matters pertaining to the garden. At the end of the year 1908 the members numbered 635 and the funds in hand amounted to 6,000 m.

Andruek Moore

Adiantum Farleyense

The subject of our cover illustration is an excellent specimen of *Adiantum Farleyense* which variety we believe to be the most graceful of all ferns when well grown. This specimen shown, grown at the R. L. Beekman estate, Newport R. I., is barely two years old and in a 10-inch pot has a circumference of nearly ten feet in the condition shown. And as Mr. Urquhart, the grower, has unflinching success with these year after year we partly state the seemingly ideal conditions under which they are grown. The greenhouse is a low even-span curvilinear with ground glass lightly shaded throughout the year. The night temperature is kept about 75 degrees, and the day temperature higher of course. The main propagating season is in March and April when old plants are broken up and crowns with one eye are put in the open bench of clean sharp sand where they usually root well within two weeks and are potted in small pots and plunged in a bench of moss till they are well established then potted on into larger pots as they seem to demand; finely chopped half-rotted sod with a good mixture of cow manure is used at each shift. Liquid manure of various kinds is also freely used. This house is occupied almost entirely by ferns of this variety, and overcrowding is always avoided.

James Robertson

NEWS OF THE CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

The attendance at the April meeting of the New York Florists' Club on Monday evening, 12th inst., was very gratifying, considering that it was the day following Easter Sunday. There were between fifty and sixty members present, among the visitors being Wm. H. Elliott, of Boston, E. J. Norman, of Lee, Mass.; W. J. Buurman, representative of J. Schilpzand & Sons, Hillegom, Holland and H. A. Barnard of Hugh Low & Co., England, the last named gentleman just concluding his first visit to America and about to sail for home full of honors and orders. Mr. Elliott was present for the purpose of reading his paper on rose culture, deferred from the March meeting on account of the death of President Hallock. Easter trade reports have crowded out this very interesting essay, but it will appear in next week's issue. It was to be regretted that so few rose growers were present to listen to it, there being not over half a dozen rose men in the audience. There were no exhibits, the display of roses intended to supplement this lecture having been staged at the March meeting, at which time no business was done, for reasons already stated. Many reports and deferred matters were disposed of at this time. Among them was the report of the committee on awards, giving cultural certificates to F. R. Pierson Co. for White Killarney, Robert Simpson for My Maryland, Mrs. Jardine and Mme. Abel Chatenay, to the Brant Hentz Flower Co. for American Beauty, to W. G. Badgley for Killarney, Bide and Bidesmaid, to V. Hanman for Bridesmaid, to A. Farenwald for Richmond and Killarney, and to Henry Hentz, Jr., for Bide and Bidesmaid; vote of thanks to F. R. Pierson Co. for My Maryland, Mye's & Samtman for My Maryland, W. A. Manda for Cherokee and South Orange Beauty, and Robert Simpson for Kate Moulton; first prize, book presented by J. Austin Shaw, to Waban Rose Conservatories for White Killarney.

The outing committee reported full particulars of the great annual picnic to take place on July 1.

Jos. A. Manda announced that a series of fifteen games would be inaugurated at the bowling alleys next Monday to determine who the five fortunate men would be who should represent New York at the convention in Cincinnati next August. Mr. Manda incidentally suggested that the bowling fraternity were ready to receive anything in the way of prizes which their friends might be disposed to bestow. We hope the response to this will be generous. It would help to stir up the waning sporting spirit of the Metropolitans.

H. A. Banyard brought up the matter of the proposed institution of a national Sweet Pea Association, and

after a discussion by various members a vote was carried offering the contents of the club, use of its hall, vases, etc., on the occasion of the opening meeting and sweet pea exhibition next June. Cups for award at that time have been promised by Peter Henderson & Co., W. W. Kaulen & Co., A. J. Boddington, W. Atlee Burpee, and others are expected.

After the reading of Mr. Elliott's paper a very lively debate ensued. Replying to questions, Mr. Elliott said that in the case of Killarney, growths should be pinched back two consecutive times on young plants; the following growth may be allowed to come to bloom. He had found that Killarneys all pinched back at same time for a holiday crop would bloom simultaneously. Each last cut an interval of seven weeks should be allowed for the crop to come on. Richmond would require four days more. For Christmas one week longer should be given.

F. R. Pierson talked at some length and very interestingly. He agreed with Mr. Elliott as to the economy of the large modern rose house. The business is rapidly becoming a manufacturing business, with the opportunity of cheap coal, cheap transportation and cheap labor taken full advantage of, and the day of the small grower has gone. Permanency and durability are important factors in the structures of today, which ought to be good for 100 years. You can't build too good and temporary buildings are an extravagance. Mr. Pierson said he was inclined to go back to the system of solid borders, partially because of the saving in the matter of renewal of soil and plants as compared with benches. Incidentally he remarked that the much dreaded eel-worm is principally dryness.

Mr. Elliott was asked whether he found the heating and management of a 1300 foot house to compare favorably with that of an equal space cut up into a number of smaller houses, and his reply was Yes, because of simplicity of operation, the even distribution of the heated air over the lower part of the house and the short time required to teach the men their required duties. Patrick O'Mara had some interesting observations to present and H. A. Barnard told of his amazement at the extent of some of the establishments he had visited while in America and the uniform excellence of the product. Chas. Leuker deplored the tendency away from art and towards the manufacturing idea in the cut flower industry. A. J. Guttman and John Nugent also contributed to the feast of reason. Mr. Nugent advocating the establishment of a great central market in New York for the sale of flowers, with shipping facilities and other means for recovering the business lost through lack of these things. C. B. Wadhere interviewed Mr. Elliott on the length of such bars and the dangers of spliced bars. Mr. Elliott said that he had bars, all one piece, 33 feet in length, but this length was the limit. Spliced bars seemed to be generally looked upon with disfavor amongst those present, but they are indispensable in the very wide houses many growers are disposed to build nowadays.

PITTSBURG FLORISTS' AND GARDENERS' CLUB.

Change of Meeting Place.

The regular monthly meeting, April 6th, was the last the Pittsburgh Florists' and Gardeners' Club will ever hold in the German Beneficial Union building where the Club has met since March, 1902. The building has been sold and will be torn down May 1st. The hall occupied was convenient and accessible, and the boys will not soon forget the interesting meetings, the fine exhibitions and, above all, the good-fellowship that was cemented by the attendance and companionship at the old hall. President Burki named the executive committee, E. C. Reine-man, Jno. L. Wyland and Jno. Bader, as committee to have in charge the securing of a new meeting place. Meanwhile the May meeting will be held at the rooms of the Pittsburgh Cut Flower Co., 222 Oliver Ave.

Headquarters for Carnation Convention.

In the matter of the meeting of the Carnation Convention with us in January, 1910, the exhibition and entertainment committees reported that a hall could be secured at the Fort Pitt Hotel for the exhibition and could be cleared in time and used for the banquet and guest rooms. The Fort Pitt is a new hotel in the business part of the city, convenient and accessible to the theatres, and to Union Station, and its management is first-class. The club authorized the securing and making the Fort Pitt Hotel, corner 10th St. and Penn Ave., Pittsburgh, as headquarters of the Carnation Convention for 1910.

The private gardeners' committee for the season June 1909-May 1910 reported a schedule of exhibits for prizes which was accepted and ordered printed.

Exhibits.

The exhibits before the club were not so large and varied as usual, it being too near Easter, but Frank Crook, gardener for J. H. Park, showed three plants of *Cineraria stellata* in 8-in. pots that had a spread of three to four feet each and two pots of *Dendrobium nobile* that showed a great profusion of bloom and were unusually fine specimens. Mr. Crook was awarded a certificate of merit for his exhibit. Phipps Conservatories, Jno. W. Jones, foreman, showed a variety of hydrangeas in bloom, one of which—*Hydrangea Japonica*—attracted attention from its oddity. There were also a number of specimen plants of Easter lilies.

Keeping Enchantress Carnations.

Mr. Crall, a large carnation grower of Monongahela, having taken notice of the discussion at the last two meetings in regard to the keeping qualities of Enchantress carnations, brought in two bunches of carnations, one each of Rose Fink Enchantress and Enchantress, one bunch cut on the 19th of March and the other on the 29th of March. The bunches were in fair condition, especially the one cut the 29th of March. The other was a little the worse for wear but was still presentable. Mr. Crall says he does not wait

until the blooms are fully open before cutting, but lets them develop in water. He grows Enchantress at a temperature of 45-48 degrees, and the cellar in which he keeps the cut blooms has a temperature of about 50 degrees.

The subject for the May number is "Bedding Plants."

H. P. JOSLIN, Sec'y.

NEW JERSEY FLORICULTURAL SOCIETY.

The regular monthly meeting of the New Jersey Floricultural Society was held on April 9 at their rooms in Orange when Charles H. Totty addressed the gathering on the chrysanthemum. His remarks were largely historical of the flower and he predicted even greater development in the next thirty-five years. Cultural features were brought out in the discussion which followed, both departments of which Mr. Totty filled to perfection, the clearness and force of his statements in the first being rivalled by the directness of the second, which distinguish him as both business man and cultivator.

A letter from Daniel MacRorie upon the scenery and flora of the Pacific coast was received with marked approbation. Mr. MacRorie is just in receipt of a large invoice of Philippine orchids of which the cold spring weather so far has prevented the delivery to eastern buyers.

The usual display of the season's flowers was made. A vase of *Andromeda Japonica*, grown in the open, by William Reid, gardener for S. & A. Colgate, filled the room with its fragrance.

J. B. DAVIS.

THE AMERICAN CARNATION SOCIETY.

Nic Zweifel, North Milwaukee, Wis., registers new carnation Badger State. Nelson Fisher x Enchantress; color dark pink like Lawson; size 3 to 3 1/2 inches; very rapid grower and extremely free; flowers do not fade in hot weather; stems long and graceful; Calyx never bursts. A money-maker.

Same grower registers new carnation Bright Spot. Lawson x Enchantress; color pure bright cerise of even shade; size 3 1/2 inches; early and very prolific; healthy and strong grower; flowers well shaped, and are good keepers; stems long and wiry; calyx does not burst.

A. F. J. BAUR, Sec.

Indianapolis, Ind.

GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.

The Gardeners' and Florists' Club held their semi-monthly meeting on Monday the 12th. Attendance only fair, attributable doubtless to the strenuous times of Easter. One thing was noticeable in comparison with the previous meeting held on the 29th ulto. At that meeting small spots of pessimism here and there through the audience could be detected, but at the last meeting all this had vanished and the members were shaking hands with themselves and each other. Easter had come and gone and left behind no cause for complaint. F. G. Dokkenwadel of New York was a visitor.

LENOX HORTICULTURAL SOCIETY.

The annual Rose and Carnation night of the Lenox Horticultural Society was held in their rooms, Saturday April 3rd, and was a decided success. This meeting was one of the largest and most interesting the society has had for some time, the members turning out in full force, and being amply rewarded for their trouble. Seldom, if ever, has there been seen such a magnificent display of roses and carnations in Berkshire county, and it reflects great credit upon the gardening fraternity of Lenox and its vicinity. An exhibit upon which special praise was bestowed was a vase of rose White Killarney, "Waban Variety," exhibited by F. R. Pierson Co. The flowers staged were in perfect condition, and were awarded a first class certificate—the society's highest award. Another exhibit of sterling merit was a vase of fifty flowers, carnation Bay State, exhibited by the introducer, A. Roper. This seems to combine all the desirable qualities of a first class variety. It is so much ahead of any other variegated carnation as to place it in a class by itself, and was unanimously awarded a first class certificate. The standard varieties were shown by the exhibitors in first class shape. Beacon took the honor as a scarlet while Rose Pink Enchantress, Enchantress, Winsor, Afterglow and White Perfection were equally well shown in their respective classes. The following is the list of the principal awards: A. J. Loveless, first for 24 Enchantress, Winsor, 12 Rose Pink Enchantress and second for 24 Beacon. A. H. Wingett; first for 24 Beacon, 12 White Perfection, Enchantress and Afterglow. S. Carlquist; first for 12 Beacon, second for 12 Enchantress and White Enchantress. D. Dunn; second for 12 Beacon and Rose Pink Enchantress. A. McConnachie; third for 12 Enchantress, and White Enchantress. F. Heeremans; first for a mixed vase of fifty, also a diploma for a fine vase of *Gardenia Veitchii*. The judges were Messrs. E. Jenkins, W. Jack, R. Speire and G. Breed.

Sidney Witney was unanimously elected an active member of the society. E. Jenkins gave an interesting description of the recent Boston Spring Show, which he described as the best exhibition he had ever seen anywhere, laying particular stress on the beautiful Japanese garden arranged by R. & J. Farouhar & Co. and complimented that firm on their enterprise.

After the business of the evening was disposed of refreshments were served, and after cigars had been passed the evening was enlivened with songs and recitations by several of the members present. A most enjoyable evening was brought to a close as the clock struck twelve.

GEORGE H. INSTONE, Secretary.

ST. LOUIS FLORIST CLUB.

The St. Louis Florist Club was unable to hold its regular monthly meeting as advertised on last week Thursday afternoon. There were not enough present to make up a quorum. This was owing to the fact that most of us were kept at home preparing for Easter business. The next meeting will be held on Thursday afternoon, May 13th, at 2 o'clock.

FRENCH CHRYSANTHEMUM SOCIETY.

This flourishing society now counts 772 members. Its official organ "Le Chrysanthemum" has just reached its 111th number and we note that the next show and convention of the society will be held at Marseilles towards the end of October next. We observe that the well known raiser Monsieur Ernest Calvat has recently been appointed by the French government an officier d'Academie which is the fourth decoration conferred upon this eminent raiser of novelties.

C. H. P.

NATIONAL HORTICULTURAL SOCIETY OF FRANCE.

The annuaire of this society just issued, is a bulky volume uniform with the society's journal and contains 225 pages. Its contents consist of the annual report for 1908 showing a total increase of members, after allowing for deaths and resignations, of 279 for the year. The rules and list of officers and committees occupy a few pages and the rest of the volume—182 pages is devoted to a list of the various grades of members, and corresponding societies.

C. H. P.

ENGELMANN BOTANICAL CLUB.

The Engelmann Botanical Club held its regular monthly meeting Monday night in the Central High School Bldg., St. Louis. One of the features of the meeting was the lecture of L. P. Jensen, landscape gardener for the Busch Estate, on "Natural Effects in the Planting of Modern Parks and Private Places." The meeting was largely attended by its members and visitors from the trade. W. W. Ohlweiler, the secretary, invited all interested to be present.

PUBLICATIONS RECEIVED.

The receipt of the last month's issue of *La Villa Ed Il Giardino* reminds us that those interested in Italian horticulture will find it a serviceable magazine. The editor is N. Severi and the offices are at 34 Piazza Rusticucci, Rome.

A useful map with key to all the plantations in the Arnold Arboretum of Harvard University, Jamaica Plain, Mass., has just been issued. Visitors to the grounds who are desirous of locating any particular group will find this diagram exceedingly valuable.

Our bright little Belgian contemporary, *La Tribune Horticole* is giving at fortnightly intervals, special plates of photographs of the foreign members of the Ghent Quinquennial Jury. In the last number to hand we notice a series of the English jurors. Short biographical notices in each case are given in the text.

Proceedings of the 18th. annual meeting of the American Carnation Society. This volume is similar to its predecessors, giving the proceedings, discussions etc., at the convention of the American Carnation Society held in Indianapolis, on January 27 and 28, 1909, list of members, etc. An excellent portrait of president M. A. Patten forms the frontispiece.

CHICAGO NOTES.

Wm. J. Smyth must be wondering what will happen next Easter. One year ago, three days before Easter, an automobile came dashing through the large plate glass window on the Michigan avenue side of his store, making a wreck of everything in its path, and on Tuesday of Easter week this year the wind, blowing a gale, forced open the rear door and instantly the \$500 window on the 31st street side passed into the street. Boards were placed up for protection till some old sash could be procured for temporary repair.

C. A. Samuelson had a very pretty Easter window. The floor was covered with moss and the back enclosed with a fence and gate done in white. On either side of the gate were beautiful specimen plants of Lady Gay roses three or four feet high, and gardenias, and a few smaller plants carried out the garden effect.

An event of considerable importance in Chicago is the annual sale of flowers for the benefit of destitute crippled children. The Children's Flower Association, numbering 300, of which Mrs. Lysander Hill is president, was organized several years ago, the object being to sell flowers raised by the children themselves, and has among its patronesses some of the leading society women of Chicago. Last year the sale netted \$1500 for the organization and this year the amount was doubled. The sale occurs on the Saturday before Easter and cuts quite a figure in the volume of business done by the retail trade, as the flowers sold have long since been far beyond the ability of the little folks to grow. Some florists maintain that a considerable decrease is felt in their sales as a consequence. Prizes were given for the best plants raised by children, and this feature of encouraging children to love and care for plants is in itself one of the best features of the enterprise and far reaching in its possibilities.

Ed. Hauswirth found his first Easter as head of the store to be a successful one. He especially noted the increased demand for Killarney roses. His trade was about evenly divided on plants and cut flowers.

The supply of carnations proved to be larger than anticipated and the price lowered towards the end of the week. Some Enchantress were left over. White was in great demand early in the week. Green stuff sold well and was considered scarce. Short lilies were left over but not in any very large quantities.

Friedman was nicely settled in his new store in connection with the Stratford Hotel on Michigan avenue. Here he has an excellent salesroom, good workroom and basement. Everything is nicely fitted up and he will be better prepared than ever to handle his large trade. Specimen plants of Hiawatha rose were an attractive feature in his window display.

During Easter week a hail storm passed over the north part of Chicago, catching quite a number of florists in its path. Anton Then lost 1500 lights of glass, some stock plants and his hot beds containing fancy plants. Julius Ristow, John H. Miller and others lost more or less during the three minutes that the storm pre-

vailed. J. A. Budlong and the Reinbergs also sustained a slight loss.

Mr. and Mrs. O. P. Bassett of Hinsdale have returned from Hot Springs, Va., where Mr. Bassett has been to regain his health.

Many florists found it easier to sell small and medium plants than to sell carnations at \$1.50 per doz.

There was a downpour of rain, accompanied by a strong wind Monday following Easter. All are thankful it did not occur the day before.

EASTER BRIEFLETS.

Bridgeport, Conn.—John Reck & Sons surpassed all previous efforts in their Easter show.

Monson, Mass.—The Fuller greenhouses were kept open evenings to accommodate the Easter visitors.

Lincoln, Ill.—Gullett & Son opened a down town salesroom during the Easter season for the convenience of their patrons.

Greenwich, Conn.—Alex. Mead & Son rented a vacant store on Greenwich avenue for the display of their large Easter stock.

Hartford, Conn.—It needed only the announcement that "The show is on" to make the store of John Coombs on Main street the busiest place in town last week.

Salem, Mass.—W. T. Walke, whose business has grown from one house to seven in the last nine years, opened his houses to the public during the Easter display.

Youngstown, O.—John Walker held his annual reception at his greenhouses at Crab Creek on April 4, and throngs of people took advantage of the opportunity to inspect his Easter stock.

A COMICAL SITUATION.

By one of those funny slips which sometimes happen even in the best regulated of Legislatures the Massachusetts House last week passed to engrossment a bill which forbids any person to give his neighbor a plant, tree or shrub without a grower's license under penalty of from \$25 to \$100 fine.

The bill got by the committee on bills in the third reading and this clause in the original bill was carried along with the plain intention, as its backers stated, of having a State nursery inspection to protect trees and plants from disease and insects. Reconsideration will doubtless be given.

Frank Millang, the wholesale florist of New York City, has been very sick with pneumonia for more than a week, and two trained nurses are in attendance. He is getting along as well as could be expected under the conditions and we hope to report him as out of danger next week.

A Profitable Side Crop

Asparagus plumosus is a main crop with many growers having extensive modern plants but those with less up-to-date establishments, or parts of same defective in lighting or otherwise unsuitable for high grade crops, will find this subject one of the very best. We have prepared a cultural circular giving concise directions how to make money out of this crop. Send for it. No charge. An important feature in asparagus culture is good seed. The P. M. quality of greenhouse grown seed has earned a high reputation for freshness and purity. It is the true nanus and greenhouse grown. Send for trial pkg., 100 seeds fifty cents, if you wish to experiment only. In quantity \$3.75 per 1000 seeds, \$32.50 per 10,000 seeds. Asparagus Sprenger 75c. per 1000, \$5.00 per 10,000 seeds.

The Best For Florists.

ELMER D. SMITH & CO.
Adrian, Mich.

TARIFF ON GREENHOUSE GLASS.

The cost of greenhouse glass at present is low. The Payne bill for greenhouse sizes remains the same; it is to be expected that a combination will be made to bring higher prices. The Tariff Committee of the Society of American Florists urge each user of glass to write to their State Senators and Congressmen requesting a reduction of at least a half a cent a pound on common window glass. The rate of glass, if it is to be affected at all, can only be done by prompt action on the part of an extended constituency. The Society in their annual meetings have at various times expressed very decided feelings upon this matter of high cost of glass, and one of the primal causes was that competition from abroad was out of the question. The present status of the bill before the Congress is not past the debatable point, but what is to be done should be done at once, and every man who has any direct interest in the matter can do his part if he informs personally his Congressmen and the Senators from his state what his views are.

BENJAMIN HAMMOND.

Alois Frey has retired from the superintendency of Lincoln Park, Chicago, and has started in actively at his own place at Crown Point, Ind.

EASTER TRADE REPORTS

NEW YORK CUT FLOWER MARKET.

The General Situation.

Reports vary somewhat as to the amount of cut flower business done as compared with the plant trade and as compared with the flower trade of recent years. Nobody expects a sensational flower trade at Easter nowadays, but it is gratifying to learn that this year the cut flower more than held its own. From the standpoint of the flower grower and wholesale dealer, therefore, Easter for 1909 may fairly be pronounced a success in a general way and there is reason to hope that henceforth both plant and flower departments will make steady growth on parallel lines, neither one at the expense of the other.

Roses.

There was a generous supply of roses but the cut was not phenomenally heavy and acceptable stock was fairly well cleaned up. Early in the week considerable stored stuff was brought in under compulsion of the hot weather then prevailing and at the close the other extreme was reached in the shipment to the markets of quantities of tiny buds in so undeveloped a state that they would never swell under any circumstances. That there are growers silly enough to follow either of these courses today seems incredible, but it is nevertheless true. Of Beauty there was just about enough to go around; a few left. Killarney was the most popular variety but there were some of the most miserable specimens under this name that we ever saw. All through the list the quality varied greatly, from superb down to useless. Reds experienced a lighter demand than the pale varieties and the special classes moved more reluctantly than the medium grades. Bride and Bridesmaid hardly held their own, however, and had the crop been as heavy as it was last year there would have been trouble. Where the dealer showed a disposition to hold up to a specified price they went hard.

Violets.

The receipts of violets were enormous. It was estimated that the shipments from the Rhinebeck district on Friday and Saturday amounted to fully three million flowers. A considerable proportion of these looked as though they should have been picked two weeks sooner and the effect of the spell of hot weather at the first of the week was generally evident. The violet growers were caught by the high temperature and doubtless many high hopes were shattered. Single violets as received were useless as a rule. A tremendous number of violets were unloaded—the majority at bargain figures. They were in evidence everywhere on Sunday, having, with the exception of Lily of the valley, a practical monopoly of the corsage wear. It must not be assumed from this fact, however, that fashionable New York has taken the violet back into favor. The great quantity worn was due to their cheapness more than to anything else and the big stores in the swell neighborhoods handled but a few.

Lilies.

The same story as given concerning lily plants will apply here. Predictions of scarcity were well verified. The quality of the stock offered varied greatly, the high grade flowers being in a very small minority. Large quantities of small, soft, raggy lilies were seen on all sides but the demand was so far in advance of the supply that anything which would hold a semblance to a lily found a buyer at some price and the fortunate holders of good ones set the selling figure at whatever limit they chose.

Carnations.

Carnations were in reasonably ample supply and good quality. Looking over the shipments in the wholesale places the preponderance of Enchantment was remarkable. It really seemed as though fully one half of the entire receipts was made up of that variety and in many cases they were of grand quality. The demand for any except the white and the lighter colors was unaccountably weak. Carnations have been bringing such good prices of late as compared with last years record, that an advance in Easter values would not have been surprising. It did not come, however, and prices kept well within last year's limits.

Lily of the Valley and Bulb Flowers.

Lily of the valley surprised its friends. It took on a spurt Saturday afternoon which held out until the close of business on Sunday, cleaning up every existing scrap of the fragrant little flowers which have been so generally neglected of late. Just why or how it happened nobody knows, but the corner was a vigorous one while it lasted. Other material such as daffodils, tulips, callas, hyacinths, etc., was not in over-supply and sold satisfactorily, excepting a large quantity of southern grown daffodils which the street fakirs got at their own price, if they would accept them.

Miscellaneous.

We must confess that we have never realized the possibilities in stock culture until seeing some Beauty of Nice at McManus' which opened our eyes in amazed admiration. We don't know who grew it but hope he will do some more on the same line. Sweet peas were plentiful in all grades of goodness and badness. Extra grades brought fine prices. Orchids were not abundant and gardenias were particularly scarce, the prices soaring. Oncidium ampliatum was a welcome addition to the list of acceptable orchids. Good greens gave but little trouble this year, the accumulation being less than usual at Easter.

NEW YORK PLANT MARKET.

The Selection.

The selection of plants offered for the New York Easter market was not as large as in former years. Lilies, azaleas, rambler roses and hydrangeas were the principal stock seen in all the stores, regardless of location or society grade. Another noticeable fact was the almost entire ab-

sence of large specimens in any line, medium and small-sized plants being carried almost exclusively. One man put the situation very tersely when he remarked that the three to five dollar Easter plant now has its innings in the high-class stores. A good many plants were left over in some of the stores and they were practically all of the higher-cost grade.

"Made Up" Arrangements and Ribbons.

It may be stated further that the elaborate jardinières and other combination arrangements of plants which had such a big run of popularity in New York for a few years back are no longer a controlling feature and the demand for tiny heathers, mosses, ferns and odds and ends of various kinds which were largely used for filling in around the larger central specimens has consequently fallen off. The public fancy turns not only to the low-priced affair but to a single good plant rather than a mixture, and another tendency that cannot be mistaken is toward the abandonment of lavish ribbon and tissue paper adornment such as prevailed in other years. Some ribbon is used but not in quantity approaching even the consumption of last year. Chiffons and such trimmings were very sparingly used, and among the best stores the idea prevails that a good plant requires no decking to sell it. In pots and jardinières there were a good many pretty patterns used, and pot covers of waterproof crepe or more substantial material were quite generally favored.

The General Result.

Overconfidence on the part of the retailers, based on last year's complete clean-up, was the cause of too liberal buying in advance by many who purchased far in excess of their investments of last year, literally cleaning the growers out of everything presentable. The speculation ended somewhat disastrously for some, the stock left on hand after Easter had gone being far too heavy for comfort.

Roses.

Anny Muller was a gem among the dwarf growing polyanthas. Tausendschon was an equally sensational success among the true Ramblers. Among the other varieties which have elbowed the once exclusive Crimson Rambler out of its throne were Hiawatha, Delight, Sweetheart, Leuchsterne, Alice Steinhoff, Newport Fairy, Dorothy Perkins, Lady Gay and several others. It may be said in passing that many of these roses lacked in profusion of bloom and the growers might easily improve upon them next year. Among the bush roses Frau Karl Druschki was far in the lead and sold at sight.

Lilies.

Lilies were seen in all degrees of decrepitude—some with stalks not over six inches in height. Superior plants were the exception, yet there were some. All were sold, however in pots or pans, and the call was for many

more than could be found. The apprehensions of two weeks back as to the lily situation were fully justified.

Azaleas and Rhododendrons.

Azaleas were the mainstay of the Easter plant market. They blazed up in great masses everywhere, in stores of high and low degree. They did not strike us as being up to former quality, foliage being scanty and flowers small and soft. Rhododendrons were also inferior, with flowers no larger than a primrose in many cases and giving evidence of overforcing or some other mismanagement. An exception was the variety Pink Pearl. This, as a rule, was simply superb and it was easily the best seller in its class. The flowers were large and the trusses enormous, and a particular quality noted was the fact that the trusses do not all come into bloom at the same moment but follow one another.

Miscellaneous.

Hydrangeas in several varieties were abundant. Most of them well-flowered but some insufficiently hardened off. Daisies were never better. Ericas were seen but sparingly, a few Porceliana, regerminans and Cavendishii in the exclusive stores being the main stock. Metrosideros, snow balls, Japanese cherries, almonds, boronias and a few other things out of the common run were occasionally seen. We almost forgot to mention genistas; these were used only in small quantity and many were left unsold. Acacias were conspicuously absent. Lilacs were very handsome—the best ever, but they were poor sellers. Dwarf bougainvilleas made a grand record. Of spiræas, the Gladstone type was seen in fair quantity, but the old Japonica seems to have been abandoned entirely.

PHILADELPHIA EASTER REPORT.

Cut Flowers.

With the exception of Wednesday, clear, cool weather prevailed, and a very satisfactory business was had—most of the dealers reporting an increase over last year. Wednesday was too warm, and had a bad effect on flowers, especially roses, for the balance of the week. The amount of business done was certainly enormous, and by Friday and Saturday many items were in short supply. This was notably the case with gardenias, lily of the valley, cattleyas and red roses. By red roses we do not mean American Beauties, as these were abundant, especially in the higher grades. Bridesmaids, Jardines and Killarneys were in splendid shape and equal to all requirements. White roses were a little draggy, if anything. Carnations, although good, were a little soft, but they sold well and brought good prices. There were enough violets to go around—mostly doubles. Towards the end orchids went up with a jump to seventy-five, and those who had placed their orders early around fifty were the wise ones. Schrodæra continues the main variety. A little too light-colored, but the best to be had. Special lavender sweet peas were in great demand, and brought fancy prices. Other colors were good seconds, and the sweet pea men have nothing to complain about. Contrary to expectation, lily of the valley was one of the most called-for

items, and got quite scarce towards the last. Not a spray was to be had in wholesale centers on Saturday evening and retailers were buying from each other. Easter lilies cleaned out wonderfully well, and prices stiffened up considerably towards the last of the week. The market started with 8, 9, 10, 12; but those who had sized up the situation carefully, held out for 15 and 17 for choice stock of the proper length and got it. The calla men made the mistake of holding up their crops too long. They brought better prices early in the game. Good gardenias were very scarce. Fair stock went readily and even rubbish found a market. Snappedragons hung fire. Southern daffodils by the cart-load everywhere; no money in them for anybody. The street men fared well this year on account of the good weather. The business, on the whole, we think was fully equal to previous years. The only complaints we hear, come from the mill sections, such as Kensington, Frankford, Manayunk, etc. These are of course, attributable to the manufacturing depression of the past year and a half.

Plants.

Authorities agree, almost unanimously, that the plant trade this year was the best ever. Clear, cool, sunny weather brought the people out, and the attractive displays along the highways and byways all over the city were irresistible in charming the dollars out of the public pocket. A little hesitation was manifest around the city hall plaza up to Thursday on account of the disastrous weather of 1908, but after that a great transformation took place and the courageous ones reaped a great reward. In the stores, selling commenced on Tuesday and kept up unabated to the end. Everything went, except a few very large ramblers, azaleas and rhododendrons. Medium to small plants had all the call. Azaleas and lilies were the leaders as usual. Spireas, genistas, Rambler roses, deutzias, hydrangeas, daisies, rhododendrons, bougainvilleas, cinerarias, etc., were conspicuous as usual—as were also the lower-priced items, such as: hyacinths, tulips, daffodils, primulas and geraniums. There was nothing particularly new or striking, but most of the stock was well done, excepting lilies—many of these being on the pigmy order. The fault of the bulbs of course. It is impossible for any grower to fail in handling this crop properly. The pigmys went to the department stores and the street men mostly. Houses like Craig were sold out of lilies and azaleas very early and were at their wits end to find stock enough to satisfy their oldest and most cherished customers. Could have sold a great deal more if they had had the goods.

CHICAGO

Now that the Easter holiday is over the vexed lily problem has become a matter of history. Reports from all parts of the city are verifying our prediction that there would not be an over supply of good lilies. No good lilies were left over and they brought better prices on Saturday than earlier in the week. The market closed strong and more could have been sold had they been available. Very few flowers were shipped into Chicago from

the east. Quantities of out-door narcissi were shipped from the south. This did not affect the sales of good home grown flowers, however. Violets were a disappointment all around. Those arriving from the east on Thursday and Friday were worthless owing to the warm weather, but on Saturday quality was better and brought returns.

The Chicago market was at the mercy of a record breaking spell of weather; had the weather been favorable Chicago would have done double the business for Easter. During the week the thermometer ranged from 78 degrees on Tuesday to 20 degrees on Saturday, with a snow storm, a hail storm and a gale. The only real shortage was in Beauty roses. Long ones were in demand and not one half the orders could be filled. Killarney kept up well in quality and many wholesalers could have handled more of these and Richmond had they had them. Bride and Bridesmaid were about equal to the demand.

Owing to the weather and other local conditions many retailers found it unusually hard this year to foresee the demand for Easter. Some laid in a larger supply of cut flowers, especially carnations, than they could dispose of at the advanced price and this trade turned to plants. Others bought heavily of the large plants only to find the demand seemed all for medium.

BOSTON

Boston, in common with most other floral centres, experienced a very satisfactory Easter. The severe weather complained of elsewhere was not in evidence in New England territory, except for the two unseasonably hot days at the beginning of the week and things were generally favorable for those who wished to sell or to buy Easter plants or Easter flowers. The early part of the week was the most favorable as regards wholesale prices. Following time honored custom, growers maintained an embargo on a goodly proportion of their product early in the week, thus contributing to stable values on most things, if fresh, and then let everything loose on Saturday and thus ruined the market on that day by the over-crowding. Prices on many things were considerably lower than at any time during the week. On violets particularly there was abundant evidence of the flowers having been kept too long on the plants; many of them dropped to pieces on being taken from the shipper's box. On lilies the demand far exceeded the supply and they cleaned up in quick order. The advertised prices were adhered to, but there was plenty of opportunity to advance them had the dealer been disposed to do so. Killarney and Richmond were the best sellers among the roses. Bride and Bridesmaid fell a little behind. White carnations made a good record, but the colored ones were too abundant, and of Enchantment there were many more than the market had need for. Sweet peas went off in very lively fashion.

All that can be said advantageously of the plant trade is that it was very strong—in fact, a record-breaker. But only the moderate-sized and moderate-priced things were wanted. The growers sold out clean, well in ad-

vance, and the retailers followed suit when the time came. There was little of any consequence left over. Lilies were cleaned out early and many buyers had to be disappointed.

BALTIMORE The cut flower market generally has kept pretty evenly balanced as to supply and demand, even during the Lenten season there has been little cause for complaint on the part of either the grower or the buyer. There have been occasions when one or two kinds may have fallen a little short, as in the case of violets, etc., but taken as a whole market matters have gone along very satisfactorily. The Easter trade has been fully equal to that of last year—some claim better—and prices have ranged about the same. In addition to the bulbous stock which kept in excellent shape for the Easter holidays, azaleas, roses—of the Rambler type—Bernuda lilies, rhododendrons and hydrangeas were the most popular. The material generally was in fine shape. We noticed that a batch of hydrangeas grown by one of our houses was finished off better than is usual, the foliage being much tougher and the flowers “pinked” up very nicely. The lasting qualities of this kind of plant is so much enhanced by this hardening process and it is withal so easily effected that it is matter for surprise that growers, especially those having customers they wish to retain, are not more careful in this matter. The writer has noticed this defect in the finishing of hydrangeas in cities other than Baltimore. The cut flowers principally handled in this market for Easter are lilies and callas, roses, carnations, peas, violets, etc., with all varieties of bulbous stock. Cattleyas, gardenias, etc., are offered only in limited quantities.

BUFFALO Monday and Tuesday of the past (Easter) week the weather was ideal and every indication pointed to one of the best, if not a record-breaking Easter business. Trade opened up on Wednesday and advance orders for plants and cut stock came in abundance; but a break in the climate on Thursday with an all day rain and the temperature dropping to 20 degrees, saddened the faces of the trade. On Friday an all day blizzard with enough snow for good sleighing did not help but made the situation still worse. The lily was the leader in the plant line and there was no over supply; but all were sold out by the wholesalers as soon as unloaded. Azaleas also sold well while other stock such as bulbous stuff, hydrangeas, roses, rhododendrons and spirea had enjoyed a fair demand. In the cut flower line there is the usual amount to state. Shipping trade was fairly good and orders were filled with no shortage or notations marked “best could do” as stock was plentiful and good. White carnations were in good demand as well as other colors and there were plenty to fill all wants. White Perfection was had in fine quality, also Beacon and Victory in red; Winsor also in fine form. Roses had a good demand, especially Killarney and Richmond, Kaiserin and Carnot, and excellent stock was received and a good cleaning up was had. Beauties were in good supply and the demand

was for short grades and only a fair demand for the long stuff. Violets were in heavy supply and hardly an order was filled that did not call for a few. There was plenty to be had and the wholesaler had enough left over to fill a good many more orders. Lily of the valley was in fine form and sold well, also peas, the demand being for lavender and pink. Cut lilies cleaned up well. Mignonette was carried over, with a good portion of bulbous stock. All in all, reports from the trade state a good Easter business but would have been much better “if” that dreadful snow storm had struck some point further north, as little business was done on Friday.

DETROIT Although the week doled out a composition of weather which was anything but good and its bad effect must have been felt generally, Saturday brought out the buyers in full force and it was not long before last year's record was reached and overcome in quantity of sales with prices same as last year. Medium priced baskets seemed to be preferred to azaleas. Lilies of course held the lead in the plant line. In cut flowers violets were away ahead in demand for corsage wear. Roses and lily of the valley and many other artistic combinations were also great favorites. Everybody is well pleased with the result.

INDIANAPOLIS The Easter trade was very similar to a year ago; perhaps a little better. Prices of lilies, both cut and in pot, were a little higher than before owing to the shortage. The demand for bulbous stock was much better than other years, although quantities of other stock was handled. The list of finely grown flowering plants embraced all the commercial kinds obtainable, but nothing in the way of a novelty was seen. Lilies in pots and tubs were probably the best sellers, next azaleas and Ramblers. Fansies, forget-me-nots, mignonette and lilac brought good prices. Tomlinson Hall market florists report the biggest trade in years. There were about fifty additional flower vendors about town Easter week, which made inroads on store trade. Every plant grower reports a clean-up, and the majority of the retailers report a most satisfactory Easter trade.

ST. LOUIS The St. Louis Easter trade was large. The cut-flower trade was fully as heavy as in former years and the plant trade was very much larger—some say fully 50 per cent. more than last year. The West End florists report an enormous sale in everything in blooming plants, and some of their show houses look it this Monday morning. In the plant line as well as cut-flowers lilies sold away above all others. Lilies were not too many and everybody reports sold clean out. Azaleas and hydrangeas also had a big call. In other plants everything that looked well sold readily at good prices. Our wholesalers had plenty of everything in roses, carnations, lilies and callas. Sweet peas were in abundance, so was lily of the valley and Von Sion dafodils. California violets, too, were more than enough. These have seen their best days and their quality brought them but small prices. Amer-

ican Beauties in fancy grades were very scarce. Carnations sold well when good. We noticed a great deal of pickled stock in these which, of course, were left unsold. From the reports from the trade in all parts of the city, taking everything in consideration, it was about as good an Easter as we have ever had.

WASHINGTON It is claimed by Washington florists that the Easter just ended has been a record-breaker for sales. It was feared at one time when the mercury went tumbling down on Good Friday eve, that business would be injured to no little extent, but such was not the case, for flowers of all kinds were in demand, with the exception of azaleas, which were superseded in favor by the lavender rhododendron. The decrease in both quality and quantity of the Easter lily is causing some concern, and unless something is done, and that right soon, to ward off inferior stock being brought into the country, Easter will have to be represented by another emblem. In this section fruit is not far advanced and it is thought that the recent “snap” did the fruit no harm.

A REMINISCENCE.

Three years ago, following the Easter trade of 1906, HORTICULTURE spoke as follows regarding the violet business:

“Here, indeed, was a Waterloo. Given the brightest, balmiest Easter morning that ever dawned and it would have been beyond the possibilities to find outlet for the avalanche of violets that poured into this market Saturday afternoon. The American Express alone brought 1000 cases, each containing from 2500 to 6000 violets; this accounts for the “up-Hudson” supply only. Much of this could have been placed through the week previous at fair figures had the growers not hoarded it; as it was, the great majority laid in the crates untouched until Monday. When, if lucky, it went to the growers for something to cover express charges.”

Again, one year later, we referred to the subject as follows:

“Many of them, perhaps half the supply, were of inferior quality and were well sold at very prices; needless and with dropping petals thousands were sold on the streets which otherwise would have been thrown away and there were some even too poor to elicit an offer of purchase from the smallest street merchant. The grower who imagined it good business policy to keep his stock on the plant until it was no longer a violet will now perhaps see things in a different light.”

This year's report on the violet situation corroborates the advice above quoted. But doubtless we shall see the lesson rubbed in every spring for many years to come before it will make any impression on our friends up the Hudson.”

The proofreader can sympathize with the Arizona law makers who, in framing a recent horticultural commission bill, provided for the employment of an “etymologist.” The Phoenix Republican, in commenting thereon, says, “We need the ‘etymologist’ and now that we have got him, though perhaps inadvertently, let us keep him. If the horticulturists think they need an entomologist, let a new bill be passed creating that office.”

During Recess

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The annual banquet and dance of this prosperous organization took place at Horticultural Hall, Boston, on Wednesday evening, April 14. It was one of the worst nights of the season in the way of weather a heavy down-pour of rain with blustering wind making it most unpropitious for such an affair, yet there were over 150 members and their ladies present and notwithstanding its drawbacks the affair was a brilliant success from start to finish. Wit and beauty were there in full quota and music and merriment reigned supreme.

The tables were spread in the lecture hall and were beautifully adorned with flowers, there being no less than fifty large vases of roses, carnations, snap dragons, lilies, larkspurs, salpiglossis and daffodils, contributed by generous members and many hundreds of Killarney and Richmond roses were scattered among the asparagus that wound over the table cloth. We should like to name all the donors but that being impracticable we shall mention none now except to say that Wm. Sim provided an enormous bunch of sweet peas such as he only can grow, for every lady present. Officers, floor directors, aids and all committees are to be congratulated on the completeness of the arrangements and the faultless manner in which they were carried forward until the midnight hour brought the last dance.

Judge C. W. Hoyt, past master of the toastmaster's art outdid his record which all know is a brilliant one. His introductions were felicitous, witty and graceful and his finishing address at the close of the speech making was a gem calculated to inspire everyone connected with the organization with new zeal for its welfare.

President William Downs made a brief introductory speech, appreciative of the good attendance and then introduced the toastmaster who expressed his delight at the opportunity to again meet his old friends, complimenting the club on its prosperity and the fraternal relations which it has for over twenty-one years promoted among the gardeners and florists of Boston. He made a warm, kindly reference to treasurer Edward Hatch, absent in the south on account of illness, but present in spirit and as one well entitled to the love and respect of the horticultural community for his loyal and generous services to the club.

Secretary W. N. Craig spoke next, in words of earnest welcome, topped off with anecdotes told only as this very ingenious gentleman can tell them. He stated that the club's membership is at high water mark at the present time. Vice-president J. W. Duncan followed. He promised something new and sensational in the program for the next regular meeting and invited the ladies to be present at that time. J. K. M. L. Farquhar in a scholarly address referred to the special work being carried on by the club such as the landscape gardening classes and other educational effort, and referred to Edward Hatch as one of the club's staunchest friends. Rob-

ert Cameron spoke briefly in his imitable way and then Peter Fisher was introduced as a man whose reputation encircled the world. He pleaded inability as a speaker but "made good" all the same. Thos. J. Grey, one of the pioneers, made a witty speech, congratulatory and practical in spirit and received with abundant applause. Miss Hannigan contributed some songs, beautifully rendered, and Miss Rifford a piano solo. Corbie's orchestra furnished music throughout the evening. "Auld Lang Syne" was participated in by the entire company and Judge Hoyt was declared a "Jolly Good Fellow" in due and ancient form.

Then Floor Director Peter M. Miller assumed his duties and the young blood of Boston horticulture got busy.

PERSONAL.

James Hargreaves has been chosen superintendent of parks at East Liverpool, Ohio.

John Chapman, late of Chicago, has taken a position with Adolph Brix, St. Louis, Mo.

Pierre Schneider, of Kirkwood, Mo., is now in the employ of A. C. Canfield, Springfield, Ill.

Harry Ludwick, of Coatesville, Pa., will be found hereafter with C. P. Berhard, North Brook, Pa.

George Bestor of Huntington, Ind., fell from a table in his greenhouses and injured himself severely.

John A. Booth, of Newport, R. I., has taken a position as foreman with John E. Thayer, So. Lancaster, Mass.

Harry A. Barnard, representing Hugh Low & Co., England, sailed for home on April 14 on the Mauretania.

Frank Moore, of Flint, N. Y., has gone to Baltimore, Md., to take charge of the interests of the Moore & Carvy Plant Co.

Archie Varden, formerly in the greenhouses of the Ames estate, N. Easton, Mass., has taken a position with a florist in Trenton, N. J.

Chas. F. Brown, who sold his establishment at West Grove a short time ago, has taken a position with his brother, James Brown, at Coatesville, Pa.

John Gardner, has resigned as landscape gardener on the Glessner estate, Littleton, N. H., to take the position as assistant horticulturalist at the Baron de Hirsch agricultural school at Woodside, N. J.

On the evening of April 8 a party of friends called upon W. W. Westland, former superintendent to Francis Blake, Auburndale, Mass., and presented him with a purse containing \$60.00 in gold as a testimonial of their esteem and their appreciation of the many kind entertainments they had received around his fireside. Interesting remarks were made by William Riggs, who introduced T. J. Grey as a proper person to take the presentation speech, which he did very feelingly. The gift was gratefully accepted and the heartfelt thanks of the host and hostess returned. A collation was served and a musical entertainment closed a very enjoyable evening.

Obituary.

Barthosa Rodriguez.

This well known botanist, and author of a celebrated work on the Flora of Brazil, according to a communication from Rio de Janeiro, died in that city on March 6, last, at the age of 67 years. He was the introducer of many valuable plants. Born at Minas, he devoted himself to commerce for a time; was at a later date secretary of trade school, teacher of drawing, and lastly director of the botanical gardens at Rio Janeiro. His chief work was entitled "An Iconography of Brazilian Orchids" (14 volumes, illustrated with 1000 colored plates).

Warren Baker.

It is our sad duty to report the death on the 6th inst. of Warren Baker, second son of William J. Baker, the well known wholesale commission florist of Philadelphia. Deceased was 30 years of age and unmarried. Since he arrived at man's estate he was associated with his father in the wholesale flower trade and proved himself an exceptionally loyal and efficient helper in the business. His bright and genial personality made him hosts of friends and customers, and his early demise comes as a distinct shock to the trade generally.

William Freytag.

William Freytag, a well-known florist of Milwaukee, Wis., took his own life by asphyxiation on April 7. He has been in ill health for some time and the cares of business overwhelmed him. He was 43 years of age. A widow and one son survive him.

Dr. Persifor Frazer.

Dr. Persifor Frazer, professor of chemistry for the Pennsylvania Horticultural Society, died April 7th, aged 62. Deceased was famed as a handwriting expert in addition to his scientific standing, in which he had an international reputation.

Joseph Sondermann.

Joseph Sondermann, born in Germany, died in Brooklyn, N. Y., on April 4, aged 63. For thirty years he has been engaged in the florist business in Flatbush.

Adolph Mieliez.

Adolph Mieliez, 74, of Springfield, Mass., a well-known pioneer in floriculture a quarter century or more ago, broke his neck April 18 by falling from a wagon, dying almost instantly.

E. F. Daly.

Edward F. Daly, a florist of 19th street and Prospect Park, West, died at his home in Brooklyn, N. Y., on April 9.

John Lent.

John Lent, a pioneer florist of the Ohio valley, died April 2, aged 70, at the home of his daughter in Etna, Pa.

Seed Trade

AMERICAN SEED TRADE ASSOCIATION.

Watson S. Woodruff, Orange, Conn., Pres.; J. C. Robinson, Waterloo, Neb., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-seventh annual convention June 22-24, 1909, at Clifton House, Niagara Falls, Ont.

WHOLESALE SEEDSMEN'S LEAGUE.

F. W. Bruggerhof, Pres.; Burnet Land-meth, Sec'y.

Wholesale Seedsmen's League.

The meeting of the board of directors called for the 14th inst. has been postponed on account of illness in the families of two of its members. The new tariff bill was the special matter scheduled for consideration. The following letter is self-explanatory:

April 13, 1909.

F. W. Bruggerhof, Esq.,
Messrs. J. M. Thorburn & Co., New York, N. Y.

My Dear Mr. Bruggerhof:—I am very sorry I shall not have the pleasure of seeing you tomorrow as I have just received word that the President of our company is in the same unfortunate position as myself in having a son very ill, therefore, the Board Meeting has been postponed.

Even if I have to come on to New York especially I shall certainly make it a point to do so as soon as I can see my way clear so as to see you personally.

Think you will be interested in the enclosed copy of the bill I have had made from pages 80 and 81 of the new Senate Bill. While this leaves parsley, corn salad, endive, leek, lettuce, parsley, squash and tomatoes at 10c. per lb., yet I think you will agree with me that it is most desirable that we should have specific duties.

With kindest regards,

Sincerely yours,

W. ATLEE BURPEE.

The following is the excerpt referred to by Mr. Burpee as having been copied from pp. 80 and 81 of the Senate bill.

(Advance Committee Report.)

61st Congress—1st Session.

H. R. 1438.

In the Senate of the United States, April 10, 1909.

Read twice and referred to the Committee on Finance.

AN ACT.—To provide revenue, equalize duties, and encourage the industries of the United States, and for other purposes.

261 Potatoes, twenty-five cents per bushel of sixty pounds.

262 Seeds: Castor Beans or seeds, twenty-five cents per bushel of fifty pounds; flaxseed or linseed and other oil seeds not specially provided for twenty-five cents per bushel of fifty-six pounds;

poppy seeds, fifteen cents per bushel; mushroom spawn and spinach seed, one cent per pound; beet, except sugar beet, carrot, parsnip, radish, turnip and ruta-baga seed, four cents per pound; cabbage, collard, kale and kohlrabi seed, eight cents per pound; egg plant and pepper seed twenty-five cents per pound; seeds of all kinds not specially provided for in this section, ten cents per pound.

263 Straw, one dollar and fifty cents per ton.

264 Teazels, thirty per centum ad valorem.

265 Vegetables in their natural state, not specially provided for in this section, twenty-five cents per centum ad valorem.

The good work done by individuals in the effort to secure specific duties has been quite conspicuous and the trade at large is under obligations to all of them. One of the most active and earnest workers in this connection has been Mr. J. C. Vaughan of

Chicago, as the following letter of appreciation from Mr. Burpee will show:

April 13, 1909.

My Dear Mr. Vaughan:—The enclosed copy of letter to D. M. Ferry & Co. will explain itself.

While the writer has worked earnestly with our Members of Congress and Senator Penrose he is inclined to believe that the seed trade owes more to you than to any one other individual in the line of securing the prospects for specific duties.

Very truly yours,

W. ATLEE BURPEE.

Legislative Doings.

New York state seedsmen and particularly the grass seed houses, were much disturbed over a bill introduced in the Legislature some weeks ago prescribing, as such measures usually do, impossible conditions, but it is not likely to pass at this session, or if it does, its teeth will be drawn. The writer has this from a source unquestionably reliable, therefore the trade need not lie awake o' nights worrying over it.

Most conservative reliable houses admit that the right kind of bill, drawn on reasonable practical lines would be of benefit to honest dealers, and unquestionably some sort of regulation is needed, but the framers of such bills are usually ignorant of the matters they are trying to regulate, and in addition more or less politics is always injected into such measures.

Fortunately for the seedsmen of this state, many of them have "friends at Court," and there is not much danger of any drastic or injurious legislation being enacted. A few such friends at Washington would spare them many anxious hours.

A Thriving Youngster.

Among the younger of the Mail Order houses which has been having a steady and healthy growth may be mentioned the Joseph Harris Co., of Cold Water, N. Y. This business was founded by the late Joseph Harris, one of the foremost agricultural writers of his day, and under the able management of his son, Mr. S. M. Harris, the business has, without the burning of any red fire, attained large proportions, and at the same time has earned a most enviable reputation. The home of this firm is at Moreton Farm, but a few miles from Rochester, N. Y., an ideal country place, and destined in time to become almost as much of a household word wherever seeds are used, as "Fardhook." This firm is a credit to the trade, and young Mr. Harris has earned most hearty congratulations.

Beans and Cucumbers.

No hidden supplies of the Bush lima beans have been uncovered, and the conclusion has been reached that the supply of these beans is exhausted and this is especially true of the Burpee types. The same will be said of the leading varieties of green pod, snap or string beans at the close of the season.

Prices of the standard varieties of cucumbers have eased off materially, but many of the most popular sorts of musk melons are not procurable at all. What another crop failure would mean can be readily imagined.

Cold backward weather still retards counter trade and last week this was of

Aster Seed

Our Aster seed is grown for us by experienced and reliable growers, and cannot be excelled for quality of seed and purity of stock.

PHILADELPHIA NOTES.

A consignment of ten plants of the new hybrid rhododendrons (Metternichii x Catawbiense) has been received by H. Waterer from Japan, and will be carefully tested as to their suitability for the American climate. The variety Metternichii was discovered in Japan about 1875, by Metternich. The new hybrids are remarkable for their fine foliage, and show every indication of being hardy. These ten plants are all that are known to have reached this country so far. The habit is very fine. Colors: white and pink.

A carload of cattleyas arrived at Chestnut Hill recently. These are for a new venture by the enterprising brothers, George and Alfred Burton. Alfred Burton states that one half will go to his establishment, the other to that of his brother George. This business is auxiliary to the rose growing, which will be continued as heretofore. Much new glass has been put up here of recent years, and more is under way.

Supplementing the remarks made in last week's issue as to the danger of our Horticultural Hall being lost to the Horticultural Society it should be noted that while the William L. Schaffer bequest prohibited the sale of the real estate his sister who survived him had that privilege and before she died gave the trustees power to sell if they thought it for the best interests of the Society.

A syndicate built the hall under an improvement lease of 30 years issuing bonds to cover the cost. Some money was made the first few years for the syndicate but none of the bonds were paid off. Of late years, in fact ever since the Bellevue-Stratford was opened, many of the fashionable set have gone there with their social functions, and the revenue of the hall has fallen off to such an extent that it is losing money. The bond holding syndicate are therefore sick of the proposition and would undoubtedly be glad to sell out as there seems little hope of getting their money back.

Then there's the Schaffer trustees. Would they sell? Unless there is a strong sentiment manifested by members of the P. H. S. against it, it is feared they would. All kinds of arguments could be brought in favor of so doing and self-seeking interests with political influence would soon compel an abandonment of the property for little or nothing unless there is powerful opposition to it.

What is needed is, first an effort by the friends of the Society to buy off the syndicate. Then, get our wealthy people to so endow the Society that it will leave an income sufficient to carry on its work without renting the hall. The renting of the hall and the resulting revenue is what subjects the property to enormous taxation. The taxation would very likely amount to more than the revenue and could be escaped entirely if the Society worked only for the encouragement of horticulture and not as a business venture.

A man like Wm. F. Dreer, for instance, with the aid and cooperation of the Schaffer trustees is the proper party to take hold. With his stand-

ing and influence among the wealthy people of the State he would be a powerful factor in raising a proper endowment fund for this time honored society of which he and his forbears are and have been distinguished members and workers.

E. J. Fancourt of the Pennoek-Meehan Co. has returned home from a two months tour—north, west and south. He reports condition of the retail florist trade not quite so good as it was a year ago, especially in the west. Buffalo was one of the busiest cities he visited, and conditions generally seemed to be more favorable in the eastern states. If new building be any evidence of returning prosperity there is certainly a great deal more of it in the east this year.

George Santman, late manager for the Florex gardens, has located at Hatfield, Pa., and has taken his son into partnership. The establishment is known as the Orville Greenhouses, and the firm name is Geo. Santman & Son.

A white magnolia is blooming at the corner of 12th and Walnut. The land there is worth \$172.00 per square foot. It isn't every magnolia that has a gold plated foot-stool like that. The yellow crocuses are in bloom on my lawn at Lansdowne. The festive commuter carries bundles of lawn seed, sweet peas and spades. I guess it's spring all right, at last.

Rock Island, Ill.—In the gale of April 7 whole sections of glass were destroyed in the greenhouses of Henry Gaethje, L. Stapp, and others of the florists in the track of the wind on April 7.

NEWS NOTES.

Branchville, Conn.—G. D. White intends to start in the florist business at Sunnysbrook farm, it is said.

Adams, Mass.—A. J. Boothman lost a large amount of glass in the high wind that prevailed on April 9.

New York, N. Y.—Christatos & Koster, florists, have leased for a term of years the building at 717 Madison avenue.

Marion, Ill.—The Copeland greenhouse was badly damaged in the cyclone which swept over the town on April 6.

Detroit, Mich.—The floral establishment of Frank Holznaegel was so threatened by destruction with wind on April 7 that it was found necessary to anchor the building with wire ropes.

Dunmore, Pa.—Arthur Reynolds, florist, on his return home on the evening of April 4, found that his bride of six months had committed suicide. Domestic unhappiness is said to be the cause.

New York.—The office of the Fernwood Nursery of Stamford, Conn., will be established at 50 West 20th street, New York, on May 1.

Charles Millang secured the big store on the street floor of the Coogan building, Sixth avenue and 26th street, for an Easter plant branch. George Bradshaw and Mike Hart, both veterans in the wholesale trade, attended to customers with neatness and dispatch.

EVERYBODY KNOWS

Gardening cannot be properly done without the aid of an accurate leveling instrument

Bostrom's Improved Levels, No. 2 at \$15.00 and No. 3 at \$25.00, are conceded by all who KNOW to be the only Levels on the market which meet all the requirements, at the price.

Our guarantee back of every Level we sell, and satisfied users in every State in the Union heartily endorse every claim we make.

Shipping weight 12 lbs. Description on request.

MAINE LAW AFFECTING NURSERMEN.

An act passed by the Maine Legislature requires that all "agents or other parties excepting growers who wish to sell nursery stock shall make application for an agent's license and shall file with the state entomologist the names and addresses of nurseries or parties from which they purchase their stock. Any violation of this requirement shall be fined not less than \$10 nor more than \$50 for each offense."

It also defines nursery stock as follows: "For the purpose of this act the term nursery stock is hereby applied to all fruit and ornamental trees, shrubs and vines, and includes currant, gooseberry, blackberry and raspberry bushes, also strawberry plants," so that all parties who are raising such stock for the purpose of selling the same in Maine should apply for a certificate.

In ordering goods please add "I saw it in HORTICULTURE."

MASTICA
FOR Greenhouse Glazing
USE IT NOW.
F. O. PIERCE CO.
12 W. BROADWAY
NEW YORK

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

THE QUESTION OF STRENGTH

IT is conceded that the strongest and most durable structure known is "THE IRON FRAME." And when you have all the **Modern** features combined in this type of construction you have "**The Ideal Greenhouse.**"

The picture shows the beautiful symmetry of my "**Curved Iceless Eave**"—no heavy antiquated shading members. And I also make a specialty of having my work harmonize with surrounding conditions. **Note** how the mason work on greenhouse conforms to that on adjacent stable.

The advice of "**The Practical Greenhouse Builder**" is at your disposal for the asking.

WILLIAM H. LUTTON
West Side Ave. Station, **JERSEY CITY**

COAL Pocahontas Smokeless Coal Blossburg Smokeless Coal

The above steam coals are peculiarly adapted to **FLORISTS'** use. Prominent features are **HIGH EVAPORATION, LOW ASH, LOW SULPHUR, HIGH CARBON, and HIGH HEAT UNITS.** Permit us to figure on your year's requirements, deliverable as called for.

EAVE PLATES

Here are two kinds: our regular Standard Galvanized Steel Eave, which is the simplest and most practical—and the same plate equipped with a Galvanized Steel Drip Gutter. This last is a combination which we patented as long ago as December, 1901.

Both these plates have the cast iron roof bar brackets which firmly secure the bars to the plates and prevent end rot.

Hitchings & Company
1170 Broadway New York

INDESTRUCTIBLE BENCH

Will last a life time — no repairs — easy to erect — easy to take down — perfect drainage — costs less in the end than concrete. Write Lord & Burnham Company, Irvington-on-Hudson, N.Y. for circular.

For Example, Take the U-Bar Palm House

and you can see at once how decidedly more effective this curvilinear, circular house is than a square shaped affair, or even one with octagon corners, would be. Fact is, the U-Bar is the only construction that can be used in building a successful curvilinear palm house — it is the most adaptable construction of the day.

It is the ideal construction for private estates, parks, public institutions and florists' show rooms.

**NEW
ROSE****WHITE KILLARNEY****We Know You Will Want to Buy White Killarney**

Every live, progressive, up-to-date grower who has seen it is buying it; but when you buy White Killarney, be sure you get the right White Killarney (the Waban variety). When you buy from us you get the variety that has been exhibited and certificated, and the one that has attracted such favorable mention.

If you are in the vicinity of New York, we should be glad to have you call and see White Killarney growing at our Scarborough range, and you will say at a glance—as everyone has who has seen it growing—that it is by far the best white rose that has ever been placed on the market.

It is not only a good winter-flowering rose, but is good the entire year, and it is a splendid shipper. Read the following letter received from Mr. Willis N. Rudd, Secretary of the Society of American Florists, dated January 18th, in which he writes as follows:

"Dear Mr. Pierson:—I cannot refrain from writing you and expressing my admiration for the White Killarney as shown at Chicago on Thursday. It is an exquisitely beautiful thing and attracted much attention. I took half the blooms home with me, and they were finer on Saturday than they were at the show. The record is that these blooms were shipped from Tarrytown, staged and exhibited during the afternoon. They were then carefully wrapped up in a box, and remained in that box until one o'clock Friday morning, at which time I reached home; improved in quality up to Saturday, and were in fairly presentable condition on Sunday.

"In addition to being the most beautiful white rose of its class which I have seen, this demonstrates its splendid keeping and shipping qualities."

W. N. RUDD."

We were awarded Silver Cup at National Flower Show, Chicago, for best new rose with White Killarney; also Silver Medal Horticultural Society of New York.

Strong plants, 2 1/4 inch pots, own roots, now ready for delivery, \$30.00 per 100; 250 for \$70.00; 500 for \$125.00; 1000 for \$250.00. Grafted plants, ready April 1st, \$35.00 per 100; 250 for \$82.50; 500 for \$150.00; 1,000 for \$300.00.

Art in the Garden

(Continued from page 527)

FAULTY EDUCATION

In these days schools of art are to be found in almost every city, but it is to be feared that these do not always foster true artistic feeling, as they give so little encouragement to the observation of nature. No doubt these schools are productive of good in certain directions as they assist in producing persons capable of designing useful decorative work and the adapting of geometrical forms to various articles of use and ornament. But skill and cleverness in this work may exist without any true artistic feeling; in fact the latter is usually discouraged by the system pursued at these institutions.

Whatever opinion one may have of the methods of decorating the interiors of our homes, there can be nothing but condemnation when this decorative process of geometrical patterns is brought into the garden, thereby causing the foregrounds of beautiful scenery to be daubed with flower beds formed like a piece of linoleum.

Beauty is not attained by simply filling a garden with beautiful flowers. The total effect of a garden so filled is often marred by the separate effect of its contents. One may have an artistic garden, or a botanical garden—a museum of plants, or a garden like a figured carpet, but not all at the same time.

FORMALITY DESTRUCTIVE OF REAL BEAUTY

The merely decorative ideas of gardeners have often marred our gardens by means of what are known as "carpet-bedding," "mosaic culture," and the "bedding-out" system; in these the natural beauties of plants are lowered to the level of mere color designs, without any reference to the habits and characters of the plants themselves, clipping being generally resorted to for the purpose of keeping the patterns geometrical. No one who is a lover of flowers and who is capable of seeing beauty in nature, would allow his garden to be desecrated by this tracery work.

William Morris in his "Hopes and Fears for Art" wrote thus in connection with this subject: "Another thing also much too commonly seen is an aberration of the human mind, which otherwise I should have been ashamed to warn you of. It is technically called 'carpet-bedding.' Need I explain it further? I had rather not, for when I think of it, even when alone, I blush with shame at the thought." This kind of decoration seems to have been introduced and kept up as a manifestation of a gorgeous and highly elaborate style of gardening—a style which suggests the thought of enormous cost and enormous labor.

THE CHARM OF SIMPLICITY

If an artist wants a subject for a painting he never goes to a garden of this kind. No true artist would prostitute his brush by portraying these "aberrations of human intellect." If he wishes for a beautiful picture he goes along rural byways and there finds many examples of the beautifying effect of flowers being allowed to grow as nature designed they should, and in these cases sees artistic expression based upon the best foundation, viz., simplicity. It was the charm of simplicity which made many of the old-fashioned gardens so restful alike to the eye and brain. In this I do not include the old topiary work—another aberration of the human mind, copied from the Italians and introduced when people were limited to only a few species of shrubs—which is nothing but a brutal murdering of the beautiful forms of trees, mere barbering in fact.

In striving to surround a country home with beautiful

effects we must keep simplicity and naturalness, as opposed to formalness, continually in our mind's eye. If one sees a garden remarkable for its precision, the strictly geometrical sequence of its flower beds, trees closely clipped for the purpose of "harmonizing with the house," and a general air of stiffness pervading the entire surroundings, it may be passed at once with contempt as it has no artistic value.

THERE IS NO ABSOLUTE RULE

Many gardens of this description are designed in a building architect's office and are supposed to "fit the house." In all probability the same plan has been used for many other gardens, and it is a fact that they are often drawn without the designer ever seeing the spot beforehand, or having anything before him except the plan of the house. It is a great mistake to suppose there is such a thing as strict rule in landscaping which is capable of being applied to all sorts of situations. Every home and its surroundings invites its own plan, which when executed should give the property added charms of originality, variety, and character. Conventionalism is entirely out of place in a garden, and it is quite impossible to make a design which will fit every situation.

Artistic landscape architecture will never become capable of being governed by stereotyped rules and regulations, except that what Ruskin wrote may be safely laid down as an axiom, "Nothing is great as a work of art for the production of which either rules or models can be given." The more the laying out of gardens is guided by rules, or fashion, the less it becomes an art and the more a manufacture.

THE BANE OF MONOTONY

Apart from artistic considerations pure and simple, there is also the monotony which is to be found in many gardens which is so painful, and which does away with the possibility of finding any restful, refreshing feeling in them. It must never be forgotten that change and variety are as much a necessity in gardens to satisfy the aesthetic perceptions, to raise pleasurable emotions in the heart and mind, as in books, a gallery of paintings or sculpture. We can no more expect to derive pleasure from a monotonous garden where the bedding is principally on one pattern, than we should from a universe in which clouds, hills, and trees were all of one shape and size. There is nothing satisfying nor lasting about artificiality.

The botanical system of Linnaeus, for instance, a splendid contribution to human knowledge which did more in its day to enlarge the view of the vegetable kingdom than anything before it, was a purely artificial system. But all artificial systems must sooner or later pass away. None knew better than the great Swedish botanist himself that his system, being artificial, was but provisional. Nature must be read in her own light, and as the botanical field became more cultivated the system of Jussieu and De Candolle slowly emerged, unfolding itself as naturally as the petals of one of its own flowers, and, forcing itself upon men's intelligence as the very voice of nature, supplanted the Linnaean system forever.

PERNICIOUS FASHION

Not only is the lack of variety between different parts of a garden bad in itself, but with stereotyped bedding and geometrical borders all gardens become more or less alike; especially when a certain style is, for the time being, fashionable. In these cases there is not only a depressing monotony in our own garden, but when we visit others we find much the same thing; whereas when

true artistic feeling is brought to bear, each garden has a character of its own and every garden its own special features. The landscape architect must make his design thoroughly to fit the situation, and, regardless of fleeting fashion, should use the same pure taste in arranging the living elements of the picture he wishes to produce as an artist does in creating with his brush and colors.

The banefulness of fashion is in nothing more apparent than in the matter of terraces. Allowing architects of houses to interfere with the laying out of gardens is very often the cause of too much terrace, and the ordinary landscape gardener, following mere custom, will even make a terrace on level ground and induce the owner to spend large sums on excavating and walls which have no other effect than to absolutely spoil the place. There are of course situations in which terraces are more or less admissible, as where the ground slopes rapidly from the house and in positions where a level piece of lawn cannot be obtained without, but many country seats have had what might have been fine lawns spoiled by terraces.

AVOID TERRACES

The idea of a terrace was first brought from Italy. At one time an Italian garden was considered the proper thing, but the results of introducing a style—which owing to local circumstances is quite correct in the place where it originated—into a totally different environment, has been in most cases only productive of hideousness. Terraces are necessary on the hillsides in Italy, and were first formed in a rough way by the peasants, otherwise the ground could not have been put to any use, as it is the only means whereby the soil can be kept on the steep slopes. Also on these Italian terraces the beautiful olive is planted which has a double value; it gives a natural and therefore artistic effect, and is at the same time a source of profit to the planter.

Even in those situations where terraces may be considered indispensable, the walls can only be looked upon as necessary evils. Much might be done, although rarely attempted, to soften the bad effect of walls in an ornamental garden by covering them with life in the shape of creepers and other plants.

PLANTING FOR WINTER EFFECT.

In designing a garden the winter half of the year is too often forgotten or ignored, due, perhaps, to the fact that there are many even among lovers of the country who fail to appreciate the charms that may be found in the garden in the depth of winter, and who therefore cannot realize the possibilities in this direction. In this connection we see another point against the inartistic bedding system, for the beds in winter are nothing but mounds of brown earth and the reverse of pleasing even to the inartistic eye. It is a great mistake to suppose there is only bleakness and desolation in the winter. The many evergreens of all shades and shapes capable of enduring winters with a temperature below zero, and the still larger number for the more temperate climates, must, to everyone with any knowledge of plants, forbid such a supposition. Then there are amongst the deciduous species many having their bark of bright pleasing hues, harmonizing well with the dark evergreens and thereby adding additional charm to the winter picture.

A KNOWLEDGE OF PLANTS ESSENTIAL.

Bearing this brief outline of the general principles of our subject in mind, it must be apparent that to be successful a landscape artist must not only be capable of designing the framework, as it were, of a garden, but he must have a thorough knowledge of plants. Without the latter it is impossible for anyone to achieve a result which will be truly a work of art.

Every plant has its own peculiar character. Shape, color of leaves and bark at the different seasons, height and habit of growth, evergreen or deciduous; these and other traits all go to make up character. The characters of plants must be known and studied before any one can compose them into a harmonious whole. To expect success without this knowledge is like expecting a person without any knowledge of the tones of music to compose an opera. But, as it is true that even with a knowledge of music one may be unable to compose, so likewise the possession of a thorough knowledge of plants does not necessarily include the gift of designing artistic landscape effects.

The wide range of plants which in the present day can be used in landscape architecture, the equally numerous varieties of situations which the designer can be called upon to deal with preclude the, what may be termed, practical side of this question being touched upon in this paper. Nor, as previously mentioned, is it possible to lay down any fixed rules. Every situation has its own distinctive natural features, with which the artist must harmonize his garden. The fundamental point is to study nature, and it will be found that "Nature never did betray the heart that loved her."

Arthur S. Davis

Davallias

The genus *davallia* contains some of the most useful forms that are known to commerce. *D. Mariesii* trained over peat to form junks, monkeys, elephants, etc., demonstrate to what useful purposes many *davallias* can be put to. A native of Borneo is *D. parvula*, the fronds of which never exceed one inch in length, and being situated on the rhizome rather closer than in many *davallias* lends itself readily to treatment when allowed to grow over an old peat stump; in this form it is useful when employed in table decoration, a miniature pyramid of living fern being at once novel and distinct. Perhaps one of the best known varieties is *D. canariensis* (hare's foot fern), its prostrate stems creeping downwards over the side of the pot. It is a good subject for the dwelling room.

Another meritorious dwarf variety is *D. Tyermanni*, fronds dark, of leathery texture, silver rhizome, and of great durability for cut purposes. *D. dissecta* is a rapid grower, excellent when raised from spores in its small state, and *D. bullata* makes a charming subject for basketwork. Among the larger varieties one of the best known possibly is *D. filijensis plumosa*, the rhizomes of which are usually horizontal, in this respect differing from *D. canariensis*, although both varieties are identical in regard to the brown scales and thickness. *D. plumosa* is an excellent exhibition plant and so also is *D. hirta cristata*, usually known as *Microlepia hirta cristata*, the pale green color of its heavily tasseled fronds making it remarkably distinct. It will thrive in a night temperature of 50 degrees, therefore is suitable for house decoration. This variety does not readily produce spores but is easily divided with success. *D. tenuifolia Veitchiana* is one of the most graceful varieties in cultivation, an excellent subject for basket work and does not dislike the sun; it grows erect from the centre from two to three feet high and its light feathery fronds bend gracefully over and around the basket.

In regard to cultivation very little loam should be used. They delight in compost chiefly consisting of

Trained Rambler Roses

As Grown by Wm. Kleinheinz, Ogontz, Pa.

LADY GAY

"Umbrella." Three in a 14-in. Pot.

DOROTHY PERKINS

"Pyramid." Three in a 14-in. Pot.

DOROTHY PERKINS

"Balloon." Three in a 14-in. Pot.

Our photographs illustrate some of the results obtainable from these rambler roses with care in the culture and training. The specimens were grown by William Kleinheinz of the Widener Conservatories, Ogontz, Penna., and comprise, each three plants grouped in a 14-inch pot each plant having been grown one year

in a seven-inch pot before being combined to three in a 14-inch.

L. G. Bretson

peat, sand and a little charcoal. Watering overhead should be avoided and plenty of water is desirable at the roots. The creeping stems should be kept recumbent on the surface of the soil and kept pegged down either to the soil or to the outer surface of the basket, although in the latter case tying may be adopted. In case it is desirable to confine the creeping stems, cutting off the tips may be resorted to without injury to the plant. During the resting season water may be partially withheld although by no means entirely.

Vernon G. Sherwood.

British Horticulture

THE TRADE OUTLOOK

So far the season has been very unfavorable for the nursery trade. The long, and at times severe winter, has put everything behind, whilst considerable damage has in many cases been caused by the frost. The bad weather has also prevented a prompt execution of the orders, as it has been impossible to get on the land to handle the stock. Then again, the general depression which exists in trade throughout the country is bound to exert its influence in this branch of commerce. There is one bright ray in the gloomy outlook, and that is the increased attention which is now given to gardening amongst villa-residents. The wide extension of the number who are enthusiasts in this health-promoting hobby has proved very beneficial to the nursery and seed trade, and has given a great impetus to the business in late years. Judging from the heavy advertising bills of some firms, an enormous trade must be done in catering for the amateurs. The fact that about a dozen gardening papers are flourishing in this country is also another

indication that horticulture, despite the temporary depression, is retaining its hold on the British public.

THE FLOWER MARKET

The floral department of Covent Garden market has lately been abundantly supplied with roses, Catharine Mermet particularly making a good show. Other varieties finding favor with market growers include Bridesmaid, Kaiserin A. Victoria, General Jacqueminot, Marechal Niel, Perle des Jardins. Carnations make a good display, but values are much lower than was formerly the rule. Amongst the whites, White Perfection is well to the fore. The bulb growers are now reaping their floral harvest. Large quantities of daffodils are being sent from the Scilly Islands. Some good specimens of lilac have been forwarded from French and English growers. The tulips coming forward include some excellent samples of the Darwin varieties. In the pot plant section, azaleas are a prominent feature, whilst there are some good lines in ericas, such as E. Cavendishii, E. persoluta alba, and E. Willmoreana. There is also a bright array of stocks, cinerarias, cyclamens, tulips and hyacinths.

A VALUABLE BEQUEST

British horticulture has benefited materially from the will of the late Mr. John Innes, of Merton, Surrey. A sum which will produce £8,000 per annum has been left for the endowment of a horticultural institution. A scheme has now been framed by the Charity Commissioners. In addition to the maintenance of a park at Merton, and minor charities the principal sum is to be utilized "to establish and maintain the institution for the purposes of affording practical and scientific training for those engaged or desiring to be engaged in the industry or employment of horticulture."

The call of duty

It is not pleasant to contemplate the possibility of the Pennsylvania Horticultural Society's losing their beautiful home, Horticultural Hall in Philadelphia. And to think of the Philadelphia Florists' Club having to vacate those hospitable quarters where the spirit of brotherly love has shed its lustre so many years and the stranger within the gates has always found a warm welcome—why, it's simply preposterous and it would be a calamity of far more than local application. The entire country will watch eagerly for the good news that Philadelphia's shining lights in horticulture have been equal

to the emergency and that Horticultural Hall has been saved to horticulture for all time.

Boston
 in 1920, perhaps

Among the propositions of sensational magnitude for the future, the suggestion of an International Fair at Boston in 1920 in honor of the three hundredth anniversary of the landing of the Pilgrims, will take first rank. Just how much force there is behind the project is not yet apparent and whether Boston will care to repeat the experience which other cities have gone through, especially in the way of recovery from the effects of these big Expositions, is a question, but if it is to be undertaken the intervening time—eleven years—is not too long in which to fully prepare for an enterprise so colossal in character and in commemoration of an event so momentous in the history of human progress. Should the project be undertaken it goes without saying that the horticultural department of it will be in all respects aware ahead of any previous effort in that direction.

The rose
 and its advancement

We are inclined to agree with W. H. Elliott's opinion as expressed at the meeting of the Gardeners' and Florists' Club of

Boston, that the rose is now well started on the same road that the carnation has been travelling for some time back—that is, that the number of new roses produced from now on will be sufficient to relegate successively to the rear and final obscurity, varieties that may attain prestige and popularity in the flower market. As is well-known the list of commercial carnations of ten years ago is practically extinct and a similar fate probably awaits the pet varieties of today after a few years roll along and bring to the front new and improved varieties. And this may be expected without considering the oft-debated theories of the deterioration of varieties under greenhouse culture. The long reign of the Bride, Bridesmaid and American Beauty is not likely to be duplicated by any of their successors. Once fairly under way the business of producing new varieties of roses will undoubtedly make things interesting for the trade and there is no good reason why the carnation history should not be repeated in the case of the rose.

The cement
 greenhouse bench

The question of cement versus wooden benches for greenhouse use has been a prolific subject for discussion within the past few years.

Some of our ingenious fellow florists have put their inventive brains at work and, as our columns have testified from time to time, the result has been the placing on the market of several methods of construction—each having some valid claim on the attention of the growers who, after life long experience with short-lived wooden structures, are ready to listen to the facts regarding something more durable and more satisfactory. There have been establishments where, with the needed help and facilities, "home made" cement benches have been constructed and made to fill all requirements. We believe, however, that better satisfaction will come in the long run to those who turn over the work to the specialists who are doing it as a business and who, with the competition now existing, are not likely to charge for the work anything more than a fair figure. What-ever trivial objections may arise as to the use of cement benches it cannot be denied that the tendency in greenhouse structural work today is away from wood or other short-lived material and the man whose repair bills are the smallest will have most to say in establishing the selling price of the greenhouse products of the future.

After Adjournment

The gardenia, as is its custom at this season of the year, is about to come down from its lofty perch and give everybody a chance to get acquainted. See advertisement of Miss A. Washington.

Greenhouse men who have used the Revere Hose this season speak well of its lasting quality. For lawns and garden plantations it has already a first-class record. One of its best recommendations is its freedom from kinkiness.

The florists' supply men are gradually warming up for Decoration Day and the June wedding and graduation gaieties. Watch the advertising columns of HORTICULTURE if you have anything ahead in that line. You'll have no need to look anywhere else. Ask the specialty and supply men who advertise in HORTICULTURE to send you price-lists and prospectuses.

"Horticulterists have discovered that roses and mignonette cannot live together. If the two flowers are placed together in a vase both wither within half an hour."—Boston Globe.

The author of this remarkable bit of news didn't go back far enough in his investigation before forming his conclusions. Chances are that those roses and that mignonette came from rival establishments and were too well-trained to enjoy one another's society. Why, we have repeatedly known flowers to drop from first quality to third rate in the simple process of crossing from one wholesale establishment to a rival place on the opposite side of W. 28th St.

We have seen a copy of a Brooklyn, N. Y., paper in which appears in full an address on "Fletcher and Fletcherism" made by J. Austin Shaw before the Franklin Literary Society. We allude to it now, because the lecturer is "one of us" well known to the trade, and further because his subject—that of health and longevity—is one that will appeal to every human being. Therefore, there may be many who would like to read it—for it is very readable—and no doubt our friend Shaw would be glad to supply any applicants. Nearly two centuries ago there lived a man, John Armstrong by name, who in an essay on the Art of Preserving Health, wrote:

"Of right and wrong he taught truths as refined as ever Athens heard; And (strange to tell!) he practiced what he preached."

So we now serve notice on Brother Shaw that an Argus-eyed watch will be put upon him when next John Nugent carves a turkey for the New York Florists' Club.

During the past two years HORTICULTURE has taken opportunity on various occasions to call the attention of the plant and flower growers to that labor-saving, fuel-saving and worry-saving invention known as the Castle Automatic Circulator. We did this, as we do it now, because we believe we are conferring a substantial benefit on the horticultural fraternity in so doing. We are pleased to be able to publish in full the following letter from

Thomas Roland of Nahant, Mass., which should be carefully perused by any grower using hot water for greenhouse heating. As to Mr. Roland, he is known all over the country as an expert plant grower with no superior, a trustee of the Massachusetts Horticultural Society and a man whom no inducement would influence to write such a testimonial unless every statement was unqualifiedly true.

Copy.

Mr. W. W. Castle,
Mr. W. W. Nahant, Mass., April 24, 1909.

MY DEAR SIR: Last September I had you install one of your automatic circulators in my plant at Nahant. In order to heat these houses water had to travel two feet and 15 feet below the boilers. Previous to placing the circulator I was compelled to use steam, running an extra boiler to supply heat for these houses. I have used the past winter hot water solely, changing the steam system over entirely. The upper houses were also attached to the forced circulation, and I am pleased to report that not only have I received great benefit in those houses which were on same level as boiler, but with those 15 feet below the level have been able to maintain and regulate the heat to my utmost satisfaction. No other apparatus that I have ever seen or knew of could give me the same economical results. I consider your new circulator an indispensable adjunct to any heating system.

I propose to extend my plant by constructing new houses on this lower level the coming summer. Convinced that the question of heating same by hot water from my central station is satisfactorily demonstrated, I cannot see where I could afford to be without it.

Should be pleased to show the system to any interested, and you are at liberty to quote me fully to any one desiring information.

Yours truly,

(Signed) T. ROLAND.

A NEW PLANT ESTABLISHMENT.

Brief mention was made in our columns last week of the resignation of Alois Frey from the position of head gardener at Lincoln Park to conduct a commercial business at Crown Point, Ind. Mr. Frey has raised some noteworthy crosses, especially in cinerarias and chrysanthemums and these will be among the specialties at his new place. Some of his best new anemone-flowered and single chrysanthemums are catalogued and illustrated in Elmer D. Smith's latest list. They were among the most admired features at the National Flower Show in Chicago last November.

ROSE BABY DOROTHY

As a Pot Plant, Can Be Sold by Thousands.

Personal

J. Hanna has taken a position with the Baur Floral Co., Erie, Pa.

Miss Cora Hapgood has taken a position with J. V. Lavar, Erie, Pa.

The Alpha Floral Co., Chicago, are fortunate in securing the services of Miss Elsie Schnapp.

John C. Elliott has taken charge of Dr. L. D. Ward's place, "Brooklake," Madison, N. J.

Mrs. W. J. Smyth of Chicago has been called to California on account of the death of one of her parents.

O. Beeb, manager for Charles Eisner of Pittsburg, Pa., is reported as ill with blood poisoning from rose thorns.

Charles Biederman, of the firm of Biederman & Schultz, florists, Kansas City, Mo., was stricken with hemorrhage on April 12.

F. W. Timme, well-known florist and writer on florists' topics, is said to be recovering rapidly from a recent paralytic stroke, at his home in Chicago.

James Hutchinson, for three years orchid grower to Dr. Shafer, Pittsburg, Pa., has given up private gardening and taken up landscape work in and around Pittsburg.

The Meriden (Ct.) Journal in a recent issue presents the portrait of Linus Birdsey, a prominent nurseryman of the town, who observed his eighty-fourth birthday recently and is still vigorous and active.

Lyman B. Crawl of the Lord & Burnham Company, who recently underwent a very serious operation at the hospital, is now at home and improving rapidly, and anticipates being back in the harness about May 1st.

John Heereman of Palmetto Bluffs, S. C., formerly superintendent to A. R. Whitney, Morristown, N. J., spent, with his family, a few days with his successor there, H. B. Vyse. Now he goes to see his brothers Fred and Harry in Lenox.

Merlin Harris has left the Plant estate, Groton, Conn., to take a position with Dr. Shafer, Pittsburg, Pa. Mr. Harris' experience amongst orchids, gained in the orchid department of Hugh Low & Co., Enfield, London, eminently fits him for this position.

A HOUSE OF WHITE KILLARNEY ROSE.

Our columns contain more than the usual proportion of rose matter this week and favorable mention is made of White Killarney, the sensational introduction of the present season. Our cover illustration shows a view taken early in the season in one of the big Pierson houses devoted to this variety at Scarborough, N. Y. This rose has made a phenomenal record so far at the Waban Rose Conservatories where it originated and with the F. R. Pierson Company who are joint disseminators and at every exhibition where it has appeared it has been the centre of attraction and honor. Orders for stock are enormous and the fight for supremacy in the flower market over the Bride will soon be on.

NEWS OF THE CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

It has been noted that the attendance at the April meeting of this club is invariably the smallest of the entire year. The fact is readily explained, of course. Still, seventy-five is not a bad audience, especially when the quality grades high, and that was the number approximately which turned out last Tuesday evening to greet Louis Reuter and listen to his excellent paper on Roses, which appears in another part of this issue of HORTICULTURE.

Mr. Reuter's talk was listened to with close attention and its close was the signal for a regular "field night" of debate, participated in by W. H. Elliott, Eber Holmes, Kenneth and Duncan Finlayson, J. W. Duncan and other war horses and lasting until the participants had to scurry for the last trains home.

In answer to questions Mr. Reuter said that all his roses are grafted stock with the exception of Chateaufort and a few of My Maryland. Regarding the latter he said that the grafted stock seemed more inclined to take a winter rest than the own-root plants and for this and other reasons he is disposed to favor the own-root system for this variety. He will, however, try a few more grafted stock the coming year, with a little higher temperature and will also give this promising variety a trial for summer blooming.

W. H. Elliott suggested that the aggregate results from a section of 100 running feet of bench would be a better basis for comparison of profit than the record of the number of flowers cut. His experience had been that Richmond, Bride and Bridesmaid, had yielded scarcely one-half of the results which Killarney had given him. Rhea Reid had been a disappointment at the finish but it just narrowly missed being a big success and he proposed to hold on to it for another trial. Eber Holmes pronounced Killarney to be the best paying rose grown. Bridesmaid better than Bride. He advocated low benches—12 to 18 inches—for economy. He spoke of the risk of allowing blooms of new varieties to get out of the introducers' hands and instanced how certain parties had propagated White Killarney surreptitiously from fragments of stems and said that the wise man would keep his novelties absolutely under lock and key. He estimated that in the hands of a clever propagator with adequate facilities, a single eye might be increased to a quarter million rooted cuttings within two years.

On the exhibition table were some superb exhibits, including *Rhododendron præcox* from Robert Cameron, snap-dragon from Wm. Swan, semi-double rose pink larkspur from W. N. Craig, My Maryland rose from S. J. Reuter & Son, alpine plants from Mr. Cole and roses in variety from Montrose Greenhouses.

Rhododendron præcox is one of the deciduous species which blooms before the foliage appears. It is a hybrid between *R. ciliatum* and *Daphniphyllum*, the flowers crimson pink. Mr. Swan said that his antirrhinums had been raised

from cuttings last June from seed which he had been selecting for seven years and kept at 40 deg. to 45 deg. during the winter. Four to five spikes were left on each plant. These spikes were of extraordinary size—nearly two feet of flowers and buds. Mr. Craig stated that his larkspur had been sown in late November. The flowers keep fully ten days in water. In a discussion concerning *Canna* Tarrytown it was asserted by Mr. Holmes and others that it is quite distinct from *Canna* Admiral Dewey.

An invitation was received from E. J. Shaylor for the club to visit his peony gardens in June.

PASADENA GARDENERS' ASSOCIATION.

The fourth annual spring flower show of Pasadena Gardeners' Association was held on April 1, 2 and 3, the show being opened by Mayor Thomas Earley, who gave a brief address. Three years ago this show was held for the first time in the Auditorium, which was a small hall over one of the business houses. Step by step it has grown, and the promoters found it necessary to erect two large tents near the famous Hotel Green.

The tropical effect and appearance presented a most impressive spectacle. The exhibit of Henry E. Huntington was a grand sight. Tree ferns, *Cocos plumosa* and many other palms of the like nature mingled with rare flowering shrubs, and a fine plant of *Bougainvillea lateralis* by E. H. Rust made a fine spectacle. Howard & Smith also had a very interesting exhibit of flowering plants and Japanese shrubbery, illuminated at night by Japanese lanterns. Some very fine water lilies were exhibited by E. D. Sturtevant. Thomas Chisholm of the Pasadena Nursery presented a fine display of dwarf Japanese shrubbery and ferns.

The regular prize list was lengthy, comprising carnations, roses, antirrhinums, pansies, nicotiana, schizanthus, phloxes, stocks, sweet peas, violets, marguerites, *Gerbera Jamesoni*, delphiniums and a general list of annual garden flowers, besides callas, irises, watsonias and bulbous stock; also peonies and other herbaceous stock and shrub bloom. The winners were equally numerous, the list of winners of firsts numbering between 25 and 30 exhibitors, mostly amateurs, among which the names of Mrs. S. W. Allerton, C. H. Garvey, Mrs. E. M. Fowler, D. R. Cameron and W. F. Kendall were most often repeated. A number of special awards and certificates of merit were also distributed.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Advisory Committee for the S. A. F. Trade Exhibition at Cincinnati.

President Valentine has appointed the remaining two members of the Advisory Committee for the Trade Exhibition. The committee now stands: Albert McCullough, chairman; R. Witterstaetter, E. G. Gillett, W. N. RUDD, Secretary.

April 16, 1909.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The regular monthly meeting of this Society was held in Pembroke Hall, Glen Cove, on Wednesday evening, April 14th, with a good attendance. Messrs. Holloway, MacKenzie and Ingram acted as judges at the monthly exhibition. G. Wilson was again leader in the points competition and now has a substantial lead in the fight for the gold medal.

The judges' awards were as follows: G. Wilson, Frau Karl Druschki roses, 93. Paul Reul, antirrhinums, 86 1-3. Valentine Cleres, carnations, 86 1-3. Henry Gaut, sweet peas, 86. James Elmslie, carnations, 81 1-3. Some of the flowers and plants for exhibition were also worthy of note. Especially fine was *Miltonia Blueana nobilior*, shown by Julius Roehrs Co. of Rutherford, for the first time in America. The judges awarded it a certificate of merit.

E. Fardell was awarded a cultural certificate for a vase of Queen Alexandra stock. A pan of *Salvia Zurich* shown by Paul Reul was much admired.

J. Ingram read a paper on orchids. Previous to starting business as a landscape gardener, Mr. Ingram grew orchids extensively and successfully in a private establishment. His essay therefore was interesting and instructive. The essayist dealt briefly with the cattleya fly, but offered no suggestion as to how it could be entirely eradicated. It can be kept in check, he said, by persistent fumigation and by cutting out infected eyes or buds.

On request Mr. Roehrs explained the origin of *Miltonia Blueana*. He said it originated in France about fifteen years ago and is a cross between *M. vexillaria* and *M. Roezlii*. *M. Blueana* is still scarce as it is difficult to grow. Mr. Wilson and E. Fardell gave brief talks on how they grew their respective exhibits.

W. H. MACKENZIE, Cor. Sec'y.

NEW ORLEANS HORTICULTURAL SOCIETY.

The regular meeting of the above society was held on April 15. In the absence of President R. Steckler, Vice-president H. Scheuermann presided. Trade reports were made by several members, in which it was shown that the Easter business was a great deal better than last year, many florists having a larger demand than they could accommodate.

An invitation to the members of the society to attend the annual barbecue given by A. Alost of Rose Villa, Gentilly Road, on May 2 was received and accepted with pleasure, and a committee on transportation, etc., consisting of J. Steckler, P. Abele and P. A. Chopin was appointed.

R. Eichling, grower for the U. J. Virgin establishment, exhibited some fine specimens of snap-dragon, Spanish iris, and sweet peas. J. A. Newsham exhibited some carnations which he had grown out of doors, which were as good as and in better condition than those brought here from the North, and he found that they last longer than northern grown carnations.

CHAS. R. PANTER, Sec'y.

MORRIS COUNTY GARDENERS' AND FLORISTS' SOCIETY.

A very interesting meeting was held April 14th. It being the annual "Rose Night," something like sixty members were present. Wm. G. Badgley, of Chatham, read a paper on the Rose. It was a very able effort and received a rising vote of thanks. The growers engaged in an entertaining and interesting after-discussion. A fact was brought out that I haven't seen in print yet, which is that the American Beauty grown in cement benches has proved almost a failure. This was a universal expression amongst the large growers around here. The theory advanced is that, being a gross feeder, it absorbs an injurious element from the cement. Whatever the cause, the fact remains the same and a timely warning was given to those thinking of experimenting in that line. Among those who discussed this and other points of the rose were David Falconer, John R. Mitchell, Wm. Muhlmichel, Wm. G. Badgley, Joseph F. Ruizicha and Chas. H. Totty.

The various exhibits were fine. In novelties, F. R. Pierson Co. had White Killarney in grand form, and S. J. Reuter sent My Maryland. Both received certificates of merit as well as a vote of thanks. Cultural certificates were received by the following:

Brant-Hentz Floral Co. for American Beauty; Joseph F. Ruizicha for American Beauty, Bride, Bridesmaid and Richmond. Geo. Harvey for Bride and Bridesmaid. David Falconer for Bridesmaid. Wm. G. Badgley for Bride, Bridesmaid and Killarney. C. A. Work, gardener Wm. Muhlmichel, for Richmond. Mrs. G. F. Stone, gardener Ernest Wilde, for Killarney. C. R. Hedden, gardener Alex. Michel, for glaxinas.

H. B. Vyse, gardener to A. R. Whitney, Morristown, secured the Bunyard special prize for best plant in flower, with a magnificent plant of *Cineraria stellata*. This makes the second time Mr. Vyse has captured this prize. Last year a specimen of *Calceolaria hybrida* did the work for him.

A most unusual and attractive exhibit of indoor grown vegetables was made by Florham Farms. In quality and appearance they were A No. 1 and arranged with rare taste. Sweet corn, peas, new potatoes, lettuce, cauliflower, string beans, cucumbers, tomatoes, carrots, turnips and a number of other things were in it. Besides a cultural certificate the committee awarded a gratuity prize of \$5.00 which on motion of Mr. Herrington went to the grower, Percy Herbert.

Wednesday and Thursday, Oct. 27 and 28 next, were the days on which it was decided to hold our next annual Flower Show, in Assembly Rooms, Madison, N. J.

The society promised its support to the new Sweet Pea Society about to be organized. H. A. Bunyard is interested in this. He also seeks to induce every member to attend the annual outing of the N. Y. Florists' Club.

We had with us our past president, John Heeremans of Bluffton, S. C., who is still one of our active members and a hearty welcome was given him. He goes on a visit to his brother Fred, in Lenox, before returning south.

"Fertilizers" is the subject slated for May. We hope to secure a speaker

from the State Experiment Station in New Brunswick.

EDWARD REAGAN, Sec.

MINNESOTA STATE FLORISTS' ASSOCIATION.

At the meeting on April 13, at Merriam Park, the Fair Committee of the association reported progress. If the state fair management is able to get an appropriation from the legislature for a new Agricultural Building, then our prospects are bright, for we'll not only get about all the space we've been asking for this year, but the premium list, submitted by the committee, will be accepted. If we cannot get the room wanted, the premium list will be cut pro rata. The question came up, whether it would be advisable to lower the annual dues of the society (at present \$5.00), so as to enable more of the employees to become members; or if a lower rate should be established for employees only. The sentiment was that a special lower rate would look too much like charity and would not put the employees on the same footing as the employers. Motion was made that each employer should make a special effort to bring, if possible, every one of his employees to the next meeting and then have it discussed. What are they doing in other organizations in regard to the above?

Professor A. G. Ruggles, of the Agricultural Experiment Station, gave a very interesting talk about insects in general and the anatomy of caterpillars, of which an enlarged model was shown. A hearty vote of thanks was given to Mr. Ruggles.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The regular monthly meeting of this society was held on the 19th inst. On account of the bad weather, exhibits were very limited. A motion was passed inviting the National Association of Gardeners to hold their convention and exhibition during the society's spring exhibition, March 15, 16 and 17, 1910. William Kleinheinz, gardener for P. A. B. Widener, is the president of the association this year, and stated that already fifteen cups were offered for competition in various classes. Resolutions were passed on the death of Persifor Frazer, who held the position of professor of chemistry for the society for many years. A committee was appointed to arrange the dates, etc., of the annual sweet pea, peony and rose exhibitions. This committee consists of Messrs. Lonsdale, Long, Batchelor, McLeary, Kleinheinz and Hurley. Several additional prizes will be offered for Hybrid Tea roses—this class being now of commanding importance and becoming more popular every year. The dates of the shows mentioned cannot be fixed ahead, as it all depends on the earliness or lateness of the season. At least ten days' notice will be given to intending exhibitors.

The Grand River Valley Horticultural Society met at Grand Rapids, Mich., on April 13, and the subject of pruning was under discussion. W. L. Cukerski, former superintendent of parks, spoke on pruning of ornamentals in an interesting manner.

ROYAL HORTICULTURAL SOCIETY.

An extensive exhibition took place at the Society's Hall, London, on April 6, at which orchids formed the chief attraction, and narcissi, forced hardy shrubs, carnations and cinerarias the next items of interest. Conspicuous in the display of Messrs. Armstrong & Brown were *Dendrobium nobile* *Virginalis*, D. Alice Bound—a largely magnified D. Wardianum, D. Bryan—a white flower with an orange-colored stain in the throat traversed by crimson lines, D. Rubens grandiflorum, D. Cybele nobilium, D. Artemisia—a fine spike of flowers with rose colored sepals and petals—and a rich velvety patch on the lip, and the pure white flowered D. Jamesianum: the yellow-flowered Laelio-Cattleya Mercia, Brasso-Cattleya Madame Hye, Odontoglossum Rolfeae, O. Ossulstronii, etc. Messrs. Charlesworth & Co. showed among other orchids of merit Laelio-Cattleya Elinor, a bloom of a bright orange tint, Phaius Normanii the blooms of which are of a light pink tint and the lip of a lurid purple with a few golden yellow lines running down it. L. C. Dominiare was a gorgeous flower, and the truss consisted of five large blooms. *Odontodia Lutetia*—and a Brasso-Cattleya Marathon were attractive hybrids.

Messrs. J. Veitch & Sons showed Brasso-Cattleya Veitchi, the conspicuous feature of the bloom being the purple colored throat stained with orange and striped with crimson. *Cymbidium insigne* Sanderi has flesh pink sepals and petals and a lip densely spotted with crimson. H. S. Goodson, Putney, showed a *Sophrora* Laelio-Cattleya, a nice plant bearing three expanded flowers, and *Odontodia* Ernest Henry (*Odontoglossum* Queen Alexandra x *Cochlidia* Noetzeliana).

A. W. Jansen was exhibitor of a variety of *Cattleya* Schroderei under the name of Irene, a large bloom with a much fringed lip and yellow staining in the throat, the general color of the flower a light mauve. From Sander & Sons came the beautiful *Cattleya elata* (C. Trianae x C. Lawrenceanum) and a handsome *Odontoglossum* Dreadnaught for which an award of merit was bestowed; *Odontoglossum* Angele, a grand spike with eight expanded blooms—award of merit. Lieut. Col. G. H. Holford received a like award for *Od. Sylvia*, a cross of O. cirrhosum and O. Rolfeae. Sir Trevor Lawrence, president of the society, was awarded a botanical certificate for the curious orchid *Megaclinium bufo* which has a black-brown knifeblade-like spike up which minute flowers appear to creep in single file.

Miss Clara Mangles showed cross bred Himalayan *Rhododendron* Rose Mangles whose blooms are slender, campanulate in shape, outwardly rose pink as regards the lower shaft; and inside the tube, and at the edges of the flower of a pale pink tint. White flowered *R. campylocarpum* and *R. Hookeri* Rose Queen were other notable varieties shown.

Messrs. Paul & Son were the exhibitors of the new *Wichuraiana* rose, Lady Godiva, a sport from Dorothy Perkins, a blush colored bloom, very pretty and free; and a hybrid musk

rose—Snowstorm—a variety that forms a dwarf climber or a bush. It is a perpetual and continuous bloomer. The blossoms are white, and of small size, coming in bunches of 5 to 25.

FREDERICK MOORE.

PARK SUPERINTENDENTS MEET.

An informal meeting of Park Superintendents and those of kindred work was held April 16th, ten members present, at the Litchfield Mansion, the headquarters of the Park Department of the Boroughs of Brooklyn and Queens of New York City.

They received a most cordial welcome from Park Commissioner Kennedy and Park Superintendent Zartman. The photographs of the New York parks to go to Seattle were exhibited and admired, and also an exhibit of methods of treating injured trees and of preventing insect troubles. There was a walk through Prospect Park with free discussion of the different features and modes of construction, a visit to the Flower Garden Cafe, an automobile ride through the Ocean Parkway to Seaside Park of twelve acres, which has the record of the quickest constructed park in this country of its size,—it was completed in forty-three days after the first stroke, and is a beautiful spot which now gives no suggestion of its quick construction, for the work shows all the evidence of thoroughness.

A lunch was enjoyed at the Montauk Club, followed by a discussion on park administration in which Commissioner Kennedy gave some most valuable facts and suggestions. A talk by J. A. Pettigrew of Boston, on how to prevent the destruction of roads by automobiles was very valuable. He seems to have found a method. Altogether it was a profitable and enjoyable meeting.

John H. Beatty, Superintendent of Parks, Borough of Manhattan, New York city; Peter Zuger, Supervisor of Gardening, Park Department, Hartford; and C. H. Hachler, Superintendent of Mr. Clarence Mackay's estate in Roslyn, were elected members. The next meeting is to be held in Boston, June 18th.

DOBBS FERRY HORTICULTURAL ASSOCIATION.

A meeting of this association was held in Odd Fellows Hall, Saturday evening, April 10th. Some very fine plants suitable for Easter decoration were exhibited and the judges, Messrs. Scriber, Heath and Bradley, awarded first prize, also cultural certificate to H. Keeling, gardener for Mr. J. Scott McComb, for a fine specimen hydrangea, and 2nd prize, also cultural certificate to H. Kastberg, gardener, to the Misses Masters, for white azalea. Claude Wilson and R. Boreham also exhibited fine plants. The prize for the next meeting will be for three varieties of outdoor flowers.

J. BRUNGER, Cor. Sec.

LADIES' SOCIETY OF AMERICAN FLORISTS.

Mrs. J. C. Vaughan, President, L. S. A. F., has appointed the following Committees on Resolutions: Mrs. Geo. Asmus, Mrs. E. F. Winterston and Mrs. James P. Foley, upon the death of Mrs. P. J. Hauswirth, Chicago, Ill.; Mrs. W.

CHRYSANTHEMUMS

We have the following ready for immediate delivery, which are the best for Commercial use. We do not include the Exhibition sorts, but will be pleased to quote those desiring such. 25 of a kind at Hundred rates, 250 at Thousand rates.

EARLY

Clementine Tousey—Second early white, Oct. 20.
Early snow—Similar to Polly Rose, Oct. 10.
Glory of Pacific—Pink, Oct. 15.
Ivory—White, very popular, Oct. 15.
John K. Shaw—Ball shaped pink, Oct. 15.
Monrovia—Best second early yellow, Sept. 25.
Miss A. Byron—Ball shaped white, second early.
October Frost—Earliest large white, Oct. 10.
Pink Ivory—Second early pink.
Polly Rose—White sport from Pacific.
Robert Halliday—Light yellow, Oct. 20.

MIDSEASON

Col. D. Appleton—Best commercial yellow, Nov. 1.
Dr. Englehard—Pink, easy doer, Nov. 10.
Mrs. H. W. Buckbee—Ball shaped white, Nov. 1.
Mrs. H. Robinson—Incured white, Oct. 25.
Major Bonaffon—Incured light yellow, Nov. 1.
Major Weaver—Bright pink, Nov. 10.
Silver Wedding—White, Nov. 1.
Timothy Eaton—Large white, Nov. 5.
Vivian Morel—Bright pink, Nov. 5.
Yellow Eaton—Large yellow, Nov. 5.

LATE

Helen Erick—Best bright pink, Nov. and Dec.
Mile Jeanne Nonin—Largest white, Nov. and Dec.
John Burton—Latest pink, Dec.
Lavender Queen—Light lavender, Nov. 20.
Minnie Bailey—Pink, Nov. 20.
Mrs. J. Jones—Incured white, Nov. 15.
Nagoya—A good late yellow, Nov. 20.
White Bonaffon—Incured white, Nov. 15.
Yanoma—Reflexed pure white, Nov. and Dec.
Yellow Mrs. Jones—Sport from Mrs. Jones, Nov. 15.
Price—Plants, \$3.00 per 100; \$25.00 per 1000.
R. C.—\$2.00 per 100; \$17.50 per 1000.

Alma—Soft Lavender.
Emo—Small bright yellow.
Iva—Amber.
Kent—Dwarf Yellow.

Price—Plants, \$3.00 per 100; \$25.00 per 1000.

We have many other varieties in stock; if the foregoing does not supply your need send us a list of your wants. For more complete description see our Catalogue which gives best bud, height of plant and flowering period.

IT IS FREE ON APPLICATION.

This advertisement will be changed each week to compare with stock on hand.

ELMER D. SMITH & CO., Adrian, Mich.

During Recess

FLORISTS' CLUB OF WASHINGTON.

The regular monthly meeting of the Florists' Club was held at Congress Hall Hotel, on Tuesday evening, April 20th, having been postponed two weeks owing to Easter. After a short business session all repaired to the banquet hall where professional talent, of the musical class, entertained the guests. Prof. Pistoria's band furnished sweet music, and elaborate floral decorations in the form of semi-circular banks of palms, azaleas, rhododendrons and cherry blossoms completed the scene. Separate tables, with centrepieces of Killarney roses filled the room.

Wm. F. Gude, toastmaster of the evening, in his usual happy manner introduced the talent of the evening. E. T. Eadt, a Holland bulb grower, and Mr. Tiller of the Washington Times, were guests of the evening. Geo. Shaffer, the retiring secretary, was presented with a silver tray. O. A. Oehmler, the newly appointed secretary, entered upon his duties, and the club is to be congratulated at having secured the services of so competent a man. At midnight the banquet, which had begun at 9.15 o'clock, came to an end, as all pleasant times must.

ST. PAUL vs. MINNEAPOLIS.

It is quite some time since I reported a game between St. Paul and Minneapolis as the last one of the season. But "revenge is sweet," and so on

The horticultural department of the Illinois State Fair, Springfield, has secured for next fall's exhibit all of the rotunda of the Dome Building, a circular space containing about 13,000 sq. ft. of floor space, exclusive of the main aisle. There are premiums of over \$2700 offered in this department. The walls will be well decorated and every facility offered for making the finest display ever shown in the state, outside of the Coliseum in Chicago. The Superintendent of the Department is arranging for private space for the florists to make up their artistic designs and pieces in the building, and is also trying to arrange for cooling rooms.

GEORGE ASMUS,

Member State Committee.

THE ROSE GROWER'S PROBLEMS.

A Paper Read Before the New York Florists' Club by William H. Elliott.
In Memoriam.

I do not think there was ever a time when I felt so hopelessly unable to rise to the demands of the occasion as at the present. To interest in any way the members of this club, or the rose growers of this, the great floral center in the world would seem enough to undertake under ordinary conditions; but it seems hard, indeed, coming as I do now, with a sorrowful and heavy heart caused by the going out of that brilliantly beautiful personality that it has been our great privilege to know, to honor and to love. No matter how bright the light of his genial, kindly countenance shines in our hearts and memory, or how thankful we feel to have known him, it will be impossible to go on with our ordinary, everyday affairs without something of that serious and thoughtful life entering into our thoughts and meditations.

Under these conditions I know you will expect the few words I have to say to you tonight will be a deeper, more serious view of the rose grower's problems.

The Price of Success.

You who are rose growers know, and those thinking of entering upon that career should know, that it is necessary to consecrate your lives to this work. It must not be taken up without very serious consideration. The only way to succeed is to pay the price, and that is an overwhelming and everlasting determination to put forth every ounce of energy you have. You must make it your religion and your life—and why not? You must enter into partnership with the power that moves the universe. What grander work than developing the beauties of nature that thousands may have pleasure?

Planning the Establishment.

To those starting new, and to many who are not well located, a proper site for a rose growing plant is of the greatest importance. First, a good soil, an abundant water supply, a large level tract of land near the railroad station (it is better to go twenty-five miles farther out into the country, if you can get two miles nearer the railroad station, as the extra cost of teaming coal over that two miles will a great deal more than make up for the extra expense in express). A large farm in a small town will usually solve this problem best, as in larger towns, farms are too great a distance from the station. A full and complete plan of an up-to-date rose growing plant will require a great deal of care, time, serious thought. All of us should plan ahead carefully what we intend to do, changing and re-changing for years, that we may develop along the best lines. My recommendation is the large house. My latest house, 60 x 1340, I find none too

Advantages of Large Houses.

large. The advantages over smaller houses are many and are summed up in the fact that they produce better stuff and more of it. We do not find that those that have built the large houses have given them up and gone back to the smaller ones. Those who have built large houses build still

larger when they build again. The report from North Wales, Pa., is that their house built two years ago is too small, although 150 feet wide. They have now planned, and I believe are under way, in the construction of a house that is 172 feet wide and 700 feet long; over 110,000 feet under one roof, with proper construction, and good construction, is absolutely necessary in these large, high houses. I believe that such a house will be a success, although I might hesitate to recommend the building of such a house.

An investment is necessary to carry out a properly planned rose growing business. First of all, you will have to invest your heart and soul, all your courage, and be ready to put in at all times, good large amounts of patience, untiring hard work. Also a love for your business and the rose, like the love of a mother for her offspring. You will also need some money, but that is a secondary matter to the stock of courage that you should have.

Cultural Advice.

The best roses are not grown by any secret process, but by the most careful attention to every detail. Eternal vigilance is the price of good roses. You will find it true every time that the man who produces superior stock does so by a more careful and painstaking method. If anything has been accomplished by the use of chemicals, I should like to know it. I have not been able to obtain good results from their use. I find plenty of care and cow manure produce much better and surer results. Do not deceive your self in regard to reasons for success. We sometimes know why we fail, but why we succeed is harder to answer.

When they grow well, there are 4000 reasons why they do so. We may know what a dozen of them are, and if, by chance, we learn one or two more, we think we have solved the whole problem.

Are we getting from the experiment stations all we should? How many of us make an effort to get the knowledge, or to assist them in any way with the work that they are doing? I don't think we have used the experiment stations fairly. They are doing a great work, and should be called on to help us in the solving of many of our problems.

Timing the Crops and Selecting the Varieties.

Aim to cut your roses when the demand is good. The grower that produces a large supply on an overstocked market and a small supply when the market is short, must not expect to get a very large return. In Boston we have a good demand in August; in October the rose market seems always to be overstocked. From the middle of January to the middle of February is a time of very short

A Profitable Side Crop

Asparagus plumosus is a main crop with many growers having extensive modern plants but those with less up-to-date establishments, or parts of same defective in lighting or otherwise unsuitable for high grade crops,—will find this subject one of the very best. We have prepared a cultural circular giving concise directions how to make money out of this crop. Send for it. No charge. An important feature in asparagus culture is good seed. The P. M. quality of greenhouse grown seed has earned a high reputation for freshness and purity. It is the true nasus and greenhouse grown. Send for trial pkg., 100 seeds fifty cents, if you wish to experiment only. In quantity \$3.75 per 1000 seeds, \$32.50 per 10,000 seeds. Asparagus Sprengeri 75c. per 1000, \$5.00 per 10,000 seeds.

S. S. PENNOCK-MEEHAN CO.

PANSY PLANTS Fine Plants ready to bloom, of my well known strain, \$2.50 per 100; large plants in bud and bloom, \$1.00 per 100, \$8.00 per 1000.
GERANIUMS, best kinds, double **PETUNIAS** (Direct), **VINGA** var., **PARLOR IVY**, **STOCKS**, fine plants, 2 1/2 in., \$2.00 per 100; 30c for \$5.00.
CABBAGE PLANTS, E. J. Wakefield, ready to plant out, \$1.25 per 1000; 500c for \$5.00.

J. C. SCHMIDT, Bristol, Pa.

supply. This is the time that takes our best efforts to cover.

How do you decide which old kind to give up to make room for the new? What are you going to take out to make room for the White Killarney? Will you give up the Bride this year? Do you think the White Killarney will replace the Bride? Have you given up your Maids, and are you growing Killarneys instead? I have given up Maids; next year I expect to give up Brides. What about the other new kinds? Rhea Reid I shall continue to grow but not very extensively. This rose came very near to being one of the best roses ever produced. Maryland I think very well of, and a good, safe one to grow. William R. Smith is a very promising rose for summer. I intend to grow it, but only to a limited extent. Kaiserine don't give any light-colored summer rose much show. Mrs. Jardine and Queen Beatrice I have discarded.

In closing, the last word I will say is in regard to the economy and saving that I have found best to practice. For many years, at the first, I thought it most important to save my money, but I now find that the money is not near as important as the saving of your nerve force. Your courage and brain force, also your health and bodily force, and with what is expected of you in these high-pressure times, you will need them all.

PHILADELPHIA NOTES.

E. J. Fancourt of the Pennock-Meehan Co. left on the 19th inst for a week's trip on firm's business to Baltimore and Washington.

Robert Crawford, Jr. is rusticated at Atlantic City after an unusually strenuous season. Business has been better at this point than any previous period of the firm's history.

The Dreer Arboretum is the title given to the new experimental garden at Riverton, N. J., by yours truly. Mr. Eisele and Mr. Clark are far too modest to claim a high sounding name like that. Nevertheless we believe the cognomen is almost justified when the large number of new and rare shrubs and hardy plants from all parts of the world are considered.

The collection is located on the southwest banks of the extensive lily ponds and consists of many new and rare specimens among which were noted: *Buddleia raphirolepis*, a shrub which, according to the authorities, does best on light well-drained soil—conditions which can hardly be claimed for the location next to the lily pond; *Spirea bumalda* Walluf, a dwarf shrub of the same sub-family as the well known *Anthony Waterer*; *Azalea canescens*, a variety belonging to the *nudiflora* section, which is a native of the eastern states.

Among the new *deutzias* we noted the variety *foetosa* belonging to the *gracilis* section but unknown to cultivation generally; also *Lonicera Maackii*, *Rhododendron myrthifolium*, *Senecio elivorum*, *Azalea mollis* L. J. Endtz, *Dimorphanthus Manchuricus* fol. var., *Rhododendron fimbriatum*, *Andromeda calyculata* pumila, *Ligustrum lucidum*, *Demorphanthus argentea* var.,

Deutzia discolor major and a host of other rare things in evergreen and deciduous shrubs.

The garden is for the testing of items not generally known or grown in our climate and will no doubt be a valuable auxiliary to the business and a centre of interest to visitors of an enquiring turn of mind. Next year the intention is to plant all around the eastern banks of the lily ponds with a still larger collection.

If you want to see things done with a rush and yet with a system so accurate that it is almost impossible for an error to occur, visit the Dreer packing sheds in April. Hundreds of men are at work at the benches, helpers are scurrying up with box-loads and barrow-loads, wagons are starting off every few minutes for boat or train—a most inspiring bustle all around that makes even your scribe wiggle his pencil faster than usual.

Roses are going out rapidly at present. One range of potted plants under glass comprises about fifty thousand square feet of space and looks like a field of wheat. Mr. Eisele says that one of the surprises this year is the demand for *Penzance Sweet Briars*. An experimental section for outdoor testing of new Hybrid Teas was established last year and proved so interesting that it has been largely extended this year. Two hundred varieties, most of them unknown in this country, are now under test. This will be a Mecca for rose enthusiasts during the coming summer. An important development of last summer's work was the discovery of *La Detroit*. Mr. Eisele declares this to be one of the best bedding roses extant—more flowers and a stronger grower than any other. Mark that down.

Seed Trade

AMERICAN SEED TRADE ASSOCIATION.

Watson S. Woodruff, Orange, Conn., Pres.; J. C. Robinson, Waterville, Neb., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-seventh annual convention June 22-24, 1903, at Clifton House, Niagara Falls, Ont.

WHOLESALE SEEDSMEN'S LEAGUE.

F. W. Bruggerhof, Pres.; Burnet Landreth, Sec'y.

The Frank S. Platt Company.

The Frank S. Platt Co. of New Haven, Conn., have sold the large building which they are now occupying and Mr. Platt is now planning to retire, though, as he expressed it recently, it may be one year or possibly two before he is wholly out of harness. He intends to turn the business over to the young men associated with him, and just how long before they have absolute control depends on the capacity they show for management. Mr. Platt has served a long apprenticeship in the seed business, having commenced away back in 1866, and he is far from being a patriarch at that. He may be said to be the father of several prosperous florists who learned their business in his employ, as well as one or two vigorous young seed houses. Mr. Platt has built up a large and prosperous business, and has always been a credit to the trade. He was one of the pioneers in the growing of seed Lima beans in California, and despite the vigorous competition of recent years, still does a large business in that line. It was not learned just when the new owners are to have possession, nor where the Frank S. Platt Co. is to have their new home, but doubtless this question will receive the careful and wise consideration for which the head of this house has always been noted.

Crop Prospects in California.

At this season of the year the various seed dealers throughout the United States and Canada are naturally anxious to get some idea as to the crop prospects here in California. The writer begs to state that we have had a very severe winter with more rain than we have had here for fifty years past. The result has been that on low lands many seed crops have suffered and in various instances total acreages of various seeds have been destroyed. This is especially true on onion crops that were being grown on the Sacramento and San Joaquin River district. One seed grower lost 150 acres; another seed grower lost 25 acres. These losses were caused by the breaking of a dyke which flooded the land. In the Santa Clara valley district the onions have suffered as a whole by excessive water fully 25 per cent, some crops of onions being totally destroyed while other crops of onions are looking remarkably well. It is the writer's opinion that there still remains in good condition sufficient onion going to seed to supply a reasonable demand of the seed trade for the season of 1910.

Lettuce at the present writing is being reseeded and at the best we cannot look forward to any large crop of this seed. Of onion, as said before,

there will be enough to go around with the probable exception of Red Wethersfield and White Portugal. These two sorts, it is our opinion, will be very short. Of carrot, there is a very limited acreage growing here in California this season. What crops are planted are looking well and we can see no reason why we should not harvest a good crop of this seed. Salisfy is doing well. Sweet peas are doing very well. Radish promises a good crop. Celery, collards, beet, kohlrabi, leek, spinach, parsley, parsnip, mustard and endive all promise a good crop at this time.

CHAS. P. BRASLAN.

A Letter to the Seed Trade.

Bristol, Pa., April 14, 1909.

Now the Finance Committee of the Senate, presided over by the Hon. N. W. Aldrich, is actively considering the subject of the tariff is the time to write that committee, to the effect that all the seedsmen of the United States are unanimously in favor of a specific duty rather than an ad valorem, but solely with the idea of simplifying the system of assessment on importations, and to avoid the irritation of Custom House penalties.

Will you not today write to Senator Aldrich to this effect?

Respectfully,
BURNET LANDRETH.

Personal and News Notes.

There has been some improvement in the demand for canned goods, and a more optimistic feeling is permeating that line of business.

The situation affecting green pod beans has been greatly relieved by offerings from the growers. Had it not been for this, prices would be ruling much higher at the present time.

O. H. Dickinson of Springfield, Mass., or as he is affectionately known to his friends, "Dick," has been laid up with a severe attack of grippe. He is out again much to his own joy and that of his friends, and busy as never before.

Counter trade is now in full blast, and there are not enough hours in the day to enable seedsmen to transact their business. It is fortunate that union hours do not obtain in the seed business, or many houses would have to shut up shop.

Jerome B. Rice, with his wife and son, have been spending a short vacation at Atlantic City, and all have returned home greatly invigorated and refreshed. Mr. Rice's popularity continues to grow with advancing years, and no seedsmen is more universally respected or beloved by his colleagues.

John C. Caswell, manager of the garden seed department for The W. E. Barrett Co., of Providence, R. I., who has spent a great part of the past winter in a hospital where he underwent two critical operations, is again at his desk. He is hardly able as yet to engage in a Marathon race, but is able to direct the affairs of his department, much to his own satisfaction and the relief and pleasure of his superiors.

The Senate has granted the request of the seedsmen by amending the

Aster Seed

Our Aster seed is grown for us by experienced and reliable growers, and cannot be excelled for quality of seed and purity of stock.

Improved Sample's Branching

tariff bill as it went to them from the House, and placing a specific duty on seeds. It is hoped this will not be changed when the bill passes the Senate and goes to conference. Those having the matter in charge should be alert at that time to prevent this.

It may or may not be generally known, that the McMoran-Gray Co., of Port Huron, Mich., are not growing any contract peas for future delivery. Taking advantage of the high prices of peas the past fall and winter, they have sold off their seed-stocks excepting just enough to produce their own seed-stock for 1910. Mr. Gray is no longer connected with the concern.

McMinnville, Ore.—G. S. Crego, the aster specialist, will grow his seed here this season.

Amherst, Mass.—A seed house belonging to Lafayette Goodell was destroyed by fire on April 13.

Ottawa, Can.—Graham Bros. contemplate the erection of an up-to-date seed storehouse on the land they have recently acquired on Sparks St.

Monticello, Fla.—D. H. Gilbert is adding a two-story brick building for storing watermelon seeds. He has planted 1,200 acres this year, and hopes to harvest about 125,000 pounds of the fruit.

The Office of Public Buildings and Grounds, Washington, D. C., announces that sealed proposals, in duplicate, will be received until 2 p. m., May 10, for furnishing during the year ending June 30, 1910, florists' supplies; flower pots; paints, oils, glass, etc.; iron pipe and plumbers' supplies; manure and fertilizers; lime, cement, felt, etc.; sod; fuel; lumber. Separate proposals for each class. Further information can be obtained from Spencer Cosby at above address.

Of Interest to Retail Florists

EASTER AT MORRISTOWN, N. J.

A large volume of Easter retail trade was done in Morristown, which is essentially a retailers' town. Pot plants of good quality were in great demand. From 6 to 8 in. seem to be a taking size, convenient to carry or handle. Lots of Rambler roses of the Dorothy Perkins type were everywhere; good 6 to 8 in. pans of tulips sold well; hyacinths, three to four in a pot and 6 to 8 in. pans of daffodils did well, and good lilies found ready sale. But reports are that 25 per cent. of the bulbs were no good, which of course materially increased the cost of production. Hydrangea sale was not large. Forced as they are, they seem to be a little too soft to last long in

the house. Azaleas were the finest we ever had and lots were sold. E. A. Holton, H. C. Holmes, John Jones, Marcus Force, R. A. Elliott and George Bird, all report a great deal better business than last year. The florists hope that this little ripple of prosperity is the harbinger of a strong wave to come. E. R.

The usual post-

WASHINGTON Easter quiet has not settled down

upon Washington owing to the fact that there are at least 5,000 daughters attending the Annual D. A. R. Conference which is now in session in Washington. Social affairs of the most elaborate character are the order of the day and of course, wherever fair woman goes, flowers must needs go with her.

The annual banquet of the Connecticut Horticultural Society was held at Long's Hotel, Hartford, on April 12. Thirty-eight members were present and after the edibles were disposed of, President Huss welcomed the guests and introduced A. C. Sternberg as toastmaster. John Gerard, E. W. Schultz, H. A. Pinney, W. P. Bristol and J. A. Creilly were among the speakers. An enjoyable evening was spent.

Flower Market Reports.

BOSTON Business in Boston is veritably in the dumps.

It was not long after Easter before symptoms of congestion began to appear and the spell of hot weather added to the Patriots' Day holiday was all that was necessary to smash the moorings and precipitate a stampede on all lines. The most regrettable feature of the situation is the high quality which characterizes most of the material marketed. The stuff is entirely too good for such a predicament and the slaughter figures at which it must be unloaded. The "street merchant" has his innings and he knows it all too well.

A few days of real **BUFFALO** spring weather and plenty of sunshine brought on stock so fast that the wholesalers could not handle it to advantage and by the middle of the previous week there was a flood of everything and values were much on a decline. Roses are making up for the shortage during the winter and any quantity can be had at low figures. Carnot and Kaiserin have been added to the list but have had only a fair demand. Bridesmaid and Bride are in heavy supply but Killarney has the preference. Crops are heavy in the carnation line, also. Lilies, which should have been in for Easter are now to be had in any quantity; also callas, with little demand. Peas have sold readily and are taking the place of violets; the latter are nearing their end. Lily of the valley has made up for lost time. The only thing scarce is smilax; other greens are in fair supply.

The usual reaction followed **CHICAGO** Easter and the early part of the week found trade practically at a standstill and stock shipped in added to that left unsold on Easter Sunday, soon caused an accumulation hard to move off. In the week after Easter the effect of the increasing plant trade is felt more and more. Some dealers are very strongly of the opinion that the quiet spell lasts about as long as the life of the plants and, barring funeral work, there will be few flowers sold till the plants are gone from the homes of their customers. Carnations are particularly plentiful and hard to dispose of. Some good violets are coming in again. Sweet peas are of good quality but prices low. American Beauties are again getting equal to the demand and all other roses are coming in faster than they can be disposed of. Cattleyas are between crop and at present scarce in consequence. Gardenias are also scarce and southern crop still several weeks off. Callas are here in numbers and call for them light.

Weddings and other social gaieties came thick and fast the week after Easter, reaching their culminating point Wednesday, when some of the big retail stores declared they were rushed almost as much as on an Easter Friday. Since then business has receded somewhat although there is still a good deal going on. The advancing season has brought crops in on the jump so that the congestion is very

severe. This is especially the case with roses. What business there is seems to call more for carnations, sweet peas, lily of the valley, etc., rather than roses. Cattleyas are exceedingly scarce and the few that are coming in are eagerly snapped up. The local supply is entirely inadequate and outside points when called on have been unable to furnish any relief. The hot weather is bringing the gardenia crop on again and values are much lower. Another week will probably see the last of the violets. Lilies sold well up to the middle of the week but are now slacking up. There are few tulips and daffodils about.

TWIN CITIES Easter in the Twin Cities did not turn out what it should have. Although business was as good as last year's, the expectations were to beat last year's output. The retailers in Minneapolis have quite some stock left over—not very much of any particular thing, but a little of almost anything that would not be much good anywhere after a few days. While pot plants went fairly good, tulips, daffodils, etc. and even lilies, were too abundant. The wholesalers especially have some "left overs" in bulbous stock. As usual prices were cut early Saturday afternoon in some places. Easter over, there was a general rest all around.

MOVEMENTS OF GARDENERS.

Hamilton, Mass.—Ed. Davies has taken the position of gardener on the estate of Hugo Johnstone.

Orange, N. J.—S. Wyatt has succeeded John Dervan with A. C. Van Gaasbeek.

BUSINESS CHANGES.

Tyler, Texas.—The Sneed Nursery & Orchard Co. have filed articles of dissolution.

Canal Dover, O.—Daniel Wyss has purchased land just out of the city on which he intends to start a nursery.

Pittsburg, Pa.—William Flemm has retired from the firm of Breitenstein & Flemm and the new name of the house will be Breitenstein & Co.

Santa Cruz, Cal.—Ernest A. Bailey, has bought a one-half interest in the A. Mitting Calla Lily Bulb Co. A. Mitting will be president and manager; Ernest A. Bailey will be secretary and treasurer.

INCORPORATED.

Plainfield, N. J.—Van Zandt & Voorhes; capital, \$50,000. To deal in seeds, fertilizers, etc.

Rochester, N. Y.—Home Planters' Association; directors, Harry B. Phillips, Stuart Hamilton, H. E. Grady.

Providence, R. I.—The Meschianit Nursery Co.; J. Rogan, F. I. McCanna, J. A. Lee; capital, \$5,000. For buying, selling and cultivating all kinds of flowers, seeds and nursery products.

L. Merton Gage, Orange, Mass., writes that he is testing this year nearly 400 named varieties of gladioli, 175 of which are advanced novelties, and will also plant a large quantity of seed, including seed of his own crossing. He promises a report on these novelties next fall in HORTICULTURE.

EVERYBODY KNOWS

Gardening cannot be properly done without the aid of an accurate leveling instrument.

Bostrom's Improved Levels, No. 2 at \$75.00 and No. 3 at \$25.00, are conceded by all who KNOW to be the only levels on the market which meet all the requirements, at the price.

Our guarantee back of every Level we sell, and satisfied users in every State in the Union heartily endorse every claim we make.

Shipping weight 12 lbs. Description on request.

NEW YORK MARKET.

A very heavy supply of all varieties of roses and carnations has been coming to this market during the past week, under the incentive of the precocious weather and there is no compensating demand for the goods, which have been accumulating each day in hopeless surfeit. Not roses and carnations alone but the general stock of cut flowers are all in overwhelming abundance and prices are on the rapid decline, all semblance of stability having disappeared.

NEWS NOTES.

Council Bluffs, Ia.—The whirlwind on April 9 damaged the Lainsou greenhouses to the extent of \$75.

Billings, Mont.—W. H. Ralston, and M. I. Tuttle of Ft. Morgan, Colo., are actively interested, it is said, in the formation of a nursery company which will make a specialty of small fruits.

Saturday, April 24, has been designated as Arbor Day, in Massachusetts, by the proclamation of Governor Draper, who urges the planting of new trees or the care of those already planted, on that day.

It is stated that the mayor of Tokio, Japan, has offered to the City of Washington, a thousand Japanese cherry

trees to be planted along the new pleasure driveway which has just been opened along the Potomac River south of the monument grounds and that the gift has been accepted by the president.

Detroit, Mich.—The largest flower show ever tendered the Detroit public was the Easter show at the Horticultural building at Belle Isle. In addition to the more than three thousand lilies, there were azaleas, orchids, etc. It is said that nearly a million plants are ready to be distributed among the parks.

Pueblo, Col.—William Joxen has brought suit against G. A. Rodell to collect \$1,150, which he alleges is due through a deal in nursery stock. He has obtained an injunction restraining Rodell from disposing of any of the stock until the matter can be heard by the Court. The plaintiff asks for a receiver for the property.

Worcester, Mass.—Fire in the seed and agricultural warehouse of Ross Bros., on April 13, caused a loss of between two and three thousand dollars, chiefly on lime and fertilizers stored in the basement. Prompt action by the fire department prevented the spread of the flames to the upper stories where the seeds were stored.

CATALOGUES RECEIVED.

McCray Refrigerator Company, Kendallville, Ind.—Florist Catalog No. 71. It bears a rose in colors on its title page and is handsomely gotten up on heavy coated paper which shows off to good advantage the illustrations of display ice boxes which this company manufactures especially for florists' store use. Some of these are carried in stock and others are made to order only but all are artistic in design and undoubtedly well adapted for practical use.

Lager & Hurrell, Summit, N. J.—Descriptive Illustrated Catalogue and Price List of Orchids. A very striking and beautiful production, the most elaborate in its line we have ever seen. The ornament of the front cover is a faithful reproduction in colors of *Cypripedium insigne* Sanderae, on a green background. The lettering, in yellow and orange, gives a luminous effect which will attract immediate attention. The illustrations throughout are very fine, showing press-work of a quality seldom found in horticultural catalogues. Every orchid lover should have a copy.

LORD & BURNHAM COMPANY TO OPEN A CHICAGO OFFICE.

The Lord & Burnham Co., Irvington, New York and Boston, are about to open an office in Chicago.

Mr. George Sykes will have charge of this, and will be there after May 1st. The office will be located in the Rookery Building, which is handy on La Salle street.

GREENHOUSES BUILDING OR CONTEMPLATED.

Foxboro, Mass.—F. H. Baldwin, one house.

Marietta, Pa.—A. R. McKain, one house.

Norwich, N. Y.—E. F. Quinn, additions.

Long Branch, N. J.—W. G. Elsele, one house.

Dansville, N. Y.—Winters & Proget, one house for tomatoes.

Tarrytown-on-Hudson, N. Y.—The F. R. Pierson Co., one house, 56 x 375.

Obituary.

John Scott.

John Scott, widely known as an expert plant grower, and an ex-president of the New York Florists' Club, met with a sudden and tragic death on the evening of Monday, 19th inst., in front of his greenhouses on Midwood street, Flatbush, N. Y. Aloysius Gross, who had been employed by Mr. Scott as night foreman for the past two years and had recently been discharged for neglect of his duties, had called Monday forenoon to seek re-employment, but Mr. Scott reminded the man that he had been taken back several times through pity for his family, but declared that he had made up his mind to part with him for good. Gross went away muttering threats and returned soon after 6 o'clock armed with a revolver. He renewed his appeal to Mr. Scott to give him a job again, and when ordered off the premises broke into violent abuse. He was ejected by Mr. Scott and his foreman Mr. MacKenzie and just as he reached the road he drew his revolver and fired. The bullet struck Scott in the left breast directly over the heart and death was almost instantaneous. This terrible calamity has cast a gloom over all the trade in New York and wherever the news has reached, for John Scott was exceedingly popular and his perseverance and industry in the business which he has laboriously built up won for him the right and title to the respect of every admirer of a self-made, prosperous business man.

Mr. Scott was a native of Newlandrig, Dalkeith, Scotland. He served his apprenticeship at the Marquis of Lothian's. New Battle Abbey, under William Priest. He next went to the nursery of Ireland & Thompson at Edinboro, from whence he went to

JOHN SCOTT

work again under Mr. Priest at the Earl of Englington's place. Taymouth Castle and Rosemont House were later assignments. Then, in 1889 he came to America and was first employed under David Irving at Hoosick Falls, N. Y.; next under James Boyd, at Levi P. Morton's place in Rhinebeck,

and later under Thomas Emerson, at the Dinsmore Estate in Staatsburg. He finally took a position in charge of the F. Scholes Greenhouses in Brooklyn, which, within three months became a commercial establishment, in which Mr. Scott had a joint interest. About nine years ago he built in Flatbush, and on several occasions has largely increased the glass capacity, moving the original Brooklyn greenhouses and business to the Flatbush location.

He was elected president of the New York Florists' Club in December, 1905, and made an efficient and painstaking presiding officer. Since the organization of the New York and New Jersey Plant Growers' Association he has been an active member of that body also. Mr. Scott's name is indelibly fixed in the minds of florists everywhere, through its association with the valuable nephrolepis sport which bears his name. He leaves a widow and four children, the oldest a daughter of seven years. His age was forty-two years.

Joseph Anthony.

Joseph Anthony, head of the Anthony Union Nursery Co., died at Austin, Ark., on March 29, aged 42. A widow, two sons and three daughters survive him.

W. H. Henderson.

William H. Henderson, a chrysanthemum specialist of Cedarville, N. J., passed away on April 1.

J. J. Kent.

James J. Kent, a florist of Pittsburgh, Pa., died at his home on April 12.

PATENTS GRANTED.

Chicago, Ill.—The glaziers' strike has been settled by arbitration in the form of a compromise, the strikers agreeing to accept one-half the advance asked for. This strike has caused much inconvenience to Chicago florists. The Garfield Park Conservatories particularly suffered on account of the delay.

MASTICA
 FOR Greenhouse Glazing
USE IT NOW.
F. O. PIERCE CO.
 12 W. BROADWAY

 WE HAVE SOME SNAPS

A New Curved Eave House

Talk about a house being light, you can't beat this!

You know from the very look of it that it is the practical curved eave.

It is 50 feet long and 18 feet wide. The first curved eave house erected in Richmond, N. Y.

YOU will like our way of doing it. We retain all the strong structural features of our Flat Rafter house without columns for supporting the roof, and simply change the detail at the eaves. In doing this, however, we have in no way weakened the house at that point, but have increased its lightness, and a good many say it is a more attractive looking house.

There is one thing certain, we have a Curved Eave House that is not so high priced as to make you unhappy.

We have a special way of constructing the eave which we want to tell you about. We will explain it fully in replying to your letter.

Hitchings & Company

The Castle Automatic Circulator

The Summit of Perfection. No Device has ever been Invented for Forced Hot Water Circulation which will do what this little machine accomplishes, for Economy in First Cost or in Operation. Requires no Supervision or Manual Manipulation. Prices and Discounts on Automatic Circulator, several sizes, with or without Motors, also Testimonials from Large Greenhouse Establishments, east or west, furnished on Application.

While the method of producing a forced circulation of liquids is the same as in the Original Electric Circulator, some modifications in construction which we consider to be of vital importance are made.

The great improvement of its being equipped with a valve which requires no manual manipulation to change from forced to gravity circulation will be at once recognized as extremely valuable.

We are prepared to estimate and contract for Boilers, Pipe, etc. Our Steel Plate Boilers are specially constructed for us, and have proved to be *marvellously economical and efficient.*

This House Will Interest You Gardeners

YOU see it was this way: the owner, Mr. Weber of Stamford, Conn., wanted a house for practical producing purposes. The ornamental side was not so decidedly important, so the house was designed to suit the location. It is 30 feet wide and 141 feet long. The house is divided into three compartments, for general plants, carnations and roses. The house is divided into three compartments, for general plants, carnations and roses.

A Cast Iron Sill job with masonry walls. Later he intends building a duplicate work room is for the connecting passage. These pictures were taken two weeks ago attractive arranging of the plants and the gardener, has every reason to be very proud of.

If you are thinking of building, be sure

NEW
ROSE

WHITE KILLARNEY

We Know You Will Want to Buy White Killarney

Every live, progressive, up-to-date grower who has seen it is buying it; but when you buy White Killarney, be sure you get the right White Killarney (the Waban variety). When you buy from us you get the variety that has been exhibited and certificated, and the one that has attracted such favorable mention.

If you are in the vicinity of New York, we should be glad to have you call and see White Killarney growing at our Scarborough range, and you will say at a glance—as everyone has who has seen it growing—that it is by far the best white rose that has ever been placed on the market.

It is not only a good winter-flowering rose, but is good the entire year, and it is a splendid shipper. Read the following letter received from Mr. Willis N. Rudd, Secretary of the Society of American Florists, dated January 15th, in which he writes as follows:

"Dear Mr. Pierson:—I cannot refrain from writing you and expressing my admiration for the White Killarney as shown at Chicago on Thursday. It is an exquisitely beautiful thing and attracted much attention. I took half the blooms home with me, and they were finer on Saturday than they were at the show. The record is that these blooms were shipped from Tarrytown, staged and exhibited during the afternoon. They were then carefully wrapped up in a box, and remained in that box until one o'clock Friday morning, at which time I reached home; improved in quality up to Saturday, and were in fairly presentable condition on Sunday.

In addition to being the most beautiful white rose of its class which I have seen, this demonstrates its splendid keeping and shipping qualities.

W. N. RUDD."

We were awarded Silver Cup at National Flower Show, Chicago, for best new rose with White Killarney; also Silver Medal Horticultural Society of New York.

Strong plants, 2 1/4 inch pots, own roots, now ready for delivery, \$30.00 per 100; 250 for \$70.00; 500 for \$125.00; 1000 for \$250.00. Grafted plants, ready April 1st, \$35.00 per 100; 250 for \$82.50; 500 for \$150.00; 1,000 for \$300.00.

HIPPEASTRUMS AT J. VEITCH & SONS

The firm of J. Veitch & Sons is famous the world over for the introduction of new plants from almost every part of the globe, its travellers having explored almost every country in turn, and succeeded in every instance in introducing meritorious plants to English gardens, whence these have reached continental cultivators. In this connection, their efforts in improving the shapes and tints have been remarkable in the case of *Hippeastrums* (*Amaryllis*). At the present date (April 10) a fine collection of varieties were to be observed in the new house built for these bulbs. This span-roofed house of 60 feet in length and 22 feet broad, has a brick-built bed 7 feet wide running down the centre, and there are beds $3\frac{1}{2}$ feet wide, built against the ends and sides. These are furnished with hot water pipes, having valves for the regulation of the temperature of the beds in which the bulbs are plunged. Spent tan forms the plunging material of the beds. The progenitors of the race of *Hippeastrums* grown at this nursery were Leopoldi—a Brazilian hybrid of a creamy white color, the tips of the segments white and the central parts of the flower crimson—and Empress of India, which was raised in Holland, and this cross has resulted in the great variety in color observed in the *Hippeastrums* of the present day; at the same time there has been an elimination of the green color of the base and medium ribs of the segments. The flowers are more reflected at the points, and the segments broader; so that in some flowers the edge is truly circular, and without indentations. Among the finest of the year, so far—for there are scores to open their flowers—are Marcus, a crimson self; Neila, scarlet, with white bands on two of the segments; Titan, ground of the upper segments lined with crimson, lower ones pure white; Nevada, a crimson self; Gamos, orange scarlet; Idothea, a crimson self; Queen Alexandra, white ground flamed with scarlet; Optima, a scarlet bloom with a white band on all the segments, excepting the lowermost; and Ravenna, a royal scarlet. There were many others of almost equally fine quality. The firm is endeavoring to raise a yellow variety, and seeing that some of the newer varieties show faint traces of that color in the basal parts and the middle ribs of the segments, the quest will probably meet with success.

NOTONIA GRANTII

A handsome succulent under this name was figured and described in the issue of the "Gardeners' Chronicle" for April 10, 1909. The plant was found in Mozambique, during Speke and Grant's expedition to discover

the source of the river Nile, in 6 deg. 50 min. South latitude; and was by them given the name *Kleinia* sps. in Speke's "Nile Journal." Colonel Grant described the flower as blood red. The color varies, and the cultivated plant has flowers of an orange-scarlet tint. The species is identical with *Cacalia semperviva*, Forsk., a native of tropical Arabia, and was named by Ascherson *Notonia semper-viva*, a name under which it will probably remain in some Continental gardens. There are several dried specimens at Kew bearing the name of this *Notonia*, all of which are more robust than the ordinary *N. Grantii* as introduced by Miss Edith Cole from Somaliland, and first raised from seeds by Mr. J. Lynch, curator of the Cambridge Botanical Garden. *Notonia Grantii* is an easy plant to grow and flower.

IMPERIAL INTERNATIONAL EXHIBITION, LONDON

An exhibition will be held at Shepherd's Bush, London, W., opening in May and closing in October of the present year. Group 8 is devoted to horticulture as follows: Appliances and processes used in horticulture and arboriculture; apparatus and objects used for ornamenting gardens, vases, pots, chairs, garden seats, etc.; garden architecture, kitchen garden plants, fruit and fruit trees; trees, shrubs, ornamental plants and flowers; greenhouse and hothouse plants; horticultural and nursery seeds and stock, grass and other seeds.

Sunderick Moore

Improvements at Kew

That Kew Gardens are still a popular institution amongst Britishers was evidenced on Easter Monday, when over 40,000 visitors passed through the gates, to admire the countless floral attractions. Keen interest was taken in the new water garden. This occupies the site of the old medicinal ground to the north of one of the museums. The dimensions of the seven tanks are 104 feet by 62 feet. The centre tank and four corner ones will be used for *Nymphaeas* and other aquatics, whilst the two side ones will be set apart for bog plants. This addition will still further add to the value and variety of Kew's unique attractions. This is one department of the Government's activity which is always popular, and no one is found to criticise the outlay involved. The Gardens have a world-wide reputation, for representatives come from all quarters to inspect the priceless collection, whilst its value as a training centre is everywhere recognized. Former Kew students occupy positions of importance in all parts of the globe. The training received equips a man for filling the highest posts in the horticultural world.

The hippeastrum for florists' use

We know that other British and continental breeders are also working on this beautiful genus and we have been able to record notable successes in this line of late by some of our own private gardeners. Some two years

Our London correspondent writes interestingly of the progress being made in the improvement of the Hippeastrums by the Veitels.

ago a series of articles on Amaryllis by John Thorpe attracted considerable attention. It is very likely that with the increased interest being manifested in their improvement and multiplication we shall presently see the amaryllis attaining popularity as a florists' specialty as a cut flower and as a pot plant. There would seem to be plenty of room for it at Easter, especially, as a companion for the lilies and to liven up their monotonous white. Possibly some ingenious hybridist may find a way to produce Hippeastrums with more upright flowers poised on more graceful and slender stems, which would add materially to their decorative value as cut flowers.

The rose breeders' double chance

Our views on the duality of the rose hybridisers' field as editorially expressed in the issue of HORTICULTURE for March 20th gain confirmation in the April 17th number of *The Garden* in which a life-sized drawing of E. G. Hill's Rhea Reid is given in connection with interesting notes on the behavior of this American rose in England. The writer says that "It is difficult to select a rose of finer growth or one more hardy. It has stood an indifferent summer and a very severe winter and spring. It is difficult to name a more hardy and all-round useful rose." It is well known that Mr. Hill's aim and ambition with Rhea Reid was to establish a new high record in the forcing rose class. We cannot yet say that he has not done so but it is fairly well settled, after but one season's test, that in Rhea Reid he has put out an ever-blooming garden rose *par excellence*, for it has lived through the winter in the vicinity of Boston unscathed and the flowers produced last summer rivalled the best of the H. P. standards. The rose breeder has two chances where the carnation breeder has but one.

After the explosion

The news of the lamentable disaster at Toronto has doubtless awakened disquietude and anxiety in many places where hitherto confidence has been taken on trust as it were. The conviction forces itself that what has occurred in Toronto is liable to happen elsewhere at any moment wherever steam heating outfits are maintained without full realization of the ever-present peril. "He is truly wise who gains wisdom from another's mishap" and it is to be hoped that the lesson taught in this instance may be well taken to heart by any who have been unmindful of the mighty volcanoes slumbering in the heating outfit of the modern greenhouse establishment. Knowledge acquired in the little stoke-holes of the old-time hot water heaters counts for little in the operation of the vast flower factories which are now springing up on all sides and the boiler house, from being an ordinary adjunct in the florists' equipment, has now become the most important department. In the light of recent events it is realized that the topic demands more attention than we have been giving it and we are glad to be able to publish the very practical advice contained in the communication in another column of this paper from the pen of W. W. Castle, a man well informed on the subject of heating engineering, and what he has to say is worth a very careful reading. We shall not be surprised if one result of this destructive boiler explosion should be the substitution of safe hot-water systems under forced circulation in many places where steam has been in use heretofore. One thought more—should not the widespread sympathy which has been expressed by American growers on behalf of their stricken fellow craftsmen "across the line" take some more substantial form, such as contributions of material for re-stocking? The case is surely one to justify some concerted action.

PROFESSOR GOODALE RESIGNS CHAIR AT HARVARD.

George Lincoln Goodale, Fisher professor of natural history and director of the botanic gardens at Harvard University since 1888, has resigned, his resignation to take effect the first of this coming September. It is understood that he will continue his interest in the development of the Botanical Museum at Harvard.

George Lincoln Goodale was born in Maine, in 1839, (eldest son of Hon. Stephen L. Goodale, for more than twenty years Secretary of the Maine Board of Agriculture). He graduated from Amherst College in 1860, and from the Harvard Medical School in 1863. From 1863 to 1866 he was an instructor in the Portland School for Medical Instruction, from 1867 to 1872 Professor of Natural Science in Bowdoin College and of Materia Medica in the Medical School of Maine. In 1872 he began work as instructor and

provement of plants are in progress under the supervision of Mr. Robert M. Grey. The Head-Gardeners who have been associated with Professor Goodale at the Botanic Garden in Cambridge, are Messrs. William Falconer, W. A. Manda and Robert Cameron.

Professor Goodale's place will not be easily filled. Always a courteous gentleman, his relationship with every employee of the garden and with all who have had occasion to call upon him for advice has been of the sort that inspires affectionate respect. S. A. F. members who were present at the Providence Convention in 1897 will pleasantly remember Prof. Goodale's delightful illustrated lecture on "Our Favorite Exotic Plants in Their Own Homes."

PUBLICATIONS RECEIVED.

Transactions of the Massachusetts Horticultural Society for the year 1908. Part II.—Comprises full reports of trustees, librarian, exhibition and other committees, prize awards during the year, necrology and list of members.

The Florists' Scrap Book. Published by John C. Moninger Co., Chicago, Ill. It would take a volume as big as the book itself—256 pages—to adequately tell everything it contains. So concise and comprehensive is it. The index alone takes up nine pages. The contents are compiled from the florists' trade papers, with proper credit given, and there is thus brought into convenient, easily-accessible form a vast accumulation of valuable cultural information and instructive material on the thousand and one problems every florist must meet. To be more explicit, there are over 2500 useful hints and pointers on greenhouse, store and nursery management; also about 750 remedies for various insects and diseases. The book is not only useful for the beginner, but the expert grower will find it of value also. It gives directions for making the many remedies used in greenhouses and also formulas for same. The price of the book is \$1.00, but copies may be obtained free by complying with request in advertisement of John C. Moninger on page 600, issue of April 24.

The Orchid Stud Book.—After five years of anticipation we are at last favored with the results of the collaboration of R. A. Rolfe and C. C. Hurst in their attempt to straighten out the nomenclature of the ever increasing work of the orchid hybridist. It is safe to assume that the immensity of their self-imposed task, did not at the commencement, disclose itself, but it must soon have been apparent that their original promise of date of issue could never be fulfilled. We have the compensation in that up to date no omissions appear and the thorough way in which cross references are arranged makes it easy for the reader to ascertain readily if any particular cross has been made, by whom, and the date of exhibition or publication, as the case may be.

To give an illustration of the process of "boiling down" adopted, we note that the original cross *Cypripedium x aureum* has had applied to it no less than thirty-nine other names,

and the remarkable part of it is that Jules Hye, the raiser of *C. x aureum* named thirty-two of these, presumably out of the same seed capsule and, doubtless, all differing. These thirty-eight other names now are relegated to the position of synonyms or in some cases perhaps they may live as varietal forms of *C. x aureum*. This is primarily why the work was begun and it is proposed in the columns of the *Orchid Review* to keep it up to date as the years go on in the way of supplementary data as it accumulates.

Of American-raised orchids there seems to be a complete list, garnered from various publications, as they appeared. One curious instance might be cited where the raiser was in a seemingly legitimate way, robbed of the credit of being the original exhibitor and his name classed as a synonym. In 1902 *Laelio-Cattleya Gladys* was shown in Boston (*L. tenebrosa x C. Gaskelliana alba*) and was awarded a certificate; a few weeks later a similar plant was shown in London as *L-C Eva*, and registered as such. Then M. Cogniaux discovers that the name *Gladys* had been pre-empted and in *Gardeners' Chronicle*, states that this cross must be known as *L-C. Orpetiana*. The "Stud Book" however recognizes *L-C. Eva* only. Such matters are all in the way of simplification and we rejoice that the present generation of gardeners now has something to refer to that has for its object fairness and simplification.

The names of the raisers of the plants are treated alike whether in the employ of a commercial concern or in private collections, in that they do not appear in the work, the compilers doubtless reasoning that gardeners come and go but the collection lives on, though often times in memory only.

Interesting introductory chapters are given, both cultural and historical with a list of the published literature on the subject from 1847 to date, also there are 120 illustrations of notable hybrids interspersed through the text, several of which we recognize as of American origin.

Cultivators will find the "Orchid Stud Book" a necessity, and may now simplify the names of their plants, for one of the most valuable features is the treatment of commemorative names, thus, *Cypripedium x Mdlle Gabrielle Moens*, must in future be known as *C. x Moensiae*—a distinct gain to the cult.

Copies of the book may be had by addressing The Editor, *Orchid Review*, 12 Lawn Crescent, Kew Gardens, London, Eng., or will be supplied from the office of HORTICULTURE, Boston, Mass., at \$2.25 each.

NURSERY INSPECTION IN NEW YORK.

The bill of Senator Raines providing for a more rigid supervision by the State Department of Agriculture to prevent the bringing of diseased nursery stock into New York state from other states was signed on April 21 by Governor Hughes. The new law also seeks the extermination of diseases and the brown tail moth and all other insect pests infesting trees, shrubs and vines. An appropriation of \$25,000 is provided.

PROF. GEORGE L. GOODALE.

University Lecturer at Harvard University. He was appointed Assistant Professor in 1873, Professor of Botany in 1878, and Fisher Professor of Natural History in 1888. He has served as Director of the Botanic Garden since 1879.

Professor Goodale is a member of the National Academy of Science, and of the American Philosophical Society, as well as of the American Academy of Science. He has served as President of the American Naturalists and of the American Association for the Advancement of Science. He is a Fellow of the Royal Geographical Society, and an Honorary member of the New Zealand Institute. He is one of the Associate Editors of the *American Journal of Science*, to which he contributes critical reviews. His publications have been principally in the department of Plant-Physiology and Economic Botany. He was instrumental in establishing a botanical station in Cuba, in connection with the Botanic Garden of Harvard University, where interesting experiments in the im-

NEWS OF THE CLUBS AND SOCIETIES

CONNECTICUT HORTICULTURAL SOCIETY.

The regular meeting of this society was held on the 23d of April, President J. F. Huss presiding. After a brief business session, the audience withdrew to a large room, in the County Building, where about 100 people listened to a very helpful, instructive and interesting lecture by our former president, John T. Withers, now of Jersey City, N. J., on the subject of America's historic trees, tree surgery, shrub pruning, etc., illustrated by a stereopticon. Mr. Withers showed great command of his subject, as the result of his wide experience in forestry and landscape gardening. The Liberty Tree, which stands on the campus of St. John's College at Annapolis, Md.; the Wethersfield Elm, which adorns our adjoining town; the Lancaster Elm, near Amherst, Mass.; the Evergreen Oak, at St. Louis, Mo.; the Indian Chestnut, at Yonkers, N. Y.; and many other famous trees, were pictured and described. The Liberty Tree is a tulip, of great historic interest, and probably 600 to 800 years old. Fifty-six tons of concrete were recently employed by Mr. Withers in restoring this tree to a safe condition against winds and further deterioration. The Charter Oak, dear to the memory of all Connecticut residents, which blew down in 1856, and in which the colonial charter was once hidden against Andros, the representative of James II., was believed to be 1400 years old, and was so eaten by decay that 29 firemen could stand within it a year before it fell. The Wethersfield Elm, now 150 years old, has a circumference of 28 feet, and a height of 127 feet, and a spread of 166 feet. Mr. Withers explained graphically the methods employed in tree surgery. After the duramen, or interior heart wood, has rotted out, and the alburnum, or outer heart wood, is nearly extinct, vital functions continue in the tree as long as the cambium layer is intact, and if the cavity made by the decay can be completely filled with concrete in such a manner as to exclude air and water; and the speaker declared that thousands of trees that have been allowed to die, might have been spared if modern means had been used for the purpose. He illustrated the utility of the use of tin covers, bark, etc., to place over holes to arrest decay, and the use of iron bands to hold limbs together, the bands finally constricting the flow of the tree fluids, and acting as a girdle. The planting, nursing and general care of ornamental trees and shrubs received full attention; and the lecturer pointed out the frequent mistakes made in the annual pruning of such plants as the spiraea, the azalea, the forsythia, and the rhododendron, which form their blossom buds during the previous year. The lecture was free, but worth a good admission fee, and reflects credit upon the knowledge and ability of the speaker and the beneficent work of the Connecticut Horticultural Society, which has now over 100 active members.

A pleasant feature of the evening

was the exhibition by Hugh Kirk of a rare plant, about 18 inches high, in a six-inch pot. It was brought from the Cape of Good Hope, 25 years ago, by a lady missionary, and was identified by the late Prof. Meehan as *Bowiea volubilis*, named after J. Bowie, collector for Kew. The owner believes that there is no other plant of the kind in the country. Its green bulb is about the size of an orange, and annually throws up a twining, slender plant, with curving and forked branches, which has blossomed but once since the owner has had it. It is cultivated at Kew Gardens.

GEORGE W. SMITH, Secretary.

FLORISTS' AND GARDENERS' CLUB OF RHODE ISLAND.

This club held a warm meeting in Swartz Hall, Providence, on April 19. Prof. H. J. Wheeler, a member of the club and director of the Experiment Station at Kingston, had been charged by James Hockey and others at a previous meeting of the club with breach of a promise made several years ago, to the effect that the R. I. College would not sell any of its carnations or other product in the Rhode Island market in competition with resident growers. Prof. Wheeler was present to explain his position, showing that the sales complained of had been made since a change of officers had occurred in which his responsibility had ceased, and that to the best of knowledge had now been discontinued. A motion was unanimously passed exonerating Prof. Wheeler from all intention to violate any promise and from any responsibility in the sales complained of. Prof. Wheeler then gave an interesting account of the work being done at the Experiment Station.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURALISTS.

Registration of Hydrangea.

Public notice is hereby given that Mr. E. Y. Teas, of Centerville, Wayne Co., Ind., offers for registration the plant described below. Any person objecting to the registration of this plant or to the use of the proposed name is requested to communicate with the undersigned at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Hydrangea cinerea sterilis, "Teas' Snowball Hydrangea"; collected from forest; a sport from *Hydrangea cinerea*; growth upright, spreading; foliage glaucous, pointed, serrated; height 4 feet; flowers snow-white.

W. N. RUDD, Secretary.

April 23, 1909.

AMERICAN CARNATION SOCIETY.

F. Schramm, Park Ridge, Ill., registers new carnation Kathleen B. W. Sport from Mrs. Thos. W. Lawson; color light pink; size 3 inches. This registration is provisional, subject to the decision of the judges at the next annual meeting as to its distinctiveness.

A. F. J. BAUR, Sec.

CHRYSANTHEMUM SOCIETY OF AMERICA.

It is the earnest desire of those interested in this Society to increase its membership.

It should be understood the secretary is the only officer receiving a salary, and he only a nominal sum, much less than the work involved deserves.

The other officers, including the executive committee and the members of the committees who judge the new varieties each year, perform their duties solely for the welfare of the society.

The work of the committees deserves unlimited endorsement from all persons interested in this branch of horticulture.

There was a time when new varieties were sent out in large numbers upon the merits as they appeared to the originator and in many cases they did not sustain the glowing description applied. Today all new comers must be indorsed by the society's committees to interest the public to any degree. Some may say all the certificated varieties do not come up to the standards. I know from experience there is no favoritism shown in the awards. The members of these committees are not superhuman and cannot discern from the six blooms submitted, certain defects that are either constitutional or controlled by cultural conditions. I refer to those susceptible to disease, difficult of propagation, insufficient petalage, etc. They give their unbiased opinion of the six blooms before them and that is all any mortal man can do. These gentlemen are certainly entitled to the hearty support and praise of every grower, for the unselfish zeal they have manifested in devoting time and money to this work.

Their benevolence enables the Society to protect the buying public against worthless sorts.

I feel there are too few commercial and exhibition growers interested in this charitable work.

I say charitable because we save dollars for every grower by indicating the best kinds for his purpose and do this without compensation. Am I asking too much of any grower, either private or commercial, to send C. W. Johnson, Sec., Rockford, Ill., \$2.00 (the annual membership fee)?

All of us spend this small amount in some foolish way without benefit. Some may say it is unnecessary to join the Society as its important matters are made public through the trade papers without additional cost. This is true, but we all have a moral obligation which should not be lost sight of.

The florists of this country are like one large family whose interests are in sympathy. One grower's failure with a certain crop, prevents him from meeting his obligations and thus his misfortune bounds and rebounds to others in the trade. If this organization through its efforts has pointed out the best sorts and has thus been a benefactor it is up to those receiving such service to join hands and assist.

Let us hope every one in the trade has interest in the welfare of all and

has pride enough to support this worthy cause by giving liberally of moral and a small amount of financial support. ELMER D. SMITH, Pres.

CLUB AND SOCIETY NOTES.

The Indianapolis Florists' Club held its monthly meeting April 14. The premium list for the Indiana State Fair may be secured from A. F. J. Baur.

About fifty guests were present at the clam-bake tendered the Utica Florists' Club by Dr. W. A. Rowlands, at Whitesboro, N. Y., on April 15. The following officers were nominated for the coming year: President, L. J. Baker; vice-president, Seward Hakes; secretary, J. C. Spencer; treasurer, C. F. Seitzer.

CHICAGO NOTES.

In the Wholesale District.

Chicago florists in the wholesale district were the recipients of a novel announcement this week. It was a nicely gotten up card and contained the announcement of the wedding of Mr. Robt. Rahaley and Miss Helen Murphy of Detroit, along with some good advice to the Chicago florists as to the kindness they ought to show the timid pair on their honeymoon. It was signed "Some of the Detroit Florists." Mr. Rahaley is the manager of the Michigan Cut Flower Exch. of Detroit, and a cordial welcome awaits him and his bride.

Chicago has two fine young women in the commission business and both are very successful. Miss Hertha V. Tonner was one of the original founders of the Flower Growers' Market, and is now on her seventh year. Miss M. C. Gunterberg is also located in the Market, but started some time later.

At Pochmann Bros.' wholesale store were seen blooms of carnation Trea-tor. It is a novelty somewhat on the order of Conquest, having deep pink petal with a decided rim of white. It has however a deeply fringed edge while Conquest has not, but on the other hand Conquest has a more uniform shade of pink, and a wider rim of white.

Florists are in danger of an ice famine. It was announced on Monday that the drivers of the ice wagons are threatening to strike. It is hoped that their differences may be settled amicably.

Spring Plant Work.

The outlook for plants for Decoration Day trade and for general bedding stock is only fair. Growers are now heaving their energies toward getting everything in readiness for the approaching season. The amount of cold, cloudy weather makes this rather a difficult problem to face. Stock in general and geraniums in particular will require skillful handling in order to be ready on time.

Chicago growers are now potting up their dormant poinsettias, getting them started so they will produce the young cuttings that will make the plants for next Christmas.

The Inventors.

The Geo. M. Garland Co. of Des Plaines, Ill., are perfecting an arrangement for emptying and refilling a greenhouse in an almost incredible short time. They expect to place it

PART OF EASTER SHOW

At H. C. Frick Greenhouses, Pittsburgh.

The Pittsburgh spring exhibitions at Schenley Park and in the private conservatories this season fully maintain the high standard for which they are famous. The healthy, friendly rivalry amongst the plantmen who make these exhibitions possible has much to do with this excellence; nothing mediocre counts, and the best is none too good for the Pittsburgh public who by these semi-annual, special efforts have become educated, and critical in matters horticultural.

The Schenley Park display is one of the best ever seen in western Pennsylvania and Supt. G. W. Burke and M. J. Jones are receiving the congratulations of the admiring populace. Many things are worthy of special mention, chiefly a display of H. P. roses in superb health and floriferousness. An innovation which attracts a large share of attention is a large compartment devoted almost entirely to old-fashioned flowers, amongst which are batches of several species of native cypripediums. One of the most beautiful and useful of the charming spring flowers is Ornithogalum Arabicum which would make a valuable addition to the number of cut flower subjects suitable for Easter. Mr. Jones carries over the bulbs and thinks they improve with age. The orchids make a creditable display.

on the market in 1910.

The Des Plaines Floral Co. are the inventors of a very substantial crate, which will fold. It is for shipping long flowers and several of them folded and tied together will make only a ligat package.

Personal.

The engagement of Miss Lillian Bloom and Wm. Feniger of Toledo, O., is announced and the wedding will take place in September. Miss Bloom is stenographer for Bassett & Washburn, Chicago. The customary reception took place on April 25th, at the home of the bride to be.

Mrs. O. P. Bassett of Hinsdale, Ill., was taken very seriously ill upon her

Some fine plants of Dendrobium thrysiflorum, D. nobile, D. chrysotoxum and D. densiflorum were noticed. A fine plant of Laelia purpurata which has been hurried into flower makes a good display. The azaleas, rhododendrons, genistas, cinerarias, calceolarias, lilies and other seasonable plants are splendid examples of cultural skill. The arrangement is one of the features of the show leaving nothing to be desired.

The Peacock Greenhouses do credit to Supt. Jenkinson and his foreman Alex. McLeod. Everything is of a high order. To mention all the creditable features would be too great a demand on space. The exhibition is seen by large crowds daily.

At the Heinz greenhouses J. Featherstone has prepared a display which is away ahead of anything attempted here in previous years and augurs well for future displays in these fine conservatories. Seasonable subjects are here in fine condition.

While the D. M. Clemson place is not advertised as open, gardener Jas. Wiseman turns no one away and has good reason to be proud of the fine condition of the greenhouses. His Easter display is fine, while the roses, carnations and other things in the reserves department are a surprise to his visitors. JAS. HUTCHINSON.

return from Hot Springs, Va., and was removed to the Mary Thompson Hospital in Chicago. At this writing, April 26, there is a very slight improvement in her condition though she is still very low.

Ernest Oechslin is able to be out after his recent shooting accident, but is far from being fully recovered.

L. Coatsworth of Bentley & Coatsworth has been a sufferer from rheumatism the entire winter. Mr. Coatsworth has been away for treatment, but does not show any decided improvement.

Chicago Visitors: Frank Smith, of Smith & Fetters, Cleveland, O.; Wm. Feniger, Toledo, O.; Edw. Amerpohl, Janesville, O.

ROSES UNDER GLASS.

A Paper on "Comparative Results" by Louis J. Reuter, Western, R. L. before the Gardeners' and Florists' Club of Boston.

It has been somewhat of a puzzle to me to know what line to take in talking on roses at this meeting. Although I sometimes find myself talking as though I really had very definite ideas on methods of growing roses I generally get back again to the point where I think that I am only a student and that what seems to be a settled fact today is surrounded by questions tomorrow.

The subject "Roses" is broad enough in a way but when I come down here to your shows I am struck with the idea that the growers for this market know quite a lot about roses. It would be much easier for me to show what I don't know than it would what I think I know. Consequently I shall not try to say anything regarding culture in general. The Boston growers know some things about growing most any crop. Anyone who is not aware of that had better come here to some of the shows. He will see exhibits of all kinds and will find that within a not very great distance from Boston there are located men who can hold their head up with the best in all lines, so I have decided to say a few words in the way of comparing the results from a few of our standard varieties.

Bridesmaid Outblooms Bride.

Of course, we must consider Brides and Bridesmaids first and my first impulse was to escape the bother of following out a maze of figures and say that these two varieties were alike in productiveness but I met a surprise there. Whether this is only a local condition or not I am not prepared to say but I found the Bridesmaid to produce the better. It has always been apparent to me that our stock of this variety was a little more thrifty, better able to resist mildew, etc., and I was a little bit reluctant to pass by the opportunity while I was poring over our records of satisfying myself as to the productiveness of these two old standbys. I found that our plants have cut as high as twelve blooms more of Bridesmaids than of Brides for the year. This number represents the limit, but in every case Brides fell short. As to the average price on these two there is little to be said. They hold about the same in the long run. This leaves the Bridesmaid with an advantage.

Killarney's Advantage.

Next we come to Killarney. This variety takes kindly to our conditions and we are able to get good stems and good color, but it is hardly as good a producer as Bridesmaid, and here is one important point to be considered. We cut short and weak-stemmed blooms of the latter while on Killarney we cut nothing less than No. 1 grade. All short breaks are pinched and left for double joint stems. The market price also favors the Killarney and with the public inclining to it when a pink rose is wanted, we must place it at the head of the list. How long this condition will last is a question. Bridesmaid had been the only standby as a pink rose for quite a number of years and we are now glad for a change, but the buying public are not going to be satisfied with nothing but Killarney

as a pink rose any more than they were with Bridesmaid. Of the new ones none seems more likely to succeed in taking a share of the honors than My Maryland. It will by no means crowd out Killarney, but it will find a place if it can be grown properly. (Regarding this I want to say a few words later.)

Richmond, Chatenay, Jardine, Reid.

Richmond does not take kindly to our soil. I can hardly think that other growers who cut such excellent blooms get as low returns per plant as we do. We cut good stock, but not enough of them and are trying to find a soil which will suit them better. Another year we may find different results, but our experience thus far has not been very satisfactory. Chatenay is a heavy producer, ranking close to Bridesmaid and is really a surprise when the season's average is considered. In grading there is an advantage at once, a good percentage of blooms being No. 1 and better. There are two main reasons why this rose is not more generally grown. First, it has a bud too light for warm weather. Until the cool nights come on it is impossible to cut blooms with sufficient body for them to be salable and the same condition exists by the early part of June. The other reason is that the buying public seem to consider Chatenay only as a novelty. A limited quantity will find a good sale but I don't think it would be wise to plant very heavily. Mrs. Jardine has not been a success with us, it being shy and also weak in color during the time when the sun is strong. A perfect bloom of this rose is really very handsome and such blooms as were offered in the Philadelphia market at Christmas time would always find a ready sale at a good price. Rhea Reid has been a stubborn variety and we found it necessary to discard it early this spring because it was not paying and we needed the room.

Bride's Great Rival.

With the coming of White Killarney, Bride will have its first strong competitor and there seems little doubt that this grand new rose will be received with a strong welcome. It seems to be the general opinion of the store men who had a good chance to form an idea, that this variety will prove a strong favorite for some time at least. It surely will be as good a producer as Pink Killarney and consequently should be more profitable than Bride.

My Maryland, Its Behavior and Prospects.

Now for a few more words concerning My Maryland. There has been a great deal said about this variety lately and several articles in the trade papers which have spoken well for the rose have kept well within the bounds of truth. There is no good reason for doubting the great value of My Maryland as a forcing rose and not only is it good in winter, but it is especially good in the summer. The blooms have good substance, enough petals and hold their color so well that it will surely be appreciated during July and August. It is not susceptible to mildew or black spot and as a producer I believe that the best we now have will be pushed to hold first place. No doubt it has been inclined in some

places towards resting this winter, but is that surprising? We didn't know the rose and its requirements and practically every one who grew it took every eye that could be used for grafting or cuttings, robbing the plants so much that it is not at all strange that the cuts were not heavy in some cases. It is a fact, however, that it has been made to produce very well by quite a few growers this year even though the most trying part of the season and I will venture to say that next year will tell us a different story. We don't know yet how good it can be grown and it is very probable that we have heard the worst and only a small part of the good.

Number of Blooms Per Plant.

I will try to give an idea as to what some of the varieties I have mentioned may be expected to cut. I have never gathered any definite ideas as to what other growers can get from their plants, but the following statements will give some faint idea at least as to what a plant may do. There are several things to be considered in stating what a lot of roses will cut per plant. Where the cut is given from a house of first year stock we must consider when the stock was housed, whether it was in the spring or June or July. If we are speaking of carried over stock we must consider how they have been handled. We have cut from one house up to date, twenty months without a break. The plants were not rested last summer and are still doing well. In this case a count may be taken for a full twelve months.

Where we rest a house each summer and carry it over two or more years, it is possible to count on ten months flowering. This is an advantage which carried over plants have over young stock planted each year, but when the stock passes the third year they seem to gradually cut less, and two or three years at the most seems to be the limit for growing our forcing roses. From a house of Bridesmaids which cut ten months in their second year we took fifty-three blooms per plant. This same house is cutting well now in its third year and had no rest last summer, but it will not equal that cut this year.

The best cutting we have done for ten months on Brides was forty blooms per plant and Killarney thirty-eight to forty, but the Killarney had hardly the full ten months to its credit. Chatenay has cut for us forty-two blooms for eight-and-one-half months, during which time the buds were of good quality, but to have run them longer into the summer would have been of little consequence. I cannot give an average cut from Richmond as we have never handled them in a way that will permit comparison with our other sorts.

Other Factors in Estimating Relative Value.

These records which I have mentioned do not mean that these are given because they are the best cuts I could find, but are simply a statement of last year. A house of roses may no doubt be made to produce better than these and it is also true that we may expect to fall below these figures at any time. All I have in mind is to give a general idea of the matter.

When forming conclusions as to the

relative values of these varieties mentioned, it is necessary that the subject be considered from all sides. While there is a difference in the productiveness of several varieties there are also facts to be taken into consideration before deciding which is the most profitable. While Killarney will not produce as heavily as Bridesmaids the higher percentage of No. 1 grade and better with no No. 3 at all which are cut from Killarney gives this sort the advantage at once. And so it is with all the varieties. To make sure which are the best paying ones a record must be kept of the cuts, prices and grade of blooms.

In conclusion I would say that I believe Killarney ranks first, Bridesmaid and Bride next in order named with a possibility that Richmond may come in close to Bridesmaid.

CARNATION SHASTA.

Shasta is the result from a pink seedling crossed with Enchantress. The color is pure glistening white,

always. The flower is round, moderately fringed and built up nicely in the centre. In size it runs from 3 to 3½ inches. Messrs. Baur & Smith say that the calyx never splits. The stem is of good length and always supports the bloom upright as the picture shows. The growth is strong, healthy and upright. It keeps well and travels fine. Its earliness, freedom in blooming and freedom from any tendency to crop warrant high hopes as to its future. Messrs. Patten & Co. of Tewksbury will grow part of the stock and will assist in disseminating Shasta next season.

An inquest was held at Dover last week on a boy named Piper, aged 13, who had died in great agony from tetanus which had been developed, according to the medical testimony, as a result of a pricked hand which the lad had sustained through slipping on to a gooseberry bush when jumping over a fence. The doctor stated that the chances were a million to one against tetanus occurring from such a mishap. —*Market Grocers' Gazette.*

PHALAENOPSIS SCHILLERIANA.

We take the following from an article on the cultivation of Phalaenopsis Schilleriana, appearing on April 3, in the "Gartenwelt." According to the writer, a head gardener at Potsdam, R. Blassfeld by name, the importation of the plant, is in spite of all precautions still a venturesome business. In the past, when Ph. Schilleriana could be found in abundance in its native habitats, large quantities arrived in Europe in a dead state. Meanwhile the collecting of the plant is considerably more costly, and not so remunerative, the plants not being found in districts readily accessible. On this ground, efforts have been made to lessen the chances of loss of plants by fastening them on wooden laths with the leaves hanging downwards and stuffing palm fibre between the plants, hindering the lodgement of moisture in the hearts of the plants, which in non-established condition means the death of the plants. The plants remain in their home for one year, bound to the laths or block, and are as well cultivated as is possible; and then having become attached to these, they are fastened into suitable chests and forwarded to their destination.

When the plants arrive at the end of the journey they are brought into a cool, dry house and gradually inured to light, warmth and moisture. The sprinkling of the plants is avoided during the first few weeks so as to prevent loss of the leaves. When the roots begin to show signs of life they are carefully loosened with the blade of a knife from the wood and placed in orchid baskets of the usual kind, or in earthenware pans, which have holes near the rim by which they may be suspended. The material placed about the plants should consist of quite freshly gathered sphagnum and polypodium roots, which in both cases should be but slightly chopped, and a small quantity of charcoal. The greatest care should be taken in arranging the roots in the pans or baskets. The base of a plant should be placed 1-2 cm. above the surface of the pan or basket, and quite free, so that no danger of decay can occur, as is often the case in a night—a misfortune which is feared generally, and the causes of which remain scientifically unknown at the present time. A layer of fresh moss should be laid over all, and the plant hung in the most suitable part of the house; otherwise the roots attach themselves so firmly to the staging that it is impossible to remove them by later repotting, etc.; and their loss may easily result in that of the leaves. For a time, after the transference of the plants to new baskets and pans the house should be kept at a temperature of 68 degrees to 71 degrees Fahr., shaded and moist, and water applied from above, quite lightly, and with a syringe. With increase of rooting, increase by degrees the amount of water applied and admit more sun-heat, but always moist and buoyant. Ventilation should be very moderate. In sunny weather the leaves may be plentifully syringed in the morning hours. According to need the house must be shaded, but the marbling of the leaves becomes more distinct with the admission of sunlight.

FREDERICK MOORE.

ARBOR-VITAE MONUMENTALIS.

This new and distinct arbor-vitae was found growing among a lot of American and pyramidal arbor-vitae seedlings in Illinois some fifteen years ago. It soon attracted attention by its distinct habit of growth and its rich dark green color. Each succeeding year's growth has added to its beauty and it is now a superb specimen sixteen feet high. The half-tone gives a fair idea of the appearance of the original tree, but shows it more pointed than it is, on account of photograph being taken on a windy day. Its habit of growth is the most upright of all arbor-vitae, forming without

shearing, almost a perfect column, the diameter continuing the same until near the top of the tree. With slight shearing they form the most perfect columns of living green. The foliage is fine and soft, borne on slender, wiry stems, which gives it an elegant plume like appearance, never stiff and rigid as in other compact sorts. The soft foliage gives the tree a graceful wavelike effect which adds much to its beauty. The rich dark shade of green is retained during winter, the trees never turning brownish or yellow as do other varieties. It is practically seedless, rarely showing any of the objectionable seed pods and is fully as hardy as the American arbor-vitae. A very fine variety for growing in tubs for decorative purposes.

MARTIN LEWIS BENSON.

DESTRUCTIVE EXPLOSION.

On Wednesday, April 21, at 1.30 p.m., a terrific explosion occurred at the greenhouses of F. C. Miller & Sons, Bracondale, Ont., wrecking practically the entire four acres of glass houses, the boiler house and smoke stack, ruining the stock and entailing a loss estimated at \$50,000 to \$60,000 (in which there is, of course, no insurance).

Only one boiler exploded but it did the work of a dozen. The boiler that exploded was 6 ft. 6 in. in diameter and 16 ft. long. Each section of a plate was torn (although half inch in thickness) like a sheet of paper; one section weighing probably 1½ tons was hurled about 400 yards into an adjoining field, another section, same size and weight about half that distance, and the remaining section is missing. The tubes from this boiler were scattered over an area about 600 yards in diameter. One small pump boiler weighing over three tons was hurled by the force of the explosion fully 100 yards from where it was set, not a pipe connection intact. A chimney 80 feet high, 4 feet in diameter, was razed. The debris, bricks, mortar and fragments of boiler fittings were hurled in all directions, showered over houses, breaking bars and glass and completely demolishing the houses. The debris dropped on plants, cutting and breaking stuff on benches. Two new King houses 28 ft. wide, 300 ft. long, only completed last fall and furthest from the explosion had two 4 in. boiler tubes dropped on ridge, smashing all the supports, bars, glass, etc., for a space 25 ft. in length and about half the glass of these new houses was broken by flying missiles. The complete destruction of everything was pitiable, but considering the seriousness and completeness of the wreck, it is a cause for thankfulness that although all the employees were at work just after dinner not one was injured beyond a few cuts from the flying glass. It is marvellous that nothing in the way of a more serious nature to human life occurred. Several of the local florists as soon as they learned of the wreck proceeded as quickly as possible with men and tools to try to render assistance, but there was too much of it to do anything, except protect what stock could be removed to neighboring greenhouses, which was done as expeditiously as possible. The two new houses are being reglazed and these will be filled with stock.

One small boiler is being installed for pumping water and another temporary for heat. Frosty nights have prevailed since and additional damage is feared until some heating is installed.

Further comment upon the disaster, its cause and its lesson, will be found in another column.

REFLECTIONS ON THE TORONTO CATASTROPHE.

Editor HORTICULTURE:

I have received clipping from Toronto papers describing the explosion of boiler and consequent wreckage of the Miller Greenhouses at Bracondale.

I just here wish to call the attention of your readers to the lesson taught by this catastrophe. In all effects of this nature those who are or may be interested, at first blush ask "What was the cause?" The effect all can see; deplorable as it was in loss

of property, still the absence of loss of life to those who were in jeopardy cannot but be looked upon as exceedingly fortunate, to say the least.

It appears to be the old, old story of a boiler installed in an improper manner, operated unskillfully or of such condition generally as made it a menace to life and property. Just what the boiler was there is nothing to show, but judging from experience, should be inclined to guess it was either a second-hand article or worn out in service for which it was originally intended. Too valuable for the junk heap (as is generally the case) it may have been purchased with the understanding that it would be just the article for the greenhouse man to operate at not to exceed one-fifth of the pressure designed for, and at a price very greatly reduced from what one of the same size, etc., would cost newly constructed and installed.

This is an old story to me. In an experience of some years past I have run across scores of boilers which were a menace every moment. Bought with an idea that they were cheap, they were fit only for a scrap heap, but the purchaser was advised that they were all right, having been in use, the seller don't trouble to say how long or how hard, but will magnificently do greenhouse duty for many years, "having been operated upon a pressure of 90 to 150 pounds, not a leak, not a bit of trouble for years. It will just fill your necessities at the duty you ask for (25 to 35 pounds) for an indefinite period,—and just think, you can get it into your place all ready for operation at one-fifth or less of what a new one would cost you;—we have got to put one in its place of larger capacity, which is our only reason for taking it out, etc.," ad libitum, ad nauseam. Many times I have heard this story from the innocent purchasers; many times I have been told by purveyors of this stuff, "Why, it is good enough to heat up a little greenhouse shack; what are you 'butting in' for?—you know the boiler inspector won't let us run it any longer, and a penny saved is two earned; are you trying to rob us?"—generally supplementing the whole by a proposition of "There will be 5 per cent. in it if you will place it."

I do not say, for I do not know that this 115 H. P. exploded boiler was of this class, but "I have notions" on that line, simply from the fact that I have run against scores of greenhouses fitted for steam heating with this junk heap stuff. Why more do not go up as forcibly as this one in Toronto did is almost inexplicable; possibly, as in some I have seen, they give out gradually rather than suddenly and thereby the calamity is averted. Why, but yesterday a large grower equipped with steam heating said, "There is a heap of truth in what you say, for only last summer I took out one of my boilers, and I tell you I could punch a hole in it with a tack hammer anywhere on the line of the brick setting." When asked what he took it out for, the answer was "Well, she leaked some for a couple of seasons and bran wouldn't tighten her, so I pulled her out; didn't cost me much anyway." At the suggestion "If it had blown up and killed some one, do you apprehend you were responsible?" a shoulder shrug was the answer; at another,

"Suppose it had gone up and blown your house into smithereens," the reply, "That would have been tough luck;" apparently filled his conceptions of loss or gain. All disasters have an element of instruction to the thoughtful, and this one it might be well to heed. Many "don'ts" may well be considered.

To any who desire to use steam, either high or low:

Don't run any risks by installing second-hand boilers, particularly unless they have been carefully inspected by qualified experts and determined to be unquestionably safe for the duty called for.

Don't, if the inspector reports a certain limit not to be exceeded in the operation of a steam boiler, assume that he was "fussy and theoretical" and take any chances by exceeding that limit.

Don't neglect, even though it may cost something, to have your boilers inspected yearly or oftener.

Don't place the operating of a steam plant in the hands of any one not fully qualified to give you positive certainty from injury to the boilers or their surroundings.

Don't deceive yourself that because an employee is strong and able to keep up heat by shovelling fuel that he is competent to give you best results in economy of operation.

Don't be deluded by the idea that because you see water in the water column that the boiler has the same level; the water column may be plugged by mud and dangerously unreliable. All columns are, or should be, fitted with pet cocks and should be tried at least twice a day.

Don't assure yourself that because a boiler is fitted with a safety valve it of necessity renders your boiler safe with no attention. It may get stuck fast and be unable to operate. Raise the valve once a day to be sure it is all right.

Don't neglect to have blow-off cocks tested each day, and be sure your boiler pump or steam trap is in proper condition. The blow-off may be leaking, draining the water from the boiler or your pump or trap not delivering water.

Don't use steam boilers for heating purposes if you can possible place a hot-water system. A properly installed force-circulation hot-water system is the most flexible, reliable and economical in existence and entirely free from destructive collapse.

The old hackneyed remark "What caused the explosion will never be known" is in this as in many similar cases used. From the reports of the disaster there can be no doubt to my mind; viz, too much fire; little, if any, water at first in the boiler; or a sudden influx of the same on heated crown sheet. Report says "Fireman had only been in charge two days." Must have therefore been unfamiliar with the boiler and its fittings. "Fire was started up but one-half hour before the explosion." Probably a quick kindling one, heating the plates to an extent that an ordinary supply of water would flash into steam instantaneously and produce a pressure equal to a heavy charge of dynamite.

If the "Don'ts" enumerated had been in mind and followed out, the disaster would have been averted.

WILLIAM W. CASTLE.

OUTLOOK FOR PLANT BREEDING.

A Paper by Dr. H. J. Webber, Cornell University.

(Continued from page 628)

Variations.

The fact that we can improve plants depends upon the occurrence of variations. No two plants are alike in all respects, and while the difference between individuals of the same species or variety is ordinarily slight, still there occasionally occurs a marked variation or sport which may be of an entirely different and new type. Breeders now recognize three types of variations: fluctuations, mutations and variations due to hybridization. Fluctuating variations are the slight individual variations which are not considered to be heritable, but which are doubtless in some degree transmitted. In the case of mutations or sports, as gardeners call them, we have a variation of larger degree which in general reproduces its characters through the seed. A typical illustration of such a variation is found in the Dwarf Cupid sweet pea, which was suddenly produced from one of the ordinary tall sorts, and which reproduced its character in its progeny. It is the discovery of these striking variations or mutations which have given rise to the great majority of our new varieties of cultivated plants. This is particularly true in the cereals, vegetables, and all plants regularly propagated by seeds. Fultz and Gold Coin wheat were such chance discoveries of mutations reproducing true to seed. Among fruits a large share of our standard varieties were found as accidental variations, but here in many cases accidental hybridization is probably responsible for the variation.

The use of variations produced by hybridization is of the greatest importance, but is well understood by horticulturists and need not be discussed in detail.

Producing Variations by Artificial Means.

One of the great practical problems before breeders is to learn how to produce variations, specially mutations, by artificial means. They are evidently the result of changed conditions of some sort, but what these conditions are which influence the changes should be understood so that the breeder may force the variation and not be compelled to await the slow and uncertain action of natural causes. Experiments have indicated that mutations may be stimulated by injections into the plant, of chemical solutions such as zinc sulphate, calcium nitrate, and the like, and many experiments on this method are now in progress.

Other experiments and observations indicate that very great changes in temperature at certain periods in the life of the plant may lead it to produce mutations. Experiments are being conducted also in feeding plants with different chemical solutions and out of the mass of evidence now being

accumulated it seems probable that some method will be discovered by which we may induce plants to produce these marked changes or mutations which are of such value to the breeder. It does not now seem probable that we will be able to guide the direction of the change but if we can increase the number of the variations we will increase our chances of getting the ones showing desirable improvements.

Bud Variation.

The importance of breeders giving careful attention to bud variation was emphasized by the speaker. We know that occasionally a tree will produce on one branch a variety of fruit different from that on the rest of the tree, and the same is true with flowers. The cause of this is a change that takes place in the bud instead of through the seed and sexual reproduction. Every tree is of a complex nature and every bud on a tree differs from every other bud on the same tree. As simple and fundamental as this truth is, it is scarcely recognized as it is difficult to find anywhere an orchard in which buds used for budding or grafting have been selected. It is generally recognized that buds reproduce their kind when used in propagation. If we take buds from a Baldwin apple tree they produce Baldwin apples, but horticulturists know that the fruit of Baldwin apples from Colorado, Washington, Arizona and New York, regions differing widely in climate and altitude, are of different shapes, color and flavor. No evidence is available to prove that these changes are not something inherited. If we examine the trees in an orchard of Baldwin apples, we may find one tree that will produce well and another immediately by its side which is a poor producer, and yet they are both Baldwin apple trees; both have all the characteristics of the Baldwin, one, however, is a good producer and the other is not. It is these latter good yielders that bring in the money. We have evidence to show that these good and bad characters are largely transmitted to the bud progeny, yet we pay almost no attention to the plants from which we select buds or cuttings. An orchard will last for a hundred years, and we plant largely for our children, yet we pay little heed to the selection of the buds which we use in propagation.

Inducement to Experiment.

In conclusion the speaker urged every horticulturist and farmer to adopt a breeding fad, to select some one plant which they will breed, as Jersey cows and Berkshire hogs are now bred. It costs an apple grower nothing to make a few hybrids of different varieties each year. The seeds of these hybrids can be grown in a corner of the garden at little expense until they produce sprouts two or three feet high when, buds or scions can be taken and top worked into large trees. Such experiments if made generally would unquestionably, in a short time, result in the discovery of many improved varieties and the names of their producers would go down in history as have the names of Colonel Baldwin, the originator of the Baldwin apple and John Bull, the originator of the Concord grape.

NEW HEAD GARDENER FOR PROVIDENCE PARKS.

We are sorry to learn that Joseph D. Fitts, for many years superintendent of Roger Williams Park, Providence, R. I., has resigned the position, for Mr. Fitts is a most estimable gentleman and an ideal official. But we are pleased in an equal degree to know that Mr. Fitts' successor is a gardener so capable and popular as Fred C. Greene. Mr. Greene has been for eleven years engaged in the laying out of Senator Aldrich's estate on Warwick Neck, now acknowledged to be one of the most beautiful in New England. Mr. Greene is an English-

FRED C. GREENE.

man and learned his art on the estate of Lord Rosebery. He spent eight years on the Cheney estate at Wellesley and the Lawrence place at Medford, Mass., before going to Rhode Island.

A TENDER APPRECIATION.

The widow of John Scott whose sudden death was noted in our last issue, desires to express to his many friends who so tenderly and lavishly demonstrated their love for him, in their presence and beautiful floral mementos, her sincere appreciation of their kindness and sympathy.

In her great affliction, the memory of this universal token to his life and character will remain a constant consolation.

Obituary.

Benjamin Simonito.

It is with regret many florists will read of the death, on March 29, of "Ben" Simonito, a remarkable cultivator of the tulip, auricula and carnation. Following his father's business—that of table knife blade maker—he worked for Messrs. J. Rodgers & Sons, Sheffield, England. His chief delight was, nevertheless, to be among plants, and he gave up knife-making about 23 years ago and devoted his attention to his plants. This "workman florist," as he was sometimes called, carried on floriculture under the most adverse conditions imaginable, in one of the smokiest parts of Sheffield. The following are the names of his finest varieties of auriculas: Rev. F. D. Horner, green edged; James Hannaford, green edged; Frank, grey edged; Heather Bell, white edged; Ruby, a beautiful red edged; Mrs. Douglas, a pretty blue self, and Talisman. The deceased followed his occupation till about three weeks before his death. He was in his 74th year, and is survived by a son and daughter.

Walter S. Hogg.

Walter Scoon Hogg, long identified with the florists' business in Providence, R. I., and one of the pioneers in that line, died suddenly at his home, on Sunday night, of hemorrhage of the brain. While he had not been in good health for some time, his indisposition did not keep him in the house. Sunday he attended morning church ser-

vice and later was at the Bible School session.

Mr. Hogg was a native of Scotland, and was 65 years of age. He was but a child when he came to America and acquired his education in the public schools of Providence. In 1864 he established a place of business at the corner of Benefit and Meeting Streets, his being the fourth green house built here. He was a man of quiet and retiring disposition but always to be found when the local Florists' Club or the fraternity in any capacity needed a friend and enjoyed the respect and affection of the trade always. He leaves a widow and one daughter.

Lewis J. Risser.

Lewis J. Risser, proprietor of the Mosbaek Greenhouse Co., Onarga, Ill., who died suddenly in New York, on April 13, was born at Ashland, O., on September 19, 1848. Mr. Risser was more widely known as president of the Iroquois Canning Co., a very large concern in its line. The announcement of his sudden death, by the company, closed with this sentence, which expresses the sentiment of all who knew him: "A brave soul, a loyal friend and a lover of mankind gone to his eternal rest." A widow and daughter survive him and will continue his various business enterprises.

Robert Cragg.

In Rochester, N. Y., Robert Cragg passed quietly away after a short illness, on April 5th. Deceased was 65 years of age and for many years had been associated with his son-in-law, George Hart, in the commission house, and had endeared himself to all local

florists by his quiet, unassuming ways, his friendly solicitude, and strict attention to every detail in business. Of sterling integrity, his absence was noticed by all, and the many kind inquiries for him was a splendid testimonial to his popularity and the sympathy of the trade is extended to the bereaved ones. S.

Herman Dreyer.

As we go to press a telegram announces the sudden death of Herman Dreyer, Elmhurst, N. Y., at noon on April 28. Mr. Dreyer was a well-known plant grower for many years. His greenhouses were formerly located at Flatbush, but a fortunate sale of the property for railroad purposes brought very substantial results and he removed to Elmhurst where a range of new houses was erected. Mr. Dreyer was an active member of the New York and New Jersey Plant Growers' Association, well-known and popular among a large circle of acquaintances in the trade.

W. A. Reichardt.

William A. Reichardt, head of the firm of Reichardt & Schulte, seed dealers of Houston, Texas, died April 3 at the age of 39. Mr. Reichardt was well known in southern Texas and his funeral was largely attended.

Mrs. A. K. Peterson.

Mrs. A. K. Peterson of Wheaton, Ill., died at her home on April 20th. Mr. and Mrs. Peterson had lived in Wheaton many years and were engaged in the florists' business.

ORCHIDS

We have just received the following Orchids in superb condition and solicit your inquiry for same.

CATTLEYA TRIANAE

best type known, free flowering and of great variation. Superb plants, fresh, plump and well leaved. By dozen, hundred or case.

ODONTOGLOSSUM CRISPUM

Pacho type, splendid plants in perfectly fresh condition.

Phalaenopsis amabilis, P. Schilleriana, **VANDA SANDERIANA**

Oncidium varicosum Rogersii, O. splendendum, O. crispum, O. Forbeii, O. sarcoodes, O. Westworthiana, Odontoglossum grande, Miltonia candida, M. spectabilis, M. flavescens, Lycaste Skinnerii, Scuticaria Steelii, Zygopetalum crinitum, Z. Gautieri.

To arrive in a few days: Cattleya labiata, Dendrobium formosum, D. nobile, D. thyrsiflorum, Vanda coerulesa, Cattleya Percivaliana, and many more. Write for prices.

PLANTING FOR WINTER EFFECT IN THE NORTHERN STATES.

A paper by George E. McClure, before the Society of American Florists.

(Continued from page 488)

Effects in Soft Colors.

For gray effects in stem and twig coloration, we can resort to the sea buckthorn (*Hippophae rhamnoides*), and to one of the Oleasters (*Elaeagnus argentea*). Effects in gray are sometimes very desirable in the winter landscape picture. For effects in green branches, we have the grass green stems of *Kerria Japonica*, and the green stemmed variety of the red dogwood (*Cornus sanguinea viridissima*), and the golden bell (*Forsythia viridissima*).

We look to the coral berry (*Symphoricarpos vulgaris*) for a magenta shade. For soft brown shades we have ample opportunity to select from a long list, such as *Stephanandra flexuosa*, *Spiraea callosa*, the golden bell (*Forsythia suspensa*), the tree of heaven (*Ailanthus glandulosa*), *Crataegus crenata*, and many others.

Many fail to notice the beautiful soft effects that can be obtained by mass planting of the brown-stemmed shrubs and trees, but it is particularly agreeable during the months of January and February to see a mass of brown stems as a relief from the blinding glare of the sun on the snow. It is then that we value the brown stemmed shrubs along with the osiers and dogwoods.

In order to secure exceedingly good effects in stem coloration it is well to remember that the highest color is produced in the growth of the current year and in order to secure this growth we must not be afraid to prune heavily in the spring, so as not to destroy the effect in winter. This is particularly true of the willows, dogwoods and *kerrias*.

Plan Your Planting with a Definite Purpose.

All planting should be done to a definite purpose. If it is for a place that is to be occupied throughout the entire year, we should not fail to make ample provision for the effect which we can produce in the winter. If successfully planned, such a planting would be a work of art, which would not only appeal to every artistic eye, but would at the same time serve as an education to the people.

The efforts of many landscape gardeners in the past have been to plan for summer effects only, and we are often sated with the profusion of summer blooms. It is in the winter that we more fully appreciate what we can get by way of color and tone.

Do Not Disfigure the Winter Landscape.

Too often we see the home grounds arrayed with bundles of straw, burlap and barnyard refuse, and the graceful shrubs which are absolutely hardy and need no protection, tied up in an unspeakable manner, suggestive of the hair dressing of an African chief.

The effective arrangement of plants for winter effect can never be taught

I have roots of the Imperial Palmetto *Asparagus* that cut seven stalks to a bunch which sells at 5 to 6 dollars per dozen bunches wholesale. Will bring you in \$400.00 to \$500.00 per acre. Also great *Rhubarb* clumps that will give you immense crop next spring.

WARREN SHINN, Nurseryman, Woodstown, N. J.

as it is more difficult than the more or less stereotyped summer effects can possibly be, yet it is worthy of careful study and will repay every effort. Wither travel and constant observation will enable us to add to our storehouse of knowledge.

The growing desire for out-of-door exercise, especially in winter, when indoor ventilation is so often neglected, cannot be too much emphasized and if it can be stimulated by the creation of better winter gardens and by rendering more beautiful the great out of doors, in the winter season, the art of the landscape profession will have taken a long stride forward.

CATALOGUES RECEIVED.

Howard Gardner, Greensboro, N. C.—Seed Catalogue 1909. Cover in colors.

Basil Perry, Cool Spring, Del.—Descriptive Catalogue of Choice Strawberry Plants, etc.

Horace B. Keizer, West Street Nursery, Reading, Mass.—A little 8-page announcement of this new enterprise.

Peacock Dahlia Farms, Williamstown Junc., N. J.—"New Creations in Dahlias." An illustrated descriptive list of new dahlias.

Pasadena Nursery, T. Chisholm, Pasadena, Cal.—Descriptive List of Hardy and Tender Plants, Trees, Palms, Roses, etc., for 1909.

Conard & Jones Co., West Grove, Pa.—How to Grow Roses. A serviceable list with cultural directions for the guidance of the amateur. Well illustrated.

Yokohama Nursery Co., Ltd. New York and Yokohama.—Wholesale List of Japanese Lily Bulbs, Nursery Stock and Seeds. A very full and useful price list of indispensable florists' material.

Good & Reese Co., Champion City Greenhouses, Springfield, O.—Spring Trade List, For Florists, Nurserymen and Dealers Only. Devoted to roses and standard varieties of florists' stock. Also Special List of Peonies from same firm.

Shatemuc Nurseries, Barrytown, N. Y.—Flowering Shrubs, Herbaceous Plants, Trees for Ornament and Shade. A very handsome catalogue, profusely illustrated with fine half tones. Covers in sepia ink showing Japanese anemone on front and a lovely water garden view on back. A new departure is the use of the inside pages of cover for illustrations, the subject being hydrangeas and rhododendron plantations, and the omission of the name of the concern from the covers, entirely.

TO EXTEND AND IMPROVE MINNEAPOLIS PARKS.

The Minnesota legislature during its last session passed a bill, permitting Minneapolis to issue bonds to the amount of \$350,000, to be used mainly for lake connections—Lake Calhoun, Lake of the Isles and Cedar Lake. A portion of it will be used for extending the system of boulevards, improving some of the smaller squares in the different parts of the city and for adding two or three more houses to the present greenhouse plant. If the council votes favorably on the bond issue, which no doubt it will, as the money will be spent all over the city and all the improvement associations are pushing it, Superintendent Wirth will be one of the busiest men in Minneapolis.

PATENTS GRANTED.

A Profitable Side Crop

Asparagus plumosus is a main crop with many growers having extensive modern plants but those with less up-to-date establishments, or parts of same defective in lighting or otherwise unsuitable for high grade crops, will find this subject one of the very best. We have prepared a cultural circular giving concise directions how to make money out of this crop. Send for it. No charge. An important feature in asparagus culture is good seed. The P. M. quality of greenhouse grown seed has earned a high reputation for freshness and purity. It is the true nanus and greenhouse grown. Send for trial pkg., 100 seeds fifty cents, if you wish to experiment only. In quantity \$3.75 per 1000 seeds, \$32.50 per 10,000 seeds. *Asparagus Sprenger* 75c. per 1000, \$5.00 per 10,000 seeds.

Seed Trade

AMERICAN SEED TRADE ASSOCIATION.

Watson S. Woodruff, Orange, Conn., Pres.; J. C. Robinson, Waterloo, Neb., First Vice-Pres.; C. E. Keudel, Cleveland, O., Sec'y and Treas. Twenty-seventh annual convention June 22-24, 1909, at Clifton House, Niagara Falls, Ont.

WHOLESALE SEEDSMEN'S LEAGUE.

F. W. Bruggerhof, Pres.; Burnet Landreth, Sec'y.

A Questionable Policy.

Reference was made a few weeks since to the supplementary contract for garden seeds awarded by the Department of Agriculture to one of the California seed growers, but no thought was there of reflecting on the integrity of the successful bidder. Indeed, no question that everything was not entirely square and above board has ever been raised. In referring to the very low price at which report says this contract was secured, the thought in the mind of the writer was the absurdly low quotations made by nearly all seedsmen and seed growers when bidding for the government order—prices usually much lower than they would quote to one another. The fact of the large quantities wanted does not justify many of these very low figures, the result of which is to cause erroneous impressions of standards of values in the minds of Department officials or employees, who cannot be convinced that many of these prices are below cost of production, which is often the case. The idea that seeds are cheap and of little value is fostered if not created by this unfortunate custom, and wholly incorrect views of the seedsmen's profits are formed. The latter statement is based on a remark of one of the southern Congressmen when the appropriation for the free seed distribution was under debate in the House two years ago. Comparing the prices in some of the retail catalogues with those paid by the Department of Agriculture for the same varieties, this solon characterized the seedsmen as robbers and swindlers and the disparity between the two sets of prices seems to give some sort of justification for his rabid utterance.

Seed Stocks Running Low and Values Soaring.

From all parts of the country come reports of great activity in the retail seed business, and all indications now point to a record year. The large jobbing houses are very busy, and have to report items sold out every day. In fact never were stocks so broken and so many items exhausted. Most ample crops will be needed to bring stocks up to average quantities, as with the exception of a very few lines, reserves are very small or wholly wiped out. Growers of seed beans have had their troubles getting out their seed stocks this year, and many who based their contracting prices on the basis of last year's figures paid the farmers, have found themselves facing the alternative of not putting out their seed or of doing business for practically nothing. While manufactured products have greatly declined, and are going to still lower levels,

agricultural products are, on the other hand, establishing new high records. Practically everything the farmer produces is unusually high, not a few abnormally above average prices, and when one begins to talk of contracted crops, he finds that the farmer has high and lofty ideas of values, and moreover is pretty firm in standing by his guns. It is said that much of the winter wheat crop of Michigan has winterkilled and will be plowed up, and about the only crops that can be substituted are potatoes, corn, peas and beans, and this will enable the seed grower to secure his acreage, but owing to the present high price of potatoes, they will be largely substituted and beans will be a second choice.

Notes.

Falmouth, Mass.—The new seed store and greenhouses of H. V. Lawrence are considered models of their kind, being equipped with all modern improvements.

Fredonia, N. Y.—It is announced that H. L. Cumming and F. W. Case have increased their stock in the Fredonia Seed Co. and have taken the management of the company.

Sioux Falls, S. D.—O. S. Jones & Co., seedsmen of Madison, S. D. have purchased land on Phillips avenue, on which they will erect a three-story building and transfer their seed business to this place.

CATALOGUES RECEIVED.

Jno. D. Imlay, Zanesville, O.—"A Few Choice Seeds and Plants," 26th Year.

W. B. Longstreth, Gratiot, O.—Longstreth's Seed Annual and Bargain Catalog.

John R. Box, Croydon, Eng.—Annual Garden Guide of Seeds, Begonias, Bulbs, Sundries, etc.

S. J. Galloway, Eaton, O.—Wholesale Price List of Hardy Herbaceous Plants and Perennials, Spring, 1909.

Friedr. C. Pomrencke, Altona, Hamburg.—Wholesale Price List of Flower and Vegetable Seeds and Herbaceous Plants.

Schaum & Van Tol, "The Hansa Nurseries," Boskoop, Holland. Wholesale Trade List of Nursery Stock 1909-1910.

Thompson & Morgan, Ipswich, Eng.—Catalogue of Choice Seeds for 1909. Established 53 years. A compact and very full list, without illustrations.

V. Lemoine & Fils, Nancy, France.—Catalogue for Spring and Summer

1909. Always an interesting volume to the garden enthusiast who likes to keep informed as to the new and meritorious introductions for which this house is noted.

Portland Seed Co., Spokane, Wash., and Portland, Ore.—Complete 1909 Catalogue. The half dozen departments in this catalogue are distinguished by being printed each on a paper of different tint. The covers are in red, green and white.

Wood Brothers, Fishkill, New York.—Trade List for January to May, 1909. Plants and rooted cuttings of roses, cannas, carnations, chrysanthemums, geraniums, verbenas and a general collection of bedding plants are listed at attractive wholesale rates.

Ellwanger & Barry, Rochester, N. Y.—General Catalogue. As always a finely illustrated and instructive list of Fruit and Ornamental Trees, Shrubs, Roses, Peonies and Hardy Border Plants. Also Abridged List of New and Noteworthy Varieties and an excellent pamphlet on How to Have Roses, by William C. Barry, reprinted from *The Country Gentleman*.

Sutton & Sons, Reading, England.—Sutton's Amateur's Guide in Horticulture for 1909. This publication is a model of catalogue making just as the seeds it lists are recognized as standard, the world over. It is a wide volume of nearly 200 pages on heavy paper, profusely illustrated with half-tone cuts. The cover is robin's egg blue, bearing no imprint except the royal arms in the centre of the front cover and the autograph of Sutton & Sons in silver.

Of Interest to Retail Florists

Ever since Easter the DETROIT stores have been kept busy in a satisfactory manner, but with most of us it was a chance of cleaning up the surplus left from the holiday. Were it not for the general tendency to produce more and more, this over-stock would not exist and its existence is not to be a criterion of the Easter business. Local seed stores are in the middle of a very busy season which at present promises to out-do last year. The weather is still cool and discouraging which keeps the plant business back. A good many new plantings are made around private homes but not as extensive as last year.

NEWS NOTES.

Frankfort, Ky.—F. W. Meyer, formerly florist at the Iowa State College, has taken a lease of the Henry estate.

W. Hartford, Conn.—R. R. Thomson has taken charge of the florist business of his father, the late Paul Thomson.

The floral decorations at the McCann-Goodwin wedding in Albany, N. Y., on April 14, by Amos F. Balfort, were exceptionally elaborate and somewhat unusual from the fact that yellow was largely used in the color effect.

Memphis, Tenn.—C. H. Hune was given a verdict for \$1,000 damages against Pinkney Latham, Jr., by a jury, on April 15. Mr. Hune, who is manager of the Memphis Floral Company, had accepted five plants for storage from Mr. Latham a year ago last winter. Four were returned in good order but the fifth could not be found, and Latham caused a warrant to be issued charging Mr. Hune with breach of trust. A few hours afterwards Mr. Latham withdrew the warrant and Mr. Hune then filed suit for \$10,000 for false arrest and malicious persecution. The suit was hotly contested by both sides.

Rockford, Ill.—J. W. Ingalls & Co., have moved their green houses to Lawson street.

Lewiston, Ill.—E. Bearce has purchased the plant of Wm. Jones and will take possession in the fall.

Newport, R. I.—H. J. Hass, florist, has leased a tract of land on Bliss Road for horticultural purposes.

Newcastle, Ind.—Otto Benthay has purchased the half interest of his partner in the Benthay-Coatsworth

Co. \$30,000 is said to be the price paid.

Richmond, Me.—L. B. Billings has purchased the greenhouse of L. B. Dingley and will take possession at once.

Hoopeston, Ill.—Andrew Peterson, florist, has bought out his partner's interest and will continue the business alone.

Mankato, Minn.—E. C. Willard's greenhouse was damaged by fire to the extent of several hundred dollars on April 12.

Santa Clara, Cal.—H. H. Hazleton has succeeded to the business of Hazleton Bros. and is looking for a new location for his greenhouses.

Dés Moines, Ia.—The Lozier Floral Co. has vacated its stand on 518 Walnut street and at last accounts was looking for a desirable down town location.

PHILADELPHIA NOTES.

George L. Pennock, of C. & G. L. Pennock, rose growers, Lansdowne, Pa., left on the 27th ult, on an inspection trip to New York and Boston. Among other places of interest on his program—28th St., Scarborough, Natick and Brighton.

C. M. Keegan, retail florist, 104 13th street, is offering a composition of 25 per cent. to his creditors. Mr. Keegan succeeded the William Graham Co., at the same address. The intention seems to be to settle up the concern on this basis and quit. The alternative of course is the usual legal procedure.

Flower Market Reports.

BOSTON

Much colder weather for the past week has had the effect of retarding the heavy crops that were beginning to overburden this market and conditions are generally much better than at the time we made our last report on the flower situation. Demand has livened up somewhat, prices are more stable and a better feeling prevails all around. Quality was never better. All varieties of roses are being received in fine shape, including high class Carnots from cold houses. Two items are scarce—smilax and lily of the valley. The former is always in short supply in April but the lily of the valley situation is somewhat peculiar. Ever since Easter, it has shown unexpected activity.

CHICAGO

The Chicago market is in a normal condition. Large shipments of flowers are coming in and prices consequently low but these low prices have induced buyers to come into the market who do not generally do so. The volume of trade is therefore very large. Business this year has been fully equal to that of last spring. The cold wet weather has held back outdoor stuff and no glut is expected. Beauties are doing exceptionally well. Carnations are in great supply but all really good shipping stock is moved promptly. Mr. Washburn says he is unable to fully meet the demand for the O. P. Bassell carnation. The rose supply is very large, Killarney being in heavy crop, as indeed are most of the varieties. The cold weather has shut off the lilacs that were coming in from southern Illinois. At Washington Heights, just outside Chicago, sweet peas six inches in height were reported frozen on April 25th.

INDIANAPOLIS

The week following Easter was a most successful one for all concerned, the growers being well prepared for all demands. The better classes of goods sold well, but there was a noticeable reduction in all grades of roses. American Beauties are in fine quality, the supply equal to demand. Carnations are holding their own but prices have receded somewhat. Bulb stock is on the wane. Sweet peas are handled in great quantities, the quality has never been better. Lily of the valley and orchids appear to be scarce. Lilac and violets are about over for this season. Anything in green goods is to be had at regular prices. Some good mignonette, snapdragon and stocks are seen. The plant growers are now devoting their time to bedding stock, but the planting does not become active till about the tenth of May.

PHILADELPHIA

An avalanche of flowers rolled down on Philadelphia last week. Ten times as much as the market could use. The demand was about the usual for this time of year; but was entirely inadequate to make any impression on the mountain of supply. The warm weather from the 17th to the 20th, loosed a regular cataract of flowers of all kinds—the worst that has ever been experienced at same date within

the memory of the oldest. Quality was all that could be expected. The outlook for this week is more promising. Crops are shortening up a little and a larger number of weddings and other functions for the end of the month are on the cards.

NEWS NOTES.

Victoria, B. C.—Fairview Esquimalt Greenhouses, two houses 136 x 205.

Columbus, O.—Wm. Graff has secured a five years' lease of the store room adjoining his present establishment.

Chicago, Ill.—It is said that C. Clemenson intends to erect an up-to-date florists' place on the land he recently acquired at 78th St. and R. R. Ave.

Indianapolis, Ind. The legislature has recently appropriated a generous sum for the parks and Supt. H. Tall is having a large number of trees, shrubs and perennials set out for the adornment of the city.

Philadelphia, Pa.—Bids for the completion of the park and boulevard plans for League Island Park were received on April 26 by the Department of Public Safety. The present appropriation allows \$500,000 for this project. About \$3,000,000 will have been expended upon this scheme when completed.

Residents of North Abington, Mass., are greatly stirred over the discovery that vandals had slashed and cut off with knives and axes last Monday night, some 1700 young trees belonging to the Bay State Nurseries, the damage amounting to several hundred dollars. The police are working on the case and a special town meeting may be called.

ALBANY NOTES.

A special meeting of the committee of the flower show was held at the store of W. C. King, on Thursday, April 29th.

Visitors at Albany: J. J. Karins, representing Henry A. Dreer, Philadelphia; Ed. Roehrs of the Julius Roehrs Co., Rutherford, N. J.

W. C. Kurth and Ely D. Burke have purchased the store, 518 Broadway, and will open up same about May 1 under the name of the Broadway Florist.

Mr. R. W. Zobel has sold his greenhouses and stock to Fred. Keller who is in the employ of the Julius Roehrs Co., Rutherford, N. J., who will take possession the 15th of May. Mr. Zobel is confined to his home with a severe attack of inflammatory rheumatism.

PERSONAL.

Frank Sealey, of Millbrook, N. Y., has taken a position with Miss C. A. Bliss, New Canaan, Conn.

M. E. Estep, of Chicago, landscape gardener, has opened offices at 407 Mohawk Block, Spokane, Wash.

The recovery of James McKellar, secretary of the Florists' Club of Columbus, O., from the operation for appendicitis, is now fully assured.

Visitors in Boston this week: Martin Reukauf, representing H. Bayersdorfer & Co., Philadelphia; A. Zirkman, representing M. Rice & Co., Philadelphia; J. J. Van Waveren, Hillegom, Holland; Andrew Wilson, Summit, N. J.; George C. Watson, Philadelphia, Pa.

EVERYBODY KNOWS

Gardening cannot be properly done without the aid of an accurate leveling instrument.

Bostrom's Improved Levels, No. 2 at \$15.00 and No. 3 at \$25.00, are conceded by all who KNOW to be the only Levels on the market which meet all the requirements, at the price.

Our guarantee back of every Level we sell, and satisfied users in every State in the Union heartily endorse every claim we make.

Shipping weight 12 lbs. Description on request.

NEW YORK MARKET.

Low temperatures and backward weather generally have called a halt on the immense shipments of flowers forced on the wholesale trade by reason of the summery weather of the previous week, and while the situation is by no means ideal, yet it is less discouraging than it was during last week's almost complete stagnation. No fault can be found, as a rule, with the quality of the product at present. What is wanted is more activity in the retail call and a more pronounced willingness on the part of the retailers to give the greenhouse product preference over the garden shrub and tree bloom.

A CURE FOR RED SPIDER.

Mr. E. Ruestow of Barnard's, N. Y., has after many years experimenting, found a cure for Red Spider. His application or remedy is so simple that for a cent or two a whole house may soon be under control, as the writer has seen hundreds of dead spiders on the ground four weeks after applying the remedy. What the composition is, Mr. Ruestow keeps to himself, as he is now trying to interest the government or some society to reimburse him for his trouble and he has nothing to sell, either liquid or solid. The spiders

drop off dead without the aid of syringing, from two to six weeks after treatment. In a paper read before the local Florists' Association, Mr. Ruestow guaranteed to kill spiders by his remedy, and offers to demonstrate to any person the results of his labor. This is the second year of trial and from the writer's view point (I have picked dead spiders from carnation bench and seen the bodies magnified 135 times), it certainly appears very successful.

A. H. SECKER

Rochester, N. Y.

DURING RECESS.

Bowling at St. Paul.

The last tournament between St. Paul and Minneapolis took place at the Swiss Casino at St. Paul, April 22. Minneapolis lost two out of three games. Of the eighteen games rolled during the season St. Paul scored 11 and Minneapolis 7. Total average score, St. Paul, 142.33; Minneapolis, 110.82.

Scores of last match game were as follows:

St. Paul.		Minneapolis.	
Drsinger	186 163 139	Wirth	137 116 121
Dill	164 123 187	Meyer	114 143 148

HELP WANTED

GOOD MEN

When you need good men,
skilled or unskilled, Write:

**THOS. H.
BAMBRICK**

34 South 7th Street Philadelphia

Help of all kinds, including that for Florists, Nurserymen, Seedsmen and the Horticultural trade generally.

WANTED FOR PRIVATE ESTATE

Foreman, with good knowledge of general greenhouse work, vegetables and general routine work; single, strictly sober and ambitious. Englishman or Scotchman preferred. Good wages to right man. Give full particulars first letter. WM. H. GRIF-FITHS, Box 448 Lake Forest, Ill.

FOR SALE

Greenhouse Men Attention

FOR SALE—About 10 acres with 900 ft. frontage on the C. & N. W. R. R. Main Line West, at Winfield. Land south slope to Spring Brook, extra fine black soil for outdoor planting, and the best location for a Green House near Chicago. The distance from Wells Street Depot is 27 miles. It is out in the clear air, away from the Chicago smoke, and is an ideal spot for this purpose. Price of the land is only \$2000. Will sell for 10 acres. Go out with us and see it. Vandercook & Skidmore, Owners, 108 E. Salle Street, Chicago.

FOR SALE—A fine estate situated on high ground at Hyde Park, Mass., near Milton. Only 10 minutes from R. R. station, fifteen minutes to Boston. House, 14 rooms and bath, all conveniences. Corner lot, 47,375 ft. land, fruit and shade trees. Greenhouse, 118 x 33, built 1908, 6 on sides, 16 centre, 16 x 24 glass. Good opening for commercial florist. Address A. G. Chickering, 53 State St., Boston.

GREENHOUSE property for sale; 2 houses, built 2 years; 4000 sq. ft. glass; hot water heated to 65 deg.; 2 acres best land. Modern house of 8 rooms and bath; barn 25 ft sq. Everything first-class. Chas. L. Pierce, Holbrook, Mass.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHESKY BROTHERS, INC., 59 Montrose Ave., Brooklyn, N. Y.

MISCELLANEOUS WANTS

WANTED TO BUY—Complete green house plants and all kinds of greenhouse material, to be taken down and removed at once. Terms cash. Address I. Susserman, 229 Livingston St., Newark, N. J.

WANTED TO BUY—Greenhouses and dwelling house in good repair with 3 acres or more of land, within 20 miles of Boston. Address: 16 Bedford St. Lexington, Mass.

WANTED—One Pandanus Utilis, large plant; state size and price. Scott Bros., Elmsford, N. Y.

SITUATIONS WANTED

SITUATION WANTED—Gardener, married, German, 20 years' experience, wants a position. Address H. Graue, care F. Drake, Florist, Pittsfield, Mass.

DON'T EXPERIMENT USE TO-BAK-INE

and your stock will be free from insects, clean, and the blooms will not be discolored.

USE

THE NIAGARA BRAND LIME SULPHUR SOLUTION

It destroys Scale Lice, Spiders and all forms of Aphides, AT THE SAME TIME Mildew, Blight, Rust and other Fungus difficulties.

Used in Winter or Summer. — No other remedy has been so universally effective.

Niagara Brand ARSENATE OF LEAD for chewing insects is equal to the best and better than the most Ask about our Green House sprayer. Address —

NIAGARA SPRAYER CO., - - Middleport, N. Y.

In writing to Advertisers kindly mention Horticulture

THE CASTLE BOILER

Don't Take Any Chances

of having the labor and earnings of years wiped out in a moment by operating a dangerous heating system. We furnish Steel-plate, tested Boilers, built to order under our specifications. We have many that have been in use for past three years and upon request will be pleased to furnish testimonials to any who are contemplating rebuilding or making additions to their heating plants. We are confident we can show such an economy in first cost, reliability, and above all in expense of operation as will appeal to the good business sense of any contemplating new construction or remodeling what has been in use. It is never troublesome to us to promptly reply to inquires and our steady aim is to be of assistance to our customers by way of advice and estimates.

We can also furnish Cast Iron Boilers of recognized high efficiency.

For forced circulation nothing has yet been produced to equal the AUTOMATIC CIRCULATOR. Its economy and absolute reliability have been demonstrated wherever it has been installed. Read testimonial of Thomas Roland in last week's issue of Horticulture, page 593.

W. W. CASTLE CO., 170 Summer Street, Boston, Mass.

Flavor and Flesh

are the aim of the fruit grower. The flavor should be rich and the flesh firm and solid. To secure the best of both is the mark of highest success in horticulture.

If you have not been satisfied with results heretofore, try a fertilizer with more

THIS IS THE WAY A U-BAR HOUSE LOOKS FROM INSIDE

You have never seen anything that anywhere near approaches it for lightness. Think what it means not only to have no gutter at the eaves, but also no heavier supporting roof members than the U-Bar, at any point of the roof.

Think what this wonderful lightness means in increased blooms, especially just this time of the year when light is at such a premium.

Think what a pleasure such an attractive, beautiful house always is — what a pride you can take in its being "the best there is."

The thing for you to do is to drop in at our office at an early date, or write us at once about the new U Bar house you want.

ANNOUNCEMENT

We have arranged with MESSRS. PATTEN & Co., Tewksbury, Mass., to grow part of the stock of **White Carnation Shasta** and to assist in disseminating it next season 1910. We have 12,000 plants between us. Orders may be sent to them or us with the assurance that from either place only strictly first class cuttings will be sent out. Shasta scored 89 points at the A. C. S. Convention, Jan. 27-28, 1909, and was generally conceded the best looking new variety in the whole show. It is a money maker for both grower and dealer.

Both Messrs. Patten & Co. and ourselves are booking orders now at \$12.00 per 100; \$100.00 per 1000.

BAUR & SMITH, Cor. 38th St. and Senate Ave., Indianapolis, Ind.

**NEW
ROSE****WHITE KILLARNEY**

We Know You Will Want to Buy White Killarney

Every live, progressive, up-to-date grower who has seen it is buying it; but when you buy White Killarney, be sure you get the right White Killarney (the Waban variety). When you buy from us you get the variety that has been exhibited and certificated, and the one that has attracted such favorable mention.

If you are in the vicinity of New York, we should be glad to have you call and see White Killarney growing at our Scarborough range, and you will say at a glance—as everyone has who has seen it growing—that it is by far the best white rose that has ever been placed on the market.

It is not only a good winter-flowering rose, but is good the entire year, and it is a splendid shipper. Read the following letter received from Mr. Willis N. Rudd, Secretary of the Society of American Florists, dated January 18th, in which he writes as follows:

"Dear Mr. Pierson:—I cannot refrain from writing you and expressing my admiration for the White Killarney as shown at Chicago on Thursday. It is an exquisitely beautiful thing and attracted much attention. I took half the blooms home with me, and they were finer on Saturday than they were at the show. The record is that these blooms were shipped from Tarrytown, staged and exhibited during the afternoon. They were then carefully wrapped up in a box, and remained in that box until one o'clock Friday morning, at which time I reached home; improved in quality up to Saturday, and were in fairly presentable condition on Sunday.

"In addition to being the most beautiful white rose of its class which I have seen, this demonstrates its splendid keeping and shipping qualities."

W. N. RUDD."

We were awarded Silver Cup at National Flower Show, Chicago, for best new rose with White Killarney; also Silver Medal Horticultural Society of New York.

Strong plants, 2 1/4 inch pots, own roots, now ready for delivery, \$30.00 per 100; 250 for \$70.00; 500 for \$125.00; 1000 for \$250.00. Grafted plants, ready April 1st, \$35.00 per 100; 250 for \$82.50; 500 for \$150.00; 1,000 for \$300.00.

Dendrobium Superbum Dearei

The cover illustration this week represents two distinct forms of *D. superbum* Dearei in the collection of Mrs. B. B. Tuttle of Naugatuck, Conn., The one on the right was exhibited in Boston in the spring of 1906, where it was awarded the silver medal of the Massachusetts Horticultural Society. It was shortly afterward figured in *HORTICULTURE* (Vol. III, page 547) and in *Orchid Review* (Vol. XIV, page 177).

Shortly after that another plant out of the same importation flowered and proved to be a white form, but was considered to be only a cutting from the other plant as it was then very small and produced only one flower. However, it has since developed into a nice plant and is far superior to the other in form and texture, the older plant having the habit of curling and twisting its sepals and petals, a common occurrence in the species. As to color, both are of the purest white with a faint lemon-yellow hue in the throat. The flower seen above the spray of *D. s. Dearei* represents a good form of the type species and gives one an excellent idea what a grand thing the white form is.

Dendrobium superbum requires plenty of heat during the growing season and a decided rest after the bulbs have formed. From the time the plants start to grow until the young growths are well rooted great care is necessary to keep the atmosphere of the house in which they are growing sweet by giving a little air at all times, else some of the young growths are sure to rot off; better to grow them cooler with plenty of fresh air than to try to maintain a high temperature by keeping the house closed tight. A weekly dip in weak manure water from the time the new growths have rooted until they have finished will work wonders in the way of building up good strong pseudo bulbs and consequently a good crop of flowers.

AMONGST THE ROSES

Today (April 23rd) is St. George's Day, and roses are being generally worn, in honor of the English patron saint. This "wearing of the rose" is of modern introduction. The increased attention paid to this custom has resulted in a fillip being given to the rose trade and the fact that these fragrant blooms can now be obtained at a reasonable price has had the effect of giving it a big impetus. The London market was well supplied with roses, and for some time past these have been sold for ridiculously low prices. The extra demand for the festival, however, somewhat improved matters. Amongst the varieties which were seen to advantage this week at Covent Garden were Marechal Neil, Mrs. John Laing, Capt. Hayward, Kaiserin A. Victoria, Bridesmaid, Bride, Richmond, General Jacqueminot, and others. Roses formed a special feature at the fortnightly show of the Royal Horticultural Society on Tuesday. There were one or two novelties which attracted attention. George Mount, of Canterbury, had amongst his collection Frau Lilla Rautenstrauch, a German importation. This is a rose with pale, conical blooms, lightly shaded with rose. Wm. Paul and Sons, of Waltham Cross, made a feature of a German rose, apparently the nearest approach to a blue rose which has yet been reached. It bears the unattractive title of Veilchenblau, but on this side it has been given the English name of Blue Ram-

bler. It is stated to be a sport from the popular Crimson Rambler. The rose is a vigorous climber, with bold semi-double blooms of a violet-blue tint. Of course the shade is not a true blue, but it is a step in the direction of obtaining that great novelty, which has been so much talked of, and so belated in appearing.

AURICULAS AND PRIMULAS

The lateness of the season was evidenced at the annual show of the National Auricula and Primula Society this week. There was in consequence a falling off in the number of exhibitors, and less competition in the various classes. Several of the successful exhibitors of former years were absent. The best group of primroses and polyanthus plants arranged for effect was exhibited by Mr. Mortimer, of Rowledge, Farnham. Certificates were awarded to the following auriculas: Sweetness, an Alpine variety of shapely form, of a purple tint, shading to lilac; Queen of Spain, a self show variety of a maroon tint—shown by James Douglas; Harbinger, green edged show variety, shown by W. Smith; Bracknell, an Alpine variety with a large yellow eye, shown by Phillips & Taylor; Alexander Dean, an Alpine variety of deep maroon tint, with a yellow centre, shown by F. W. Price, of the Beckenham Horticultural Society. On the same day the Royal Horticultural Society granted awards of merit to the following auriculas: Admiration, a gray edged flower with a sulphur tinted centre; Claud Halero, yellow centre and crimson petals, changing to bronzy-red at the margin; Robert Bruce, gray edged with sulphur shaded centre; Ulleswater, purple edged with whitish centre. The Society also granted a first-class certificate for Primula Forresti, which was exhibited by Messrs. Bees, Ltd. This is an attractive new species from the High Alps of Yunnan, China. The blooms are of deep yellow, with an orange colored eye. Leaves, ovate-elliptical with crenate margins.

W. H. Adsett.

Orchids at Royal Horticultural Society

On April 20 Charlesworth & Co. obtained an award of merit for an *Epi-Laelia* obtained by crossing *Epidendrum macrochilum rosea*, and *Laelia purpurata*; and a botanical certificate for *Pleurothallis Bisichenallei*, the flowers of which are very small and of a chocolate brown tint. Interesting it may be, but destitute of decorative value. F. Sander & Sons received an award of merit for an extra large flowered plant of their variety of *Miltonia Bleuana*. Other plants shown by this firm were *Laelio-Cattleya Choletiana*, large loosely built blooms which are developed in straggling bunches; sepals and petals of a light purple color; the lip stained of a darker tinge, with yellow in the throat; *Cattleya Schroderae* The Queen is large and white, with a stain of orange in the throat. Two *Odontoglossums* were shown named *Dreadnought II* and *Dreadnought III*; the first a cross between *O. Prince Albert* and *O. scopitrum*. Both have brown blotches on a yellow ground color but the blooms differ in size. Sir Trevor Lawrence, President of the Society, received an award of merit for *Odontoglossum Loochristiensis*, and *Od. aureo-fulvum*, a flower having a yellow ground color spotted and blotched with bright brown.

A society and a duty

The appeal of President Elmer D. Smith in last week's issue of *HORTICULTURE*, for a more widespread and hearty support for the Chrysanthemum Society of America is well seconded in the brief communication from C. H. Totty in this issue. *HORTICULTURE* is fully in sympathy with the sentiments expressed by these gentlemen. That the splendid work which the C. S. A. has done during its existence might have been done fully as well under the auspices of the S. A. F. and the gentlemen who have given so freely of their own time and money relieved of the unpleasant financial worry connected with it, is undoubtedly true. But the S. A. F. has not been disposed to undertake it and until some mutually acceptable system can be devised the C. S. A. should have the full and hearty support of every florist whose knowledge of what varieties are best to grow and how to grow them is directly due to the intelligent and really philanthropic work this useful society has been conducting. It will be a reproach to the chrysanthemum growers of America if a willing response is not forthcoming.

What "pure seed" means

Among our newspaper clippings of late we find frequent congratulatory reference, editorial or correspondence, to the various statutes passed by legislatures from time to time providing severe penalties for the selling of impure seeds. The ignorance and prejudice which inspire most of these articles are apparent in the implication all through that the seed dealers are in the habit of intentionally adulterating their wares in the same manner for instance as a milk man might mix water with his milk and that legal means are necessary to restrain him, overlooking the fact that purity in seed, reversing the situation as it applies to milk, is not a primary condition but a consummation approached or reached only through successive processes of cleaning and elimination. In calling for the strict enforcement of these laws we incline to the belief that these writers forget in their enthusiasm that the purification demanded must be paid for and the cost must of necessity fall finally upon the consumer. Buyers have demanded cheap seed and they have got it. While it would be absurd to assert that there have been no rascals or dishonesty in the seed business yet, as a general thing, we believe it has been usually possible for those who wanted pure seed and were willing to pay its value, to procure it. Under the new laws the difference will be that they must pay the price of pure seed or go without. When low-grade is banished low-price goes with it and nobody will rejoice thereat more heartily than the seedsman himself.

Change of policy at the Bussey Institution

We have read with considerable interest a lengthy article contributed to the *Country Gentleman*, in which changes recently made in the policy and management at the Bussey Institution, Harvard's Agricultural School, are severely criticised and the record of the Institution under former methods put forward as evidence that it was satisfactorily fulfilling its proper functions as intended by its founder. As we understand it, it is not proposed that the Bussey Institution shall be a teaching institution any longer except for a few special students, but that it shall be an institution for scientific research. While not disposed to take issue with the writer of the article in the *Country Gentleman* as to the propriety or wisdom of this change of policy we must say that his presentation of the case seems hardly a fair one. From the very fact that at times there were fewer students than instructors in the Institution it is not unreasonable to say that from the standpoint of public appreciation and support the Bussey was a failure as a school of agriculture and this notwithstanding the fact that some very brilliant young men went through its courses and also that among its instructors were men who labored loyally and whom the graduates will always hold in affectionate esteem. The shortcomings which have long been apparent seem to have at last dawned upon the Corporation of Harvard University and in trying to remodel the Institution along some more useful lines they are presumably doing what they feel to be their serious duty. The names of the gentlemen entrusted with the work of carrying out the new policy are such as to warrant a reasonable hope that in the next twenty-five years results of great importance to agriculture and horticulture will be obtained. In the meantime Amherst offers opportunities for practical horticultural education such as would be forever impossible in a place like the Bussey Institution.

Obituary.

John A. Shellem.

Philadelphia lost one of its prominent figures in the florist trade this week in the demise of John A. Shellem, who passed away on the 3rd inst. after a long illness and was buried May 6th. Robert Craig and Robert Kift, two of his close personal friends, were among the pall bearers, and many of the leading members of the trade attended the funeral.

Mr. Shellem was born and brought up in the southern section of Philadelphia known as "The Neck", and as a young man was an iron moulder, with a keen taste in an amateur way for floriculture, which later having inherited means—he turned to commercial account, starting in 1880 as a florist at 17th and Tasker streets. Two windfalls came his way; the first, when the property at the latter place was purchased by the city for a school site; the second, when the leased Clark greenhouses on South Broad street were taken for a new street. On both, substantial profits came to the owner, who afterwards built an extensive range of greenhouses at Magazine lane and latterly had a retail store just below 17th and Tasker streets. As a grower Mr. Shellem never posed as anything out of the common, nevertheless he raised a few things that made some mark, among them being the rose W. R. Smith; an improved large-flowering pure white freesia; the Early Snow chrysanthemum, a standard white, generally considered the superior of Polly Rose of the same earliness; and the Craigi croton, which is now recognized as one of the very best of the oak-leaved type.

Personally, Mr. Shellem was of a modest and retiring disposition; warm hearted to a fault; enthusiastic in the artistic advancement of floriculture, and always a willing coadjutor in all movements for the general welfare of the trade. He joined the local Florists' Club almost at its inception, twenty-four years ago, and the Pennsylvania Horticultural Society at the same time. The Society of American Florists counted him among its members also, and he was a regular attendant at nearly all of its annual conventions. A widow, six sons and one daughter survive him, all of whom are grown up. The business will be continued by the family. Mr. Shellem was 59 years of age and was universally respected as one of the most genial and likable men in the business, and that, too, in a city where the craft is noted for containing such a large proportion of men who follow and adorn their escutcheon "Brotherly Love", and do their level best to live up to it in spite of the strenuous competition and conditions of modern business life.

George D. Bennett.

George D. Bennett, who has been foreman at the Boston Public Garden, Boston, for nearly a quarter of a century, died on April 25, aged 49 years. About three weeks previous Mr. Bennett had his leg severely injured by a falling limb from a tree which he was

trimming and was taken to the hospital, where pneumonia ensued and proved fatal. He was a most industrious and valuable man in the important position which he filled so long and his death leaves a vacancy which will not be readily filled. Mr. Bennett served under his father, the late Henry Bennett, on the Cheney estate at Wellesley, Mass., when a young man and proved a clever pupil of a good instructor.

Mrs. Gottfried Amling.

Laurette, wife of Gottfried Amling, died on April 24 in her sixty-eighth year. A husband and nine children survive her, of whom Albert F., of Maywood, Ernest C. of Chicago and William, who has recently moved from Milwaukee to Maywood, are well known to the trade.

S. W. Marshall.

Samuel W. Marshall, nurseryman, of Fresno, Calif., died on April 15. He is survived by a widow and son; the latter has been actively associated in business with him.

Foster Udell.

Foster Udell, known as the apple king, is dead at Brockport, N. Y. His orchards were famous and were inspected annually by the Cornell University students.

M. P. Carn.

Maurice P. Carn, for many years gardener to W. W. Justice of Manheim, Pa., died on April 25. He was born in Whitmarsh, Pa., fifty-five years ago.

Edward Hennessy.

Edward Hennessy, one of the most expert gardeners in the country, died at Elizabeth, N. J., April 20, in his sixty-fourth year.

Thomas Kennedy.

Thomas Kennedy, employed for many years in the Swan Point Cemetery, Providence, R. I., died on April 21, aged 62.

L. B. Baxter.

L. B. Baxter, nurseryman, died on April 21 at Nichols, Mo., aged 48.

In the haste consequent upon the receipt of the news of the death of Herman Dreyer, just as last week's paper was ready for the press, we inadvertently mentioned Flatbush, N. Y., as Mr. Dreyer's former place of business. We should have written Woodside. Mr. Dreyer was 50 years of age. The funeral was held on Saturday, May 1, and was attended by many florists and plant growers for the New York market. He leaves a wife and three children.

NEWS NOTES.

Warren, O.—J. H. Brown & Son have leased the Gaskill greenhouses.

Ames, Ia.—The hail storm on April 28 did considerable damage to the greenhouses in town.

Everett, Mass.—Osgood Bros., the Woodlawn florists, have opened a down-town office in the Everett Associates' Building.

IN MEMORIAM.

Resolutions adopted by the Florists' Club of Philadelphia, at its meeting, May 4th, 1909, upon the death of David Bearn:

We, the members of The Florists' Club of Philadelphia, having heard with deep regret of the death of one of our oldest and most beloved members, David Bearn, extend our heartfelt sympathy to his brother, John, and other members of the family. We have lost one that took an active part and was deeply interested in Horticulture, or anything that tended to the advancement of the same, and also that we have lost a true and tried friend.

(Signed) JOHN WESTCOTT,
GEORGE ANDERSON,
Committee.

Resolutions adopted by the Florists' Club of Philadelphia, at its meeting, May 4th, 1909, upon the death of John A. Shellem:

Whereas, The Florists' Club of Philadelphia having heard with deep regret of the death of their fellow member, John A. Shellem.

Resolved, That the Club hereby expresses its deep sense of loss in the passing away of this most estimable brother, who has been with us for so many years, through storm and sunshine, and who has always been most enthusiastic in every movement for the general welfare of the trade.

Resolved Further, That we hereby put ourselves on record in appreciation of the sterling worth of our deceased brother in all his relations socially and commercially, and of the affection in which we held him for his open and kindly disposition, and

Further Resolved, That we record here with a few of his noted achievements in the improvement of commercial florists' plants, namely the Rose W. R. Smith, the Croton Craigi, the Early Snow Chrysanthemum, and the large flowering pure white Freesia. These, among other good things, will be a lasting monument to his memory and will keep fond recollection vivid longer than stone or marble.

Resolved Further, That a copy of these resolutions, suitably engrossed, be sent to the family of the deceased.

(Signed) EDWIN LONSDALE,
GEORGE C. WATSON,
Committee

THE CHRYSANTHEMUM.

Editor HORTICULTURE.

The notes of Pres. Smith in your last issue regarding increasing the membership of the C. S. A. are timely and to the point and it is a fact that though many florists watch the report of the different committees in the fall, still they are indifferent about joining the society and becoming actively interested in it. Some there are I know who believe that all the work now being done by the different societies such as the Rose Society, the Carnation Society and the Chrysanthemum Society should be done by sub-committees of the S. A. F., and I am not prepared to say but what that would be the ideal way. In the meantime however, what should be done about it? Surely the Chrysanthemum Society is worth the annual dues of \$2.00 (which is all the applicant is asked to contribute) to every florist in the country, not to mention the hundreds of private gardeners and amateur growers who can all find valuable information in its yearly report. Pres. Smith and his committees are willing to work and make this the banner year for this Society, so brother growers show your interest in the matter. In the common slang of the day "It's up to you."

C. H. TOTTY.

Havre de Grace, Md.—Chas. Uffler has taken a position with C. E. Bryan, Mt. Pleasant.

NEWS OF THE CLUBS AND SOCIETIES

AMERICAN POMOLOGICAL MEETING.

Thirty-first Biennial Conference, St. Catharines, Ontario, Canada, September 14-16, 1909.

The Executive Committee of this national organization has accepted a joint invitation tendered by the Ontario Fruit Growers' Association, the Niagara District Fruit Growers and the St. Catharines Horticulture Society to meet at the city of St. Catharines this year. Arrangements are rapidly progressing for a reunion of unusual value and interest at this attractive place on September 14-16, 1909.

An unusual feature lies in the fact that the Ontario government has recognized the importance of the coming of this society to Canada by placing a substantial sum of money at the disposal of the committee on arrangements. This committee includes representatives of the provincial as well as local societies.

The secretary of the Pomological Society was invited to meet with this general committee on arrangements at a conference recently called at St. Catharines for the purpose of organizing such a systematic campaign making for instruction and entertainment as would place the success of the convention beyond all peradventure. He was greatly impressed by the business-like and energetic way in which the main and important features involving preliminary arrangements were adjusted. The sub-committees are attacking with vigor and enthusiasm the respective pieces of work assigned to them.

The secretary is glad to report that an unusually large number of state horticultural societies have appointed delegates to attend the St. Catharines meeting. This will insure a wide representation and a diversity of interests which will present exceptional opportunity for considering in a satisfactory way legislative questions of inter-state significance. It is also to be noted that a great exhibition of Canadian-grown, Lake Ontario fruits will be in progress at the time of the meeting affording a splendid opportunity for a study of these northern varieties.

The fruit region between Niagara and Toronto is the most intensively cultivated region in Canada. Excursions through this famous section will be arranged for the pleasure and profit of the visitors.

The program may be expected to include the latest and best in the entire field of pomology. Arrangements are now making for the presentation of subjects of present-day importance by the leading authorities.

Early September is a delightful period in the Lake Ontario section. All members of this historic society should arrange to attend this convention, new members are welcomed. Full particulars will be issued later by circular direct to each member, but in the meantime a note should be

made of the time and place, and all members should plan accordingly.

L. A. GOODMAN, President.
Kansas City, Mo.

JOHN CRAIG, Secretary.
Ithaca, N. Y.

NORTH SHORE HORTICULTURAL SOCIETY.

The schedule of prizes offered for the June and August exhibitions of this society, at Manchester, Mass., for 1909, has been received. For the Rose Show, June 30 and July 1, there are no less than eighteen special prizes for flowers and five for vegetables, including several cups and medals. There are, besides, forty-eight regular classes. It is the sentiment of the society to welcome competition from outside its immediate territory, and exhibitors from a distance will receive attention. Eric H. Wetterlow is chairman of the show committee and John D. Morrison, from whom copies of the prize list may be procured, is secretary.

FLORISTS' CLUB OF PHILADELPHIA.

Two remarkable specimens of pelargoniums were shown by Samuel Batchelor at the monthly meeting of the Club, held on the 4th inst. These were in 8 in. pots, three feet high and the same in diameter and covered with flowers. Resolutions of sympathy were adopted for David Bearu and John A. Shellen, both of whom had been long active and esteemed workers in the membership of the Club. Routine matters occupied the balance of the evening.

NEW YORK FLORISTS' CLUB.

At the next meeting of the N. Y. Florists' Club, Monday evening, May 10, Patrick O'Mara will read a paper prepared by the venerable Chas. L. Allen of Floral Park on "Plant Development." As Mr. Allen is, unfortunately, at present in ill health, it will be impossible for him to attend the Club in person and read the paper himself; hence Mr. O'Mara has kindly consented to read the paper at that meeting.

JOHN YOUNG, Secretary.

THE WINNIPEG FLORISTS' ASSOCIATION.

This association had a most successful year. We held one flower and vegetable show which was both socially and financially a grand success, and this year we are making arrangements for a much better one, every member working hard to that end.

A. R. KING, Sec'y.

AMERICAN CARNATION SOCIETY.

Baur & Smith, Indianapolis, Ind., registered new carnation Skasta. Parentage pink seedling x Eucharistress; color, pure glistening white at all times; bloom well formed and 3 to 3½ inches in size; extra free and early in blooming and does not crop; does not split its calyx.

A. F. J. BAUR, Sec.

FLORISTS' CLUB OF WASHINGTON.

The regular monthly meeting of the Florists' Club of Washington was held at Gude's Hall on the night of May 14th. There was a fair attendance of members and the greater part of the meeting was consumed in discussing the desirability of holding a flower show in Washington next fall and the plans for same. Peter Bisset, John Robertson and O. A. C. Oehmle spoke warmly in favor of it. No definite plans were formulated.

NEWPORT JUNE SHOW.

The premium list for the June Exhibition of the Newport Horticultural Society has been issued. There are 56 classes covering decorative plants in groups and specimens, cut flowers—mainly roses—fruit, vegetables, children's exhibits, etc. Mrs. Goellet offers two special premiums of \$25 each which are sure to excite some lively competition. One is for best table of flowering plants, size 6 x 6 ft.—50 per cent. for plants, 50 per cent. for arrangement. The other is for best vase of cut flowers, with the same specifications. Copies of this schedule can be had on application to the secretary Daniel J. Coughlin, Newport, R. I. James Robertson is president of the society. The show will open on the afternoon of June 23 and close on the evening of the 24th.

CLUB AND SOCIETY NOTES.

The Rhode Island Legislature has recently appropriated \$1,000 for the Newport Horticultural Society, \$1,000 for the Rhode Island Horticultural Society, and \$800 for the Woonsocket Horticultural Society.

At the April meeting of the North Shore Horticultural Society, Manchester, Mass., president James Salter led the discussion on vegetables, a topic in which much interest was manifested. Resolutions were adopted on the death of Mrs. Charles Head, an active supporter of the society.

At the exhibition of the Royal Horticultural Society, London, on April 20, Messrs. Paul & Son exhibited several new Wichuraiana hybrid roses. One of these, named Iceberg, has a double flower of a diameter of four inches, and is white; Agate is another of this race, smaller and less double; Sea Shell is a pink, single flower.

J. Veitch & Sons, Ltd., among a variety of plants in pots, showed Clerodendron myrmecophillum, a plant with dark green lanceolate leaves of a leathery texture, and pyramidal spikes of orange colored, small flowers; Malvastrum hypomadarum, a plant extremely floriferous, flowers white and stained at the base of the petals with purple.

Lenox, Mass.—The Lenox Horticultural Society has contributed \$180 to the fire relief fund.

GREENHOUSES WRECKED BY HAIL.

Our illustrations show the effect of the recent disastrous hail storm on

the greenhouses of J. T. Conger, Hartwell, Ohio. Much glass in the Mill Creek Valley in southern Ohio was broken by this great storm. As shown

in the pictures, Mr. Conger had to use sacking as a cover for his houses, almost every light of glass having been destroyed.

GREENHOUSES BUILDING OR CONTEMPLATED.

Chicago, Ill.—Fred Vasthoff, one house.

Cleveland, N. Y.—David Will, one house.

Anderson, Ind.—Robert Ellis, one house.

Lawton, Mich.—Isabel Bitely, violet house.

Hartland, N. Y.—White Bros., one house.

Conshocton, O.—W. Clary, house 24 x 150.

Chicago, Ill.—George Reinberg, rebuilding.

Pleasant Prairie, Wis.—S. Fredson, one house.

Meadville, Pa.—G. W. Haas & Son, improvements.

Bethlehem, Pa.—John E. Haines, rose house, 30 x 60.

Allentown, Pa.—E. N. Kroninger, two houses, 65 x 100.

GEORGE SYKES.

In charge of the Lord & Burnham Company's new office, Rookery Building, Chicago.

Cleveland, O.—John Blechschmidt, three houses, 25 x 300.

W. Fairview, Pa.—Harry Miller, two houses, each 150 feet.

Wellington, Kan.—Worden Nursery, storage house, 80 x 120.

Lewiston, Me.—E. Saunders, house, 40 x 600; old houses rebuilt.

W. Bethlehem, Pa.—Weiskopf & Papsch, two houses, 30 x 100.

Hagerstown, Md.—Henry A. Bester & Sons, two houses, 30 x 150.

Baldwin, N. Y.—G. T. Schuneman, three violet houses, each 30 x 150.

Monticello, Ind.—Fred Roberts will rebuild the Ostot greenhouse on his place on E. Ohio St. and build a new house.

Lansing, Kan.—Masson & Asmussen are rapidly improving their recently acquired property. They have arranged with the K. C. W. railroad to ship their coal direct to their greenhouses.

TRUSS-ROOF GREENHOUSES IN THE GALE.

The following is self-explanatory:

HORTICULTURE Publishing Co., 11 Hamilton Place, Boston, Mass.

Dear Sirs: When making mention of the damage done to the houses of Hoerber Bros. of Des Plaines, you will do us a favor if you will kindly advise your readers that, although these buildings were in our own town, none of our material whatsoever was used in the construction of the same. As you are undoubtedly aware four houses of Hoerber Bros. were wrecked in the recent wind storm and a rumor has reached us that these houses were erected with our truss construction and it is for this reason we are writing you to correct this mistake, for our truss construction withstood the high wind better than did the houses in the locality with purlin posts.

We are this day in receipt of a letter from Pochmann Bros. of Morton Grove, in which they state that the truss roof houses withstood the recent high winds better than did the houses erected with purlin posts.

Trusting that you will comply with our request, and advise your readers that Hoerber Bros. did not use our truss construction in these houses, we remain,

Very truly yours,

GEORGE M. GARLAND CO.

Des Plaines, Ill., May 4, 1909.

WRECK OF MILLER GREENHOUSES

Due to Boiler Explosion. See Our Last Week's Issue.

Wm. Hagemann & Co.

Hudson Terminal Building, 30 CHURCH ST.
NEW YORK

The business formerly carried on by Mr. Wm. Hagemann (who died on April 3rd, 1909) *is being continued* at the same address as heretofore under the management of Mr. PAUL KASE (for many years associated in the business with Mr. Hagemann) and Mrs. WM. HAGEMANN.

PERSONAL.

Visitor in Boston, Thomas Madsen, representing Erchard Frederiksen, Landby, Denmark.

M. Rice & Co., of Philadelphia, announce that Frank I. Farney, formerly of Chicago, has been added to their staff of traveling representatives.

Mr. Philippe de Vilmorin, of Messrs. Vilmorin, Andrieux & Co., Paris, France, has been recently appointed by the French Government a counselor of the foreign commerce of France.

James George, who has been in charge since a month ago of the R. D. Evans estate at Beverly Cove, Mass., where President Taft is to spend the summer, is doing some extensive planting and arranging in anticipation of a very lively summer.

Albany Visitors: Mr. Jas. B. McArdle representing Vaughan's Seed store; H. Rinzweid representing Guldemond & Son, Lisse, Holland; C. S. Ford representing A. Herrmann, New York; Arthur Zirkman representing M. Rice & Co., Phila.

NEWS NOTES.

Warren, O.—The Gaskill greenhouses have been leased by George L. Brown of Syracuse, N. Y.

Altoona, Pa.—Myers Bros. contemplate a change into larger quarters and different location.

Minneapolis, Minn.—Miss H. B. Whitted, 34 So. 5th St. was again the victim of a burglar, but little of value was secured. This is the third attempt of the kind this year.

PHILADELPHIA NOTES.

A miniature cyclone struck the vicinity of Girard College on the 1st inst. Three of the tall electric light towers in the college grounds were wrecked, and Mr. Lonsdale, superintendent of the gardens and grounds, reports great damage to trees, shrubbery and flower beds.

Work will commence next week on the new range of greenhouses at Norwood, Delaware County, for the Robert Craig Co. Four houses, each 27 1-3 x 300 ft. will be erected and ready for planting by the first of July. The Lord & Burnham Co., have contract for the material. The erecting will be by a local contractor. Robert Craig in answer to inquiry states that it is not likely that their present establishment at 49th and Market St. will be given

up for two years yet. The Norwood property is 16 acres in extent.

Some new assets have been discovered in connection with the Keegan Flower Store and it is now reported that the creditors are favorable to accepting a composition of 50 per cent. and allowing the business to be continued.

A. E. Brown, of W. Atlee Burpee & Co., has taken a cottage for the summer at Atlantic City and will move into same next week.

Charles P. Poryzees, of 15th and Chestnut St., will sail shortly on a trip to Europe for rest, recuperation and a long deferred visit to relatives.

Mrs. Howard M. Earl, who underwent a critical operation at the Woman's Hospital recently, is reported almost recovered, and expects to return to her home on Saturday, 8th inst.

NEW ENGLAND FRUIT SHOW.

On Oct. 19 to 24 next, inclusive, a New England fruit show will be held at the building of the Horticultural Society, Huntington and Massachusetts avenues, as a result of the conference of governors of the New England states last fall.

The objects of this exhibition are to stimulate interest in fruit growing among the farmers of New England, to show the consuming public that New England fruit can be grown that is equal in appearance and superior in quality to that now grown in the West.

The committee in charge has set \$10,000 as the sum needed for the premium list. In Massachusetts alone agricultural and similar organizations have already pledged upwards of \$1200. Prizes will be offered for all fruits and will be for quality and appearance of all recognized varieties and in all styles of package.

THE TREE AGENT.

As he appears to the Bangor News.

Without regard to Governor Fernald's wishes about the right date for our Arbor day, which in theory should come to Maine regularly every year, the dapper chap who called on you last winter and ate corn beef and cabbage at your table, and seemed to like it, and then walked off gayly to make other conquests—bearing your autograph for six peach trees, two banana bushes and a choice lager beer tree this freeman comes to see you at the very time you are out of money and demands cold cash on delivery in spite of your personal inclinations in the matter, and without even asking to learn the cause of death of the trees you bought and paid for last year. You recall now that as you stood above the chopping block and brought your axe down with a great whack upon the stalks of the dead and mummified treellets that you then and there resolved to buy no more trees from anybody, but here he is again with the old smile on his face and the old story on his tongue, and nothing new but some bundles of lead pencils that were grown in the nurseries of Rochester, N. Y.

The company makes good all losses from death, does it? A sort of life insurance company against deceased trees is it? Not much! When an old countryman has worked days and sat up nights over sickly young trees, when he has blistered his hands and watered the trees with his sweat and his tears, you cannot replace them. It is just as if the doctor who had killed your baby should say he would drop around and bring you another baby that was "just as good." There is no substitution for the things we work for and suffer for. The trailing tree man is a sweet and beguiling companion over a table re-cumbent under loads of baked beans and brown bread. He will sell you what you want at his price, but if you do not know what you want or are not absolutely sure of it, a farmer will receive a greater measure of mercy from a society of the Black Hand in Sicily than he can hope for from the chap who sells prospective fruit from copper plate samples, that have been colored by hand or else "made in Germany."

—Bangor News.

APPLES IN NEW ENGLAND.

New Englanders who put their money into orange culture in the south should think a moment on the statement of the expert who says that apple culture in New England offers the greatest return and is less hazardous than any other class of orchardry to which New England is adapted. He says there is plenty of cheap land in this part of the country that is admirably adapted to apple raising. Yet a proportion, sometimes a very large proportion, of the apples sold in New England markets come from other sections, and we buy them at the good prices because it is the fact that the dealers have to pay a good profit abroad and then the freight charges for bringing them into this section. It would appear that some people with capital are neglecting an obvious chance to make a good return on the investment easily and at home, where they can watch their investment closely. *Brookline Enterprise*

RANGE OF CONSERVATORIES AT CENTRAL PARK, DAVENPORT, IA.

Erected by Lord & Burnham Company

NEWS NOTES.

Beverly Farms, Mass.—The Pierce Nursery has secured the contract for planting hedge and trees on the Lee estate.

Paducah, Ky.—C. L. Brunson & Co., have been engaged to supply the plants for the stations of the N. C. & St. L. R. R.

John E. Dwyer, formerly manager for Burr & Co., has leased four acres of land in Manchester, Conn., and will start in the nursery business.

Windsor Locks, Conn.—The Brainard Floral & Nursery Co., have received the order to beautify the grounds around Memorial Hall.

Portersville, Pa.—A demonstration in spraying was held on the Oliver farm on April 23, under the direction of inspector F. L. McClure. J. L. Fisher of Pittsburgh was the lecturer.

The Boston & Maine has contracted with Loring Underwood, a landscape architect of Boston, to plant 1000 wild rose bushes between the Fitchburg and Southern division tracks, at the new Belmont station.

The New York State Forestry Commission is making preparations to plant seed for 600,000 Norway spruce at Randolph, Vt. The International Paper Company is engaged in a similar enterprise at Randolph.

PERSONAL.

Miles Dietrich has taken a position at the Simonds greenhouse, Barre, Mass.

R. L. Woodward has returned to Indianapolis, Ind. and started in landscape gardening.

Ernest A. Asmus, formerly of Chicago has been placed in charge of the Muskrat Nursery on the Government forest reserve at Helena, Mont.

Frank N. Howe of Hartford, has taken a position as manager of landscape and nursery work for George Johnson & Son, Providence, R. I.

J. M. Prost, formerly an assistant in West Park, successfully passed the recent civil service examination and has been appointed city forester of Chicago with a salary of \$2,000.

CATALOGUES RECEIVED.

Yokohama Nursery Co., Ltd., Yokohama, Japan.—1909-10 Descriptive Catalogue of Bulbs, Plants, Seeds. Enclosed in covers of wood veneer fastened with knots of vermilion floss and lettered in gold. This publication proclaims its Japanese origin in external appearance. It is finely illustrated with half-tone engravings, and six full-page plates in beautiful colors, of lilies, Pink Cherokee roses, Magnolia parviflora flore semipleno, Viburnum Carlesii, Kudsu vine and decorated porcelain flower pots.

The Twenty-Sixth Annual Report of the Board of Park Commissioners of Minneapolis, Minn., recently issued is not only a splendid record of praiseworthy progress in park construction but an art volume as well. The cover illustration—a scene in Mississippi Park—in colors, and the many full-page half-tone views inserted throughout the volume are fine examples of reproductive art and the typographical work throughout is fully up to the high standard of the contents. A number of diagrams and maps are bound with the book and are interesting as showing the character of the improvements contemplated under the supervision of that energetic superintendent, Theodore Wirth.

N. F. McCarthy & Co. are having an unusually fine stock of spring planting material, both hardy and tender, at their Tuesday and Friday plant auction sales at 84 Hawley street, Boston. The attendance at these sales is excellent and growers having surpluses to dispose of will find this a prompt and effectual means of reducing stock. Catalogues of each sale are issued in advance and mailed to applicants.

Cincinnati, O.—The park commission have rented for a term of ten years the Jackson Nurseries on Price Hill. The nursery stock on the premises belonging to D. R. Herrick was purchased for \$2,000.

Seed Trade

AMERICAN SEED TRADE ASSOCIATION.

Watson S. Woodruff, Orange, Conn.,
Pres.; J. C. Robinson, Waterloo, Neb.,
First Vice-Pres.; C. E. Kendel, Cleveland,
O., Sec'y and Treas. Twenty-seventh annual convention June 22-24, 1909, at Clifton House, Niagara Falls, Ont.

WHOLESALE SEEDSMEN'S LEAGUE.

F. W. Bruggenhof, Pres.; Burnet Landmeth, Sec'y.

Bush Limas Short.

The fierce character of the weather the past week largely paralyzed counter trade, but with the prospects of clear and warmer weather business should hum the coming week. A few bushels of Burpee's Bush Limas came to light last week, and were snapped up at \$10.00 per bu., so report says. Beyond all question these beans will be short again, as confidential information clearly shows that there is very slight chance of growers raising enough to fill orders. Whenever the embargo is lifted further information will be given.

Damage in the Norfolk District.

Last week's storm has done immense damage to garden truck in the Norfolk district and in the South and West generally, and it is now so late that replanting is impracticable. It can be done, of course, but the crops would come into market in the north at the same time as the Northern crops, which would mean sick and demoralized markets and no profit, if not heavy loss, especially to the southern truckers. Seedsmen doing business with truckers in the Norfolk district are liable to find collections slow this season, as the loss has not been on crops entirely, but has extended to building and other property which the trucker will want to make good before he pays out money for anything else. It isn't a pleasing prospect.

Ely Seed Co.

It is said that the Ely Seed Co. are going to move and take a store, though the location has not been given. This concern has been rapidly forging to the front and though they have had an uphill fight, grit and perseverance have carried them along to where success now seems assured. They surely have fought a good fight and kept the faith, in that they have done business on the square and their integrity is universally recognized. More success to 'em.

Pea Prospects.

Planting of peas in Michigan is progressing, but what shall the harvest be? The canneries are praying for a short crop, the seedsmen, or at least seed growers, for a large one. Here is a conflict of interests. Can both be accommodated? "The prayers of the righteous avail much." Take your choice.

NEW YORK PURE SEED BILL.

The amended pure seed bill introduced in the N. Y. State Assembly by Mr. Callan has passed both the Assembly and Senate and is now before the Governor for his signature. If the Governor signs it, as he probably will, the bill will go into effect July 1, 1909. Following is the text of the bill:

ARTICLE XVI.

Inspection and Sale of Seeds.

Section 329. Inspection and sale of seeds.—No person shall sell, offer, expose or have in his possession for sale for the purpose of seedling, any seeds or cereals, grasses, clovers or forage plants in quantities exceeding one pound, unless every receptacle, package, sack or bag containing such seeds, or a label securely attached hereto, is marked in a plain intelligible manner as follows, and said sack shall be on the receptacle, package, sack or bag itself if there is more than ten per centum of injurious foreign seed:

a. With the full name and address of the seller.

b. With the name of the kind or kinds of seeds, except in the case of mixtures prepared for special purposes, when so labeled, and the name of any foreign injurious seeds present to the extent of five per centum or over by count and the name and per centum of the following adulterants, if present, which adulterants shall not be taken into consideration when estimating the five per centum herein above referred to:

Yellow trefoil in red clover,
Yellow trefoil, burr clover, sweet clover or dodder, in alfalfa.

Canadian blue grass in Kentucky blue grass,
Meadow fescue or rye grass in orchard grass.

c. With the claimed per centum of purity of the sample by count which shall be not more than five above the per centum determined by official examination.

Section 331. Samples, publication of results of examinations.—Samples of seed shall be taken in duplicate, both samples to be sealed promptly and one to be tendered and, if accepted, to be delivered at the time of taking to the person apparently in charge and a receipt taken therefor, unless refused. No action shall be maintained for violation of this statute if the seed was not sold or exposed for sale. The commissioner of agriculture is hereby authorized to publish from time to time the results of seed examination, together with the names and addresses of dealers from whom the samples examined were taken.

Section 2. This act shall take effect July one, nineteen hundred and nine.

Notes.

Vaughan's Seed Store has removed from number 14 to 25 Barclay street, New York.

Norristown, Pa.—A three-story seed and flower store is being built by W. H. Catanese, 323 De Kalb St.

Hjalmar Hartmann & Co., the leading cauliflower and cabbage seed dealers of Denmark, have moved their stores and offices to the new building, Logangstraede 20, Copenhagen. Am-

erican buyers of cauliflower and cabbage seed at wholesale will please make note.

Chicago, Ill.—Henry H. Poole who died recently at Kewanee, Ill., of pneumonia, was office manager of the Albert Dickinson Seed Co. for twenty years.

European sources of information indicate that there is a very considerable shortage in the crop of Kentia seed this season, more especially in Forsteriana. The consequence is a smart rise in price, the later prices showing an advance of nearly one-third over previous quotations.

Denver, Colo.—The Barteldes Seed Co. has recently acquired the land at 1525 Fifteenth St. on which their poultry department is located, and will now erect a new and spacious building at a cost of \$50,000. Manager C. R. Root of this company was recently elected president of the Colorado National Apple Exposition.

WINNIPEG TRADE NOTES.

The trade here was exceptionally good this year. Flowering plants sold better than ever at good prices. Cut flowers also went good, about equal to last year. Bedding plants of all kinds are looking splendid, but the weather conditions are poor—snow and wind storms and too much frost for this time of the year. Otherwise the prospects for spring business are very bright and daily enquiries for garden plants give promise of a very active retail trade.

The up-town stores
WASHINGTON report business a
little improved over
last week, but not much difference
about the market centers. The cold,
rain and wind of the greater portion of
last week not only cut down the quality
and quantity of flowers, but it
threw a very decided damper on all
kinds of entertainments. There are
numerous weddings looked for this
month which will go far toward making
the Washington florists "look
pleasant."

FLORIST ROBBED.

Henry Russe, 1614 South Grand avenue, stopped in front of 3369 Folsom avenue Saturday evening with a wagon laden with flowers which he offered for sale. Four negroes took a hand in the bargaining:

"Ah wants er gemanian," said one. He bought two or three other plants and tendered a \$5 gold piece. Russe drew forth a capacious bag containing \$100 in bills and change, but he could not break the five so he put the bag back into his coat pocket and went into a store. The one negro got his change and the other three decamped. A little later Russe discovered that his bag and the \$100 had been slipped from his pocket. The police are after the negroes.—*St. Louis Star.*

INCORPORATED.

New York, N. Y.—Wm. Hagemann Co.; V. P. Donihoe, R. S. Batson, C. S. Clark: Capital, \$50,000.

BUSINESS CHANGES.

Nevada, Mo.—C. H. Hollied has purchased the Weltmer greenhouses.

Cincinnati, O.—Carl Yager has bought the florist store of Mrs. Henry Glins.

Salem, Va.—J. Scharzter has succeeded J. J. Curran at the Salem Conservatories.

Bangor, Me.—Frank P. Lane has taken over the greenhouse plant of Carl Beers on Mt. Hope avenue and will run it in connection with his place on Columbia street.

Chicago, Ill.—The Palace Floral Co., 189 No. Clark St., has been purchased by E. Armstrong, formerly with Wieland & Risch.

Pansy Garden Flower Shop, Miss Grace Sawyer, proprietor, moved May 1st to 2027 W. Madison St., where she will have much better accommodations.

J. W. Walters will carry a stock of flowers in connection with his stationery and cigar store at 2020 West Madison St., formerly occupied by Miss Sawyer.

A. W. Morgan, for many years a prominent florist of Danville, Ill., has purchased the business of Mr. Iralson, 588 43rd St., Chicago. Mr. Morgan sold his business in Danville one year ago with the intention of retiring but the call of the trade was too strong and he could not resist. The Iralson store will be continued under the old name for a time.

Flower Market Reports.

BOSTON The present week finds the flower market in excellent condition, strong and healthy. Shipments clean up promptly every day at prices that compare well with those prevailing at a corresponding date in any recent year. From accounts received from various centres it would appear that Boston is the strongest flower market in the country for the time being. Carnations are in brisk demand and the available supply is hardly equal to the emergency. As to quality, stock in general has never been better at this time of the year. This is true of practically every standard variety of flower. Shipping trade to New England points is quite brisk.

March weather with a **BUFFALO** good variety in the line of high wind, rain, snow and sleet was had the past week which did not help the trade. Roses and carnations came in quite abundant the first part of the week but the latter dropped off in supply; on Friday and Saturday everything in these lines cleaned up. Kaiserin, Carnot, Richmond and Killarney roses also fell off in supply, but Bridesmaids and Brides in all grades seemed to remain with the wholesaler. Beauties have been in good supply but have not moved too freely. The demand has been more for sweet peas, lily of the valley, daisies and orchids, the latter being rather scarce and prices holding firm. Violets had little or no demand, and prices were away below quotation. Indoor Poeticus narcissi are had, also outdoor jonquils, which have moved quite satisfactorily. Callas and longiflorums are in abundant supply. Greens are plentiful, especially adiantum, but smilax is still on the scarce list.

Chicago had a queer **CHICAGO** May day. A pelting, blinding snow storm lasting all day and driven by a fierce wind. In spite of it all the wholesale florists did a good business on that day and Sunday. During the earlier part of the week trade was quiet though the market did not show any great depression. It was a week of unusual storms and this naturally reduced the supply somewhat and also the local demand. The retailers felt the loss of transient trade and especially those in close proximity to the opera houses. On Monday, May 3rd, business was good. The supply was not large and carnations especially sold quickly. Roses also moved briskly. Callas are very abundant. Forced Spanish Iris in purple, yellow and white are in the market. Snap-dragons seem to take well here. They are used extensively in wedding decorations. Forest fires are said to have been the cause of the present high price of ferns.

With the exception of **DETROIT** two days last week was as brisk as the previous one. The lifeblood of business runs steadily without any special excitement. Those two days mentioned might as well be stricken from the calendar. Snow and thunder storms of remarkable violence brought all business close to a standstill. It was an exhibition of meteorological sarcasm

and although reports are meager the occasional hail storms do not seem to have done much damage to speak of. A worse effect have the now following floods, many of the growers staying up day and night to prevent their firing boxes from being flooded. The Clinton River, a peaceable little stream near Mt. Clemens, has become a raging torrent and the boiler houses of Breitmeyer and Klagge are several feet under water, so that no firing can be done. This condition of affairs is entirely novel, never having been experienced before.

INDIANAPOLIS

There was a perceptible depression in the market during the first part of the week, but toward the end business became very brisk, Saturday being exceptionally so. The various stores are now availing themselves of the ample supply of dogwood and fruit-tree blossoms, and

some very good window effects are being obtained. Lilac, lily of the valley and other outside stuff are advancing very rapidly, but the cool nights are retarding vegetation. The sale of plants and bedding stock will soon play an important part in local business. All kinds of good roses are obtainable at satisfactory prices. Richmonds are finding very slow sale. Any quantity of carnations are to be had with little variation as to quality or price. Callas and Easter lilies are more plentiful than at any time since Easter. There is a good, steady demand for lily of the valley, sweet peas, daisies, mignonette, pansies, forget-me-not and snap-dragon. Bulbous stock and violets are about over for this season. The general report from the wholesalers is fairly good and business is about normal. Smilax is selling well, also plumosus and the best grade of maiden-
(Continued on page 677)

EVERYBODY KNOWS

Park, Cemetery and Landscape Gardening cannot be properly done without the aid of an accurate leveling instrument.

Bostrom's Improved Levels, No. 2 at \$15.00 and No. 3 at \$25.00, are conceded by all who KNOW to be the only Levels on the market which meet all the requirements, at the price.

Our guarantee back of every Level we sell, and satisfied users in every State in the Union heartily endorse every claim we make.

Shipping weight 12 lbs. Description on request.

Flower Market Reports.

(Continued from page 675)

hair fern. Hydrangeas are the principal attraction in pot plants at present. The common ferns, both fancy and dagger, are getting quite scarce.

The situation im-

PHILADELPHIA proved considerably last week.

Trading was more active, and the influx of stock fell off a good deal. Quite a number of weddings and other social functions took place, and one big event in especial—the Taft reception at the Union League—had a markedly good effect on the general tone of the market. Richmond roses, cattleyas, sweet peas, and gardenias, were the most active stocks. American Beauty roses were in good supply, and sold fairly well; but at prices much in favor of the buyer. The man who had a good order got what he wanted, generally at a good deal less than quoted figures. Brides and Bridesmaids were in over supply. Killarneys sold better than any other pink—with the exception of Jardine. There are a few Marylands coming in again, and finding a ready market. They are rather short stemmed. Carnations are cleaning up well, and it looks as if there would be no surplus of these until after Memorial Day. The special

carnation event known as "Mother's Day" is slated for next Sunday, which ought to make a good demand for Friday and Saturday. Easter lilies and the general run of stock abundant and in fair demand. Smilax is the only scarce item among greens. New ferns are commencing to arrive.

NEW YORK MARKET.

This a time of plenty—a surfeit of plenty—in the New York cut flower market. Not plenty of business or plenty of money, but plenty of roses and other things that the anxious grower and bewildered wholesaler would like to see moving on. Our price quotations tell the story concerning American Beauty only in part, for most of the sales are made at the lowest figure quoted for each grade. All through the rose list the best grades are the most difficult to realize on. Carnations are not so heavily overloaded as other things and are enjoying a little better call.

Cincinnati and vicinity was visited by a damaging hail storm on April 20. Among the heaviest losers in the trade were W. K. Partridge, Max Rudolph, Geo. Corbett, Walter Grey, J. T. Conger and Geo. Meyer.

In ordering goods please add "I saw it in HORTICULTURE"

HARVARD TAKES UP THE MOTH FIGHT.

With Governor Draper's approval, a collaboration has been effected between Harvard University and Frank W. Rane, State Forester, whereby the supervision of the future campaign against the gipsy and browntail moths in Massachusetts is to rest with the university, which will entrust it to the highest authority at its command at no cost to the Commonwealth, though the actual cost of a part of the work will come out of the state gipsy moth appropriation. Furthermore, a Harvard alumnus provides a special fund for a fungus-hunting expedition to Japan, which is likely to prove of great benefit. This visit to Japan will be made by Dr. G. P. Clinton, mycologist of the Connecticut Agricultural Experiment Station, who has had wide experience with fungus diseases of the browntail. He goes abroad to look for diseases that will attack the gipsy moth as well.

Manual of the Trees of North America. C. S. Sargent. Price, \$6.00.

Soils: How to Handle and Improve Them. S. W. Fletcher. Price, \$2.20.

CHICAGO NOTES.

The Great Storm.

The culmination of a stormy week was reached last Wednesday night when Chicago was struck by the most severe wind, rain, hail and thunder storm known to many of the florists who have lived there for half a century. The hail, driven by the fierce wind, would have done much damage had the hail stones been large, which fortunately they were not. During Wednesday and Thursday the rainfall was three inches, on ground already soaked. On Saturday, May 1st, those who had planted their young carnations in the field found them sticking out through the ice.

The heavy rainfall coming after the frequent showers of the past month on ground already soaked completely flooded the low ground in the market gardening district. Mr. Kraush at 78th St. and Jeffrey Ave., lost his entire plant used principally for vegetables.

The N. C. Moore greenhouses at Morton Grove suffered much. The tall chimney was struck by lightning and in falling ruined the heating and watering systems. Six-inch iron pipes were twisted like straw in the terrible gale.

Poehlmann Bros., Morton Grove, estimate their loss at \$1500 to \$2000, and think they are fortunate to come through a cyclone so well. The west end of their rose range is entirely out and the stock more or less injured.

Kirchert Bros. of Morton Grove had a 12 ft. section, including rafters, taken from their greenhouses, leaving both ends standing.

J. C. Brooks, also of Morton Grove, was fortunate in escaping with slight damage.

Most of Evanston escaped with a bad scare. It looked as if the many establishments were to be wiped out but the storm passed them by. Michael Reding, a vegetable grower, had the roof of his barn lifted and dropped on the greenhouse, demolishing it pretty thoroughly.

At Frank Oechslein's the small chimney on his storage house was blown over, breaking in the roof and demolishing, among other things, some fine plants of boxwood, just imported, and considerable glass. He estimates his loss at \$200.

Hoerber Bros., who are building a range at Des Plaines, had five houses up but no glass set. The frame work for four was completely wrecked. The loss will be mostly for labor.

Heim Bros. of Blue Island are also heavy losers.

A. W. Meyer, whose greenhouses are at Dalton, thought his place was gone, for he was directly in the path of the storm. Just as it reached his corner the wind turned to the north, passing him by with almost no injury.

At Frank Beu's the greenhouses danced in the wind, but Mr. Beu had no idea of giving up his possessions so easily. He and his men risked their lives by trying to hold down, by means of hose, the corners of a new house, 40 feet wide, and he succeeded.

H. P. Gerhardt of Winnetka was not so fortunate. A greenhouse may be held down but a smokestack cannot be held up. In falling it severed the ends of the houses, letting the wind under

the glass, which took the roof off the entire plant. Total loss, seven houses, barn and dwelling.

C. Clemensen, 8128 Sherman Ave., So. Chicago, is receiving the congratulations of his friends at his miraculous escape. He saw brick buildings blow down and freight cars pile up. The air was filled with flying bricks and cap stones weighing three and four hundred pounds were falling from the new buildings. Mr. Clemensen did not venture out for the two hours the storm lasted there, and when he did he hardly recognized the vicinity, so terrible was the destruction. What was his astonishment to find his 20,000 feet of glass safe and sound.

H. C. Bluet and Chas. Wiffin of Des Plaines, Ill., both suffered loss from the overflowing of the Des Plaines river. The water put out the fires and made it almost impossible to pick the flowers.

The Sick People.

Fred Klingel, of Geo. Reinberg's wholesale store, is suffering from bronchitis. Phil Schupp is able to be back at his desk, after a tussle with grip. Louis Coatsworth, after suffering all winter with rheumatism, is now recovering from an attack of appendicitis. Mrs. O. P. Bassett is slowly improving and is now considered out of danger.

Miscellaneous.

The son of N. P. Miller, greenhouse builder, will be married June 9th to Miss Margaret Schaefer. Miss Josepha Then will be bridesmaid.

Imported pot plants of magnolia have proved unsatisfactory in the Chicago market. Calceolarias are seen in very beautiful colors but they do not sell well.

According to the report from the weather bureau April made a record for rain fall over an inch higher than ever before. It was 7.73 this year and the highest previous was that for April 1882—6.73.

Provincetown, Mass.—J. & A. E. Brian have recently started in the greenhouse business here under the name of Pilgrim Greenhouses.

"Every Bug Has His Dose."

Insect-destroying preparations that do their work well and effectively are the cheapest. Bowker's Arsenate of Lead and Bowker's Pyrox are recognized standard insecticides and fungicides for both indoor and outdoor use. Bowker's Insect Emulsion destroys many kind of plant lice, black and green flies, etc. Call or send for catalogue.

PULVERIZED SHEEP MANURE

PURE — UNIFORM — RELIABLE

A strong and quick acting manure,
highly recommended for carnations
and chrysanthemums.

SHREDDED CATTLE MANURE

EASY TO HANDLE AND APPLY

Stronger and better in every way
than rough manure. Lasts much
longer on the benches. Unequalled for
mulching and feeding roses, liquid
manuring and mixing with bench
and potting soil. Used by all the largest
growers.

Our Cover Contract Covers You

By "cover" we mean H & Co. do the entire thing—heating plant, ventilating apparatus, erect your house throughout — **one contract with one firm** to do the whole completed thing, as one. Such a contract has these strong points—you do business with one firm—all parts of the work go forward without delays—everything is on the spot—you hold one firm liable, you make all settlements with one firm, and you get the best construction obtainable, and are sure of pleasant dealing. Write for particulars.

Hitchings & Company
1170 Broadway New York

Interior of Our Shadeless Ridge House

55 feet 6 inches wide and 300 feet long—five of which we have erected for the F. R. Pierson Co. at Scarborough, N.Y. and now another one is about ready to leave the factory. They are the Sectional Iron Frame Construction, which has stood every test for years. You cannot afford to put up experimental constructions only a few months old—let the other fellow pay for the experiments.

**NEW
ROSE****WHITE KILLARNEY**

We Know You Will Want to Buy White Killarney

Every live, progressive, up-to-date grower who has seen it is buying it; but when you buy White Killarney, be sure you get the right White Killarney (the Waban variety). When you buy from us you get the variety that has been exhibited and certificated, and the one that has attracted such favorable mention.

If you are in the vicinity of New York, we should be glad to have you call and see White Killarney growing at our Scarborough range, and you will say at a glance—as everyone has who has seen it growing—that it is by far the best white rose that has ever been placed on the market.

It is not only a good winter-flowering rose, but is good the entire year, and it is a splendid shipper. Read the following letter received from Mr. Willis N. Rudd, Secretary of the Society of American Florists, dated January 18th, in which he writes as follows:

"Dear Mr. Pierson:—I cannot refrain from writing you and expressing my admiration for the White Killarney as shown at Chicago on Thursday. It is an exquisitely beautiful thing and attracted much attention. I took half the blooms home with me, and they were finer on Saturday than they were at the show. The record is that these blooms were shipped from Tarrytown, staged and exhibited during the afternoon. They were then carefully wrapped up in a box and remained in that box until one o'clock Friday morning, at which time I reached home; improved in quality up to Saturday, and were in fairly presentable condition on Sunday."

"In addition to being the most beautiful white rose of its class which I have seen, this demonstrates its splendid keeping and shipping qualities."

W. N. RUDD.

We were awarded Silver Cup at National Flower Show, Chicago, for best new rose with White Killarney; also Silver Medal Horticultural Society of New York.

Strong plants, 2½ inch pots, own roots, now ready for delivery, \$30.00 per 100; 250 for \$70.00; 500 for \$125.00; 1000 for \$250.00. Grafted plants, ready April 1st, \$35.00 per 100; 250 for \$82.50; 500 for \$150.00; 1,000 for \$300.00.

Amaryllis Johnsoni

The illustration herewith shows a well grown *Amaryllis Johnsoni* in a 6-inch pot which was recently shown before the Newport Horticultural Society by Colin Robertson, gardener for Mrs. Robert Goelet, and awarded a first-class certificate for cultural merit, it having two flower spikes over two feet long with fine unusually large flowers on each, and all in good condition. This variety is said to have been raised by a watchmaker in England over 100 years ago, but although old it is still one of the best of its color which is a rich dark red with stripes through each segment.

Amaryllises, like many other old-fashioned plants, have had periodical spells of popularity and justly deserve a more prominent place in our plant collections than they have at present. They are suitable for many different uses and adaptable to various forms of treatment which makes them valuable for both professionals and amateurs and as flowering pot plants they fulfill more requirements than many of the popular kinds of the present. They can be retarded or forced into flower at almost any season of the year, have few insect enemies, require little room space on account of their sparse foliage and have a range of superb colors suitable for almost any taste.

James Robertson

Chondroryncha fimbriata

The accompanying picture shows one of the most curious flowers in the wonderful family *Orchidææ*. The plants are of easy culture and very floriferous yet strangely enough are seldom seen in American collections. The habit of the plant somewhat resembles that of an *odontoglossum* with long narrow leaves, but without pseudo-bulbs. The roots are very fleshy and require plenty of water at all times. We have had splendid results with this species, by giving it the same treatment as we give *odontoglossums*, having had as many as a dozen flowers open at one time on a small plant in a five-inch pot and afterwards on the same plant a continuous succession of solitary flowers for several months. The flowers seem abnormally large in comparison to the size of the plant. The color of sepals and petals is creamy white; the lip is also cream color with purple spots and blotches under the column and the margins are wonderfully crisp and fimbriated. The scape bears only one flower. A moist, cool treatment in summer is essential. In winter, full sunshine may be given, providing the atmosphere is not too dry. Thrips are very partial to the foliage of this genus, and if allowed to infest the plants for even a short time will do irreparable damage.

shipped flowers and if it should be demonstrated that carnations can be successfully grown outdoors in April to compete with the greenhouse product from farther north the result is likely to be far reaching. The possibilities in flower production are still far from being realized but it has been demonstrated over and over again that the loss of a shipping trade and consequent casting upon the home market the resultant surplus has a most demoralizing effect on values, especially where the facilities for production are being rapidly multiplied.

"Mothers' Day" and the florist

So far as we have been able to learn, the proposed new holiday, "Mothers' Day," on which date once a year everybody was requested to wear a white carnation in tribute to his or her mother was met with very scant observance last Sunday, insofar as the display of a carnation in the button hole could be construed as an offering on the altar of filial devotion. From press clippings that have come to us from various sources it would seem that the major portion of the people prefer to honor their mothers in their own way and look askance at the suggestion that the public parading of a carnation in the button-hole once a year can in any sense promote a sentiment which should be, and presumably is, uppermost in the heart of every normal human being, not one day but every day in the 365. The phase of the matter that most directly concerns us is, however, the question of how far the florist can safely go in pushing forward a proposition of this kind. It must be apparent to the thinking man that a too urgent advocacy by the florist is pretty liable to be misinterpreted, thus affording an opening for comment on the motives for such activity which may react injuriously on a business that has already suffered too much through short-sighted policies.

Six long days a week enough

If there is one particular more than another in which reform is sorely needed in the florists' business, it is in the long hours and Sunday work which, because of fixed habit and timidity, have come to be regarded as unavoidable. Public holidays are among the florists' hardest working days and Sunday work has become so engrafted into the customs of the trade that any suggestion that it might be curtailed or discontinued altogether is met with incredulity and any attempt on the part of local authorities to enforce Sunday closing is resented by the florists themselves as an injustice. Yet it is undoubtedly true that most of the Sunday toil of the seller of flowers might well be dispensed with, provided an agreement is entered into and faithfully kept by all concerned. The public are, of course, always ready to accept as a prerogative any service, regardless of the amount of self-sacrifice it may impose upon others, and the initiative for reform in this case must come from the florists themselves. The public will fall into line when they are convinced that they must and not before. In these days of ever-ready universal communication by telephone and inexhaustible wholesale supplies of flowers within easy reach, the reasons which originally necessitated keeping open during long and unusual hours in anticipation of sudden calls no longer exist. We often marvel at the uncomplaining, patient submission of employees in the florist trade to the exactions of their business as at present conducted. The wholesale dealers in New York, we are informed, have all agreed to close up on Sundays regularly hereafter. The retailers would do well to follow suit.

A cloud on the horizon

In our issue of April 21, it was stated by the secretary of the New Orleans Horticultural Society that out door carnations exhibited by one of the members were in as good and even better condition than those brought from the north and were found to last longer. New Orleans and other cities in the same section have been good buyers for northern

Obituary.

Mrs. Orland P. Bassett.

Mrs. Orland P. Bassett died at the Mary Thompson Hospital in Chicago, May 7th, after an illness of three weeks. She was taken ill returning from Hot Springs, Va., with Mr. Bassett who had spent some time there for his health. She appeared to be getting along nicely and her recovery was expected when the disease took a fatal turn and she passed away. Mrs. Bassett was prominent in the social life of Hinsdale, and her husband is the senior member of the firm of Bassett & Washburn. The funeral was held on Sunday, May 9th, at the home in Hinsdale and interment was at Oak Forest Cemetery at that place.

Mrs. J. F. Huss..

Mrs. Helen E. Huss, wife of John F. Huss, superintendent at the J. J. Goodwin estate, Hartford, Conn., died on Sunday morning, May 9, after an illness of three months. She was the second wife of Mr. Huss and the circumstances of her sickness and death were especially pathetic as her illness developed shortly after his marriage last winter. Four little children are again left motherless and the deepest sympathy is felt for Mr. Huss in this affliction.

John Dallas.

We have just received word of the death at Danbury, Conn., of John Dallas, formerly in the florist business at Fairfield, Conn., and later in charge of Ventford Hall, the beautiful estate of G. H. Morgan, Lenox, Mass. Mr. Dallas leaves a son and two daughters. He was a member of the Lenox Horticultural Society.

A. C. Schroeder.

Alvin Charles Schroeder, one of the older florists of Bayonne, N. Y., died on May 2, at the age of sixty-nine. Mr. Schroeder was a native of Germany but settled in Bayonne forty-five years ago and had there built up an extensive business. Two sons, Frederick W. O. and Rustin L., survive him.

Adolph Frost.

Adolph Frost, a native of Germany but a resident of the United States since 1857, and the oldest florist in Cortland, N. Y., died on April 29 at the age of 78. A daughter and son survive him, the latter carrying on the business which his father established.

Grant Thorburn.

Grant Thorburn, brother to the late J. M. Thorburn, and grandson of the founder of the seed house of J. M. Thorburn & Co., New York, died in Paris, France, April 30, aged 81.

Jacob Schneider.

Jacob Schneider, carnation grower at Rogers Park, Chicago, died May 5th. He was ill but a few days with pneumonia. He leaves a wife and two children.

J. C. Rossow.

J. C. Rossow, a well known grower for the New York market, died on

April 29, at an advanced age. His home was at Carlstadt, N. J.

Mrs. Harriet H. Smith.

Mrs. Harriet H. Smith, mother of Frank Smith of Smith & Feters, Cleveland, O., died on May 2. Interment at Bristol, Conn.

HOUSE OF FLOWERS.

The accompanying illustration is reproduced from our Belgian contemporary *Le Triumvirat Horticole*. It is stated that this house was during the summer of 1908 the best adorned in all Belgium. This branch of gardening art is not given the attention it should have in this country. A few examples

like this house herewith pictured, in both residential and business streets, would soon excite the public interest to the extent that the object lesson would be very generally followed and the demand for plants suitable for such work amazingly increased. It is up to the florists themselves to set the fashion. Do it this season.

THE GARDENING WORLD.

This old established English gardening paper, after an existence of nearly a quarter of a century, has ceased to appear. It has been taken over by the proprietors of "Garden Life," a well known horticultural journal for amateurs, with which it is now incorporated. The first number following the amalgamation will be considerably enlarged, and will be entitled "Special Amalgamation Number of Garden Life," the old title being no longer used. It is published by the Cable Printing and Publishing Co., London, Eng., a business concern that is specially interested in providing literature for the amateur gardeners of the United Kingdom. C. H. P.

Personal

Robert George has taken a position with C. E. Wingate, Lawrence, Mass.

Visitors in New York: C. C. Cropp, Chicago; Ernest Benary, Jr., Erfurt, Germany.

Carl Jurgens of Newport, just returned from a trip to Spain, was a visitor in New York this week.

J. H. Slocombe, florist of Townsend Ave., New Haven, Conn., is reported to be recovering from the shock with which he was recently stricken.

Visitors in Boston: W. A. Koch, Denmark; E. J. Fancourt, Philadelphia, Pa.; Ralph M. Ward, New York, N. Y.; Winfried Rolker, New York.

Andrew Ferguson, of Detroit, who has been ill most of the winter has been taken to the hospital and an operation is thought to be necessary.

Daniel MacRorie, who recently opened a new business in San Francisco, reports the arrival of an importation of Phalaenopsis in perfect condition.

Lyman B. Crow of the Lord & Burnham Company, made his first visit a few days ago to his office in New York since his recovery from a very critical surgical operation.

Recent reports from Luther Burbank state that he is indisposed and unable to receive visitors at his Santa Rose home. Needless to say, every one wishes him a speedy recovery.

W. McM. Brown, a frequent contributor to HORTICULTURE, has accepted a position on the Coryell estate, Menlo, California. This is one of the most noted orchid establishments on the Pacific Coast.

Lyman B. Brainerd, president of the Hartford Steam Boiler Inspection and Insurance Company, has been elected a member of the board of park commissioners, Hartford, Conn., to succeed Rev. W. DeLoss Love.

MOVEMENTS OF GARDENERS.

John McMillan of Roxbury, Mass., has accepted a position as head gardener on the estate of Mrs. C. Adolph Low, Sharon, Conn.

Jacob Reid has taken a position as head gardener on the Bradley estate, Brattleboro, Vt. Mr. Reid was gardener on the Mitchell estate, Norwich, Conn.

James S. Hutchinson, who for forty years has held the position of foreman of the gardens in Allegheny Park, Pittsburgh, Pa., retired to private life on April 30. He is 80 years of age.

NEWS OF THE CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.

This club held its semi-monthly meeting on the evening of May 10 in the hall of the Florists' Exchange Building. The attendance was somewhat above the average and an excellent spirit—social and business—prevailed.

A feature of this club which may not be common to the fraternity in other cities (the Sec. would be glad to learn by the reports of clubs generally whether it is so or otherwise) is the payment of (\$100) one hundred dollars upon the death of a member in good standing to the beneficiary named on the deceased member's certificate. This endowment is paid from a fund known as the "Benefit fund" and, of course, is kept entirely from the general fund. When this benefit fund is reduced below the \$100 mark an assessment of one dollar is made upon each member. A charge of one dollar is made for the certificate, upon each candidate when elected a member. At this meeting a good-natured discussion arose as to whether it is equitable to those who join the club in their youth, or in the heyday of life, to admit to membership those who had passed the age—say 50—as hitherto none has been debarred on account of age. There was, however, so broad and fraternal a spirit prevalent amongst the members that the whole matter was tabled, so that as heretofore the mere matter of age is no obstacle.

It was decided to hold the annual family picnic about the middle of July and a committee was appointed to complete arrangements for the event. Each summer for several years the club has been entertained by one of our public spirited citizens, Mr. William Lanahan, at his beautiful suburban home "Blenheim," a comparatively short distance beyond the city limits. Both Mr. and Mrs. Lanahan are the very soul of hospitality, and the visit to "Blenheim" is always looked upon as a red letter day in the history of the club. The Maryland Horticultural Society will hold its summer meeting at Mountain Lake Park, and as most of the members of the club are also members of that association, the larger proportion of the membership will attend this outing also.

CHICAGO FLORISTS' CLUB.

The regular meeting of the Chicago Florists' Club was held May 6, with a good attendance. The committee appointed to consult with the Horticultural Society of Chicago concerning the advisability of holding a flower show in November reported favorably and a further conference will be held regarding the concessions, all of which the Chicago Florists' Club desire, in return for which they will assume all liabilities. The second reading of the proposed by-laws was postponed until the next meeting, on account of the absence of the chairman of that committee.

NEW YORK FLORISTS' CLUB.

Nearly fifty members attended the May meeting of this Club last Monday evening—a fair number considering that the busy season is now at its height for the majority of club members. Considerable time was devoted to committee reports. H. A. Bunyard reported good progress on the program for the July outing, solicited portraits of all the members to be used therein and announced that A. T. Boddington's store would be closed during the day of the picnic.

Obituary resolutions, signed by Messrs. Schenck and Weathered, on the death of W. C. Krick were presented and adopted. Messrs. Birnie, Marshall and Weston were appointed to prepare resolutions on the death of ex-President John Scott, Messrs. Donaldson, J. Manda and Schultz were intrusted with a similar duty in relation to the late R. Dreyer and Messrs. O'Mara, Sheridan and Young on behalf of the late J. H. Starin, who was an honorary member.

Mr. C. L. Allen's paper on "Plant Development" was read by S. S. Butterfield, its author being unable to attend, owing to infirmity.

Joe Manda gave a graphic account of his efforts to awaken pride and enthusiasm among the bowlers and his disappointment at the lack of interest taken in the practice games. He said his patience was about exhausted and a stirring speech by his fellow-bowler, Bob Berry, didn't seem to change his mind. John Birnie then brought up the subject of a plant market for New York with the object of inducing the club members to participate in the agitation of this most important project. After discussion Messrs. Nugent, Birnie, Totty, Miller, and Schmutz were appointed a committee on behalf of the Club to investigate the subject and report at the next meeting.

On the exhibition tables a very fine display of spring plants was spread out. A special vote of thanks was given John Birnie through whose efforts among the market growers the exhibits were made. The exhibition committee reported cultural certificates to John Tschupp & Co., for geraniums and dwarf fuchsias, Herman Mende for geraniums, Rex begonias and mignonette, Robert Leach for candytuft and heliotrope, Charles Hunt for hydrangeas, geraniums, fuchsias and pansies; vote of thanks to John Lappe for Phlox subulata, F. Engeln for coleus, Chas. Schmieg for Bellis perennis, John Reichert Estate for rambler roses and I. verbenas, H. C. Steinhoff for rambler roses, A. C. Schroeter & Son for coleus, John Birnie for geraniums, heliotrope and verbenas, George Fich for marigolds, Hartmann & Wagenfohr for Druschki roses and A. L. Brown for vincas. Most of the above named plants were shown in quantity in large flats and were ideal as to culture and variety.

The May exhibition of the Massachusetts Horticultural Society will be held on Saturday and Sunday, May 22 and 23, at Horticultural Hall, Boston.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The meeting of the club on Tuesday, May 4th, was well attended. Usually it has been the case that the early spring months have shown a falling off in attendance, but this spring it has been very gratifying to see how well the meetings have been maintained. As the building where the club has held its meetings for seven years is about to be torn down, the May meeting was held with the Pittsburgh Cut Flower Co.

The exhibition committee reported that arrangements had been completed with the Fort Pitt Hotel, the headquarters for the Carnation Convention in January, 1910, and the banquet hall secured for the desired dates.

The private gardeners had a display which drew much attention. Frank Crook, gardener for J. H. Park, exhibited a Boston fern with fronds 6 ft. in length, making the diameter of the spread of the plant 12 ft., Cibotium Baromet, Nephrolepis Davallioides furcans and Clerodendron Balfouri in bloom. N. C. Madsen with R. H. Boggs, Sewickley, showed specimens of Rehmannia angulata in bloom, dwarf Comet aster and sweet peas. F. Burki showed salvia and fine specimen coleus. Godwin Bros. of Bridgeville showed a collection of geraniums and Mat Schweiger geraniums and pelargoniums. The judges, Wm. Loew and B. Elliott awarded a certificate of merit to Frank Crook for three ferns, and to N. C. Madsen for dwarf Comet aster and Rehmannia angulata.

R. Karlstrom and I. Rosnosky, representing respectively W. A. Manda of South Orange, N. J. and H. F. Michell Co. of Philadelphia were with us and made addresses in optimistic vein.

The subject for next meeting is Outdoor Roses and Peonies, with a competitive display of out door roses by the private gardeners, for which a prize has been offered by Mrs. R. H. Boggs of Sewickley.

H. P. JOSLIN, Sec'y.

CHRYSANTHEMUM SOCIETY OF AMERICA.

President Elmer D. Smith has appointed Chas. H. Totty, Madison, N. J.; Edwin Jenkins, Lenox, Mass., and I. L. Powell, Millbrook, N. Y. to serve as the executive committee for the ensuing year.

The Massachusetts Horticultural Society and the Lenox, Mass., Horticultural Society have affiliated with the Chrysanthemum Society of America for the year 1909 and C. S. A. trophies will be offered for chrysanthemums at the fall shows of these societies.

As secretary of this society I heartily endorse all that President Smith has written regarding the wishes of the officers of the Chrysanthemum Society to increase its membership. We need every chrysanthemum enthusiast and shall be pleased with the support of everyone who grows a chrysanthemum.

CHAS. W. JOHNSON,
Secretary.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

The National Flower Show Committee.

President Valentine has appointed the following committee to take up and formulate plans for holding another National Flower Show: F. R. Pierson, chairman; F. H. Traendly, New York; J. K. M. L. Farquhar, Boston; W. J. Stewart, Boston; Edwin Lonsdale,

Philadelphia; Robert Craig, Philadelphia; committee to have power to add to its membership at discretion.

It is the intention that this committee shall have entire charge of formulating the preliminary arrangements for a show and that it will be prepared to report at the next Convention, suggesting a time to hold the show, the city in which it shall be held, and to perfect and present a complete organization to carry forward the project to completion.

W. N. RUDD, Secretary.

May 7, 1909.

NATIONAL HORTICULTURAL SOCIETY OF FRANCE.

The annual spring show will be held in Paris on May 17 to 23 and a schedule comprising 370 classes has been issued. In conjunction therewith a Horticultural Congress will be held in the hall of the society on May 19 and 20. Papers on various subjects of horticultural interest will be read, a list of which accompanies the show schedule.

C. H. P.

— ANNOUNCEMENT —

JOHN SCOTT Rutland Road,
Flatbush, N. Y.

THE business of the late John Scott will continue under able management. The reputation of the house for the finest plants and cut flowers will be maintained. The patronage and confidence of the Trade is solicited. This opportunity is taken to gratefully acknowledge the kindness and sympathy of all for his family and to guarantee that the same care and enterprise characterizing the record and reputation of Mr. Scott in the past will be continued.

Alphonse Pericat, ORCHID SPECIALIST
COLLINGDALE, PHILA., PA.

During Recess

BUFFALO FLORISTS' CLUB.

The regular meeting of this club was held on Tuesday evening, May 4. The regular routine of business was shortened on account of the festivities that the entertainment committee had prepared. The sport opened with a blindfold boxing match which afforded much amusement. This was followed by a handicap wrestling match between two boys and "Cyclone" Baumgartner, the latter being downed in short order. Other events in the line of wrestling and sparring, a pie-eating contest, etc., were greatly enjoyed. The entertainment concluded with a few games of pedro, in which ex-President Sandiford carried off first prize, a motor cycle. The committee is to be congratulated on furnishing such a pleasant evening's entertainment.

NEW ORLEANS HORTICULTURAL SOCIETY.

About fifty members of this society assembled on the afternoon of May 2 at the residence of A. Alost, in Gentilly avenue, for their annual outing and barbecue. A tempting banquet was spread, at which C. R. Panter acted as toastmaster, and among the guests was Mayor Behrman. Toasts were given in honor of the Mayor, and in response Mr. Behrman made a speech. At the close of the banquet a beautiful silver service was present-

ed to Mr. and Mrs. Alost by Mr. Panter in the name of the Horticultural Society.

A good attendance was reported at the Chicago Florists' bowling club last Friday. The honors were carried off in the handicap as follows: 1st prize, W. Wolff; 2nd, Frank Ayers; 3rd, Fred Kraus.

CLUB AND SOCIETY NOTES.

Louis J. Reuter gave an interesting talk on Roses before the New London County Horticultural Society, at Norwich, Conn., on May 3.

The annual convention of the Greenhouse Vegetable Growers' and Market Gardeners' Association will be held in Ashtabula, O., October 12.

The trustees of the Worcester County Horticultural Society, Worcester, Mass., have appropriated \$100 for the N. E. Fruit Show to be held in October.

E. C. Sears of Mass. Agricultural College, addressed the members of the Houghton Horticultural Society, Lynn, Mass., on May 6, on commercial fruit growing.

At the meeting of the Dobbs Ferry, N. Y., Horticultural Association on April 24, H. Keilling was awarded first prize for outdoor flowers and H. Kastberg second. E. Kane, gardener for E. L. Coster, showed some nice blooms. Mr. Kastberg read a paper on the *Chrysanthemum*. Lord & Burnham Co. have offered a gold medal for the fall exhibition for four varieties of *chrysanthemum*, three of each.

CARNATIONS AT JOLIET, ILL.

Manager Pyfer says the rumor that the Chicago Carnation Co. has sold its retail store is unfounded, though there is a proposition for leasing it under consideration, their wholesale business demanding all of their attention. Mr. Pyfer expressed his belief that there had been an over production of *Enchantress* this season, making white carnations rather scarce in and about Chicago. When asked which had his preference as a commercial white, *White Perfection* or *White Enchantress*, he said the latter if the best strain was used. He places *White Enchantress* above *White Perfection* for commercial use, because it makes larger plants from late cuttings in the same length of time in the field, and makes more cuttings without sacrificing blooms. *Conquest*, which is to be sent out next year has kept up to its previous good record. *Sangamo* originated by A. C. Brown of Springfield, Ill. and Mary Tolman by A. E. Hunt of Evanston will be sent out jointly by the originators respectively and the Chicago Carnation Company. *Sangamo* is similar to *Winsor* in color with stem as stiff and as large and it is claimed that it will out-bloom that variety. Mary Tolman is a light flesh pink. This makes three novelties of high promise now in sight.

MAY.

For thee, sweet month, the groves green
Irvories wear
If not the first, the fairest of the year.
For thee, the Graces lead the dancing
hours.
And Nature's ready pencil paints the
flowers.

JOHN DRYDEN.

Chrysanthemums

WHITE—Merza, Kalb, J. Jones (cream), J. Nonin, Clay Frick, Lady Fitzwgam, Polly Rose, Oct. Frost, C. Tousey, A. Byron, T. Eaton.

GERANIUMS, DAHLIAS AND BEDDING PLANTS

We have one of the most complete collections of Geraniums in the country, containing every color and type found in the Geraniums. Every one of our 75 Standard Varieties at \$2.00 and \$3.00 per 100 are Bred and Butter Winners, and among our 34 New Varieties of special merit are some that are going to fix the standard in the future. Every one is a Gem, not high in price, only \$4.00 and \$6.00 per 100.

Our Novelties should, coming as they do from the leading introducers of the world, represent the highest development of Geraniums at the present time. A collection of 100 Varieties, our selection of 1907 and 1908 Novelties, will be sent for \$10.00.

Special Offer of 1000 good, strong plants from 2 in. pots, our selection of 20 distinct kinds from among our Standard and Newer Varieties, for \$15.00 cash. From 3 in. pots \$3.00 per 100, \$25.00 per 1000, in a good assortment.

CANNAS

Strong plants from 3 in. pots. J. D. Eisele, Egandale, Alphonse Bouvier, Mme. Crozy, and Florence Vaughan, \$4.00 per 100. Jean Tissot, President Myers, Louisiana, Pennsylvania, \$5.00 per 100.

DAHLIAS

We have one of the finest collections in the country of good distinct Commercial Varieties at \$2.00 and up for plants ready for shipment. Then we have Jack Rose, Virginia Maule, Big Chief, Rose Pink Century, Pringed 20th Century, Rebecca Mayhew, etc., at 50c. each, \$5.00 per doz., \$35.00 per 100. We will send 1000 in 20 good distinct Cut Flower Sorts, our selection, for \$18.50.

See issue of April 24th or Our Wholesale Catalogue for complete list of Bedding plants.

THE WORLD'S BEST DAHLIAS

The following speaks for international confidence in the merits of Peacock's New Dahlias. A CONFIDENCE NEVER BETRAYED.

Messrs. Peacock, New Jersey.

Rothsay, 28th April, 1909.

Dear Sirs:—We are favoured with a copy of your Dahlia catalogue and will thank you to send us carefully packed by post—

6 plants of new Dahlia Jack Rose, and

6 plants of Virginia Maule.

We hope that these will travel safely as we would like to try these new varieties.

Yours faithfully,

DOBBIE & CO.

PARK IMPROVEMENT AT DENISON.

Denison, Texas, on April 24, held a Tag Day and at that time raised \$900.00 for the purpose of landscaping and beautifying the city parks. The City Commission (Denison has a commission form of government) has arranged to add about \$1200.00 of the city funds to the amount raised and this will be spent in the most judicious manner possible. The site of Forest Park, as it is called, is a four-acre plot of ground lying in the heart of the city hitherto little used. It rises gradually towards the center and is covered with a fine growth of oak trees.

A cement walk system will be installed with a large fountain and basin in the center. The basin will be made large enough to be used for aquarium purposes and will be well stocked with gold fish. Flower beds are being laid out at frequent intervals. One part of the park is laid off for a baseball field and playground and it is expected to utilize the park for band concerts, celebrations, etc.

CHICAGO STREET TREES.

Mr. Prost, City Forester of Chicago, has begun taking a tree census of the city. Until recently property owners could plant in front of their lots such trees as happened to strike their fancy or as could be most easily obtained. The result was not pleasing to the eye and not being adapted to the soil many trees made stunted growth or died outright. Recently the city council passed a tree regulation ordinance by the terms of which no tree or shrub can be set out in any street until its variety has been approved, its situation designated and a free permit for its planting issued by the city forester. Another duty of this official is "to advise, without charge, owners and occupants of lots regarding the kind of trees, plants and shrubbery and the method of planting best adapted to or most desirable on particular streets." Citizens are being urged to take up the matter in various neighborhoods and consult the forester jointly as to the improvement of their own locality.

Berkeley, Cal.—A special short course in horticulture is being conducted at the Berkeley University for prospective county horticultural commissioners.

BALTIMORE OUTDOOR CROPS.

The planting out of summer stuff has not yet become general at this date, May 10th, owing largely to the fact that the temperature has shown its capacity for variation by falling about 10 degrees in less than 24 hours—going down to and even below the freezing point. It is an established fact that a goodly portion of the earlier blooming fruits have been seriously injured, not in Maryland only but also in the state of Delaware. One condition that has made our fruits more susceptible to injury by spring frosts is that for some two or three years there has been a spell of very mild weather, in either the very early spring or late winter, of sufficient intensity and duration to swell the buds to a quite considerable extent. In this condition a few warm days causes them to expand so that the organs of fructification are exposed to the atmosphere and in this condition, although the thermometer may not indicate that the freezing point has been reached, it is often sufficiently low to kill the bloom—or more correctly, to kill the pistil.

DETROIT NURSERY TRADE.

Market business has not yet commenced here. Frost and rain about us constantly have prevented the plantmen from moving their stock and no relief is yet in sight. Planting in the field is impossible even on high ground. The ground is so heavily soaked with water that it will not absorb any more and ploughing is impossible. The plight in which the nurseryman finds himself can be easily seen from the foregoing.

GARDEN LIFE YEAR BOOK.

This is a new venture on the part of the Cable Printing & Publishing Co., of London. It is a neatly printed octavo of 208 pages in which appear: A calendar of garden operations. The rose season of 1908, Sweet peas in 1908, Chrysanthemums of 1908, Carnations. The Dahlia Year. Some choice orchids. The ferns of 1908, Present day fruit culture, Vegetable growing in 1908, Horticulture past and present. Flowers, fruits and vegetables certified by the R. H. S. in 1908, Select varieties of common vegetables and fruit. Some famous gardens. Societies.

The chief novelty in this publication is that part entitled "Who's Who in Horticulture?" This is a list of many

of the most eminent men connected with British horticulture, giving their names and in some cases a brief outline of their work and distinctions.

C. H. P.

The Revere Rubber Company are sending out a handsome colored wall hanger which should prove an excellent help in making sales of Revere hose wherever this popular florists' hose is sold. Better than even this, however, is the general satisfaction this non-kinkable hose is giving in places where it is used. We have yet to hear one word of complaint concerning its serviceability and it is in evidence in almost every establishment we visit, for outdoor or indoor use.

Full information regarding this hose can be secured at any of the branch stores of the company or at the home office in Boston, Mass. Branch stores are located at New York, Philadelphia, Pittsburgh, Chicago, Minneapolis, New Orleans, San Francisco and Portland, Oregon. A copy of the above mentioned show-card will be sent free of charge to any dealer requesting same.

Of Interest to Retail Florists

Washington is experiencing one of the latest and coldest spring for years, with the result that there is not an over plus on any one flower, but most of the dealers report themselves as more than satisfied with conditions. A good many peonies are coming from the south, but are not up to the standard in quality. Nearby lilac has been a total failure, and as yet no water lilies are on the market. Sunday was celebrated as Mother's day in Washington, which made a run on white carnations, consuming all in the city long before the closing hour for the stores. It is

thought that this will be an annual observance in all the large cities. Owing to the unveiling of several new statues during the past week there has been a great demand for outside decoration of laurel.

CHICAGO NOTES.

Spring Plant Trade.

The supply of Boston ferns is decidedly short in Chicago. There has been a heavy demand throughout the entire season. In some cases they were pushed on a little to make room for Christmas stock and the steady demand since has about consumed the supply. Many growers last year found themselves overstocked and consequently did not grow enough this year.

Geraniums are as a rule decidedly backward this year and many growers are going to find it very difficult to get stock in bloom for Decoration Day trade which is so nearly upon us. This applies to all varieties. The wet weather last August started the difficulty and the continued damp and cloudy weather this spring has added to it. Other bedding plants seem to be in about the normal condition and there will probably be enough to take care of the trade.

The Ringler Rose Co., having a wholesale business in nursery stock, seeds, bulbs, etc., at 39 Market street, have opened up a retail store, for the

busy season only, at 69 5th avenue. They have a good location for this kind of business and if the venture proves a success it will become a yearly event.

Personal.

Visitors: C. H. Perkins of the Jackson & Perkins Co., Newark, N. Y.; P. M. Koster, Boskoop, Holland; H. A. Fisher, Kalamazoo, Mich.; Harry E. Philpott, Winnipeg, Manitoba; J. H. Duyveus, Jr., Aalsmeer, Holland.

John Thorpe is convalescing after an attack of bronchitis. His many friends are glad to see him up again and hope for a complete and speedy recovery.

The young son of George Asmus is recovering from an operation for appendicitis.

Obituary notes of Mrs. O. P. Bassett and Jacob Schneider will be found in the column devoted to that purpose, also an interesting note about street tree planting appears in nursery department of this issue.

Miss Hertha Tonner reports the visit of a brother from South Dakota, accompanied by his bride.

Robt. Rahaley and bride, of Detroit, reached Chicago and found the florists all on the lookout for them, thanks to the timely warning given by their Detroit friends. The couple was not very much in evidence about the market, due no doubt to the shyness mentioned on the announcement cards so generously distributed among the trade.

A Coming Benedict.

The engagement of John A. Then and Olga Hauke will be announced at a dinner participated in by the two families Sunday, May 16th. Mr. Then is a very popular young florist, son of Anton Then, whose entire family are engaged in various ways in the florists' business.

A Failure.

J. W. Niesen filed a petition in bankruptcy May 4, with liabilities placed at \$3,055, and assets \$326. For several years Mr. Niesen has had a retail store and greenhouses at 753 Forty-seventh street, which is considered a fine location.

N. Cambridge, Mass.—Robert E. Sands and George H. Conant, Jr., have started in the wholesale and retail plant business at 67 Garfield street, under the firm name of Sands & Conant.

WHOLESALE
GROWER of CUT FLOWERS

BUSINESS TROUBLES.

St. Joseph, Mo.—W. C. Kennedy has filed a petition in bankruptcy: liabilities, \$8,000, assets, \$3,500.

Cincinnati, O.—W. K. Partridge, florist, has filed a deed of assignment and attributes this step to his heavy loss in the recent hailstorm. Two years ago a similar storm did even greater damage to his plant. He gives his assets as \$40,000 and liabilities as \$30,000.

BUSINESS CHANGES.

Bloomington, Pa.—C. W. Miller has bought the greenhouses of Davis Bros. on Fourth St., and A. W. Dwy has purchased the plant on Light St.
